It is better in SALADA

A Dog With A Bad Name.

Alignment of the various countries participating in the World Economic Conference at London, England, into a Gold Bloc on the one side and a Sterling-Dollar group on the other, served to rivet attention of the world on the difficulties attending a conference of the kind. There is no gainsaying the fact that the people of all countries participating are anxious to see the conference reach some definite, if not spectacular, conclusions, but, despite this unanimity of desire for adjustment of the economic machine, the burning hunger of all peoples to end depression and restore world trade and world purchasing power, memories of old crises bridge the infinitesimal suggestion with almost insuperable obstacles. It is a case of the dog with a bad name.

Countries of Europe, which with France and Germany adhere to gold, have painful recollections of their ventures into the realm of unsecured bank-note issues. They remember the disastrous slip-ruination of monetary value in relation to monetary units. They recall the hectic efforts to keep abreast of currency depreciation, and the desperate calculations, involving nothing in astronomical figures, which maintenance of an ordinary family budget entailed. Inflation to them means printing presses working overtime, and the catastrophic uncertainty of day-to-day business. No wonder then that they bar into to venture again from the gold anchorage.

Great Britain, the Dominions, the United States, and adherents of the Sterling-Dollar group, have not the same grim experience of foreign rendering. Britain hazarded a return to gold, and bled herself white in the process of maintaining the standard. So much so that when the country eventually was forced off gold, it was with something of relief that the country abandoned its heroic efforts to maintain the pound at gold par, and allowed it to find its own level on world exchanges. The United States, having embarked on a policy designed to raise commodity price levels and revive moribund industry, has seen fit to release the dollar from gold, and is not to be persuaded to hitch it to any other money standard until experience has demonstrated the proper level at which it should be pegged for the country's good. The assurance the world now awaits is whether or not the United States will be able to control the inflationary process upon which it is launched.

London now would indicate that, whereas Britain abandoned the gold standard and apparently was shoving sterling to find its own level, in reality the pound, for some time, at least, has been maintained in a position of some relationship with the French franc. Some measure of control, therefore, has been exercised in Britain and, in the result, there has been no appreciable disequilibrium between money and goods in the commodities market. The possibility is that the United States will pursue a similar course. That is to say, the dollar will be permitted to find a level at which the beneficial effects of the inflation are real and, this position having been reached, a strenuous effort will be made to prevent the inflationary trend from going far enough to negative the good done.

The controversy between the members of the Gold Bloc and those rallying to the Sterling-Dollar group had the effect of forcing Great Britain to declare its inclination. It is noteworthy that, in the last, British threw in her lot with the Dominions and the United States, which would appear to indicate that Britain is looking toward those countries rather than to the continent of Europe for the trade expansion necessary to her economic well-being. London despatches have made it abundantly manifest that the British people are becoming more wedded to the idea of an Empire economic unit, to the extent that such an idea is translated into fact. Indeed, efforts in efforts of the conference, when definite attempts were made to force its adjournment, there were many proponents of a scheme to organize a second Empire Conference from among the representatives of the British dominions now gathered in London.

The obvious deduction to be made from the propagation of such ideas is that, whatever the outcome of the World Conference, the trade relationships as between the Mother Country and the Dominions overseas are bound to be improved. Contacts established have proved fruitful. British opinion is emphatic for practical negotiations of the Ottawa agreements and for their expansion. Canada should not hesitate to capitalize this favourable attitude; and, with prices of the primary products moving upwards, the stage is being set for a real revival.

Costs Little To Operate

Small Airplane Weighs Less Than Automobile Loaded

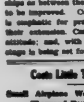
One of the smallest airplanes built, a two-cylinder Aircoupe, is proving its worth in high altitude flying at the Western Airport at Denver, Colo., more than a mile above sea level. The plane weighs less than 1,000 pounds loaded and can be operated from the full drum Canada authorities say. It develops a maximum speed of with the Wellington bomb, and tight ninety-five miles an hour and cruises, which will be worn as Colonel at a economical speed of eighty-five of the World Canada, grey cloth miles per hour. It burns only two and comfort and freedom of movement a half gallons of gasoline an hour. in battle dress will be worn by the The craft is a two-seater cabin Colonel-in-Chief of the Seaforth monoplane. Highlanders.

Prince Likes Scotch Costume

Prince Seen When Full Dress Uni-form Is Worn

The Prince of Wales, who deputized for his father at the last levee of the season at St. James's Palace, is very fond of wearing the kilt of the Royal clans of Stuart, which demand full dress uniform. The reason for the pseudo badge and can be operated from the full drum Canada authorities say. It develops a maximum speed of with the Wellington bomb, and tight ninety-five miles an hour and cruises, which will be worn as Colonel at a economical speed of eighty-five of the World Canada, grey cloth miles per hour. It burns only two and comfort and freedom of movement a half gallons of gasoline an hour. in battle dress will be worn by the The craft is a two-seater cabin Colonel-in-Chief of the Seaforth monoplane. Highlanders.

Bowel Complaints of Children During the Summer Months



Mothers should look well after their children during the hot summer months. Disorders of the stomach and bowels may be caused, at any time, with diarrhoea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has retained its reputation for over 70 years. Ask your druggist for a bottle of Dr. Fowler's and be on the safe side.

Grain Elevators Busy

Men In Wheat Pools Brings Unusual Conditions

Saskatchewan wheat elevators are working night and day and there is a much happier situation there than has prevailed for a long time, Hon. Robert Weir, Minister of Agriculture, stated on his return to Ottawa. Mr. Weir has been for several weeks on a visit to his constituency of Melfort, Sask., and also visited much of the surrounding country.

The minister said there was much more wheat in the hands of the farmers than has been realized and they are now disposing of it at 68 cents a bushel and more, with the result that conditions have taken on a brighter aspect. The activity of Saskatchewan elevators was without precedent, Mr. Weir said.

Some 30 manitoplettes had been badly stricken by the grasshopper plague, Mr. Weir said, and assistance would have to be given them.

Use Russian Lumber

Britain Reported To Be Importing Large Quantities This Season

Britain is a heavy importer of timber, according to a letter to British firms interested in purchasing timber that they would be able to buy 600,000,000 feet of Russian timber during the coming season.

The letter, a copy of which was received by Timber Distributors, whose previous plans to import Russian wood were stopped by declaration of the recently lifted embargo against Russian goods, told its clients it was adding 15 shillings to the contract price for the lumber to cover increases assessed by the embargo.

Even with this addition, the Post said, the item as regards the price in the British market would be far below anything with which Canadian timber interests could compete.

Completion Cross-Canada Flight

Secretary Of Civic Trade Sizes Up Its Being Done In China

George M. Rose, secretary of the Canadian Flying Clubs Association, landed at San Island Airport, Van-couver, Saturday, a flight across Canada during which he visited all the Aero clubs en route. He made the hop from Calgary in eight hours flying the Moth 'plane presented to Major-General J. H. MacBrien, president of the civilian league, during the latter's visit to Vancouver and his fourteenth trans-Canada flight. It has done some 50,000 miles.

Mr. Rose finds more flying is being done in nearly every city. "Everywhere Canadians are going to the United States for their aviation training," he said, "in some parts of the east, in fact, the trend is the other way."

SUFFER ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile No Calomel necessary

Sluggish, torpid liver, constipation, sick headache, biliousness, dizziness, sour stomach, bad breath, pimples, colds, indigestion, gas, acid stomach, sleeplessness, nervousness, and many other troubles are caused by a sluggish liver. Don't dose with salts, pills, calomel, or harsh physics. Just get from your druggist a bottle of Dr. Edwards' Olive Tablets and take as directed. Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil. They act on the liver like nature's own remedy. Don't accept substitutes. Ask for Dr. Edwards' Olive Tablets by name. 15c, 30c, 60c.

Railroad Station Masonry

Newest Innovation Established In France Will Be Free

A nursery is the latest innovation to be established at railroad stations. Railway Station in Paris which serves Brittany and La Vendee. From 40 to 50 babies may be looked after in the railroad nursery, the first to be established in France, which will shortly be imitated in the principal stations of the Basin Parisien. If baby wants a bath, a change of clothing, a bottle of milk, an hour or two of sleep, all will be available at the nursery, and all of it will be free.

In the last two years 600 women have been appointed magistrates in London.

The number of Millionaires in the United States is 4,500,703. This is a drop of 85 per cent. in a decade.

Cars Are Practically Immune To Lightning

Safest Place For Motorists If Storm Overtakes Them

If you are driving along the highway when an electrical storm comes up, and you seek a nice safe place to sleep until the storm passes, just take the advice of experts and stick right to the driver's seat.

The Bureau of Standards tells us that automobiles are practically immune to lightning despite the fact that rubber tires and the car as a whole become very wet during the storm.

Persons driving within a conducting enclosure are fairly safe against lightning, and the auto body, although enclosed to a considerable extent by glass, approaches this condition.

The average motorist is probably safer in his car during an electrical storm than in his home. Come to think about it, there are mighty few cases on record of autos being struck by lightning. And this is rather remarkable when you stop to consider the hundreds of thousands of cars out in electric storms, particularly in our larger cities.

Society Doing Good Work

Entomological Society Of London Meeting With Outstanding Success

More than 150 delegates, representing 23 counties, will assemble in London for the three-days commercial celebration of the Entomological Society of London, England.

Economic entomologists in every country of the Empire are now fully aware of the annual loss in terms of the value of their work two outstanding successes may be instanced the recent reclamation of three million acres of land in Queensland from the prickly pear, and the rescue of the entire cocoanut industry of Fiji following a little purple moth which had damaged the trees beyond bearing.

In each case success was achieved by the introduction of a parasitic insect. The world's hope of controlling the migratory locust in Africa and Asia is also dependent on the cooperation of entomologist.

Wonderful Trip For English Schoolboys

Have Lots Of Adventure On Holiday Trip To Moscow

Twelve pupils at the Manchester grammar school, who have left for a holiday trip to Moscow, will be the first Europeans to inspect the hitherto forbidden city of Tchaveon. Permission was obtained by the boys, on account of the school's friendly relations during previous trips with the Soviet and high officials.

In addition to exploring many little known parts of Moscow, the boys will also act as ambassadors for the London cotton trade. They are taking with them samples of Lancashire cloth, in order to impress the people of Moscow with its quality. As a result of their visit, the textile committee of the Moscow trade have purchased large quantities of such Canadian goods as toilet-articles and bed sheets.

Boom In Construction

Twenty-six Cities Plan Building Program Which Will Total Many Millions

Twenty-six cities in Canada expect shortly to undertake engineering and building projects totalling close to $500,000,000, according to a survey made by the national construction council. In all, questionnaires were sent to 100 cities, and it is expected the final figures will reach $250,000,000.

Twelve local committees are to be appointed at strategic points in Canada, to be formed along similar lines to the national construction council, in order to carry out survey and to co-ordinate the various provinces for the national body.

Had New Experience

Canada's Governor-General has met with a new experience. He attended his first baby clinic. Dr. Canniford 35 baby youngsters while Lord and Lady Tweedsmuir looked on. The clinic was part of the program staged for their Excellencies as they visited Digby on their Nova Scotia tour.

The Inside Story!

Right inside your pipe load it's there's where Ogden's Cut Plug tells the story of smoking pleasure and it's a special story, too—every pipe-ful is a chapter of enjoyment it's complete in itself it's told in a language you'll always understand. That's more particular you use about pipe tobacco the more you'll like Ogden's Cut Plug. You can't help but like it. It packs right it lights right it burns right in your pipe!

OGDEN'S CUT PLUG

If you "roll your own," use Ogden's fine cut cigarette tobacco and Chancellor cigarette papers

Best Container For Cream

A well soldered plain-bottomed tin can, about eight inches in diameter and 36 inches deep has been found by dairy farmers to be the best kind of vessel in which to hold cream. It is easily cleaned and convenient to handle. It rests in a hole in earthenware crocks that have in any way become chipped, an unbreakable flavor can be imported to the butter.

Greatly Improved Prospects For The Western Canadian Wheat Grower Are Now In Evidence

A bone had gone, a ball today, William Smith, wheat buyer for the Scottish Co-Operative Society presents a heartening prospect for the wheat growers of Western Canada.

He believes wheat prices will continue firm, and that there will be a good demand for Canadian wheat this fall. While the export market is suffering some sort of a speculative flurry in the United States and Canada which has used North American prices out of line with the world price the Liverpool price has been climbing steadily and there is a good potential demand.

Importers and millers have been following a hand-to-mouth policy, the quality of the Argentine crop is poor, little Australian wheat is available, all which indicates a healthy demand for the new Canadian crop.

Nearly half the rise which has occurred in Canadian wheat prices is due to changing currency values, the pound starting being stronger in terms of Canadian dollars. But world crop conditions have also been a considerable factor in the bulge. If speculators have taken undue advantage of these basic factors and have pushed the price out of touch with demand, the margin is not so great but that it will correct itself with comparatively little loss.

Evidently there is a real prospect that the Western Canada wheat grower will be able to dispose of his crop somewhere around present, or better, levels. That means renewed buying power in Western Canada, better business throughout the Dominion.

The 1933 crop is being produced at the lowest cost ever achieved in this country. Mighty cost wheat means a fair margin profit on the year's operations for Western farmers. It means that they will have money to spend for clothes, machinery, building supplies, the demand and use of articles which are normally in demand, some of which the farmers have been going without for a year or two because they were compelled to make the old ones do.

Every dollar of new wealth that will be created in the farmers of the West by profitable wheat prices will mean at least five dollars in distributed purchasing power. The consistent improvement in business activity in the prairie provinces which has been under way during the past two months will work its way rapidly through the whole of Canada as the crop begins to come on the market. The effect will be immediate and farreaching over for the Dominion. The sun has begun to shine again. Business is picking up, and enterprise is sticking its head out of the storm cellar.—Winnipeg Tribune.

One Native For Gift

Lindbergha Did Not Want Horse Exploited As Show Piece

It is entirely characteristic of Colonel and Mrs. Charles Lindbergh that they should turn over, as an institute devoted to child welfare, their former home near Hopewell, New Jersey, the scene of so shocking a tragedy concerning a little child. We can conceive of nothing more fitting nor more filled with a sense of real and imaginative justic. But it is a horrible comment upon American life that one native of the Lindberghs is denied the property ever to child-welfare work was to save it from various persons who wished to buy the name of the Lindbergh kidnapping and exploit it as a rendezvous. In all the stories of crime, there have been few which have laid bare so many sordid motives as has this one.—New York Evening Post.

Holiday Toll Heavy

Lives of 144 men, women and children paid for the celebration in the United States of the 157th anniversary of the republic. A compilation announced for 62 deaths. 48 persons drowned, six died as a result of fireworks, and 30 were killed from other accidental causes.

New Device Valuable

Photographic Appliance In Old Glass Service In Court Trials

Accurate details of scenes of accidents or crimes are claimed to be obtained from use of a new Dutch photographic appliance according to a report from Consul George P. Gilmore at Amster.

The process is an elaboration and extension of the system of mapping and making topographical surveys by terrestrial and aerial photography. The system provides a stereoscopic view of the objects from which the plot or diagram is subsequently made. It is claimed that the results are accurate to within one-half inch in the usual street measurements.

The new device is designed chiefly to simplify the procedure of accurately portraying the position, relation and dimensions of vehicles and other objects and highways.

By having the apparatus available at a few central stations it can be rushed to the scene and the photographs limited in a few minutes. The equipment is now in use in Berlin and is reported to be giving satisfaction.

It is claimed that necessary expenses may be made in five minutes, that proper personal rights are eliminated and that permanent records may be made available.

Treadmill Dog Likes Job

Has Record In Fatigue Experiment At Laboratory

Forty miles of running in six hours with just one short half for a drink of water, is a record set up by Joe a mongrel dog of large proportions used in fatigue experiments at the Harvard University Business School Laboratory.

And the curious part is that Joe loves his job. His job is running on an electrically driven treadmill which scientists study his food consumption blood circulation, temperature etc.

The second Joe is released from his cage he emits a loud "woof" and makes a dash for the treadmill and keeps right on thanking until someone turns on the current. Joe can run for hours without getting tired.

The scientific tests are made to determine the organic changes resulting in the body from fatigue and to learn the extent in which fat and sugar substances are used up from exercise.

Much Approval Is Expressed Of Dominion-Wide Campaign To Stimulate Interest in Fish Products

Giant Clover Plant

Leaves In Sensible Automobile Bodywork With New Find

Smithsonian botanists recently declared themselves astonished at the clover heads they held some giant clover leaves sent by J. W. Thompson, a Seattle plant collector. He had found them growing on Washington sage brush slopes. He had never seen their like, nor had the Smithsonian men.

Each plant was nearly two feet high and bore flowers almost two inches in diameter. Most of the 300 species of clover have triple leaves like the shamrock. There are "lucky" four-leaf freaks, and rare five and seven-leaf varieties. The Thompson specimens have seven leaves normally which grow on long, eight-inch stems.

The astonishing aspect of the giant Thompson clover is that it should have been discovered so lately in the U.S., a thoroughly botanized nation. It may be, opined Smithsonian Botanist Conrad Vernon Morton, one of the last conspicuous new plants to be discovered in the U.S."

Experiment Not New

Hypnotism For Tooth Extraction Used 65 Years Ago

Recent reports about a Pittsburgh dentist who hypnotizes patients before pulling their teeth brought from Rev. C. W. Hidden of Middleboro Mass. the claim that he had practiced painlessly for 65 years ago.

He produced a clipping from the Newburyport, Mass. Herald in 1867 telling of an operation in which he hypnotized a woman patient before she was treated by Dr. J. H. Brown. The dentist at the time pronounced the experiment a complete success.

Quiet and Unpretentious

The Border Cities Star says "The church's ending of Barbara Hutton and Prince Alexis Mdivani, following the customary civil rites, was as unpretentious in advance, simple, quiet and unpretentious. A choir of 30 Russian singers furnished the music four priests of the Orthodox Church officiated at the altar, the place was jammed to the doors. 30 newspaper and movie camera men perched on the front steps and the crowd in the street tied up traffic for an hour. In other words, no fuss at all."

Fishery Products

Joining in a letter to the Dominion Department of Fisheries, a number of fishdealers in Victoria B.C. recently expressed approval of the campaign of fish vendors, demonstrations and lectures which the department is conducting. Naturally, they spoke especially of the programs given in their own city a short time ago, but they commended the campaign as a whole. Similar opinions have been expressed by other fishmen people elsewhere.

The purpose of the campaign, of course is to increase popular interest in Canadian fish foods and thereby and thus to benefit the fishing men and fishing industry by widening domestic demand for these products. The demonstrations and lectures are given by Mrs. Evelyn Spencer, the department's specialist in fish cookery, and in recent weeks the field covered has included a number of Prairie Provinces centres, Vancouver, Calgary, Lethbridge, and Medicine Hat in Alberta, and Regina and Saskatoon in Saskatchewan. As a matter of fact, the field has been very much wider than this group of cities for the programs attended numerous small towns which were heard over a wide area, and heard with interest. In one instance by reports received by the department.

At the request of the provincial fisheries authorities of Manitoba a second program is being given in that province. The first Manitoba program, given last autumn, was found to need that the provincial authorities asked for demonstrations and meetings. After the lakestore schedule is completed, Mrs. Spencer may address some Women's Institutes in Ontario and later in the year. It is expected, she will go to the Maritime Provinces.

Fish from all parts of the Dominion, and fish at different prepared forms as well as the fresh and frozen product, is used in the different demonstrations. In the prairie cities, for instance, whitefish and pickerel from prairie waters, British Columbian fish including some Pacific oysters and Atlantic coast fillets were all cooked and served to the food experts.

Similarly in the addresses before public meetings and over the radio, Canadian fish foods generally are discussed, not simply fish and shellfish from one part of the country.

A Valuable Shorthorn

Prize-Winning Animal Shipped From Scotland To New Zealand

An aristocrat of the Shorthorn world Brown Dale Rugler Canadian National exhibition grand junior champion and winner of many other purple ribbons, left Caledonia, Ont. recently on a specially fitted and disinfected car for Vancouver on the first leg of a 9,000-mile journey to New Zealand. Brown Dale Rugler was bred by James Douglas and Sons of Caledonia and Paris, Ont. His sire Cruggleton Rugler, was one of the animals imported by the Prince of Wales for the E.P. ranch in Alberta, but was purchased by Mr. Douglas on arrival from Scotland in 1930 for Willow Bank Stock Farms here.

The junior grand champion was purchased by the Doon men L. Lockie Branch for a New Zealand breeder who asked for one of the best young male Shorthorns in Canada.

Prehistoric Discovery

Said To Constitute The Most Important Missing Link Find To Date

A group of noted geologists from the Orient headed by Dr. A. W. Grabau arrived in San Francisco en route to the International Geological Congress at Washington, D.C.

Dr. Grabau announced the discovery of two nearly perfect skulls of the ancient "Peking man" which he said represented "the most important missing link discovery to date."

Dr. Grabau said the skulls and several jaws of teeth were found in rock caves which contained fossil remains of the million-years-ago period.

MOUNTIES' UNIFORM CHANGES IN SIXTY YEARS

This year is the Diamond Jubilee of the founding of the famous Royal Canadian Mounted Police, formerly known as the North West Mounted Police. Organized in 1873 to take the administration of justice into the territories then recently acquired from the Hudson's Bay Company, the North West Mounted Police, then numbering 300, started on the long road to fame. Here we see two pictures of the Mounted Policemen. The top photograph shows a "Mountie" as he looks in his spick and span uniform in 1933. The bottom picture was taken at Fort Walsh in 1875, and shows a group of non-commissioned officers in the uniform then worn.

WORLD HAPPENINGS BRIEFLY TOLD

Dr. E. T. Lilly Burke, 88 years old, of Stevenson, N.J., was the three-cent-stamp visitor to pass through the Treasury Department's window at Washington in 1902-03 for every 100 stamps he purchased.

Subscriptions and collections in the Toronto Welcome restoration fund for Western Canada have already reached a total of $800,000, or slightly more than $1 per cent. of the whole objective.

Supervisors have come within one-quarter of a degree of accomplishing the remarkable shortening of the heat. They produced, at the University of California, 499.1 degrees below zero Fahrenheit.

President Roosevelt has assigned two college professors to the Treasury Department to help Secretary Wallace in the work of Council—to make a special study of United States government finance, banking and balancing of the budget.

Governments of the United States and Canada have been given an invitation report from the commission set up to arbitrate the "I'm Alone" case, and the decision in the proceedings will probably be laid in Washington.

The Government party has taken vigorous steps to bolster up Soviet Russia's faltering railway transport system, ordering immediate creation of "emergency revival service" to strengthen labor discipline and weed out hostile elements throughout the entire organization.

Future of the empire monetary unit, the organization formed to stimulate sale of empire products in Britain, and other matters, J. H. Thomas, secretary for the Dominions, informed an agreement had been reached about empire currency at the board between the United Kingdom and other empire governments.

One Way To Buckle

Shooting Adventure Noted Then As To His Name In Police.

Professor Hindhaugen is to be reminded of a vet, for he has promised a very good look at his shooting. Professor Hindhaugen, it is other years, the German destiny that he was a German, the French say he was a Jew, then he would be a Jew and half if the Germans call him a Jew and the French are confident that he is a German, he himself knows not to be possible should that he was a fellow. The scientific gentleman who astonished and mystified the world by his theory of relativity, is to receive the LL.D. from Glasgow University shortly. He intends to receive more honorary degrees of the many time which will be open to the public.

Useful to Many Plans

Discovery In Toronto University Would Help Dot Areas

A new and I hold but does Addition ground for the great technology which to be located at the University of Toronto. How useful that discovery would be in the front of the Chicago fair during the World's Fair. You could see your relations from the country coming to shop at your house before they crossed the county line. There would be plenty of time to hang the sign on the front door, "Gone to Europe, Will Not Return Until Christmas."—Chicago Tribune.

Stole Roosevelt's Gun

Possibly the thief who visited the North Dakota exhibit at the Century of Progress wanted to have a shooting to make a head notes on the Roosevelt of July. He took a revolver Theodore Roosevelt used on a young rancher at Medora, N.D. So treasured is the weapon that no questions will be asked if and when it is returned.

W. N. U. 1908

Seventy Teenage

Grain, Rail, Steamship and Employment Council to Study Problems for the United Kingdom

Many people seem at a loss to know what tonnage means. The various kinds of tonnage are often a bit confusing. For the benefit of those the Canada Line has distributed the following information:

To begin with, vessel tonnage should not be confused with cargo tonnage. A cargo weighs ton is 2,240 pounds, while a cargo measurement ton is 40 cubic feet. A vessel measurement ton is 100 cubic feet. The carrying capacity of ships is limited by the amount of measurement space available within their holds, and by the amount of weight they can safely carry. This is called register or deadweight tonnage, respectively.

The three kinds of vessel tonnage are as follows:

Gross register tonnage.—The total enclosed space of a vessel, expressed in measurement tons of 100 cubic feet, including engine room, boiler (fuel) spaces, coal quarters, storerooms, passenger cabins, etc.

Net register tonnage.—The total net enclosed space of a vessel available for the carriage of cargo, expressed in measurement tons of 100 cubic feet.

Total deadweight.—The number of weight tons of 2,240 pounds, each, of cargo, fuel, stores, supplies and fresh water for the boilers, etc., required to put a vessel down to her load draught, or load draught line.

Deadweight cargo capacity.—The number of weight tons of 2,240 pounds each, which a vessel can carry in cargo after deducting the weight of fuel, stores, supplies, and fresh water required for the boilers, etc.

Displacement tonnage.—The weight of the weight of the water displaced by a vessel fully loaded and ready for sea; or, it is the largest tonnage dimension of a ship, but is not universally understood.

School Of Long Industry

Experts Say Has Passed Working Days Into Steam Powerful.

Believe it or not, but it took the dogcarters to bring a dying industry back on its feet and start paying dividends.

Increased demand for oil lamp chimneys, and lantern globes since the Prince of Wales visited Canada led to the doubling of working forces of a glass company in Port Smith, Arkansas, and huge increases in others. Glass men attribute the sudden change to the "horse and buggy era."

An officer of one of the companies said the prince's passenger to appoints them electric or gas lights. He also asserted the "back to the farm" movement is largely responsible for prosperity in the industry.

By Hank Ketcham

THEM AND JAUNTY JACKET ... THAT WILL GIVE HANK YOUR DARING WARDROBE

Good looking jacket dress for youth and youthful types.

It is many less than woolen weave and waterproof plaited crinoly cough cloth, contrast.

It is effective too in grey crinoly crepe silk with many rings.

The jacket has the smart shoulders that just cut over the arms, and note the interesting back buttoned closing of the dress.

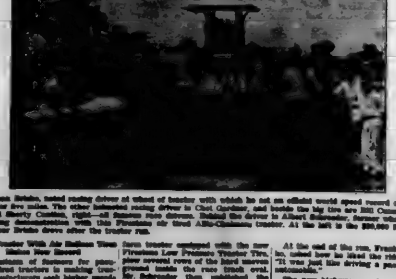
Size No. 711 is designed in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 5½ yards 54-inch or 6½ yards 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A regular Ireland-Scotland air service has begun. Passengers are able to fly from Belfast to Glasgow in less than three hours, instead of the usual time for steamer and train in about twelve hours. The actual air journey is 75 minutes.

Farm Tractor With Air Balloons Makes New Record



Frank Brinks, noted racing driver at wheel of tractor with which he set an official world speed record of 33.4 m.p.h. for five miles. The other industrial racing driver is Gus Gardner, and beside the big tire are Bill Cummings, left, and Tommy Cooper, right—all famous race drivers. Behind the driver is Albert Schroeder, former who gave a passing demonstration this afternoon of the "Indianapolis Special" tractor. At the left is the $50,000 P.W.D. racing car Brinks drove after the tractor left.

Farm Tractor With Air Balloon Tires Makes Record Speed

Indianapolis.—Farmers for generations have been interested in making tractor manufacturers seek higher speeds to make the tractor more valuable to the farmer, but not for racing on dirt-paved farm roads. Yesterday, however, a tractor was driven at a speed of 33.4 miles an hour, according to the record official AAA record of 33.4 m.p.h. for five miles over a dirt course at the Wheeler-Schebler Trophy Committee AAA race.

Ten thousand of people watched Albert Schroeder, a professional Wheeler-Schebler driver, in a new machine built especially for farm use. Frank Brinks, chief engineer of the Firestone Tire Company, drove the tractor for several years of the hard races in which he participated.

Schroeder then undertook the task and turned the tractor over to Brinks, a famous race driver, who was one of the leaders in the Indianapolis 500-mile race this year. The drivers were assisted to run the tractor through the straight stretches—at times exceeding 60 miles an hour.

A new four-speed transmission, developed by Firestone engineers, was used in the tractor. It was the first time this development had been made this method of speed.

At the end of the run, Frank Brinks, called how he liked the ride, said: "It was just like driving a passenger car."

The new highway speed and economy now available in farm tractors have been made possible by the tractor with these big tires, serves as an all-purpose machine. Demonstrations in all parts of the country have proved to farmers that tractors using these tires can do their plowing, discing and other jobs faster and more economically than the old steel wheel type, and save as well as engage.

SUNDAY SCHOOL LESSON

JULY 30

ISAIAH DENOUNCES DISCONTENT AND OTHER SINS

Golden Text: "Righteousness exalteth a nation: but sin is a reproach to any people."—Proverbs 14:34.

Lesson: Isaiah 5:1-30.

Devotional Reading: Psalm 85:7-13.

Explanations and Comments

The Sin Of Greed, verses 8-10. Woe unto the rich and powerful, cries the prophet Isaiah, woe unto those who are so avaricious for lands against that they "join house to house," unto houses of the poor, and they field to field till there be room (for the peasantry). And ye be made to dwell alone in the midst of the land." The time would come when the land would be in the possession of only a few. The Hebrew law (Numbers 36:8) provided that there should be a proportional division of the land and there were stringent laws against the alienation of hereditary family rights. See Lev. 25:8-17; Et. 27:17. Every fifty years, the jubilee year all land that had been sold or given away were to revert to the family of the original owners. But the law was abrogated. "Behind the Hebrew regulations regarding the seventh year, the fallow and the Jubilee year of release was the prestige that 'the earth is the Lord's not the landlord's', that it was held in trust for the benefit of all the people. When the commercial development of Israel came, the primitive land system went, but the independent farmers were impoverished by taxes laid to pay for war. The land was taken for loans made by the merchants. The farmers became serfs. Economic ruin said social degradation followed. This is why the prophet cried the wrath of God upon those who joined land to land, and upon the religious leaders who "justified the wicked." John Bayne Ad claim.

"It came ears saith Jehovah of hosts," Isaiah continues. "In Hebrew to say into the ears' does not mean to speak secretly and softly, but, as Genesis 29:10-26; Job 33:3, and other passages show, to speak in a manner that is distinct and intelligible, and excludes all misunderstandings. The prophet is able to distinguish distinctly the thoughts of his own heart, and from the impressing of Jehovah which rises loud within him." Dentsch, "Of a truth many houses shall be desolate, even great and fair, without inhabitant," became the habit of the Hebrew, verse 10. "For ten acres of vineyard (literally, ten yoke, or ten times as much as a pair of oxen can plow in a day) shall yield one bath (the largest liquid measure, about eight gallons), and a homer of seed (the largest dry measure, ten twelve bushels) shall yield but one ephay, a tenth of the seed sown."

Woe To The Idle, verses 11-17. Woe unto those who rise early to drink strong drink, and continue late in the evening, till wine inflame them. Where wealth accumulates and men decay."

Encouragement For Spain

Record Flight Made Atlantic Reduced For Business and Time

In flying from Seville to Buenos Aires the Spanish-built and Spanish-owned "Cantro Vicente," Captain Barberan and Lieutenant Cantin have broken the record across the Atlantic for distance and time. For the encouragement of aviation Spain needed an achievement like this. For many, it appears, has been kept before the world by intrepid pilots like Commander Franco, who with three other army officers made a flight to South America in January, 1926, and the following year flew from Spain to the Argentine. Argentina, 6,222 miles, in sixty hours; Captains Loriga and Gallarza, who in 1926 accomplished the feat of taking a Spanish plane from Madrid to Manila; and Captains Jiminez and Iglesias, who crossed the South Atlantic in Palos, Brazil, 4,000 miles in forty hours less five minutes, March 26-28, 1929.

Spain has given to the world a great inventor in Juan de la Cierva, of whose autogiro Thomas A. Edison said that it answered the question whether a flying machine could be built that would take off and land on a small space, and be practically foolproof and easy to fly. This odd-looking plane has undergone improvements in England and the United States, and has been flown in the Pacific Coast and back. It is still a question whether the autogiro will be able to compete with the standard airplane as a passenger carrier. For that purpose and pleasure flying it is coming into use.—New York Times.

Cleveland Port Of Call

Progresses From Normal Mooring Use Of Welland Canal

Cleveland has become a port-of-call for the ocean-going freighters of one enterprising steamship line.

Through use of the Welland Canal, the freighters, the "Hevrier" and the "Vordelfjell," out of Rotterdam, Holland, have gained entry to the rich Great Lakes ports.

Both vessels are about 250 feet long and draw only about 14 feet of water.

The shipping manager of one large industrial concern here declared that freight rates from Cleveland to Rotterdam via Welland are the same as railroad rates from Cleveland to Baltimore.

Something To Think About

Canada Not Bothered With Banking Troubles Like United States

W. L. Clark, writing in Border Cities Star, says some of the banks in Maine have not reopened yet. Closed for about three months, the bank holiday has hit some people hard. Here is a case told about in Portland. A man, formerly of Montreal, had a large account in one bank. He needed some money for a business transaction and instead of drawing his savings, he borrowed from the bank and put up some Government bonds as security. Then the bank closed.

The savings account of the man is more than sufficient to cover the loan he got from the bank that they still can't apply that amount against his loan. Instead, they are trying to sell his Government bonds to raise cash to pay off the loan. In other words, they not only have gobbled up the customer's savings, they also want to swallow his Government bonds as well.

This was just one of the sad stories that a Montreal man said a banker let for $20,000, put the cash in the bank one afternoon and the second day the bank closed. The banker is now broke and the $20,000

Considering Two Solutions

Dairyed Research Council Working On Chief Product Problem

The problem of the prevent on of vapour condensation on chilled or fr zen products particularly poultry is occupying the attention of the Nation l Research Council at the request of the Poultry Division of the Dominion Department of Agriculture. So far the research have done certain d ta and by means of a heating (and) ventilation can be avoided with at a excessive amount of expense in loss when it was once a chief source of storage grief. Where moisture is responsible it is said the problem is met as a whole from a floor covering and storage point of view. It can be met either (1) by the provision of a vapour barrier on the inside of the building or (2) by the maintenance of a room of sufficiently low dew point, efficiency and economically, into which the product would be placed for storage immediately on handling or (3) by the provision of a combination of (1) and (2) to prevent the operation of freezing on shipboard just prior to landing. The possibilities of these two solutions are now under consideration.

Women Long-Distance Runner

Covered Twenty Six Miles In Little Over Four Hours

In passing rude and through heavy traffic Miss Violet Pacey, a young London woman, ran from Wembley to Slough's mark 26 miles 385 yards in four hours, 25 minutes. She could have done better, except that she developed a bad stitch in the side and had stopped so frequently on the wet roadway to rest. She ran the course course in three hours, 45 minutes, and she was spying to that time. The men's record for the distance is two hours, 25 minutes.

Miss Pacey miserable runs by in the best way to get nine.

A slight, pasture-haired young woman, she ran in a severely black running costume. She claims to be "about the only woman long-distance runner in the country."

Churchill Fort Fun

Regular Yuriff Covering Stage and Custom

The port of Churchill, Canada's new gateway to Hudson Bay, is gradually taking on the trappings of a full-fledged seaport, and in the current issue of the Canada Gazette notice is given of a regular tariff of port wardens fees covering the survey of ships and cargoes.

For the complete inspection of hatches and cargo, inward, the fees range from $5 for 1,000 tons to $20 for 5,000 tons and over.

Lumber and grain are on a special category in outward cargo. For the former, fees ranging from $5 for a survey of 100,000 board feet and less to $20 over 1,000,000 board feet will be charged. The fees for grain are $10 for 1,000 tons and less to $20 over 5,000 tons.

Passing Of Famous Author

Anthony Hope, Popular Fiction Writer, Dies In London

Anthony Hope Hawkins, famous under the pen name of Anthony Hope, died in London recently.

Mr. Anthony Hope Hawkins, born February 9, 1863, in London, was widely known for his romantic stories, the most popular of which were "The Prisoner of Zenda," "Rupert of Hentzau," "Tristram of Blent," "Quisanne," and "Double Harness."

The author was knighted in 1918.

The novelist was educated at Oxford, and later was called to the bar.

Short Stories For Radio

By dropping a coin in the slot of a radio set, you can listen in on a broadcast for 15 minutes from any station. A thorough trial has been made of these radio slot vendors at the Langely Fair. Since Langley fit at the geographical centre in Europe, it was found possible to pick up stations from nearly a score of different countries in as many languages.

Radio

Radio shipped nearly $2,000,000 worth of products to the United States in the first half of 1933.

W. N. U. 2088

Britain's Latest Interceptor Biplane Amazes Spectators

All the new and some of the old aeroplanes produced in England were shown to prospective buyers from all parts of the world at Hendon, recently. More than 1,500 guests, representative of 60 countries, received the invitation of the Royal British Aircraft Constructors. There was the new Hawker "Fury" interceptor fighter biplane, stated by the British Air Ministry to be the fastest military aircraft in the world which put on a wonderful exhibition of flying. Diving at almost 600 miles an hour the machine straightened out above the heads of the spectators to fly over a straight-away course at nearly 220 miles an hour.

Talk Battleship By Lips

Country Fairly Determined By Their Shape Says French Writer

Show me your lips and I'll tell you what you are, says Maurice Dovalet, one of France's most famous writers of Lips tell a terrible tale when they belong to the fair sex and "lip-reading," he advises, is a safe thing for any man to learn.

The lips of the average American, he asserts, finds Monsieur Dovalet, are almost perfect Cupid's bow.

Parisian lips are not generally, so perfectly shaped, but perhaps are good specimens of all, with a delightful curve to the upper one, giving an elegant and spiritual touch to the mouth.

Italian lips conform to the thirst of climate to nuty and Spanish ones are distinguished by their extreme fullness.

Scandinavian women have a very thin upper lip and Viennese lips are usually small and the little ridges between the nose slightly marked.

Hungarian lips are dominating and show strong will and German ones are fresh and velvety.

Brazilian beauties have lips strongly recommended which give an air of authority.

Trans Organ To Chinese

Wesson Pitcher Instrument Goes Birth To Ancient "Shang"

Mrs. A. H. Dunlop, wife of a Shanghai American resident, who is studies have throttled over the Chinese musical instruments, advances the opinion that the ancient "Shang," the occidental pipe organ were kin. birth. This instrument is made of small pipes 13 in gourd, through which the wind is drawn when played by the mouth.

According to Mrs. Dunlop, most of the old instruments are still in use, called "chin," denoting the power of music to restrain the passions, the "sheh" resembling and chiefly at very-ious occasions.

Shanghai For Plain Living

No Silk Top Hats and Expensive Trappings For Feudal Chiefs

High-betting is prohibited literally in a code drawn up by President Chiang Kai-shek for observance by Feudal officials.

The list of rules circulated to 31 Dutch autographed photographs and circulated among the heads of regional administrations, with them and to appoint of official commissioners with top places; instructs them not to frequent de luxe restaurants and theatres, not to wear silk hats and other expensive articles, and are forbidden to use automobiles or motor-cycles when transportation is necessary.

Rat Price Higher

The million pounds of poultry shipped to the United Kingdom market early last winter with the endorsement of the Canadian Co-Operative Poultry Pool naturally netted there to four cents a pound higher than the dealer price in Winnipeg or Montreal.

Suppression Of Worlds Plan

Complete Secrecy Conducted Against Issued Peal To Cuisin

In addition to the work being carried out by the Dominion Department of Agriculture in conjunction with the provincial governments in supplying assistance of control for the suppression of weeds thus tree management on a large scale is now being prosecuted on the present moment one by the Ontario Government on Manitoulin Island, and the other on a municipal undertaking by the local authorities of Calumet Island on the Ottawa River in Quebec. Weeds like sow of two species very widely distributed in many parts of the world, particularly in Europe, North America, and to a less extent in Asia. Where they are abundant they constitute the worst insect pests to cattle and many cases be infected in this way. Sheep are also affected. The flies appear in every part of Canada where sheep is raised.

Had Sense Of Humour

London Postmaster Sent Away Post-card To War Office

An amusing story designed to illustrate the acuteness of postoffice methods, was told by Mr. L. J. Simms at the Philatelic Congress in London recently.

A party of thirty or forty soldiers were stranded at Archangel after the war, he said, with just something them at home. They had been promised a speedy passage, but after many weeks there was still no sign of a steamer.

Finally they sent an army postcard home, saying they were there. It was addressed simply to: "The Soldiers, London."

The postoffice wrote on it: "Try the War Office!"

"If you do not believe the story," added Mr. Simms, "I have got the postcard." London News-Chronicle.

Rest For Migrating Birds

Province Invited On Lighthouses By Royal Society

When the feathered "mammal migration" of the United Kingdom began and thousands of birds arrived in their annual migrations, bright lights on lighthouses for migrant birds were packed to capacity nightly by voyagers. These consist of rays of porches above and below the lanterns, and they have been erected on various lighthouses.

Before these resting-places were built thousands of birds perished annually around the lighthouses and lightships during their passage to the shores around Manchester, England. Attracted at dusk and in bad weather by these luminous lights, the birds fluttered around them in a vain search for perches until they fell exhausted into the sea. Hundreds of birds flung themselves against the glass panes of the lamps. The Royal Society for the Protection of Birds has therefore provided perches around the lighthouse, and so saved several species of birds from becoming lost to the British Isles.

Camping In Railway Cars

Change in Method For 70's Now Back In England

A scheme for camping in railway coaches in the tribal isles of the Irish Sea and North Eastern Railway Company.

Coaches were given for use six-wheeled railway carriages, each to be converted for the accommodation of six campers. On July 1 these railway coaches were placed in convenient stations on the line each week.

The summer rate for each carriage is approximately $12.50 per week during the season, and about $30 at the beginning and end of each season. They are fitted with all necessary equipment.

Provided By Thrill

Three Stooges Spending Motor-Cycle By Quite Second

In an attempt on the world's motor-cycle speed record Joe R. Wright gave a bank, two boys and a crowd of 10,000 people the biggest thrill of their lives at Southport.

As he was hurtling down the straight on the sands at about 135 miles an hour a man followed by two boys walked across his path. Stewards shouted, gave their whistles and the cyclists tried to make to the fact that sudden death was appreciable, there at the rate of 60 yards a second.

They dodged it by a fraction of that latter period.

Wright's attempt on the record failed, as after three efforts, he was forced to give up owing to the car wi[illegible] developing a fault.

Canadian Wool

Substantial Increase On London Wool Exchange Over May

Canadian wool is selling on the London wool exchange at a 30 per cent advance in price over that of the May sales.

Saskatchewan wool is being graded as a high grade.

Western shippers are immediately feeling the benefit of the higher prices at London.

W. A. Thompson of the Canadian Co-Operative Wool Growers, received a cable stating that wool prices at the May Winnipeg sales of London were 30 per cent higher than during the month of May.

The cereals are responsible at positive are immediately affected by the price to their advantage, he told The London Post, Regina.

These wool prices are for wool from Montana and cross-breds, the idea coming from which most of woolen factories still cross.

Two things control wool prices, Mr. Thomson said, rate of exchange and the London market. At the present time both these factors are of advantage for Saskatchewan wool growers.

Reports of grading of shipments of 19,750 pounds of wool sent from Regina on June 19 to the central grading house of the co-operative at Weston, Ontario, were received by Mr. Thomson.

Of the total shipment of 19,750 pounds, made up of 26 individual shipments, 11,256 pounds were classified as range type bright, first class quality, 3,432 pounds medium type and bright, 2,818 pounds domestic type and bright. There were no dark wool in the entire shipment and only 197 pounds were rejected.

The grading reports show that out of this season's wools cleaner than usual and of excellent quality," said Mr. Thomson.

Prisoner Was Out

Alleged Escaper Strike Until His Guard Was Removed

Strike until his guard was removed from Oakhill's book and get what he wanted.

Bombay has been confined for a year in the detention shed at immigration headquarters in Halifax. He was taken from Edmonton last year along with nine others arrested for Communistic activities. His companions were deported to their homelands.

But Bombay was, literally, a man without a country. He was born in western Ukraine, at the time a province in the Austrian Empire. Took over the territory after the Great War. And when Bombay tried to get back to Canada, he was refused entry.

So he stayed alone in the detention shed. A laundry was assigned to guard him.

Every night spent long hours talking, playing cards. Occasionally they took a stroll through the frigid sheds that adjoin the detention cells.

Then Bombay's guard was removed. For a few days he didn't mind the solitude. It began to get on his nerves. He wanted the guard back. When his request was embossed, he decided to try Oakhill's favorite method of getting what he wants. He went on a hunger strike.

He stuck to a water diet for several days. Finally they brought back the guard; and now Bombay is satisfied.

FANCIFUL FABLES

LOW PRICED but DEPENDABLE OLDFIELD TIRES

made and guaranteed by Firestone

YOU do not have to sacrifice quality and mileage to get a low priced tire. Oldfield Tires — made by Firestone — have the quality and features of tires costing much more.

Only Firestone, with its vast resources and experience, could build such a big, full-sized, rugged tire with a Gum-Dipped cord body and a long-wearing safety tread to sell at such a low price.

Save money with Oldfield Tires. See the nearest Firestone dealer today.

Guaranteed for 12 Months against blowouts, cuts, leaks and all other road hazards except punctures

HEART OF THE NORTH

By WILLIAM BYRON MOWERY

(With Decks)
Copyright by William Byron Mowery

CHAPTER XIII.—Continued.

As he walked along the slope toward the post, he was realizing, with bitterness of heart, that his sacrifice eighteen months ago, the greatest sacrifice a man can be called upon to make, had been worse than futile. It had cost him dearly, it had brought pain to Joyce, it had brought them, tonight to their hour of separation. And yet, through his bitter mood ran the knowledge that in his sacrifice he had met all personal requirements made and kept faith with a partner dead and had held sacred his promise to Curt Spaulding, until Elizabeth herself had made that promise impossible of fulfilment.

Again he lived over that hour when he came upon a lingering deserted, snow-drifted hut, and found Curt there, stricken with the disease, with both lungs frozen, deserted by his treacherous Indian helper, dying as valiantly as he had lived. He felt that no man on earth could understand the emotion that rushed like an ice flood beside the bunk, whispering to a partner who was going down into the dark, leaving a native penniless, alone in the savage North.

"Alan, she loves you," he could hear those broken whispers that previously were silenced. "If you'd marry her—my sister, Alan . . . I wouldn't mind going if I could think of you . . . partner and brother, too." . . . And even now a pain that dying spread pleas, and the ineffable peace that came when Alan made covenant, came to Curt. "I love her, too, because she's your sister."

And now, as he thought of that lone funeral sled trip home, and as he glanced up the slope toward Curt's towering lobstick, his lips fashioned silently:

"I tried, Curt. You wouldn't have asked more of me than what I did. But it couldn't be, it couldn't be."

* * * * * *

Joyce had helped Bill take her personal baggage down to the wharf, and had talked over with him final arrangements about forwarding the pelts to Edmonton and selling the trading store. Waiting for the steamer or she had cut only stopped out of Bill, Drummond's house into the garden beneath of it, telling no one where she had gone.

She was aware that Alan intended to come down before she left, for half an hour with her. She had slipped out in the garden to make that impossible if he came down to the wharf at the last moment, she felt she could say good-by calmly enough, with a brief handclasp a voyageur's nod and bon chance, but a longer time with him would be unbearable. Now when he brought a chair beside her, she read them with him.

Rummard had dashed off a page from his apartment address in Winnipeg. He had "done" a couple dozen bars and pumpkin shows in his new Dodge-villard but had found that Bess hard him knock, heard him ask for her, heard his puzzled "That's odd," when Mrs. Drummond said she'd been gone for half an hour.

By a lightning flash Joyce saw him as he started on past her something Bill—[illegible] dejected head, in his slow boston gait, let her know he was aware she deliberately had gone away to them both, and she felt unbearably bad shunned a parting this with him.

As Alan went slowly past the garden, unconscious of the lightning flashes, thinking only that Joyce, who had burned his picture and his gift, was now refusing a last hour with him, he heard a voice in the utterly blackness. It sounded like his name. It surprise he whirled toward the letter of mourning glories, and as he stood there, listening, he heard it again his name—Joyce's voice, half-sobbing:

"Alan! Don't—don't go. . . . I'm—I'm here. . . . "

CHAPTER XIV.

The North's Call

As she worked on a report that evening in the little library, Joyce knew it would pause now and then and listen intently, with her dark eyes gearing into the blackness outside the window.

It was time for Alan to be returning with Bill and Ped from a patrol down the Athabasca, and again and again she looked at the clock. That thought made her, on a blanket-padded couch, little Marion Montgomery had fallen asleep over a picture book, her tiny mosquitoes all in bed. The hanging over the couch. In the deep drowsiness sleep of babyhood the little tot was oblivious of the tension and unrest of fragrant and swirling around the cabin. If there was any sacrifice in having that fairy little companion in her home, Joyce had not yet become aware of it.

The report she was working on was a statement to her former bureau chief, Edward Delaney ex-Mounted Policeman, who had succeeded in her work among the Indian women around Endurance.

During a lull in the wind she noticed the dreamlike unreality sound of the big police boat skimming up the wave-tossed Mackenzie. Putting on a mackinaw she went to Deserted, Dizzy Indian Agent at Fort Endurance, N. W. T., and became the kid's Indian Commissioner, and Superintendent of Indian welfare

LOCAL NEWS

Miss Jessie Dolce of Sunnyville, Alberta, spent a week with Miss Anne Bozarko.

Ted Davis and Donald MacLellan arrived home safely and sound last Wednesday after spending a week camping at the Sturgeon.

Miss Allen MacLellan returned home from Ma-Me-O Beach, Pigeon Lake where she spent a fortnight as the guest of Miss Peggy Graham.

Misses Muriel Prince, Jean MacLellan, Frances Hodbert, Gladys Winsworth, Edith Taylor and Miss M. Chabot returned Saturday from Elk Island Park where they have been camping.

Dr. and Mrs. Grauert, Dick and Marlis, and Dr. and Mrs. T.W.E. Henry motored to Ma-Me-O Beach Sunday and spent the day with Mrs. Mc. Graham at her cottage, Lotd-on-Lead.

A member of Four people spent last Sunday at Elk Island park. According to reports, there has been considerable substantial improvements made in the park lately.

Here and There

Although $30,000,000 was spent in the construction of radio programs, cards and washing machines in Canada in 1931. A recently issued official report states that the total value of the farmer products was $1,071,134,134, and of the latter $94,376,540.

Forty boy scouts of Oregon and Washington made the first leg of their 3,000 mile trip to Budapest in the Princess Kathleen Seattle to Vancouver. They are travelling C.P.R. across Canada to Quebec, whence they will sail for Budapest at the request of British.

Alaska and the Yukon hold their appointment in the summer grounds lodging by the middle list of guests, while many north to Skagway in Canadian Pacific coastal liners. Many others are motoring and business men, but the majority are summer tourists attracted by the attractions for summer Alaska travel.

Forty-three years of "public, legal, and official service", with the Canadian Pacific Railway closed June 30 with the resignation of W. A. Kittermaster, General Western Freight Agent, Chicago. He was succeeded by E. L. Cardin, Assistant General Freight Agent, Montreal, of which the latter usually was absent.

For the first time since its foundation 35 years ago, a Governor-General of Canada was present at the annual closing exercises of the Boys' Farm and Training School, Shawbridge, Que., recently, when the Earl of Bessborough, accompanied by E. W. Beatty, chairman and President, Canadian Pacific Railway, presented medals and awarded prizes to graduates.

"There are tangible signs of business and commercial improvement in Canada and the United States," Sir Josiah Stamp, Director of the Bank of England, President of the London, Midland & Scottish Railway, and one of Britain's leading economists said recently when he called for England on the Canadian Pacific liner "Empress of Britain" after a short visit to this continent.

Two Manitoba youths [illegible] 16 and 17 years of age, [illegible] recently left on Canadian Ambassadors liner "Homeward" en route to the Yukon where they will spend the summer in scientific research and adventure. They will sail north to Skagway, go into White Horse where they will build boats for the run down the Yukon River to Dawson.

Motion pictures of herds of caribou migrating in swift current of the Yukon River and other striking studies of wild life in the far north have been garnered by Harry Pollard, Assiniboia Brown News photographer, who returned recently to the Prince Rupert by Vancouver after six weeks in Alaska and the Yukon. He went on to Banff and Lake Louise where he will photograph mountain scenery.

A total of 616,218 persons visited the 15 national parks of Canada in the fiscal year 1931-32. These great reservations cover an aggregate area of 16,00o square miles. Each has its own attractive characteristics. There are three scenic and four natural parks in Alberta, four scenic parks in British Columbia, one scenic park in Manitoba and one in Saskatchewan; one historic park in Nova Scotia and one in New Brunswick, one recreation park in Ontario and two historic park units.

Mr. Chas. Thomas, Willingdon, is working on the Bank of Commerce staff here.

Future generations may look upon the present depression as the turning point in our history. If we take advantage of the opportunities offered at the present, if we neither falter nor turn back but bring about speedily and sensibly the changes which conditions so clearly indicate are needed, then in all probability the coming generations will see that in these our adversities we found ourselves.

In all likelihood they will see in the depression an opportunity partly grasped, at any rate, for as bad as things may seem, no doubt as we may appear by the dangers which beset us, we are not through.

What nations need is strong, honest leadership that can forget self and work with others having the same and proper objectives.

Two hundred years ago we entered the machine age. Today we face the super-machine age and the problem of more adequately controlling the machine which otherwise, quite obviously, will control us. We need to change many of our ideas, yield our prejudices and work more harmoniously and more effectively for the common good.

It had too light, too steep, or too stony to plough and longer for pasture, occasionally it has been found profitable to reforest with trees suited to the soil.

VOL. [illegible] No. 17 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, JULY 20th, 1932 $1.50 PER YEAR IN ADVANCE

Town Council Holds Light Business Session

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Secretary's office on Wednesday the 13th. instant at 8 p.m. Present Mayor Montgomery, Councillors Pittman, Magor, and Graham.

The minutes of the last regular meeting held on the 21st. June were read and adopted.

An application for the Old Age Pension was approved by the Council.

The request of Miss E. Magor to purchase lot 20 in Block 12 was authorized.

The offer of Dr. R. M. Baron of $75.00 for the house known as the Sinclair House was accepted by the Council.

The following accounts were passed for payment:—Alberta Government Telephones $6.80; Calgary Power Co., $177.00 for street lighting; $5.50 for Town Hall and $1.50 for Memorial Hall. Gutta Percha & Rubber Limited $34.65 for fire hose; Jones, Graham & O'Brien relief $12.50; J. T. Lalonde relief $34.65; Fort Hardware for Memorial Hall $6.20; Bower Lumber Co., for Memorial Hall $7.50; The Record $1.50; R. Buchanan $22.50; Expenses for delegate attending two days convention of Union of Alberta Municipalities.

THE UNPROFITABLE BOARDER IN THE POULTRY FLOCK

... (Experimental Farms Note) ....

The unprofitable boarder in the poultry flock is a liability that should be wiped out at the earliest possible moment and, though the trap-nest is the most reliable indication of a poor producer, there are certain visible characters that readily distinguish the poor layer at this season of the year.

Providing the condition has not been brought about by injudicious feeding, a developing male, or a nutritional deficiency in the ration, a bird that goes into an early moult is generally an unprofitable bird. The prematurely broody hen and the bird that is hard to "break up" is using feed that should be going to a good growing pullet that should take her place in the flock. If she is overlooked she may become a menace and transmit the undesirable broody factor to her offspring. The bird with the hard, heavy abdomen and thick, hard fat covering the pubic bones at the sides of the vent, excessive pulpiness, pigmentation in legs and beak, and with dry scaly combs is a poor producer if these characters are in evidence at this season of the year when a pullet bon should be "bleached out" in line and beak, carry a full, waxy, bright red comb, a bright alert eye, soft pliable skin over the abdomen, a large moist vent, and good spread between the pubic or "lay" bones. If this season the novice will seldom err if the flock is handled and carefully culled by these elementary and simple characters.

To ensure a more reliable selection, a closer study should be made of other outward and visible characters possessed by both high and low producers in addition to those mentioned and if a definite record of both production and egg size is desired, the trap-nest is essential.

"How do you get so many subscribers?" asked the visitor to the office of the great magazine.

"Just between you and me I'll tell you the secret. All the manuscripts sent in I keep, I answer the contributors and tell them the stuff will be used as soon as available. That makes them subscribers for life."—Indianapolis Star.

A frugal Scot was approached by a man who said: "Mister, please give me a dime for a cup of coffee."

The Scot replied cautiously: "Let's see the coffee."

Worry is interest paid on trouble before it is due.

NEW WHEAT CHAMPION CROWNED AT REGINA

Freland Wilford of Stawly, Alberta won the grand championship in wheat at the Regina World's Conference and Exhibition Alberta won 21 additional awards out of 30 prizes at the grain show. which opened Monday in Regina.

Charles A. Lewis was mentioned in the prize winners from the Bon Accord district.

Herman Trebb was second and four other farmers gave to the foothills province the first six places.

MRS. C. H. QUIN PRESENTED WITH SILVER BADGE

St Stephens 12th Troop Boy Scouts of Edmonton presented Mrs. C. H. Quin who farms near the Sturgeon, with a beautiful silver badge and a letter from Baden-Powell in appreciation of her kindness to the Scouts during their stay at the Sturgeon River near the old dam a few weeks ago.

BY ITS NEWSPAPER
(High River Times)

This week there occurred an incident, interesting at least to the local press. A business man in a remote city had contemplated purchasing a business in High River He was in doubt as to the move, and as a precautionary measure decided to subscribe to the High River Times and find out what manner of town this might be. For six months, it seems, he has been one of our subscribers, studying news columns and advertisements, and probabilities and the close of people here. Apparently he was satisfied with what he read through and between the pages of the Times, for he has this week arrived in the town to complete the contemplated deal.

This is one concrete instance of the unsuspected errands which the home town paper may perform, once it leaves the local office. From time to time new subscribers in distant parts of this country, or other countries, are added to the mailing list, without any local knowledge of who they may be, or why they are interested in the district. But it may be taken for granted that they have a reason, and their interest may eventually develop in something of value to the town.

As has been repeated to the point of monotony, the weekly newspaper is, in a sense, the show window of the district, and the editor is constantly seeking for attractive material with which to dress his show window. He reacts to the news of any little achievement or success on the part of any citizen, as a father reacts to good news from a member of his family. It is something bright, colorful or valuable for the show window. It reflects credit on the whole High River family. And there is no telling where eye may be attracted. Remember, if there is some modest accomplishment to your credit, or the credit of your neighbour, let your newspaper know about it. It will brighten the show window.

White grubs eat off the roots of timothy so completely that infested timothy sod may be rolled up like a carpet.

No Sissy, He

Johnny: Mother, I held a lie today.
Mother Why, I can't believe it.
Johnny Teacher asked me where I was born. I knew I was born in the Women's General Hospital, but I didn't want 'em to think I was a sissy, so I said in the Yankee Stadium.

POLICE COURT ITEMS

A visitor in Town was fined $25.00 or in default two months imprisonment with hard labour, in the local police court last Monday, for having a revolver in his possession without a permit.

SALADA
Life Means Change.

Occasionally the writer of this column finds the urge to pass on to the readers of it some thought, or idea, or even complete article he has come across in his own reading. In surrendering to that urge this week, we pass on an article appearing in a little United States magazine which does not go into general circulation, which has no subscription list, but which is distributed free to a selected list of people in all parts of the world. That article follows:

To prepare us for life in a world which is constantly changing, that is a very important part of a universe in which nothing is or ever will be static even for the space of one brief second, humanity has been taught, from the earliest dawn of reason, to strive for permanence, security, safety, nay, something more than we may accept as settled. Mentally, morally, socially and spiritually unprepared to meet the apparently sudden, unexpected changes which follow inevitably upon some wide-spread emergency, instead of schooling ourselves to meet emergencies in their varied and unpredictable phases, we have preferred to be lulled or to lull ourselves into a sense of false security to surround ourselves with an atmosphere of spiritual anesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we delude ourselves into the belief that we have made of it something restfully secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

How different would have been our reactions to the experiences of the last three unceasingly trying years had we been free from the traditional fear of change! And why should we fear change when it is the most certain thing that life brings us? It is the very essence of life; the vital germ of growth; the stimulus toward achievement, the point of far-flung outlook along the road of progress. Change gives life its vitality; lends it sparkle and variety and the lure of glorious adventure. making it worth living to those who have learned the most precious, most helpful of its secrets. Acceptance of this fact is the one royal way to spiritual freedom, and in that spiritual freedom lies the only assurance of surety, of permanence, of safety, of ease to be found in all the range of created things. For only when the spirit is free from the bondage and superstitions and fetishes of fear and from the cramping and narrow prejudices and selfishness - free to venture where it will and when it will, is it prepared to meet, with profit to itself, the ever unexpected possibilities and adventures of life. The accumulation of these spiritual profits is the one sure laying-up of treasure where neither moth nor rust can corrupt, and where thieves cannot break through and steal. It is the one treasure not subject, except in enhancement, to the vicissitudes of life.

The chief thing in living is life itself. The chief purpose in life should be to live it abundantly, joyously, fearlessly; to savor each of its constantly varying phases; to get all we can out of it and to put all we can into it. We should not fear to meet any part of it. We should prepare ourselves for the realities of life, frankly admit them as realities, and reap the fullest possible advantages from them. And if we do this we shall come to the inescapable conclusion that the genuinely desirable advantages of life have little if anything to do with material things.

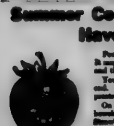
If we would enjoy life to the full, we must change our traditional attitude toward it. Instead of building upon the illusion of permanency, we must build upon the certainty of change—constant change both within ourselves and in all other created things; physical, mental and spiritual change. For without change life could not exist. There is no possible permanency in life, anything static, anything unchanging even for the smallest period of our conception of time, would be to imagine our most fearful and hopeless conception of death. And life knows no death, only change, and continuing life.

There is no thought in anything I have said here that we should not strive intelligently and courageously for some measure of stability, some temporary standard of thought and action, in our material affairs; but that in our thinking, our planning and our striving we never should for a moment lose sight of the realities of life, and that neither permanency nor absolute security is one of them. Our ideas of security, of any settled order of things, should be relative. They should be held humbly and subject to the certainty of change. In other words, we should prepare ourselves for change as for the one sure thing which life offers us. Our accumulations of things material should be secondary to our accumulation of things spiritual. The insecurity of material accumulations should make us value more highly the security of spiritual accumulations—our experiences, our memories, our graces and friendly impulses, our understanding of the universal mind, whose attitude toward our fellows, our confidence in the eternal beneficence of life, our love of what is good, our desire for continuing human betterment, in short all that our experiences have taught us how to do and desired.

Let us then accept life frankly as a glorious adventure, and face it at all times cheerfully and bravely. Let us banish fear, fear of present insecurity, fear to venture because of uncertainty, above all else, fear of change. Let us be constantly prepared for change, ready to take advantage of it rather than to have it take advantage of us. Let us live our lives to the full and go forward cheerfully, bravely, confidently, and with light and hopeful hearts.

Germany has a "reserve" company. | Drouth is threatening crops in parts of Roumania.

Summer Complaint Plays Havoc With the Bowels



For prompt relief at attack of summer complaint, it is right, as it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it seizes you how it is going to end. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Britain Is Interested

Amazing News Regarding Recovery Of Mine Plants In B.C.

Britishers everywhere are receiving splendid news concerning the result of the long lost mine on Texada Island, B.C.

In connection with the reported discovery by Stanley Boys on Texada Island, on the British Columbia Coast, of a mass of plant carrying the distinctive ether emanation over twenty years ago but since unknown, Dr Arthur W. Hill, Director of the Royal British Guardian, Kew England, is keenly interested

Dr Hill has written to Frank Kerr-tonde, of the Provincial museum of natural history, Victoria, saying the discovery, if it can be substantiated, is of every great scientific interest. He notes that if possible seed or plants with a strong musk scent may be forwarded to him at Kew, and gives instructions for their safe packing for the journey and outlines special precautions to be taken in forwarding them.

The result of the cider well recommenced by most persons of English upbringing—it was commenced as a pet by her cousin in England a quarter of a century ago is said to have been taken to England originally from British Columbia by the famous Douglas whose name is perpetuated in our Douglas fir

It is given as having originated on the American continent by authorities. It had remarkable value for perfume manufacture years ago and there are commercial possibilities about its rediscovery in British Columbia apart from world-wide scientific interest.

Located Lost Galleons

Florida Lost Wrecks Group Of An English Adventurer

Treasure buried long ago by pirates who had stolen it in raids on merchantmen is believed to be within the grasp of an expedition led by Brut-ford D. Jolly, an English adventurer, who, with his party, set out from Brisbane more than a year ago in a converted steam trawler. At least, Jolly believes the treasure is within reach. He has returned to England for a short time, but will continue his search as soon as he has vessel the trawler having been sold.

One of their party, Frank Cooper, who gave up a post in the gold-mining manufacturing industry at Teevel to join the expedition as gold diviner, was able to locate at Trinidad a number of ancient guns which experts say were scuttled in 1797 to avoid capture by the British Fleet, according to Jolly.

Finding the galleons, he said, was as easy as could be for Cooper, who was used for the purpose only a grains phone range. "That Cooper's work was successful we know," said Mr. Jolly, "because we took soundings and found the hulks in the identical shape of the sunken ships. They are down in only seven fathoms of water and it is easy for divers to work in —and, above all, they are in a very sheltered part."

Prairie Wheat Sales Higher

Show Substantial Increase Over Corresponding Period In 1932

Prairie wheat marketings showed an increase of 2,651,370 bushels over the corresponding period last year for the week ending June 23, according to Dominion Government figures released this week.

Total marketings for the crop year to date were 356,742,219 bushels as compared with 308,032,190 a year ago. For Saskatchewan the year's figures are 190,486,997 as compared with 113,983,699.

Russia's New Fast Train

With a new idea for locomotives, S. S. Valdner, an official scientist of the Soviet transport commissariat, has invented an exceedingly fast railway engine which is called an "ecotrain." The prefix "eco" is a trifle misleading, because the engine produces not fly, but the term is intended to describe the engine as of the aeroplane type, with propeller drive. The speed of that the train is stated at a speed of more than 180 miles an hour.

The production of petroleum in Canada in 1932 amounted to 20,624,000 out, the smallest yield recorded since 1930.

Ceylon's First Women Lawyer

Nineteen Year Old Girl Was Brilliant Scholar In London

Among those to pass the examination for call to the English Bar is Miss Avanthi Mehta, of Colombo, Ceylon.

Miss Mehta is only 19 years old, a slim Parsee girl from Ceylon, whose appearance would give the impression that her school days were hardly over yet. She was a brilliant scholar at the Marie Grey Training College, London, England, and after she had matriculated she read for the Bar at Lincoln's Inn.

"I saw her at her home in Hampstead, where she is living with her mother writes an Evening News representative. She was wearing a native dress of blue and gold

"I shall be the first woman barrister in Ceylon," she said. "There are, of course, a number of women lawyers in India, but up to now there have been none in my country."

"I am eager to begin work at the Bar in Ceylon, but I have to wait some time yet before I can do that. I cannot be called until I am 21, and I have to eat my dinner for three more terms. I may go to India first and practice there for a time before going to Colombo."

Miss Mehta said there was no branch of the law in which she took especial interest. Her father, who would be a general use. Her father is a marine superintendent at Colombo, and one of the few Parsees in Ceylon. There are only 7,000 of them, she said, but there are 100,000 in India."

More Aeroplane Passengers

Business Increasing On U.S. Lines and Competition Is Keen

The skyways of North America are being "double tracked."

A survey of major air lines carrying passengers to every corner of America and one of them planning to extend across the ocean showed that commercial aviation has increased its passenger income by one-third in the last year.

The reason: Renewed activity in general business and loss of what one official termed "air anxiety" by the public.

The result: A battle for the new business possible in that of the railroads several decades ago.

In the scramble for passengers, millions of dollars have been poured into new equipment. Soundproof cabins have been evolved by United Air lines American Airways has responded with ships in which passengers can sleep on comfortable berths during night trips between Chicago and the Pacific Coast.

A smaller line, Northwest Airways, has ordered a fleet of "planes capable of 215 miles an hour with a cruising speed of 180 and announced a plan to compete for business between Chicago and the Pacific northwest.

Of the coast, Northwest will connect with Pan American Airways, which plan to extend its present line to Alaska across the Arctic to Asia. At present Northwest operates between Chicago and Montana and northward to Winnipeg, Man.

An proof of increasing business the Chicago municipal airport announced that 6,837 passengers were carried out of Chicago on regularly scheduled trips during June, an increase of 109 per cent. from a year ago.

Many licensed pilots have obtained employment in the past few months, air line officials announced, because of additional planes placed on schedules.

Trips between Chicago and New York have been doubled by three lines. A traveller between the two cities now has a choice of more than 20 planes daily, the time of the schedules ranging upward from four and three-quarter hours southbound to five and one half hours westbound.

House For Orphan Boy

Adopted By Wealthy Couple Whose Head Is Bandaged

The home of a wealthy silk dyer and such advantages as a college education were ready for a 13-year-old orphan boy from Omaha, Neb., in what seemed like a modern version of the old story of Cinderella and the prince.

The boy was Peter Christopulis, and inmate of Father Flanagan's Boys' Home near Omaha. A picture of the lad, an orphan since early childhood, was the means through which he has become just like a son in the home of Mr. and Mrs. Jean Dalrymple, who live at Paterson, New Jersey.

It seems that Strengo saw the picture of Peter and was struck by the resemblance of his son, Harry, who was drowned in Green Pond, N.J., a little over a year ago. As a result Strengo journeyed to Omaha to bring Peter in the Strengo household to take the place of the dead boy.

Deadly Monotony

With the nations fooling the way they do about each other, what need is there for trade; that go 116 miles an hour and skyboard that go 200 miles an hour? It must be that we are perfecting commodations in order to get away from each other as fast as we can.

A fence twenty miles long without a hand or barn has been completed in Kingsville, Tex., on the boundaries of a ranch.

Gigantic Battle Against Bovine Tuberculosis Being Waged By The Department Of Agriculture

Over 1,000,000 tuberculin tests were conducted on cattle in Canada during the past year, it was stated by Dr G. Hilton, veterinary director-general of the department of agriculture. Almost 1,000 000 cattle will be retested this year and between 10, 000 and 15,000 new herds added. With Canada's cattle population approximately 9,000,000 and her much greater population slightly over that of the total, the battle to free Canadian herds from tuberculosis is a gigantic one.

The department is discontinuing altogether this year compensating farmers whose cattle react to the test if they are under the municipal tubercular order. However, under the provincial order the compensation will be paid as heretofore.

The object of the department is not primarily to protect the health of the public in the battle against bovine tuberculosis. The protection of the health of the people is a provincial and municipal matter. It is for the provincial and municipal authorities to see that milk and milk products free from tuberculer germs, are provided to the consumers of the Dominion. These authorities are responsible that the pasteurization is effective and sample milk kept from the public.

The primary object of the agricultural department is to "reduce the economic losses in livestock because of tuberculosis."

What fights against bovine tuberculosis first started in this country. It was in what were known as supervised herds. In this the government tested the herds but did not pay for any compensation for the cattle that were found out. That is still in force and nearly 20,000 herds will be dealt with this summer.

Then came the municipal plan in 1914. Under the municipality took steps to insure that all the milk sold within its borders was from tuberculin tested herds. The government tested any herd from which milk was sold to the corporation making the application. Some 36 municipalities originally went into the scheme and the government tested the herds. The farmers were compensated for the loss of the reactors.

For some time it has been felt that this was a very ineffective method of fighting the disease and very expensive. Accordingly some eight or nine years ago the department decided to carry on the municipalities already in the scheme but to accept no more applications. Now, however, the entire scheme has been dropped in favor of the new provincial plan, the accredited herd plan and the supervised herds.

One of the arguments against the municipal plan was that only herds supplying a certain municipality would be tested. All around it were cattle in herds not so tested. The owner of the tested herd was continuously replacing animals in his herd with animals he bought elsewhere. The result was that the herds would not stay free of the disease and the number of animals which had to be slaughtered was great with a correspondingly heavy compensation bill for the government with very little progress.

Under the restricted area plan however entire areas are cleared of tuberculer cows and county after county has gone in for this plan with its compensations.

The accredited herd plan, an international agreement whereby herds with purebred animals for sale are tested and compensation given for animals destroyed will remain in force.

Daylight Saving In Finland

Finland is the latest starter north of the Equator so far as summertime is concerned. The clocks did not go forward until June 30th South of the Equator, of course, summer-time doesn't start until September or October, and carries on through our winter in one country W's always daylight saving time. In Soviet Russia all clocks are one hour in advance permanently—Summer and Winter

LOTS OF GRACE ABOUT THIS JUMPER DRESS WITH TRAY SHOULDERS

An interesting feature is the soft becoming neckline. Its lines are slenderizing too.

Soft crepe silks, either plain or printed, are lovely for this model.

Carried out as the original, you'll use plain crepe silk in beige for the dress with a brown and white printed for the gumpee

Red and white crepe silk print jumper with plain white gumpee is cute idea.

The dress can also be worn without the gumpee.

Its simple styling makes it very suitable for cotton fabrics and fine silks in white or pastel shades for your summer wardrobe.

Style No. 732 is designed in sizes 14, 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3¼ yards of 39-inch material for dress, with 2¼ yards of 35-inch material for blouse.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

To Enforce Act

Grading and Stamping Of Seed On Compulsory Basis In Saskatchewan

Saskatchewan is putting teeth into the Federal Live-stock and Live-stock Products Act, which provides for the grading and stamping of beef.

By a provincial order-in-council, made under the regulations contained in the federal order-in-council which has been in effect for almost two years, have been made compulsory.

In other words, the regulations which have been operating on a voluntary basis are now placed on a compulsory basis with the onus on enforcement upon the federal government.

Publication of the provincial order-in-council, together with the regulations, as set out by federal enactment are controlled in the current issue of the Saskatchewan Gazette.

A Rejuvenated Trader

Tom Harvey, veteran trader of Cumberland House, 100 miles west of The Pas, Man., has created a new record for unusual freighting sights on the Saskatchewan River. Mr. Harvey needed a dwelling near his store, and having one in The Pas, decided to move it into the hinterland. It was loaded on two scows and towed by gasoline tug.

An Example To Europe

Norse Countries Have Preserved Peace For Over Century

For more than a century peace has reigned in the Scandinavian and Baltic countries. No war has ruffled the neighborliness of these nations for almost 125 years.

Sweden, Norway Denmark and further south Holland practiced the spirit of the Grand Kellogg anti-war pact for more than a century before that document came into an-nounce a political writer on the daily Morgenbladet-ner reminds his readers. There is no counterpart to this phenomenon in the rest of Europe he says.

Two facts he regards as especially interesting are that this north-west-ern peace atmosphere of Europe has not arisen from written treaties, but from an attitude of mind and that it has shown a tendency to stop the spread of European thunder storms to the north west and will most likely continue to do so.

Carries Radio-Phone Set

NNon Idea For Reporters In Getting Entire Satisfaction

New Idea For Reporters In Getting radio-telephone set has received its baptism of reportorial fire and besquibbed itself admirably.

The set weighs 50 pounds and is carried on the back of a reporter. It has a range of about four miles if used less than two watts power and operates on ultra-high frequency waves.

The midget set received its first real test under actual reportorial conditions when used by George Kirkpatrick, writer during the A. A. U. track and field championship at Chicago recently. Using the set Kirkpatrick was able to radio his stories, located at the judges stand the results of many events even before the A.A.U. timers could cover the distance from the finish line to the judges' stand.

Comfort For Spectators

Winter Sport Enthusiasts In Switzerland Enjoy Heated Grandstands

Grandstands for the accommodation of winter sport enthusiasts in Switzerland are now being heated electrically in one such stand immediately behind are placed in rows of three under the seats. The strips radiate a uniform heat, and only a short time is required to heat the entire stand to this manner In order to avoid short circuits, every cable which is grounded through an automatic switch which immediately disconnects the endangered section The current is supplied by the near-by River Aare, which makes the artificial ice for the skating rink or other sport.

Scientific Investigations Will Feature Work Of Government Expedition To Arctic Archipelago

Western Forage Crops

Pasture Crops Occupy Only About Five Per Cent. Of Cultivated Land

The amount of cultivated land devoted to forage crops in the three Prairie Provinces has been relatively unimportant as compared with the total area which has been seeded annually. The statistics which are available show that hay and pasture crops occupy in the neighborhood of five per cent. About half of which, or 1,000,000 acres is improved pasture. These figures taken by themselves, however, may be misleading in that they do not include cereal crops which are pastured or harvested in the sheaf for hay The latter in Western Canada is very important. Only some are grown more extensively for feed than all other forage crops combined No estimates are available of the uncultivated pasture lands, which are very important also and are chiefly responsible for the United acreage of improved pasture Almost 7,000,000 acres of ranching country are leased for grazing purposes.

All Metal Homes

Now Process For Making Marble-Surfaced Steel

Preparing for an era of all-metal homes, Dr. Malcolm Leitch announced a new marble-surfaced steel

The stone effect is imitation, made by a laminated resin surface woven inseparably with the metal Any other finish made with the new laminated resins can be added. In the manufacture, it can be made to imitate wood.

Decorative finishes already are applied to steel by other methods, the announcement states, but says this is the first process to make the surface seem an integral part of the metal.

The adhesive is an alloy, such as tin or zinc, which fuses with both the steel and the covering.

Committee a Record

Machinnon of Machinnon who to 63 years of age presided at the annual dinner of the London Inverness-shire Association the other night and he reported he had the honor to succeed himself a record. He is enjoying his visit to London immensely The Mackinnon is a clear friend of the King and in proposing royal toasts he always makes a brief reference to the King the Queen, the Prince of Wales the Princess Royal and other members of the royal family an unusual custom Glasgow Herald.

The Department of the Interior's 1931 expedition to the eastern islands of the Canadian Arctic Archipelago sailed from Montreal on board the Hudson's Bay Company's steamship, "Nascopie," on the morning of July 6, beginning one of the most extensive patrols undertaken in many years This year's visit to the northern posts will be extended to points on Hudson and James Bays and in addition to the regular inspection will also make a study of plant life, mineral occurrences, and possibly, it is expected that the voyage will cover about 12,000 miles and will be completed late in September or early in October

Major D. L. McKeand of the Dominion Lands Administration is again the Officer in Charge, with Dr. W. C. Bethune, also of the Department of the Interior, as assistant Mr. A. Stanley Mathews, botanist and historian, Dr J A Biddell Department of the Interior, Ships Doctor during the northward patrol Dr M. O. Malte, Department of Mines, Botanist, Mr. W. H. B. Middleton, Department of Marine Meteorologist, Dr H. G. Cushing Inspector of Mines, Geologist Dr Ivan W Parnell Macdonald College Farmatologist and Captain, R. Bartlett, Ship's Master Dr. Biddell, the Ship's Doctor on the northward voyage will disembark at Pangnirtung Baffin Island, to complete the work of Dr. L. D Livingstone as medical officer on Baffin Island. Dr Biddell will remain there for two years Dr Livingstone returning to Ottawa with the expedition.

Inspector T V Sandys-Wunsch is in charge of the Royal Canadian Mounted Police party with the expedition which consists of the following: Constables R. Taylor and H. Kearney, and Constables S. S Spalding and A. E. Fisher Corporal Kearney will join the detachment at Chesterfield Inlet, Eskimo Island, while the others will relieve members of the force at other posts who have completed their tour of duty in the North.

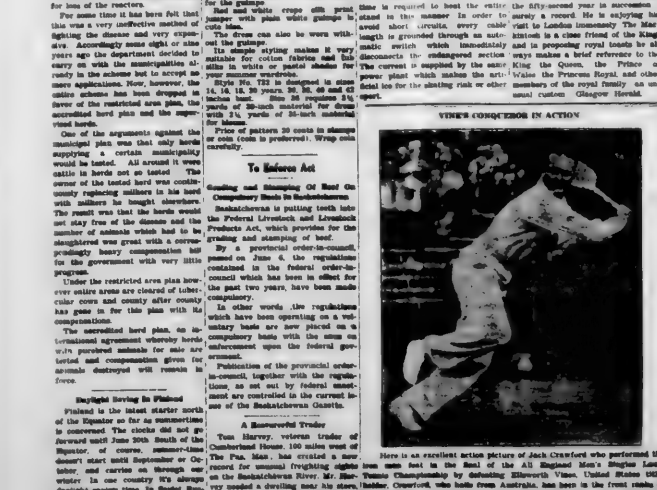
Eighteen posts in all will be visited by the ship during the voyage the supplies will be distributed to company trading ctures particularly in Hudson and James Bays. The first call after leaving Montreal is made at Cartwright, on the Labrador Coast, followed by Port Burwell at the entrance to Hudson Strait and the following points in the order named Lake Harbour, Stupart Bay, Wolstenholme, Cape Dorset, Port Harrison, Charlton Island, Churchill, Southampton Island, Dorset Lake Harbour, Port Burwell, Dundas Island, Craig Harbour, Bache Peninsular, Clyde River, Pangnirtung, Cartwright, and St John's, Newfoundland The vessel will call at Godhavn Greenland, to exchange courtesies with the Danish officials there will be made on the return part of the journey possibly after the call at Clyde River. Baffin Island Lake Harbour, Pangnirtung, and Pond Inlet are visited Baffin Island Dundas Harbour on Devon Island and Craig Harbour on Ellesmere Island They are all Government posts and among the chief objects of the expedition is to re-provision these posts and to effect changes in the personnel.

Dr Malte, the leader of the expedition, will make the entire voyage Dr Cunning geologist, will leave the ship at Churchill Beach at the end of Hudson Bay and cover the area between there and Wager Inlet at the western entrance to Hudson Strait, rejoining the expedition when the boat makes its second call at the latter part Dr Parnell parasitologist, will disembark at Charlton Island and carry on his studies in that area returning to Ottawa by rail from Moosonee.

First Impression

Biggins visited London for the first time, and on his return was asked by his friend Smith what struck him first about the Metropolis.

"The traffic," replied Biggins, "and my next impression was a vast desert on my brow, a sensation of entomptic and a voice asking me if I felt better."



VINE'S CONQUEROR IN ACTION

Here is an excellent action picture of Jack Crawford who performed the iron man feat in the final of the All England Men's Singles Lawn Tennis Championship by defeating Ellsworth Vines, United States title-holder. Crawford, who hails from Australia, has been in the front ranks of tennis stars for a number of years but this is the first time he has won the British title The match between the Australian and United States champion must be the one with Crawford showing quick superiority in the final set.

WORLD HAPPENINGS BRIEFLY TOLD

The four-power European peace pact has been signed here by Premier Mussolini, and representatives of France, Germany and Great Britain.

Sixty Jersey cattle, including three bulls, valued at more than $10,000, left Jersey on their way to their new owners in Canada and the United States.

Drought in parts of Southwestern Africa is now in its eighth year, and many farmers have been ruined while others are trekking over the country with their cattle in search of grass.

During the four weeks ended June 30, Canadian grain exports through New York included 2,132,000 bushels, a decrease of 3,007,000 bushels from a year ago.

With several thousand men on the reading list desirous of entering the Royal Canadian Mounted Police, the list has been practically closed for the time being.

Simcoe has the most up-to-date city in Canada, according to Col. George A. Drew, of Toronto. Addressing the Empire Club at Winnipeg, Col. Drew said Port Dalhousie, north of Simcoe, was the greatest eyesore centre in Canada.

There was a very definite pick-up in the volume of Canadian agricultural products to the United States in June, the value of the total being $10,000,000 compared with $917,000 in June, 1932, a report of the Department of Statistics said.

The "Royal Rest," steel $4-ton railway tent now on show at the Chicago Exhibition, will likely visit Winnipeg this fall after the close of the Chicago Fair, according to a letter received by Mayor Ralph Webb from the Montreal representatives of the London, Midland and Scottish Co.

With an Anglo-Russian commercial warfare ended as a result of negotiations between Maxim Litvinoff, Soviet Foreign Commissar, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased export trade with the Soviet Union, officials said.

Psychological Research

McGill University To Investigate Portable Theatres Of Scientific Interest

Last year's report of the Empire Marketing Board referred to a decision of the board to share with the National Research Council of Canada the cost of maintaining an Institute of Helminthology (study of many and intestinal worms) at Macdonald College, McGill University. Headquarters for the investigation of parasitic diseases of domestic animals.

The laboratory buildings have been completed and equipped during the year with funds provided by the Canadian Government. Dr. T. W. M. Cameron, faculty of Edinburgh University, has been appointed director of the Institute and work started on April 1, 1933. The establishment of the institute has been welcomed by agricultural and lay opinion in Canada. The administration of the work is under the control of a specially appointed committee on Parasitology of the National Research Council, of which Dr. H. M. Tory president of the council, is chairman.

Prince Says Irish Wins

Second Maiden Has Accolade Bestowed For Performance

The Prince of Wales has purchased another aeroplane—his sixth. The new machine is a De Havilland Dragon Rapide, with a maximum speed of about 130 m.p.h.

It is a biplane with six cross-seats for passengers in the cabin, and has a comfortable compartment for the pilot in the cockpit. The twin cabin engines are placed in nacelles between and the wings, and the machine is fitted with a retractable undercarriage.

The Prince's new aeroplane will be ready for delivery in the autumn.

Wheat Is Higher Than Cotton

Dr. Alexander Meiklejohn said, speaking in the seventeenth century "If we would rightly clothe, we let not the thing be dear, but cheap." The contrast is with conditions in the present day world.

Flight-Lieutenant F. H. Fielder, the prince's personal pilot, took the machine across the channel on a test flight. The prince intends using it himself.

Winding Sweeper Sale

By Ruth Regere

529

FOR HANDSOME OR YOUTHFUL WOMEN WHO FEEL THEY CAN SUPPORT SLIM-MING LINES

Here's a sweep Paris model you can make at just the cost of the material.

It is a dress you can wear and wear and always look smart.

It is a black and white conservative checked soft crinkly crepe silk.

It depends entirely on the lines for its smartness. It needs no further adornment.

It has the slimming wrapped bodice and interesting curved hip seaming to lengthen the silhouette. The sleeves set too full, puff just above the wrists which gives a certain grace to the lower.

Printed or plain crepe silks are equally smart to develop it.

Style No. 529 is designed in sizes 14, 16, 18 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 6 yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

CHEESE SOUFFLE

3 tablespoons quick-cooking tapioca.
1 cup milk, scalded.
1 cup grated cheese.
½ egg yolks, beaten until thick and lemon-colored.
½ egg whites, stiffly beaten with 1 teaspoon salt.

Add tapioca to milk, and cook in double boiler 15 minutes or until tapioca is clear, stirring frequently. Add cheese and stir until melted. Cool. Add egg yolks and mix well. Fold in egg whites. Turn in greased baking dish, placed in pan of hot water, in moderate oven (350 degrees Fahrenheit). Bake in done when it shrinks a little and is brown. Serve 4.

When made with quick-cooking tapioca and properly baked, souffle do not fall, but stay tender, moist and light while being served.

RASPBERRY SUMMER PUFF

2 cup small vanilla wafers, rolled fine.
2 pounding raspberry gelatine dessert.
2 gills raspberries.
½ cup cream, whipped, sweetened and flavored.

Boil waters fine and line buttered pie plate with the crumbs. Prepare gelatine according to directions on package. Chill and when beginning to set, pour into cream blend plain and chill. When set add a layer of fresh raspberries and cover with whipped cream. 6 portions.

Old Document Found

Letter Written In 1792 Offered Judgeship To Nova Scotia Member

A letter in which Canada's second premier, Alexander Mackenzie, offered a judgeship to Senator William Miller of Liverpool, N.S., in 1876, has been recently presented to the provincial archives.

Written in the premier's hand-writing, the letter reads:

"My Dear Sir: We expect within a few days to make the several appointments to the county court in Nova Scotia on the local government's desire to have the predominating provided for by the statute.

"I shall be much pleased to offer one to submit your name to his excellency for the Cape Breton district, but the salary is but the magnificent sum of $1,000 per annum.

"If you think you can live upon that, and I have every reason to believe that it will give general satisfaction to the district and to the province.

"I will feel greatly obliged by receiving your early answer, and remain, My Dear Sir, Yours Faithfully, A. Mackenzie."

It's as simple as this. The national debt seems to pass or go to pieces.

SUNDAY SCHOOL LESSON

JULY 30

GIDEON

Golden Text: "Jehovah is the strength of my life. Of whom shall I be afraid?" Psalm 27:1.

Lesson: Judges, Chapters 6-8.

Devotional Reading: Psalm 86:1-6.

Explanations and Comments

The Point-Resisted Depart, verses 1-8. Gideon and his band were to fight the Midianites under God's leader, and to God must be accorded the victory. Lest they should boast of having themselves defeated the enemy, their numbers must be reduced. Gideon therefore directed all who were fearful to depart, and more than two-thirds of the warriors left the camp. Possibly the men who had wrought most of what they would do to the Midianites were the very ones who were afraid when they stood on the height and looked at the encampment of the enemy spread along the opposite side of the valley. The "founders who were the boldest in the summit-chamber were the first to cry, "Brave qui peut" (Let him who can, save himself).

When God needs men for His work He chooses the hearts courageous. When the bugle sounds the martial note, some one has observed, there are many in the Church who suddenly remember an engagement that prevents their joining in the battle. The men who "lapped" at the waters turned out to be two to three. Would it be so low in the moral habitude of today?

Three Hundred Reduced To Three Hundred, verses 8-8.—The number of God's army looked well, but God took no chances. He sanctified the people, and a small savage cadet it "ewe" (Hebrew). Gideon himself was sent to the water and there tested them further. All but three hundred "scooped down upon their knees to drink. The Hebrew for this is said to mean literally "to drink by putting the mouth to the water," as, for example, a horse or an ox does. These hundred of them carried the water to their mouths with their hands, "lapped it with their tongues, as a dog laps," and they were the men chosen to fight.

Russia Spoiled Plans Of Finnish Aviator

Pilot Was Not Allowed To Go Up Until Cloud Cleared

Stymied by rain and wind after 16,000 miles of flying which would have made his name thus half way around the world if it had not been for international complications, Captain Walter Brenner, young Finnish flyer, brought his monoplane to rest at the Ottawa air station. His Atlantic flight was cancelled.

Captain Brenner left Finland on May 1, intending to fly his way across the usual 'plane, which took him to Cape Town and back last year, around the world. After completing 10,000 miles of the route over Germany, Arabia, Persia, India and China, he finally arrived at Vladivostok. From there he intended to fly to Vladivostok, to Nome, Alaska. However, Russian officials refused to allow him to fly up the east coast as he was forced to skip his 'plane to the Pacific coast instead to fly from Vancouver.

It is estimated that there are nearly 200,000 kinds of flowering plants.

Canadian Landscapes

Exhibition Of Water Colors Shown In England

London's gallery-goers are showing keen interest in an exhibition of water colors, many of Canadian scenes, being shown at the Graham Gallery in New Bond Street by Miss Elizabeth Harper of the Overseas league. Queen Mary is among those who have attended the show.

Miss Harper, great admirer of Canadian landscape, has painted scenes as far north as Hudson Bay and includes in the present exhibition pictures done at Windsor, N.S., Ottawa, the Rockies and as far west as Vancouver. Among her subjects are: "Mount Edith Cavell," "Mount Robson," "Great Trees, Stanley Park," "A Sunrise on Hudson Bay," "Moose Factory," and "Scenes on the Moose River in Northern Ontario," "The Lions, Vancouver," "Grouse Mountain," "Lake Louise and Emerald Lake."

Capture in her strong water colors of Canada's brilliant atmosphere as well as the country's more sober moods occasioned much favorable comment.

Her show contains also pictures painted in New York and in the West Indies.

An African Superstition

Natives Believe Babies Should Be Smoked Over Fire

One of the most peculiar tribal customs among natives of darkest Africa, is the superstition that a baby must be held over the smoke of a camp fire in order to make it "pure" and strong. A baby must not associate with one which was not "smoked" as an infant.

South was the report of Miss Ruth C. Tucker, B.M., of Johannesburg, South Africa, a nurse of the American Board of Commissioners for Foreign Missions. She is a native of New Britain, Conn., and her parents live in Alhambra, California.

"But we are gradually proving," Miss Tucker wrote, "that such superstitions are groundless, and that bits, mashed or unmashed, are safe in the hands of our native Christian nurses."

Heavy Tourist Travel

Indications That Visitors To Scotland Pack Will Equal Peak Year Of 1930

Tourist travel in Canada's principal parts this season has given indications of equalling in volume the peak year of 1930, according to information received from Hon. T. G. Murphy, Minister of the Interior. The first day of July marked the opening of the season in most national parks, particularly in the Rocky Mountain region, and the number of visitors over the Dominion Day holiday is usually taken as an indication of what the season will produce.

At least national park in Alberta, Jasper, reported a considerable increase over the Dominion Day and many tourists slept in their cars it was reported.

W. N. U. 2004

C.C.F. MANIFESTO DECLARES WAR ON CAPITALISM

Regina, Sask.—What the Co-Operative Commonwealth Federation seeks for its new Dominion of Canada and how it aims to achieve its reforms is now before the public.

In a 4,500-word manifesto, issued on the opening of the first national convention of the organization here the C.C.F. disclosed its program for a national planning commission to guide the nation in its transitions, boards of management for control of public utilities and other social enterprises, and set forth the changes desired.

Under the new regime which the organization hopes to establish after the next federal election, when it will seek governmental power, banking and insurance would become socialized and gradually socialization would be extended to industry. First of the industries to come under public control would be transportation, communication and electric power production, to be followed by mining, pulp and paper, distribution of milk, bread, coal and gasoline. New policies for foreign trade and external affairs would be established and the system of taxation would be radically altered.

Throughout it all was sounded war on capitalism with the declaration that "the C.C.F. government will rest content until it has eradicated capitalism."

"In the type of economy that we envisage," declared the manifesto, "the need for taxation, as we now understand it, will have largely disappeared. It will nevertheless be essential, during the transition period, to use the taxing powers along with other methods, as a means for providing for the socialization of industry and for extending the benefits of increased social service."

"At the present time capitalist governments in Canada raise a large proportion of their revenues from such levies as customs duties and sales taxes, the main burden of which falls upon the masses. In place of such taxes upon articles of mass consumption, we propose a drastic extension of income, corporation and inheritance taxes, steeply graduated according to ability to pay. Full publicity must be given to income tax payments and our tax collection system must be improved up to the highest standard of efficiency."

"We also believe in the necessity for an immediate revision of the taxes as of Dominion and provincial sources of revenues, so as to produce a co-ordinated equitable system of taxation throughout Canada."

The manifesto assailed the "debt creating character" of present-day governmental financing. "The C.C.F. proposes," it said, "that in future no public financing shall be permitted which facilitates the perpetuation of the parasitic interest-receiving class; that capital shall be provided through the machinery of a national investment board and free from perpetual interest charges."

Glasgow Nurse Is Bride Host

Bailey Camp, Eng. A Glasgow nurse and daughter of a famous military family, Miss Helen Rotherburgh, was one of the five women competitors as the classic King's prize service rifle match opened in the National Rifle Association empire meeting. There are nearly 1,000 in the King's shoot and 14 are from Canada.

Bush Sufferer Is Dead

Hamilton, Ont. "I never saw such suffering in my life," was the comment of Humphrey Mitchell, Labor member of parliament for East Hamilton, in writing of life in Russian under the Soviet regime. Mr. Mitchell has been visiting the U.S.S.R. and at present is in Germany. His message was addressed to Mayor John Peebles.

Wage Increase

Winnipeg, Man.—A 10 per cent. increase in wages of several members employed by the Western Shirt and General Manufacturing Company was announced.

Trade With Russia

Great Britain Looking For Greatly Increased Business.

London, Eng.—With an Anglo-Russian economic warfare ended as a result of negotiations between Maxim Litvinoff, Soviet Foreign Commissar, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased trade with the Soviet Union, officials said.

Steady progress is being made towards a new trade pact to supplant the one scrapped at the beginning of the economic troubles which reached dramatic heights with the trial of six British electrical engineers on charges of sabotage and bribery in Moscow.

Products such as timber and a good outlet in Great Britain and the new trade pact will facilitate such business.

The projected accord also will enable Great Britain to exert more pressure upon the Soviet Union for a correction of Britain's unfavorable balance of trade.

Any export the British will gain in the increased business will be small by at the expense of Germany where half of all the Russian purchases abroad have been placed.

Manitoba Crops

Drouth and Hoppers Reduce Yield In Many Sections

Winnipeg, Man. Varied crop prospects in Manitoba, ranging from excellent in the area north of Riding Mountain to poor in the extreme southwestern corner, are reported in the summary issued by the Manitoba department of agriculture.

Absence of adequate rain and grasshopper damage continue as outstanding factors. Rain has been insufficient for seven weeks. A condition described as a mosaic for provincial use, and a strip across southern Manitoba near the Dakota boundary are now infested with full-grown, flying hoppers, says the report.

Rather than chance loss through drouth and hoppers, some farmers are cutting their crop for green feed.

British Empire Conference

Advance Proposal For Empire To Discuss Its Own Affairs

Melbourne, Australia.—Australia joined in the expressions heard elsewhere, official and unofficial, to the effect the empire should hold its own conference if the World Economic conference proves a failure.

Addressing a gathering of ex-servicemen here Hon. H. G. Latham, Attorney-General in the Commonwealth Government, declared: "If the World Economic Conference fails I earnestly hope an attempt will be made to call a British Empire conference at which empire affairs may be placed upon a co-ordinated and co-operative basis."

Caught In Drifting Ice

Motor Schooner Delayed a Week Reaches Churchill Safely

Churchill. After nearly a week in the ice floes of Hudson Bay, the motor schooner "Fort Severn," Hudson's Bay Company, with Capt. D. O. Morris in command, docked here July 18.

When soon upon arriving here, Hugh Conn, district manager, said there had been no suffering. The "Fort Severn" had been caught in the drifting ice. When the wind was favorable the sails were raised and the ship moved slowly through the ice.

A cargo of fur from the post at York Factory was unloaded. The ship loaded supplies for northern trading posts and sailed for Cape Dobbins.

Prince's Hotel Big Winner

Edmonton, Alta. The Prince of Wales' herd from High River was again a big winner at the Edmonton exhibition. In the Shorthorn class Princeton Marion won the junior and grand championship, also first on junior get-of-sire, progeny of dam and breeder's herd. Campbell Farms, of Medley, Alta., showed the senior female champion, which was made reserve grand.

Canadian Business Important

United States Pleased To Note Recovery Of Canada

New York.—Commenting on the "evidence of wide-spread improvement of business in Canada," the New York Times says:

"That these gains have been made without any plan deliberately to depreciate the Canadian dollar off-on other proof of the strength of natural forces now tending to promote recovery."

The Times also notes: "The evidence of Canadian improvement is of special interest to the United States, because a move American capital is invested in Canada than in any other foreign country, and Canadian markets are second in importance only to those of the United Kingdom as an outlet for American goods."

Home and School Federation

Officers Elected At Biennial Convention In Port Arthur

Port Arthur, Ont. Dr. G. W. Kerby, Calgary, was elected president of the Canadian National Home and School Federation at the annual meeting of the third session of the convention in Port Arthur.

Other officers were elected as follows: Vice-Presidents, Mrs. H. B. McLaughlin, Oshawa, Ont.; Provincial vice-presidents, Ontario, Mrs. McLaughlin, Port Arthur; Manitoba, Mrs. A. L. Delmage, Vancouver; Alberta, Dr. Kerby, acting vice president; Saskatchewan, W. J. Young, Saskatoon; Manitoba, John Halstead, Winnipeg; Maritimes and Newfoundland, Miss Dora Baker, Truro, N.S.

Vancouver was chosen for the 1935 convention and the British Columbia federation's suggestion of a self-help part of the program by the organization.

Assistance Given Manitoba

Says Province Should Make Own Arrangements For Financing

Winnipeg, Man. Apart from the financial assistance rendered Saskatchewan in respect of areas in which there was a three-year crop failure the Dominion Government has helped the province of Manitoba more than any other province, according to a statement issued by Hon. T. G. Murphy, Minister of the Interior.

The statement detailed financial aid given Manitoba and claimed in view of the assistance rendered in connection with other responsibilities, it was incumbent on the Manitoba Government to make its own arrangements for financing direct unemployment relief.

Conversion Loan Plan

Great Britain Is Looking To Convert Half Loan

London, Eng.—Great Britain, aiming to convert 5½ per cent. war loan bonds floated in the United States in 1917 into 3½ per cent. sterling bonds, asked the American holders to accept abrogation of the bonds' gold clause.

As an inducement an offer was made of conversion of each old 5½ per cent. $1,000 bond into a sterling bond of £300 that is, at the rate of $4.86 which the United States dollar and pound exchange rate touched Wednesday.

The bonds were floated just before America entered the Great War in 1917.

No Stabilization Plan

No Action Yet Taken With the U.S. Dollar Or With Sterling

Ottawa, Ont. No action is being taken with the United States dollar or with the sterling. Accordingly the Dominion cannot be said to be definitely linked up with either. This was the explanation given here when the discussion over empire currencies in the British House was referred to government officials.

Leslie Horn-Belaike, financial secretary to the treasury, told the British House that no fresh proposals were under consideration for the stabilization of empire currencies.

To Discuss Gas

Vancouver, B.C.—The gas whose booming note at 9 p.m. has met Vancouver's watch-pulling for 34 years, will be silenced after Sunday night next. Its original purpose of supplying lamps for ship's entrances having passed, the Dominion Government has decided to save its annual cost in powder of $300. The gun was cast in 1816 and he ought not to defend Esquimalt.

WHEAT GROWING NATIONS REACH AN AGREEMENT

London, Eng.—Henry Morgenthau, United States wheat negotiator announced that the "Big Four" wheat producing nations had reached an agreement with Danubian countries providing for restriction of exports from the Danube area to 84,000,000 bushels this year and 80,000,000 next.

As regards the agreement with the Danubian states, assent was given on the part of Australians and Argentine experts for their countries, and final approval awaited the decision of the chiefs of the delegations.

There was reason to believe that an arrangement would be made with the Russian delegation during the visit or part at 75,000,000 bushels.

The accord is held to be of the highest importance, since it represents the keystone of previous set up by Australian delegation to participation in an acreage reduction scheme, which is considered necessary to mop up the large existing wheat surplus and help to raise prices.

Negotiations for an agreement regarding reduction of the world wheat acreage and exports began in principle during the World Economic Conference here by spokesmen of Canada, the United States, Australia and Argentina.

The "Big Four" representatives went directly from a meeting with the delegates from four Danubian countries Hungary, Rumania, Jugo-Slavia and Bulgaria—to a session with Russian spokesmen.

The Danubians had first been asked to limit exports this year to 80,000,000 bushels and then conceded a volume of 85,000,000 bushels.

Upon representations, however, that this year's crop in these countries is likely to be smaller than that provided a quota of 84,000 000 bushels, providing that next year's amount will be limited to 80,000,000 bushels.

Visiting Western Provinces

Trip Of Dominion Liberal Leader To Last Five Weeks

Ottawa, Ont.—On the first stage of a western trip which will occupy five weeks and probably take him to all three prairie provinces, Rt. Hon. Mackenzie King, Dominion Liberal Leader left Ottawa July 19.

The Liberal leader may visit the Great Grain Exhibition at Regina. He will go to his own constituency of Mackenzie, Sask., where a by-election to fill the seat vacated by the appointment of W. F. Kuppel to the tariff board is to take place.

Spoken Content

Submerged Continent In Pacific Twice the Width Of America

San Diego, Cal.—Captain C. B. Mayo, who sailed the naval tanker "Ramapo" plying between San Pedro and Manila made an extensive study of the ocean bottom, said he had mapped a submerged continent in the Pacific twice the width of America. Last May Captain Mayo discovered a new deep with the most depth finder off the coast of Japan, where the bottom fell away to 5,201 fathoms. It was one of the greatest ocean soundings ever made.

Planned Economy Plea

Vancouver, B.C.—James W. Dawson, former Calgary business man and prominent Rotarian, died before following a lengthy illness. He was 61 years of age. Mr. Dawson was a former president of the Crown Lumber Company in Calgary. He had spent two years travelling in India, the Orient, Australia and New Zealand organizing Rotary clubs.

Rotary Church Control

Berlin, Germany—Rudolph Hess, Chancellor Hitler's general representative, ordered all Nazis to register for church elections, which are expected to deliver German Protestants into hands of the Nazi Government.

BEFORE CONFERENCE

Frazis Edward Fenwick, chief of the international Sugar Board who was called before the Sugar Commission of the World Economic Conference on the sugar situation

HAPPY DAYS FOR SAILORS ON SHORE LEAVE

Our press photographer, looking around for an optimistic subject to "shoot," bumped into these naval entrants from H.M.S. Pembroke, arriving in Surrey to participate in the National Rifle Association meeting at Bisley. Judging by their faces, the long ranges at Bisley hold no terrors for them.

Curtailing Wheat Production

Embargo Another Thing Among Basic Causes Said Page Of Income

"The three Western Wheat Pools are unanimous in their opinion that, as long as world markets for wheat are disorganized by abnormally large world carryover steps should be taken to secure an international agreement which would provide for the limitation of quotas to be delivered by the principal wheat exporting countries on the basis of world requirements. The method to be adopted by each of these exporting countries in controlling deliveries to the world's markets should be a domestic matter to be settled by each of these countries."

This statement was made in a recent address by George W. Robertson, secretary of the Saskatchewan Wheat Pool.

Briefly the plan seems to hit the unmarketable wheat, surplus out of the "visible supply" altogether, and it would remain out of the "visible supply" as long as the international agreement was in force. The individual grower would be under no restrictions whatever as to acreage and production, but the maximum amount of wheat which he could market from any given crop would be fixed as a result of the quota agreement. He is to be treated the balance would be entirely in his own hands.

It would mean that reserves could be held on the farms themselves instead of being stored in elevators as a constant threat to price levels.

Acreage reduction by law is not favored. "The Wheat Pool organization," Mr Robertson stated, "is of the opinion that legislation compelling in this country for straight acreage reduction would be exceedingly difficult, if not impossible, to enforce, and that the net result would be unsatisfactory to the producer.

"It would appear that a bushelage, rather than an acreage basis gives the best hope of success in bringing about a better relationship between wheat production and consumption."

Natives Take To Exploring

University Graduates Of India Start Expedition in Tent

Their imaginations fired and their spirit of adventure aroused by the success of the Mount Everest Expedition, native Indians are going in for mountain climbing as a sport. Ahmedabad an Indian mountaineering company to fly over the Himalayas, and an expedition on foot is now on its way to conquer the Pindari Glacier, in the United Provinces. Nanda Devi, a 25,660-foot peak of one of the central off-shoots of the Himalayas. Nearly all the members of this expedition are university graduates. They will collect flora and fauna and take a film of their journey.

Was Shipping Magnate

Sir John Ellerman, Richest Man In England, Is Dead

Sir John Ellerman, shipping magnate and reputedly the richest man in England, died recently at Dieppe, France. He was 71 years old.

Sir John, created a baronet in 1920 was controlling owner of the Ellerman, City, Hall and Bucknall lines, and other shipping companies. Formerly he was principal owner of the Leyland line.

Sir John was believed to be worth more than $100,000,000. The inheritance duty he was estimated at $1,000,000 yearly, yet he lived in one of the largest and most luxurious castle three years ago.

A Slow Oil Builder

Three hundred years ago apple trees were imported from Normandy into Acadia to lay the foundation of the now famous apple orchards of the Annapolis Valley. One hundred and fifty years later the United Empire Loyalists came to New Brunswick. Here Sarah and Prince Edward Island. Partly with three Maritime provinces, still a population of more than a million people had with developed and undeveloped natural resources capable of supporting many times that number—Financial Post.

English Postage Stamps

Some Slight Changes In Color and Design Are Contemplated

The great English postage stamp, showing only a picture of the ruling sovereign, is to be altered but only slightly.

Sir Kingsley Wood, Postmaster-General, announced the while addressing a banquet of the philatelic congress in London. He said

"Great Britain early next year, will have an issue of new stamps as the present expires at the end of the year. I hope to take the opportunity of making some changes in design and possibly color.

"It is not proposed to alter the size or the general character of the stamps which will of course bear the head of the king."

Criticism sometimes made that our stamps remain unaltered in the valued tradition of Great Britain that our stamps should bear the effigy of the ruling sovereign. They are distinguished also by the fact that it is unnecessary for them to bear the name of the country of issue.

"Any variation of size would mean the complete alteration of stamp machines, of which there are 9,000 in London alone."

Foreigners Of the Sea

Globe-Fishes Can Make Themselves Immune From Attack

Various sea-creatures, like the moon, vast and weird in appearance have the power of growing larger than normal as a temporary expedient, then reducing themselves, after regularly proper size, and then start life afresh. The fishes called globe-fishers or puffers, and their relations, the porcupine-fishes, have the swallowing water or air, make their bodies swell up like balloons. They are too rounded in shape to be fast swimmers, but they have an armor of spines which appear as a truly terrible hedgehog when they puff themselves up and bristle. No predatory fish dare attack these porcupines of the sea. When they defend themselves, by expelling the air, a loud hissing sound is produced.

Accident Was Lucky

Carmany Smuggler On Jugo-Slavian Frontier Almost Got By

Completely smash in appearance and temperament, a woman tried to cross the Jugo-Slavian Frontier into Italy, at Sussak. She was searched as a smuggler, but was not. No pecuniary but one was found on her. A Slavonic official straightening up suddenly, however, knocked her on the head with his head. The woman ejected bowed by a volley of choice oaths. The bowed by a volley of choice oaths. The bowed by a volley of choice oaths. The period was found to contain nearly $500 in notes of large denomination tightly rolled and wrapped in waterproof paper. The woman was confiscated and the woman prisoner.

Undying Good Work

It Continued Twenty-Six Hours At Sea Without Rest

It takes a lot of wireless to accomplish wirely. The action of many school boards throughout the country results like an old adage, "Every pound foolish." There is a tendency to overlook the good work that has been done by faithful and highly efficient teachers in the midst of the striving after economy in equipping young and untried teachers to fill the work of teaching. In this way the work of teaching up a school over a period of years is practically undone overnight.

Ship Compound Air

Spanish Engineer Has Invented New Type Of Vessel

Compound air is used on motor-propelled ships in a new type of flying machine invented and tested by a Spanish engineer, Don Fernando Pomar. He hopes to overcome the difficulty of flying in this machine, and also to reach the stratosphere in it. Don Fernando is now training in Spain for the summer of the machine for which a patent under the Straits of Gibraltar.

"Everything that's bought goes to the buyer, doesn't it?"

"No, dear, sometimes fresh air child, go to the water."

IS THIS A RECORD FOR GERMINATION?

These stands of wheat were taken from one of the plots at Indian Head, Saskatchewan, Dominion Government Experimental Farm, and are from seeds taken from one of the 11,000 samples received from over 30 different countries in the competitive classes at the World's Grain Exhibition and Conference. The seeds were planted in the ground on May 1st and plucked on June 29 in full ear with all shoots strong, clean and healthy.

Light According To Job

Whitehall Officials Grade Candle Power Of Electric Lamps

The high officials of Whitehall have decided that the power of the electric lamp that lights a man's desk must be in strict ratio to what he earns.

When the electric light was first installed in Whitehall A great social error was committed.

Every one from the highest official to the most junior clerk was given a lamp of the same candle power.

That system, which continued in force for years, is now being rightly set.

All electric lamp bulbs are being changed and now no small Richard knows the following order:

Senior clerks—32 candle-power.
Higher clerks—16 candle-power.
Junior clerks—8 candle-power.
Messengers—4 candle-power.

Quite important clerks—100 candle-power.

Permanent under-secretary for state—200 candle-power.

A high treasury official has written a poem of praise:

"The minister rich just grease it lavish
And a floodlight, illumines his pages.

The poor junior clerk has to work in the dark—
As his chief has been doing for ages."

The new system is now in working order

"My mother can now stand alone."—Mr. Ramsay MacDonald.

(Pictured in the centre is the model testing plant in the World Centenarian.)

New Diphtheria Serum

Will Immunize Six Months Old Baby For Life

The Alabama Health Department has developed a new diphtheria serum which it says will immunize a six-months-old baby for life by a single injection.

Dr. J. N. Baker, state health officer, said the serum had the approval of the national institute of health at Washington, and the Alabama committee of public health, and was the result of exhaustive research by the late Dr. Leon C. Havens, for 15 years director of the state laboratories here.

The health officer said the new preparation would run from 20 to 25 times as active as the crude toxoid

Bank Of England

To Be the Strongest Purchase In the British Isles

London's newest fortress is the Bank of England.

When the building is completed, bombs will be unable to harm it and high explosive shells will be useless against its walls.

Work on the "fortification" of the bank has been in progress since 1925 and it will be another three years before it is completed. Originally it was calculated to take about twelve years to make it the strongest fortress in the British Isles at a cost of about $20,000,000.

Men Not Very Good

Yukon Man Has Novel Proposal To Restore Prosperity

A novel proposal to bring back prosperity by increasing the public's purchasing power has been brought out by Mr Monconahe Fukurwa, of Tokio. He suggests that each of Japan's 68,000,000 inhabitants should be given a 200 note good for a limited period. Everyone would have to spend this or her note before the "time limit" expired otherwise it would be useless. The bankers, however, are rather skeptical.

World's Highest Postal Lane

"We men intrusted with carrying the mails from Tachienlu, China, to Lihsing and Batang never drop below an altitude of 9,000 feet, rise occasionally to 13,000 feet, and never sight a human light or a landing field. The world's highest postal lane is travelled not by airplanes but by Chinese mail carriers making the entire trip afoot.

Beyond The Pale

Kidnappers Continue Their Frightful Trade In U. S. Cities

Eight American states impose at any rate provide in their laws the death penalty for kidnapping with abduction as the motive. In thirteen the penalty is imprisonment for life in all the others it is a long jail term. After the abduction and murder of young Charles Lindbergh last year, Congress in a mood of indignation made inter-state kidnapping a federal offence punishable by death, years in jail.

Yet the kidnapping racket, that frightful trade in American ruins the poverty of the unemployed in one month to be deterred. The charge against a recent case have been as follows: where a kidnapper may be hanged and in New York where he may be locked up 30 years. It is trite but true to say that the most appalling of rackets still flourishes because of the uncertainty of punishment. The failure of the hunt for the kidnappers of the Lindbergh child shocked and alarmed the decent citizens. It encouraged those who were meditating like crimes, especially since an immense sum was paid in ransom and not recovered.

Among criminals the kidnapper seems somehow further beyond the pale than any other. Even murderer sometimes shows great enough provocation to get sympathy from humane and gentle people. But one can never imagine an extenuating circumstance for the kidnapper. He is no lover of fear, the mortal enemy of the race. Every man's hand is against him. When he strikes his fellow citizens are moved not only by wrath but by shame and dismay. That we few Americans feel about the kidnappers who terrorize their lives, that how to get rid of th- blight seems to be at the moment beyond the wit of their police forces.—Winnipeg Free Press.

Spends Pension On Air Trips

Englishman Regrets Weekly Income Limits Flights To Two

George H. Smith, aged 68, of Kingston Road, Merton, Surrey, England, is so fond of flying that he spends his old-age pension on aerial trips.

His one regret is that the weekly 10 shillings limits his flights to two.

"I cannot understand young people being afraid of flying," says Mr Smith. "It is the most exhilarating experience in the world, and each flight makes me feel 10 years younger.

"I would rather go without my tobacco than miss a flight."

No Evidence Of Ability

Good Handwriting Fails Standard For Judging Boy's Headmaster

Good handwriting is no guide to ability, according to Dr. Terry Thomas, headmaster of Leeds Grammar School, speaking at a conference held by the Incorporated Association of Headmasters' Council in London. Many people, he declared, were prone to judge the ability by his handwriting and his capacity for arithmetic. These were false standards. Some of the greatest people were a bad hand, and pure arithmetic denoted nothing but mechanical skill developed by practice.

ONLY FIRESTONE *gives you all these* EXTRA VALUES

Twenty-five to Forty per cent. longer tire life at no extra cost . . . that's the bonus you get for buying Firestone Tires.

Firestones do not cost one cent more than ordinary tires, but only in Firestone tires can you get a combination of Gum-Dipped Cords, 2 Extra Cord Plies under the tread, Balanced Construction and a scientifically designed Non-skid tread which make for extra strength . . . extra safety and extra mileage.

Firestone Tires are guaranteed for 12 months against blowouts, cuts, bruises and all other road hazards except punctures.

Replace worn tires today. Buy Firestone . . . the strongest, safest and most economical of tires. See the nearest Firestone Dealer to-day.

Gum-Dipped Cords
Every fibre of every cord is coated with rubber by the Gum-Dipped process. Gives 29% longer flexing life.

2 Extra Cord Plies
Additional cords are applied under the tread. Protects from bruises and punctures and makes Firestone tires safe at any speed.

Balanced Construction
Every Firestone tread is wider, deeper and scientifically designed. Gives longer mileage, the traction and safety you want.

Occasional Wife

CHAPTER I.

Camilla gave her smocked shoulders a little shake of determination and bunched them over her sketch pad, focussing her eyes intently upon the still-life model which the art instructor had selected for the next progressive step of his class toward artistic appreciation and creative expression. With detailed precision, he had called their attention to the perspective, receding contours, highlights and contrasts of the Grecian art. A still-life study, he had called it.

To Camilla, the word had implied vaguely some horrible tragedy. At any rate, no two such antithetic words had any right to be hyphenated she thought. She preferred studies in native life, anyway. Virile, robust, glowingly alive, like words like the study of real life which interfered between her line of vision toward the still-life study object that she was sketching with impatient difficulty.

It was much more of a temptation to sit idly and watch the beak of a certain young man's head which perked up and down intermittently behind, speaking at a conference held by the Incorporated Association of Headmasters' Council in London. Many people, he declared, were prone to judge the ability by his handwriting and his capacity for arithmetic. These were false standards. Some of the greatest people were a bad hand, and pure arithmetic denoted nothing but mechanical skill developed by practice.

Camilla thought she detected an unusual flicker at the corners of his mouth that leaped up and sparkled in his eyes, but his expression betrayed nothing to the waiting class.

Everyone recognized that Peter Anson was the outstanding genius of the National Art School and a favorite protege of Professor Drake. But no one resented Peter's superiority, because everyone liked Peter, whether they knew him well or not. He never was condescending or supercilious, rather the contrary; and out of class he seemed only a superior boy. His shy reticence even added to his charming manner a certain confidence that appealed to everyone.

After a moment's sober inspection of Camilla's sketch and several corroborative glances toward the still-life model, he remarked, "I think, Miss Hoyt that you were not seeing the study-object when you made this —there is so little resemblance. And if I suggested remembering — could I say—real—more alive? If you will notice, the handles of the urn in your sketch look more like —— perhaps. You must have been sketching some other object from memory, unconsciously." He turned to Professor Drake. "Sorry, sir, but I don't think I can offer a fair criticism of this, under the circumstances."

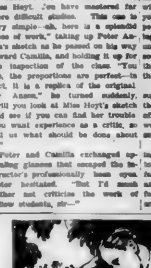
"Very well, Mr. Anson. I would suggest, Miss Hoyt, that you follow the study object more closely hereafter. When we have something to work from imagination you may do as"

"Yes, sir," agreed Camilla, collecting her materials and looking neither to the right nor left. Soon for Professor Drake and Peter Anson burned with a perfect scarlet blush. In fact like a troubled volcano ready to erupt with anger and humiliation that would manifest itself in scathing words and violent tears, if she did not soon escape from the room.

Which she did, the moment the class was dismissed, hurrying, almost running out of the building into the spring sunshine. The art school building boasted a classic setting along a magnificent parkway that terminated in a broad flight of steps, a formal garden and a lagoon that mirrored walls of Georgian marble, flanking fountains and verdant foliage.

The park benches already had been put out by the caretaker, notifying that the lagoon with their new green paint. Camilla slipped through the lilac hedge and came down upon one of the benches with head pillowed in her arms flung across the back of it. Blind, angry sobs shook her chestnut head. Tribulant thoughts seethed in her mind. Life was a wretched thing. It pushed you into some queer circumstance, like a frowning whirlpool, and then it whirled you to struggle out of it, jeering at you from the shore and pushing you back into the tortured spiral when you managed to gain a moment of breathless security and serenity.

Never since she had discovered, at the age of seven that life was a cruel whirlpool, she had not enjoyed it. Always it had been



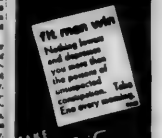
A Hand Touched Her Shoulder.

"And how," demanded Professor Drake, "do you expect to criticize the work of a student if you have not begun on students? Perhaps," he suggested, "your criticisms would be more welcome to Miss Hoyt, even than mine would be."

Peter smiled pleasantly and stepped back to Camilla's desk. "I'm sorry, Miss Hoyt, if I did not offer suggestions," and his smile was transferred to Camilla as he bent over her sketch. "I'll be glad to, if Like outsider establishing an idea on, she thought, reaching her sketch pad toward him at arm's length before he had a chance to come to her rescue.

She wanted to escape from the room, to hide her burning face; but her fascinated gaze was held by his face as he inspected her work.

HELP FOR TIRED WIVES
Take Lydia E. Pinkham's Vegetable Compound



just when she grasped a mesh of hope and was hoping he could control it, he had slipped back into the oblivion from which Professor Drake Anson had done that to her. And today's experience was like a violent wave of a hand that pushed her below the surface — her groping hopelessly.

A hundred prosaic persons might recall at Camilla's mental stasis, and call it hyperbole and fantasy. But, of course, Camilla was not prosaic. Her aesthetic mind matched her astonishing beauty like was dramatic and vivacious and imaginative, as the vivid lithe and colorful and radiant. Which describes Camilla in the abstract.

As for visible features: the sparkling depths of her brown eyes that attracted you, then the childish curve of her red lips; her nose was an inconsequential thing that served to support her finely proportioned nostrils; her skin was like ivory satin that tempts the curves of your finger to test it. Yes, it is. It is! Camilla is not a fool. This picture was framed in a cloud of shining hair, black as ebony, and you could not soon forget the sweet, lingering way the black curls clung to the curve of her neck.

These are merely suggestions of the glowing beauty of Camilla. But the Greeks had a superstition that the gods were jealous of a man—or woman—who had too much of this or that, so they pulled him down. As Helen nearly put it to Cressus, "Cressus no man happy until he is dead, you never can tell what might happen to him."

So the gods had conspired to complicate affairs for Camilla, who was almost too beautiful in their envious eyes. But Camilla was not weeping at the Acropolis in Ancient Greece. She was crying on the art school campus in twentieth century American, and held no superstitious respect for Greek gods or any others—unless it was a fair-haired youth who might have personified a god in Byron's myths, as much as a line—"Her or a Balder did he look. But she resolved now that even if she had the opportunity, she never would speak to him. He was as vain and conceited as he was handsome. He ran her distorted thoughts that were a mixture of resentment, humiliation and love.

A hand touched her shoulder, lightly. Then it withdrew hastily with gentle entreaty. Camilla of pride quivered through Camilla's tense body.

(To Be Continued).

Made Four Choke

Garbado Magbrigal, a Syrian, found a dandy place to stow away on the "In de France" when she sailed from Beirut. He was not counting on a two days at sea, however and Magbrigal discovered why it was called a vacation. It vanished. He caught pneumonia, and was thrown into irons.

ALFRED REDMOND

Alfred Redmond of Edgerton, Alberta passed away to an Edmonton hospital on July 26, aged 68 years. He is survived by his wife, three sons, John, Frank and James, all of Edgerton; three daughters, Mrs. J. Earl Graham of Fort Saskatchewan, Alberta; Mrs. A. L. Peppard, of Berkley, Cal.; and Miss Alice Redmond, of Edgerton; five brothers, W. F. Redmond and R. C. Redmond, both of Edgerton; Hugh Redmond of Paradise Valley; Ernest of Dunn, Saskatchewan county, Nova Scotia, and Charles of Dawson City, Yukon; and three sisters, Mrs. Margaret Cooper of Staten Island, New York; Miss Nellie Redmond of Massachusetts, and Miss J. A. Redmond of Vancouver, B.C. The remains will be forwarded on Wednesday morning to Edgerton and the funeral service will be held on Wednesday afternoon at 2:00 o'clock at the Edgerton United church. Rev. Bainbridge will officiate and interment will take place in the Edgerton cemetery. Howard and McBride, funeral evrice.

TENDERS

Sealed tenders, envelope to be marked "Tender for Hay", will be received by the undersigned up to 5 p.m. on Saturday, July 26th, for a quantity of baseitfed timothy hay already cut and coiled, in the Town cemetery. The highest or any tender not necessarily accepted.

Jos. Ritchie,
Town Secretary-Treasurer.

Many a fifteen minute job is never completed because it is never started.

New Semi Record Made

A new heat record was established on Tuesday when at 3:00 p.m. the mercury climbed up to the 96 mark. While the mercury went up, so did wheat prices on the Winnipeg grain exchange, wheat gaining 5 cents, due to constructive buying.

Coarse grains followed wheat closely also upward trail.

Today the sun isn't quite so hot, and there is a slight breeze.

TENNIS NEWS

In the Inter-mediate tennis league series between Varsity and the Fort Tennis Club played last Friday night, the locals managed to collect three of the nine events.

Games were postponed until Friday due to inclement weather last Tuesday evening.

In the Tennis League games played here last evening, between C.M.R. of Edmonton and the Fort Community club, only four out of the nine events were played. The other events will be played as soon as it is convenient to both clubs.

According to reports, some outstanding tennis was played on the local courts.

After tennis the players adjourned to the Badminton Hall where tasty refreshments were served.

There is Safety in Numbers

THERE'S nothing that you should be more of than the food for yourself and your family, for when bacterial action starts in food, it's a menace to health. The way to be sure that food is preserved safely is to pay attention to Numbers.

SCIENTISTS say that food is preserved safely and freshly at a temperature of 50 degrees. That's a number to remember. Put a thermometer in your food chamber, and if the temperature goes higher than 50 degrees, beware of tainted food.

THAT'S why Electric Refrigeration is becoming more and more popular, as the Thermostat safeguards your food by constantly keeping the temperature below the danger line. It provides constant cold, at a surprisingly low cost. See the Electric Refrigerator model exactly suited to your home at your Dealer's Showroom today.

Fort Saskatchewan Record

LAKE HAILSTONES AT ADDISHAN

It is report that the weather man was "knocking corks" in the Addishan district during Thursday's night's hailstorm which inflicted crop damage of from 40 to 60 per cent. Most of the meteorological missiles were about the size of hen's eggs but some of them were too large to be distinguished by the ordinary term of "hailstones".

One such gigantic projectile measured 7½ inches in circumference one dimension and 5½ another. Roofs in the path of the hailstorm were badly damaged while crops and gardens were "cut to pieces".

Districts that never have had any great deal of hail are reporting serious damage been done by hailstorms of late.

GREAT BRITIAN TENNIS TEAM WINS DAVIS CUP

After 31 years, Great Britian has finally captured the historic Davis Cup for the first time since 1912, after a hectic struggle.

The team composed of Frederick J Perry and H. W. (Bunny) Austin defeated the French squad of Andri Merlin and Henri Cochet in one of the greatest victories ever seen.

ITEMS OF INTEREST

The recent rains have gladdened the hearts of the farmers in this district. The much needed moisture has materially helped the crops and gardens.

oooooo

A beehive from which honey is extracted automatically through a funnel without destroying the comb has been patented.

oooooo

Two of the large furniture manufacturing concerns in Kitchener, Ont., announced that their plants, which have been idle for a time, will reopen, as a result of improving industrial conditions.

oooooo

"A rolling stone gathers no moss," quoted a local citizen to a young fellow on the street here. "Yes, but who wants moss?" the young fellow replied, "A rolling stone sees much and gains polish."

NEWSPAPERS EXCLUSIVELY

Montgomery, Ward & Co. of Chicago announces that it will abolish its circulars and will place advertising exclusively in newspapers in all towns where stores are located.

Six new subscribers have been added to The Record mailing list in the past three weeks. All of these readers reside in this district. It is slow work getting new readers to our local paper, but there coming in, and we hope in time to have this district solid.

The depression must of hit the news in the country points this week as only one district reported.

A Scotsman upon entering a cobler's, asked for a single spec.

"What use is one spec?" asked the man.

"Well," replied Sandy, "if I can get one side of the horse to go the other one will hae to come wi' it."

The name Hitler or any variation in connection or feminine form as the first name for babies was forbidden in a government order at Berlin.

"Come right on in, Sambo," the farmer called out. "He won't bert you. You know, a barking dog never bites." "Sure, boss, Ah knows dat," replied the coalmine colored man, "but ah don't know how soon he's goin' to stop barkin'."

Sir Francois Lemieux, veteran of many trials and chief justice of the superior court of the province of Quebec, died at the age of 88.

The body of Calixa Lavallie, composer and soldier, who gave Canada her national anthem, "O Canada," has been brought back to Montreal.

EXAMINATIONS PAPERS MARKED

The examination papers having been marked, results of grade 12 papers will be announced this present week-end and other grades to follow.

Approximately 100,000 "exam" papers have been read and marked by a staff of about 200 members. The work was completed last Saturday

Josephburg News

The Josephburg Junior U F A held a short regular meeting in the school on Wednesday, July 23th, with the President, Wilfred Mann in the chair. The minutes of the previous meeting were read and adopted

The delegates to the Farm Young Peoples Conference at Edmonton were elected their expenses.

The next meeting will be held at the home of Mr. and Mrs. Heneghan on August 28th, and will take the form of a debate.

Taken from the Files

19 Years Ago Today

August 8th, 1914

At a re-organization of the Fire Brigade attended by thirty representative business men with the following officers are given below:—

Chief—M. Sutter, Asst. chief—J. Wright, Sec.-Treas.—J. Brown, Captain 1st. Hose waggon, L. S. Hamilton. Captain 2nd Hose waggon, Geo. Easterly. Chemical—C. B. Taylor. Hook and Ladder—C. Ferguson. Engineer—A. Wootton. Ass-Engineer H. Smith.

Four dandy ears of corn came from J. Karnes's garden to the editor this week.

Rev. Mr. Gruiser, and daughter Hildegards, arrived in the Fort from Winnipeg, to take over the Josephburg parsonage.

Tom Watson is busy cutting barley.

War clouds have broken and England will no doubt be drawn into the fray.

DO YOUR STUFF

Old Man Depression has done his best—or worst. Now you do your stuff. Buy something—but anything anywhere and pay cash for it. Paint your kitchen, send a telegram, give a party, pay a bill, fix a fence, get a haircut, repair your roof, see a show, sing a song, get married. It doesn't matter what you do. Do something. Pay your subscription to The Record! The world can be made to move again if we all do our stuff.

BECOME GOOD PERSONS

The average farmer trusts his horses with kindness, can no doubt to the fact that man and horses are equally inseparable companions all day long. Through spring planting, hot summer and harvest time, man and horse work in the fields from morn until night. They find something in common, in work like this, and it is small wonder that they really get to know each other. When "Old Dobbin" gets too old to work, the generosity spends his last days in the pasture where he can roam at will.

SEND IN PERSONALS

Now that the summer season is here and holidays and vacations are in order, you will be entertaining friends and relatives from a distance or will be going away to visit them. Don't forget that your Fort friends are always anxious to learn of these comings and goings. The Record's social and local news column provides means for transmitting the information.

Just give us a call or drop a line.

Good Hope

Mrs. J Higgins was holidaying at the home of Mrs. A Macdonald, last week.

oooooo

Mr. Gordon Moyer was a delegate to the Clover Bar U. F. A. Constituency Convention at Bremner last Thursday Mr. A. E. Moyer and Miss Eva Moyer were visitors.

oooooo

We are sorry to hear that Mrs. A. E Moyer is confined to her bed, for several days.

oooooo

Good Hope wheat fields and gardens certainly welcomed the rain last week.

oooooo

Mr. A. E. Moyer and M. Lachkovich M.P., laundes going across the river to Waskatenau and vicinity over the week-end, to hold a series of U. F. A. organization meetings.

NOTED TEACHER DIES

Mrs. A. M. Hale, widely known teacher of fructed instruments at the Alberta College, Edmonton, died suddenly Saturday morning after a long illness.

TENNIS NEWS

In the Inter-Club tennis league last evening, the Fort tennis club won three of the nine events. Although a great deal of rain had fallen during the past few days, the courts here were in excellent shape.

After the games, refreshments were served in the Badminton Hall to the players.

Health Service of the Canadian Medical Association and Life Insurance Companies in Canada

Beware of summer diarrhoea! To the parents of babies, we repeat the warning, Beware! Summer diarrhoea is one of the most fatal conditions which attacks young children; it brings death to over five thousand Canadian babies each year.

Most of the cases and deaths occur during the months of August and September, and this in the reason why, at this time, we wish to urge upon the parents of babies the need for such extra care as will protect their children.

The most important point in this care has to do with the milk which the child receives. If the baby is breast-fed, there is no danger in so far as his milk-needs are concerned. For the child who is using cows' milk, it is absolutely essential that the milk be pure and clean. In warm weather there is a greater chance of contamination; there are flies and other insects which may carry filth to unprotected milk, and germs multiply rapidly in warm milk.

It may be said that no raw milk is a safe milk, at least for your young children, and that it should be either pasteurized or boiled before using. This heating destroys the germs which may entered the milk and which, although they may not cause disease in the adult, may and often do set up a diarrhoea in the baby.

Babies should drink plenty of cool, unsweetened water. On hot days, the baby needs more water and so he should be given more opportunities to drink. When the weather is very hot, the baby needs little or no clothing. He is made comfortable by cool baths, and should be kept in the cooler shade during the heat of the day.

Summer diarrhoea should never be neglected. Prompt treatment would save the lives of many babies who now die. Because so many cases occur parents are apt to think that summer diarrhoea is not serious; they try the remedies that someone suggests and, in the meantime, the strength of the baby goes and it is too late to do anything for him. We do not wish to be alarmist, but it is difficult for us to forget the five thousand babies who die each year from summer diarrhoea, and that is why we say to parents, Beware and Take Care.

SUPPORT HOME INDUSTRY! Use The Record for all your Printing.

Coming Events

Pleasant View Young People will hold a Dance on Friday, Aug. 8th, in the Pleasant View Hall. Dancing 9 till 2 a.m. Refreshments. Good music. Admission 25 cents. Everybody welcome.

Nature's Laws

In these days much is said and written on the subject of planning—farm planning, industrial planning, social planning, financial planning. Economists, both those who have made a life study of economic principles, trends and problems, and those who assume to speak on economics but have only a superficial knowledge of the subject, are talking and writing on the subject of planning Governments the world over are engaged with the pros and cons of it, and world conferences are wrestling with it. As a result, people are confused with the multiplicity of ideas advanced, as in the majority of cases, one set of ideas is contradicted by another set.

However, out of the confusion, there has come the suggestion that nations everywhere should reverse the process they have been following of increasing and expanding production and proceed to curtail production. So, we are told, farmers should reduce the acreage they are planting to wheat, and cotton and coffee, miners should mine less copper, iron, silver, zinc and tin, smaller quantities of oil should be pumped from the bowels of the earth; forest fish should be caught, less timber cut; smaller quantities of manufactured articles turned out.

The suggestion is an absurd one. The population of the world is steadily, even rapidly, increasing, and people want more of everything, not less. Why then produce less to meet their needs? The problem that calls for solution is not that there is too much wheat in the world, or that too much of it is being produced annually, but that certain countries for purely national reasons are denying to their people the right to import wheat and in so doing are denying to them the privilege of cheap bread. And what applies to wheat, applies in varying degrees to all other products and commodities.

Nature with her inexhaustible and inexorable laws has a way of controlling production. In this year of 1932 when the story of huge wheat surpluses is heard on every hand, Nature stepped in and reduced the wheat crop of the United States by two hundred million bushels, and struck tens of millions of bushels off the Canadian crop, and reduced the yield in other countries. Drouth, and hail, and grasshoppers, and other insect pests all took their toll, and as a result the world will not produce more wheat than its inhabitants require.

Suppose the acreage sown to wheat, for example, was arbitrarily curtailed by order of governments. Farmers would be obliged to summerfallow the land not needed to prevent it becoming infested with weeds. It will be acknowledged that the more carefully and thoroughly the land is worked and cultivated, the greater the production per acre. Consequently, the almost certain result would be that larger average yields would be obtained, and the reduced acreage in crop would be offset to a considerable extent by the heavier yields. Therefore, even assuming that less wheat should be produced, reduction in acreage sown might not solve the problem. It may be admitted that there would be no economic saving to the farmer in increasing his yield per acre and sowing fewer acres. Possibly farmers should have followed this practice in the past, and should do so in the future, but not with the object of raising less wheat, but better wheat and more of it per acre at less cost to himself.

And if man decided in his wisdom, or lack of it, to greatly reduce the production of wheat in any one year, Nature might likewise in that year endeavor upstairs of her lawn to bring about a reduction, with the result that man might easily find himself in dire need. Or Nature might offset the puny efforts of man and order climatic and other conditions which would more than offset all man's efforts to lessen production.

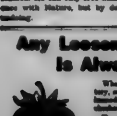
Man stands impotent when drouth comes and day follows day without rain; he is powerless when hail pushes his grain crops to the ground; he can wage but a futile battle when grasshoppers and other pests swarm over the land, he can do nothing if a blighting frost destroys. But Nature has her own ways and methods of control. When grasshoppers become a parasite or development which ultimately destroys the hoppers; when rabbits become unduly numerous, disease takes them off. Man may wage war against this or that, he may plan and seek to control, but in the final analysis Nature directs and controls.

There are men who in this day and generation propose to plan and control practically everything, who declare that the law of supply and demand, of survival of the fittest, are obsolete, and should be ignored, or overcome. These things, they say, are merely the laws of the jungle, which should have no place in our modern civilization. But the laws of the jungle are Nature's laws. In the jungle Nature's methods prevail, and it is a jungle because no attempt is made to interfere with Nature.

Man may, and can, and does control some of the powers of Nature. Working with Nature he can bring about many improvements, and may even control Nature in some of its aspects and workings. But with many of Nature's laws and workings, man can exercise no control whatever. He cannot lengthen or shorten the seasons, he cannot influence the weather, he cannot order the earth to bring forth bountiful crops this year and bare ones next year. And he better not try to do it.

The real trouble with the world today is that man has tried to control Nature's law of supply and demand by setting up an intricate system of man-made restrictions, obstructions, barriers, prohibitions, which interfere with the natural working of that law. As a result man has put himself into a huge spider's web of his own making in which he is struggling in futile fashion. He can only free himself, not by a further defiance of and interference with Nature, but by destroying the web he has woven to his own undoing.

Any Looseness of the Bowels is Always Dangerous



When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the disease checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 80 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Canada's Taxed Property

Total Taxable Real Estate In Town and At Eight Billion

The total taxable real estate in Canada was assessed at $8,222,300,000 according to reports received by the Dominion Bureau of Statistics for the year 1932.

Another $1,500,000,000 of assessed property was exempt from taxation, consisting chiefly of Dominion, provincial and municipal property and educational, charitable and religious institutions.

Quebec led with $760,706,000 exempted property; Ontario, $536,536,000; Manitoba, $156,784,000; British Columbia, $140,273,000; Nova Scotia, $46,119,000; Prince Edward Island, $6,000,000. The returns from New Brunswick, Saskatchewan and Alberta do not show the amount of the non-taxable property.

The total taxable valuations in Canada were $8,712,119,000, of which Ontario led with $3,151,112,000, Quebec, $2,223,479,000; Saskatchewan, $1,134,661,000; British Columbia, $666,096,000; Alberta, $585,714,000; Manitoba, $567,161,000; Nova Scotia, $177,216,000; New Brunswick $153,365,000; Prince Edward Island $39,202,000.

Municipal property amounting to $6,722,260,000, was distributed as follows: Ontario, $2,911,763,000; Quebec, $2,210,943,000; Saskatchewan, $1,069,720,000; Alberta, $570,960,000; Manitoba, $559,812,000; Nova Scotia, $146,107,000; New Brunswick, $130,053,000; Prince Edward Island, $83,906,000.

Change Hardly Noticeable

American Inch Unit Now Two-Millionths Longer In Length

The American inch unit of measurement has lost two-millionths of its former length in order that precise measuring in the United States and England may be done on the same basis. The new definition of the inch is 25.4 millimeters, or a difference of about one-eighth inch in a mile as compared with the former American standard. This minute alteration was made necessary by modern precision manufacturing and the confusion arising from varying standards in the two countries Gauge blocks now are made correct to within one-millionth of an inch. Both the United States bureau of standards and the national physical laboratory of England will certify industrial gauges on the new basis.

Looking For Sandy Beaches

Midsummer Reception and Mansions Are Going To Search Awaits

Seeking sandy beaches under ice floes will be part of the R.C.M.P.'s arctic patrol work the next two years, for as the "Nascopie" sailed recently bearing aboard "Mountie" to be stationed at Pond Inlet and Craig Harbor for the next two years, they had instructions to look for sandy beaches. The sight that the "Nascopie" carried, Villajalmur Stefansson, famous explorer, wired Gen. T. H. MacBrien, commissioner of the R.C.M.P., asking him to enlist the co-operation of the red-coats in searching for sandy beaches under the ice The wire stated that Stefansson had never traveled having seen one, and he wanted to confirm his own experiences.

Rewarded For Kindness

Welsh Girl Receives Legacy For Helping Old Lady

As old lady of Swansea who lost her money while travelling 3,000 miles ago met a girl at Cardiff Railway station and told her of her difficulty. The girl lent her 10s. The money was returned by post shortly afterward.

A few days ago the girl, Miss Jean Davies, a pretty brunette, engaged as a shop assistant at a hairdresser's in Pontypridd and living at Senghenydd, received a solicitors letter. The letter informed Miss Davies that the old lady had died and left her £3,000.

London Police Versatile

London policemen, who already must have a practical knowledge of first aid, car driving, swimming and life saving, are now to be trained as firemen, so that they may be equal to the task of rescuing persons from burning buildings.

Professor Rags Modern Method Of Education

Says Students' Mind Clogged With Dead Matter

Modern methods of education clogs the mind and as the result modern young people are class conscious, really ignorant selfish and arrogant, their minds filled with dead matter

This stashing attack on modern methods of education was made by Dr Williams Oliver professor of the School of Organization and Industry at Edinburgh University Scotland, in an address at the annual conference of the textile industry held in Harrowgate, England

"Modern education tends Dr Oliver said to hinder mental development by clogging the mind with dead matter Education has become too pedantic, and in consequence distrust had arisen between parents interested in education and men interested in industry

The idea that education should relieve its recipients of manual labor was prevalent, and it has been strengthened by the multiplication of staff appointments mainly dealing with clerical duties Manufacturers were largely to blame for appointing their managers from the office rather than the machine

"It is distinctly unfortunate that much of the present day educational procedure is developing a class of young people who do not wish to work in factories, or indeed to work at all Many liberally educated young people are really ignorant, selfish and arrogant

"Wherever a man gets above the dead level of bare subsistence he becomes obsessed with the idea that his family should have an easier time than he has had He fails to see that his hard work has been the essential factor in any success he has achieved."

Aquarium That Is Different

Queer Fish Kept In Refrigeration Rooms At Port Of Seattle

In a frozen aquarium, believed by officials to be the only one of its kind, strange fish from many waters stare stonily at thousands of visitors at Seattle every year The aquarium was the pleasure, it just grew, says H E Larsen, of the port of Seattle, explains, until it is becoming world famous One day a fisherman brought in a strange fish and wanted to hang it up in the refrigeration rooms Then another caught a different variety Soon in those rooms, it grew until there is now a collection which has attracted as many as 1,500 visitors to the place in a single day They have to a temperature of ten degrees below freezing to walk through the corridors filled with ice-encased rarities of the deep.

For Safer Flying

Radio Leads Passengers Safely From Disabled Plane

A device which guides passengers from disabled cabin aeroplanes and lowers them safely to the ground with parachutes was demonstrated recently at Roosevelt Field, New York, before a group of air line officials and prominent aviators.

At 150 feet, lower than is considered safe for a parachute jump, eight dummies were dropped successfully from a test plane then two parachute jumpers were dropped from 1,500 feet.

Proven Value Of Advertising

Reading Newspaper Ads Often Creates Desire To Shop

The value of newspaper advertising to shoppers and advertisers alike was shown at St. Louis, Montana, in a survey conducted by advertising students of local vocation schools.

Of those interviewed, 1,360 out of 1,940 said they generally read newspaper advertising before planning a shopping trip, while 1,322 out of the total interviewed said newspaper advertising often created a desire to go shopping when there had been no plans to go.

About the first thing a physician does is to examine the patient's tongue—probably to see if it will tell what he is worth.

Loaned Money On Plane

Kansas City Pawnbroker Hopes Promise To Take Anything

Ben Hurst, Kansas City, Montana, who advertises the "largest pawn shop west of the Mississippi," and who boasts that he has never refused a loan on anything that had a tangible value, was in a quandary recently.

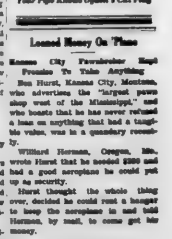
Without licenses, Oregon, Mo., wrote Hurst that he needed $200 and had a good aeroplane he could put up as security.

Hurst thought the whole thing over, decided he could rent a hangar to keep the aeroplane in and told Herman, by mail, to come get his money.

Test Was Satisfactory

First test of the Dymaxion car, three-wheeled automobile built on the stream-lining principle of fast boats, was held at Bridgeport, Connecticut, before 1,500 spectators. With its inventor and designer, Buckminster Fuller at the wheel, the automobile attained a speed of 70 miles an hour over the one-third mile cement test road at Seaside Park.

Bright red handbags are vogue in Germany.



Better Distribution Needed Rather Than Restricted Acreage When Many Are Lacking Food

"As long as so many people in the world are starving, there is no sense in reducing acreage," Neil R. Boston, president of the Scottish Co-Operative Wholesale Society considers "The right thing is to raise the standard of living of the people so that they can consume nature's bounty instead of restricting it. The world has succeeded in production, it must apply itself to distribution. That is the main object of the consumers' co-operative movement," he declared.

Members of the delegation from the Scottish Society, discussing the question at Saskatoon, did not consider that the maximum possible consumption of bread had been reached in Scotland when potatoes were cheap the consumption of bread fell to the minimum. There was one way potato shortage, one of the delegates pointed out.

The representatives of the society visiting the west were: Mr. Boston, Alexander Buchanan, a director, and William Smith, grain buyer and manager of 12 mills. They were inspecting the property of the society in Saskatchewan which includes nine grain elevators, and will also inspect the wheat conference at Regina and the conference of the Co-Operative Union also held there during the time of the World's Grain Show.

The Co-Operative movement in Scotland had more than half a million members, Boston said Mr Boston answering a question. The sales of the Wholesale Society had remained steady at about 16,000,000 pounds for the past four years, but at the lowest prices this involved a considerable increase in bulk of goods.

The wholesale organization was employing more people than before the depression, at the end of 1931 there were 10,567 employees, an increase of 200 over the previous year. The 250 retail societies had 774,776 members and as these were largely heads of families they represented the majority of the four and a half million people of Scotland. They had $8,000,000 pounds in share and loan capital in the society.

It was intended to open shortly a Dominion factory at Falkland in Fifeshire costing 100,000 pounds. Other new ventures were a creamery at Hillcarrock and extensions to grocery warehouses at Glasgow and Dundee and to the fish curing station at Aberdeen.

People Turn To Religion

Cambridge Show Church Membership Increases In Hard Times

That religious fervor is a corollary of hard times is well known and is confirmed by the statistical report of the Christian Herald, showing church membership increased 900,000 in a single year. While one out of every six banks was wiped out, one out of every 45 hospitals forced to close, one out of every 22 business and industrial institutions forced into bankruptcy, only one of every 3,-944 churches succumbed during the depression, according to the Herald Newspapers seem alive to the interest in the religious field. The managing editor of the New York Sun says that a religious pictorial feature, four-column reproductions of famous etchings depicting thrilling episodes in the Book of Books, has brought in an unusual volume of favorable comment.—Editor and Publisher, New York.

Youngest Woman Barrister

Miss Yvonne Stranger, aged 21, who has just been called to the bar of the Middle Temple, London, is the youngest woman barrister in the United Kingdom. She passed her examination some time ago, but had to wait until she became of age before being called.

Sheep in New Zealand

New Zealand has more than 30,000 sheep to the square mile, and over 30 to every man, woman and child in the Dominion, according to a recent census. New Zealand is boasting that the large sheep increase is because the country has no droughts.

Sheriff's Dream Came True

Stolen Eggs Hidden In Church Just As He Saw Them

Sheriff George Barbara sat in his office at Haverhill, Montana, his feet on his desk, and went to sleep. He dreamed he saw someone enter the Methodist Church at Advance, a nearby town, with a basket of eggs Then the sheriff woke up.

The dream made such an impression on him that he called the marshal at Advance and the Rev J L. Glassey, pastor of the church He asked them to go to the church and see if everything was all right in the attic they found six cases of eggs which had been stolen from a poultry house.

PARIS IS MAKING A POINT OF WOOLEN UNDERWEAR IN JACKET STUFF

The suit costume is of chief interest for daytime wear.

And that's the useful tremendously good looking?

It is a conservative novelty chemical pattern in light navy blue woolen. The coral-red crepe silk bodice of the dress is made an extreme high touch. Note the sporty small scarf. And that's the detail to take to heart, too, in a slimming fashion, is gently draped.

Besides woolen, this style is suitable for crepe silk. And it is stunning in a small patterned silk crepe in red and white. Make the blouse of white crepe silk.

It's easily put together. The saving in cost in wool worth the small time it will take you to make it.

Style No. 1784 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

For 16 requires 4¼ yards 39-inch or 3¼ yards 54-inch with 1¼ yards 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Parents Rest With Mounties

People Wishing To Carry Firearms Have To Prove Claim

Canada has come tightening up on its law regarding the carrying of revolvers A law enacted at the recent session of Parliament makes it more difficult for a resident legally to possess a pistol or revolver stiffens the penalty for illegal possession of such a weapon and so is expected to have an important effect in the impending war on crime In the past revolvers might be carried by private citizens who held permits issued by police authorities Permits supposedly were issued only for the protection of life and property but there was uniformity about the interpretation of circumstances which might justify their issuance The number of permits in most cities never was large and Ottawa for instance with 125,000 people had no more than a dozen or so held in the main by bank messengers

In order to tighten the regulations, and to make it still more difficult for revolvers to fall into possession of desperate characters, parliament has enacted that for the future permits to carry revolvers will be issued only by the Royal Canadian Mounted Police and by provincial police authorities Magistrates and municipal police are denied further rights in the matter

All permits in existence were automatically cancelled as from July 15, and their holders must prove their claims anew before a broader tribunal.

Any person found in possession of a revolver for which he has no legal license is liable to five years in the penitentiary.—Regina (Evening) Leader-Post.

Hudson Bay Fish

One Thousand Pounds Of Herring Shipped Weekly From Churchill

There is no doubt that commercial fishing may be carried on successfully in the Churchill region providing freight rates are reasonable, and there is a fair price on the prairie, according to Tom Riddell, shipping post operator who is acting as agent for buyers in the south.

"We are shipping more than 1,000 pounds of fresh cod herring to The Pas, Saskatoon and Winnipeg, every week," said Mr. Riddell. "We can fill all order. The fish are caught by trappers living here, and are secured just prior to the departure of the train so they will be in good condition on arriving in the cities.

"The freight rates are now such as to mean very little. We have a flat rate of $1.65 to The Pas by freight, and this has helped a lot. If a fisherman can get his fish to the nets we could increase the business.

"With the new high tide, we should be getting salmon trout, a real tasty fish which will make a hit on the prairies.

Ten thousand shells and 1,000 snowshoe boots are for now on the River Thames, to England.

Exhibit Of Canadian Paintings Now Being Shown In Britain Has Achieved Popular Acclaim

Japanese Keep Old Festival

Beloved Tea Blow Come From China Almost 700 A.D.

Festival of the Seventh Eve of the Seventh Month The Tanabata Matsuri (the festival of Tanabata)—was observed by children at some primary schools in Tokio and suburbs recently They were celebrating the Seventh Eve of the Seventh Month, when the Weaver Princess Star (Star Vega) is supposed to meet the Herdboy Star (Star Altair) in the sky once a year on the banks of the Milky Way

Virtually all but the memory of the festival had disappeared in the cities until a few years ago, when it was revived The festival is essentially a children's affair and used to be observed in the homes

Tall bamboo trees erected on the school playgrounds were a feature, with their branches waving with fifty cut papers of varied sizes and colors, bearing short poems They sing beautiful thoughts and sentiment in praise of the sky princess, the sky herdboy, the Milky Way, the Seventh Eve lovemaking, and all the vested with mystery of the heavenly elements

The festival is said to have come from China during the reign of the Emperor Kotoku (T36-762 A.D.) and already had become fashionable in the 8th century It was constantly mentioned in classical literature that came to Japan, but has become an affair of literary interest as it has been interwoven into the life of the Japanese people

Value Of Farm Land

Like Everything Else Worth Only Only What It Can Bring

What is good farm land worth? An Englishman asked and not long ago that the best land in England, where the average production per acre of all crops is much higher than in Canada, the market is at the door, the growing season is longer and the climate generally more favorable, can be bought for $150 or less per acre when it can be bought at all With an opportunity of two thousand years behind them, English farmers are pretty likely to know what values are We doubt whether any land in Canada can earn interest on a very much higher value than that, except in a very few highly favored spots, and then only by intensive cultivation of high-priced specialty crops fruits and garden truck. One of the principal causes of much of the present trouble of farmers is that they paid, or promised to pay, more for their land than it was worth and their mortgages represent more than the actual value Land, like anything else, is worth only what it can bring.

Paris pallos have been equipped with fountain pens which eject tear gas.

Scandal Brought Conscience

About Three Hundred Visit Bill's Woman Every Day

Mrs Bayard Chambers of Lake City, Utah, fed a few neighbors several years ago and as a result now feeds approximately 300 daily

The bird was lured and busy when Mrs Chambers fed it Her trips were made, with competitors drobs appearing in over-abundance, numbers

Seagulls in Utah are virtually secure, due to a rigidly-enforced state law making their destruction a serious crime

Sounded Like One

A man from Montreal was penetrating into the depths of the Grand Canyon.

"Do you know, asked the guide, "that it took millions of years this great abyss to be carved out?"

The man from Montreal was enormously impressed. "I tell you, he continued. "Why I did not know it was a government job.

Automobiles and motor boats are being traded in on aeroplanes in England.

WHAT'S IN A NAME?—PLENTY!

When Norma Shearer, famous Canadian film star returned to New York from Europe she was besieged by members of the crew for her autograph Here is the screen actress obligingly signing for an admiring sailor film fan.

WORLD HAPPENINGS BRIEFLY TOLD

Man was Gallagher, an outstanding figure in Overseas service for nearly 40 years, is dead. He was 68 years old.

Australia has made large shipments of gold to London in the last few months.

Profits of the South Manchuria Railway have greatly increased during Japanese occupation.

Judge Cluer, British jurist in Shanghai, died Wednesday patient in the same city.

Steady of accounting and auditing methods that prevail in the municipal provinces is to be made by three officials of the Ontario Government.

Thousands turned out to welcome Lord and Lady Bessborough on the occasion of their first visit to Cape Breton island.

Motor cars exported from Great Britain this year exceed in value those shipped last year by almost 100 per cent.

The first load of wheat, offered in a Brantford, Ontario, mill from the 1935 crop, brought 76 cents a bushel, compared with 60 cents for the first load last year.

Flood, insects, famine and heat and plague of cluders, locusts and cats are variously reported in different parts of China, causing suffering and death.

Robert Brenton Harris, 74, founder of the Hamilton Herald, died at his home recently. With his brother, the late J. M. Harris, he started the Herald in 1889. Mr Harris retired from the business some years ago.

Miss Anna Blair Thornton, daughter of the late Sir Henry Thornton, formerly president of the Canadian National Railways, was recently married to Dr. Winston F. Harrison, of New York and Montreal.

A brief, dismal epitaph for the last days of the first of four wide steamers, the "Britannia," "Arcadia," "Columbia," the story of the Line to Canada, "Steaming Up Channel" by Lawrence Mannock, a a fascinating one. Many celebrated passengers have been carried on these ships. Among no less a personage than Mark Twain, who made quaint account of his crossing in those early days in prose in a letter he wrote to the "Alta Record" of Halifax, and in his "Innocents Abroad."

It is heartening to know that the Canard Line was the first to obtain a company in carrying British mails by steamship, to adopt new inventions in hull and engine construction, to provide comfortable quarters for steerage passengers; to communicate by wireless, and lead to high speed. Unlikely in recent years the popular Line.

The story of the race for time across the Atlantic is the story of passenger quality. Many competitors came and fell and in the late years of the nineteenth century the race was hot and furious. As early as 1838, the "Sirius" made the crossing in eight days while ten years later the "Great Britain" crossed in 14 days. In 1877 the "Umbria" and the "Etruria" in six days, while in 1894 the speedy "Campania" and "Lucania" made it in five days. In this century the only "Mauretania" has raced across the Atlantic consistently in four days. Ships and even today in the fastest cruise liner afloat. For 23 years she held the mythical "Blue Ribbon" of the Atlantic, but was reported only she has ever worn this trophy.

Chambers have figured in several scenes of Canard ships. Sir Samuel was knighted for the service his ships gave Britain during the Crimean War, and the fleet takes served during subsequent troubles and the Great War. The present Sir Samuel is the magnificent record maintained by the Canard Line, and the Canard Line's members twenty-two, from the first "Unicorn" to the "Aquitania" to the popular "A" class of the Caledonia route.

Bidding Trade Bon-Voyage

Montreal, Que., Oct. 7.—Canadian Trade Commissioners and other officials of the Department of Trade and Commerce will be guests of honor at a luncheon to be given by the Montreal Board of Trade on October 15, it was announced today. The luncheon will be held in the Windsor Hotel.

Among the passenger services operated "one could do no better than to go overseas by having an up-to-date boat line to the port office. An appeal to the government brought prompt action and a "new" boat was installed. Inspection has revealed the letters "V.R." on the bow, showing that it had been made in the time of Queen Victoria.

Hostilities have been barred in Chile as a private monopoly and powerful government combined.

Age Is No Handicap

Eighty-Two-Year-Old Woman Keeps Active Control Of Brewery

Said to be the only woman brewery president in the country, 82-year-old Mrs. Jacob Hornung is directing the production of her Philadelphia brewery.

When her husband died eight years ago she declared that she would take a copy of that year's brewing permit making near beer. Then, with the advent of real beer, she found herself in the midst of a booming activity.

Some of her friends say she is 84, others that she is 87, but she insists she feels 56.

She is at her desk in the brewery every day and some mornings she arrives at 7 o'clock to see "who comes late."

Should Advertise In Canada

If British goods, even with a tariff preference, are to find a proper market in Canada they will have to be advertised here. Canada is undertaking an extensive campaign with British and if the full benefits are to be reaped from the Ottawa agreements a similar campaign should be carried on in this country on behalf of United Kingdom and other Empire goods.

Who Were These

Blandford, England, decided to oil-cast its recent progress and beautifying campaign by having an up-to-date road line in the post office. An appeal to the government brought prompt action and a "new" box was installed. Inspection has revealed the letters "V.R." on the box, showing that it had been made in the time of Queen Victoria.

Hostilities have been barred in Chile as a private monopoly and powerful government combined.

Founding Of Canard Line

First Regular Monthly Service To Cross the Atlantic

Americans the world over are particularly interested in the birthday of the Canard Line, founder of the first regular steamship service across the Atlantic, first because the date of July 4th happened to coincide with their own Independence Day, and recently because the birth and growth of the steamship has played a large part in the development of America.

When the Canard flag-ship "Acadia" sailed from Liverpool on her first cruise from New York her arrival was the ninety-third anniversary of the maiden voyage of the pioneer Transatlantic "Britannia," from Liverpool to America. From then on the history of the Line has been to a large extent the history of Transatlantic shipping. The "Britannia," left Liverpool on July 4, 1840, bound for Halifax and Boston and covering the route in 14 days and 8 hours carrying 63 passengers.

She inaugurated the first regular steamship service across the Atlantic. Little is known of that first historic voyage except that it was successfully completed and when the "Britannia" bearing her builder, Samuel Canard, arrived at Halifax and Boston, he was received with the highest enthusiasm and was captured feast in hundreds of invitations to dinner, and the presentation of a handsome piece of wrought-by the merchants of Boston.

Canadians Rescued

Few Canadians realize that Sir Samuel Canard was born in Halifax and even more remarkable the Line which bears his name, had by the year 1850 established a huge fortune and was head of a fleet of sailing ships bearing between Nova Scotia and the mother lands. Knighted in 1859 for outstanding service during the Crimean War, he died in London in 1860, in his 78th year, one of the world's most prominent men.

Canard came of a United Empire Loyalist family and was one of the leading men in Nova Scotia for many years. The name of his family is still perpetuated in various parts of the Maritimes.

Those were the early days of the fast boat of four wide steamers, the "Britannia," "Arcadia," "Columbia," the story of the Line to Canada, "Steaming Up Channel" by Lawrence Mannock, a a fascinating one. Many celebrated passengers have been carried on these ships. Among no less a personage than Mark Twain, who made quaint account of his crossing in those early days in prose in a letter he wrote to the "Alta Record" of Halifax, and in his "Innocents Abroad."

It is heartening to know that the Canard Line was the first to obtain a company in carrying British mails by steamship, to adopt new inventions in hull and engine construction, to provide comfortable quarters for steerage passengers; to communicate by wireless, and lead to high speed. Unlikely in recent years the popular Line.

AN EXCITING SMART LITTLE DRESS

So young is mama! She'll love it! Well I guess! It has all the newest features, besides the smart fashion of fashion it.

Navy blue crinkly crepe silk inspired the original. The sleeves, collar and tie help marvelously in creating an unrestricted effect in carved crops overplanded in blue.

Note the wrapped arrangement of the bodice and interesting shirt treatment.

It's really made out of an embroidery small coat.

Pattern 506 jumper is just the cutest idea ever with yellow and white checked gingham gabardine.

Style No 506 is designed in sizes 11, 13, 15 and 17 years.

Size 15 requires 3¼ yards of 35-inch material for jumper with 3 yards of 35-inch material for blouse, and ¾ yard of 35-inch lining.

Price of pattern 10 cents in stamps or coin (coin is preferred). Wrap coin carefully.

AUGUST 4

RUTH

Golden Text Let us love one another, for love is of God." 1 John 4 7

Lesson The Book of Ruth

Devotional Reading Psalm 4 1-8.

Explanations and Comments

Naomi and Her Family in Moab, Chapter 1 1-5. During a severe famine in the time of the Judges Naomi and her husband and two sons left Bethlehem and settled in Moab There Elimelech, the husband died. The sons married daughters of Moab, Orpah and Ruth After a few years sons in Moab both sons died Naomi was the sole survivor of her family her daughters-in-law were to her fortune She determined to return alone to Bethlehem for she feared that the famine there was over.

At the Parting Of the Ways, Chapter 1:7-14. In eastern lands there were no kitchen take place in the home. Naomi Ruth and Orpah carried out the usual custom when they accompanied Naomi a short distance on her way When Naomi thought they had gone far enough to show her fitting respect she pleaded to dismiss them She bade each return to her own mother's house, and find a husband in her own land. "Jehovah deal kindly with you, as ye have dealt with the dead and with me"—thus she voiced her real motion of their devotion to her and her gone She kissed them, and they kissed and there wept As the young women both insisted they would return with her, she reminded them that they could not hope to secure husbands in her land. Orpah yielded and turned back.

"In our desire to honor the courage and charm of Ruth's devotion, we moderns are apt to be unfair to Orpah. Poor Orpah is often contrasted with Ruth as the typical representative of Moab, Ruth as the ideal Canadian. It is not so Orpah was not a cold-hearted creature who put into prudence than affection in her nature in returning to her native land and refusing to be a burden to the older woman. She acted according to Oriental standards wisely, and even as both she and Naomi felt in a true spirit of kindness He had nothing to reproach herself with, and her mother-in-law had no cause to feel disappointed. Both Orpah and Ruth were held fast as well as kinsfolk to Naomi.—James Moffatt

Ruth's Noble Decision, Chapter 1:15-18.—Naomi tried to persuade Ruth to return also, but Ruth was steadfast in her determination to cast her lot with Naomi. Her words to Naomi have become famous: "Entreat me not to leave thee, and to return from following after thee, for whither thou goest, I will go, and where thou lodgest I will lodge; thy people shall be my people, and thy God my God."

"Large is the life that flows for others' sakes;
Expands its bust, its noblest effort takes;
Habits!
Devotion rounds the man and makes
him whole!
Love is the measure of the human soul."—James Buckham.

Plenty Of Playgrounds

Canada has Eighteen National Parks Covering 13,500,000 Acres

The recent official opening of Riding Mountain National Park, in Manitoba near Neepawa, adds 1,148 square miles to the area reserved in the Dominion as a natural playground for all the people. There are now eighteen of these national parks throughout Canada, with a total area of 13,500,000 acres, an area equivalent to 800,000 acres. They are sanctuaries for wild life, refuges from the bustle and hustle of affairs, and as the population grows they will be more and more and more by them periodically overcrowded by a desire to "get away from it all."

Riding Mountain Park is 178 miles from Winnipeg and may be reached by good roads the British Columbia boundary. It is a natural home for elk, moose, deer, black bear and beaver. It has a herd of 2,000 to 3,000 wild, probably the largest in Canada. There are golf, tennis, swimming and boating, and for those who want it, the primeval forest. Hiddy to bring one into an encounter with the roaming elk. These ought to be enough qualifications for any one park.

Eighteen national parks offer eighteen magnificent vacations in infinite variety for the tired worker who craves the open and a few of them, such as Banff and Jasper, be may drem for dinner if his inclination move him that way, but for the most part they are handed over to the people pretty much as Nature left them.—Ottawa Journal.

Changed Name

The old world hasn't changed so much in some of its troubles.—Winnipeg Tribune.

Saskatchewan Natural Gas

Drilling Commences In Dirt Hills Area Of Province

After $40,000 had been spent in testing the structure Highwood Service Oils Limited, of Calgary, has pushed forward immediate plans for drilling for natural gas in the Dirt Hills The company has secured controlling interest in 16 000 acres approximately 30 miles south of Moose Jaw and 30 miles southwest of Regina.

A contract for drilling the first well has been given to the Rheinlon Burden of Canada Limited, work has already commenced and actual drilling operations started

The company is equipped and prepared to go to 4,000 feet if necessary but it is anticipated gas bearing strata will be reached long before that depth The area has been tested geologically and geophysically and last year a thorough survey by the late seismographic method was undertaken

The results confirmed previous investigation and if expectations are fulfilled a supply of natural gas readily available for both Regina and Moose Jaw should be developed by the fall months, the company says, in the official account

A great deal of geological work has been done in this area, which has been favorably reported on by leading geologists, and the present investigation work is being undertaken as a result of a favorable report on the seismograph survey made last fall by Geophysical Service Incorporation of Dallas, Texas, which is the same company that did the work for the Dominion Company on the Turtle River structure, which has just recently completed its well

President of the Highwood Barcee Oils is A. W. Dingman, the father of gas and oil development in the district of Calgary and a pioneer in Turner Valley, to whom much of the subsequent development is due. The company is strong financially and well able to carry out its undertakings.

Japan Needs Markets More Than Territory

Chinese Trade Is Necessary To Support Home Industries

Japan has a population more than a million to her population in the home islands. She now has as many people as Germany on a territory only two-sixths as large; and Germany is among the most crowded of nations. There is only one other big power that regularly has such annual gains, and that is Russia. There the annual increment is about 2,500,000 for a population two and a half times as large as Japan's. The latter figure at this rate twice as high. Birth control in Nippon is as yet unknown.

It does not follow that Japan's population pressure in Japan justifies recent methods in territorial expansion. Emigration is comparatively a trickle and cannot solve her problem. Her growing millions can be supported only by progressive industrialization and progress in foreign markets. In this sense Japan needs the good-will and trade of the Chinese people more than she needs Chinese territory.

Idea Originated In Canada

Canadian National Steamships Offered Cut Rates To Newly Weds

Bridge Blocked

Premier Mussolini last year offered a ten per cent. reduction for honeymoon on Italian airways but a few months before his cut-rate was introduced the Canadian National Steamships had come to the rescue of newlyweds in Canada, according to Thomas Cree, passenger manager. The company had announced a fare reduction of ten per cent. available to all couples sailing within a week of their wedding day and the offer is in effect again this year.

Abolishing the Slums

For England and Wales the Minister of Health has launched a campaign to wipe out the slums in five years. In Scotland the Department of Health is at present working on a three-year program which is operating with great success. Scotland has redesigned England and Wales in slum clearance.

U. S. RECOVERY PROGRAM WINS WIDE APPROVAL

London, Eng — Approval for President Roosevelt's recovery program was voiced in the House of Commons by spokesmen of the three principal political camps.

The debate, which turned upon the world economic conference upon the eve of Monday's adjournment of that gathering, drew from Neville Chamberlain, Chancellor of the Exchequer, the declaration that the pound sterling is an independent currency, linked neither to gold nor to the U. S. dollar

Independent speakers of the Labourite, Liberal and Conservative groups declared the United States is not to blame for lack of accomplishments by the economic parley.

"There was no basis on which President Roosevelt could stabilize the dollar with reference to the pound," charged the veteran Liberal chieftain, David Lloyd George making one of his now rare appearances in the parliamentary discussions.

Asserting the economic conference is dead, Mr Lloyd George asserted that "the prime minister is engaged in finding the best method of embalming it, so as to keep the appearance of life after the spirit has departed."

Cheers greeted the statement from the Conservative member. Wardlaw Milne, it was impossible for the United States to enter an agreement to stabilize the U S dollar

Many speakers referred to "the great experiment" now in progress in the United States. Mr Lloyd George said:

"There are three experiments now proceeding, on the success or failure of which the whole outlook of the world depends the Russian, the Italian and the American. The American is the most important.

"I hope to use the word revolution in reference to other countries, but it is a complete transformation."

The debate was forced on the government in order to clear up its policies with regard to such problems as currency and public works.

Road To Recovery

Industrial Situation Is Showing Further Improvement

Ottawa, Ont. Canada's industrial situation showed further signs of improvement at the beginning of July. Increases in personnel reported to the Dominion Bureau of Statistics by 6,138 firms were greater than those indicated by the forms making returns for any previous July in any year since 1930.

Establishments reporting data had 778,168 persons on their staff on July 3, as compared with 743,780 on June 2. This brought the index of employment to rise by 3.5 points to 84.5 as compared with the average seasonal advance of about two points.

Visitor To Canada

British Free Trade Leader Coming To Confer At Ottawa Conference

London, Eng.—Sir Herbert Samuel, leader of the Free Trade group in the House of Commons and former Home Secretary, will go to Canada to participate in the conference on pacific relations to be held at Banff, Alberta, this month, it was announced. Sir Herbert left for Canada July 28.

He will also attend a meeting of the Royal Institute of International Affairs to be held in Toronto, September 12. At this gathering it is planned to discuss some outstanding empire questions.

Visiting Peace River Country

Edmonton, Alberta.—Preparations for the visit of Lord and Lady Bessborough to the Peace River country have now been completed. The governor-general's party will arrive in Edmonton Sunday, August 6. They will entrain Monday evening for the Peace River trip which will last five days. A holiday side trip to Jasper Park will follow.

High Commissioner

London Representative Has Not Standing Of Cabinet Minister

Ottawa, Ont Queries reaching Ottawa from British newspapers indicate that the question of the Canadian High Commissioner being a member of the Dom nion Government is again under discussion in London Hon Gi Howard Ferguson, High Commissioner in London is a member of the Canadian Privy Council as was his predecessor, Hon Peter Larkin As such he may attend a cabinet meeting but eventually in some quarters the proposal being made that Canada's representative in the Br tish Government should be a full fledged cabinet minister

During the war Sir George Perley before he became high commissioner represented Canada in London with a member of the Borden Government

The arrangement has been advanced that a high commissioner could more effectively serve Canada if he had the authority of a member of the Dominion Government Under the present arrangement, the high commissioner is responsible to the minister of external affairs whereas if he were a cabinet minister he would be responsible to cabinet as are the holders of the other portfolios

Query suggestion made some time ago was that a member of the cabinet serve in London for two years and then be succeeded by another member, thereby always having a representative in close touch with Dominion affairs

End Economic War

Expert Trade Barriers Between England and Ireland Will Be Removed

Dublin, Irish Free State The belief is growing that the economic war between the United Kingdom and the Irish Free State which resulted from withholding by the Free State Government of land annuities amounting to $3,500,000 a year, will be speedily ended.

"We are not anxious to maintain tariff barriers," Sean Lemass, Minister of Industry and Commerce, declared in the senate "We will remove the emergency duties now if Great Britain will agree to remove her personal duties within a reasonable short time."

Mr Lemass added that if certain members of the United Kingdom government would "show a little sanity" there would be a speedy end to the dispute.

The minister's speech is generally regarded as a distinct advance and gesture to the United Kingdom.

Western Wheat Crop

Heat and Drought Spoils Excellent Prospects For Yield

Ottawa, Ont. Continued uncertainty as to the prospects for crops on the prairies is revealed in the ninth of a series of 15 weekly telegraphic reports on conditions in Manitoba, Saskatchewan and Alberta, published by the Dominion Bureau of Statistics.

Excellent wheat prospects in May were generally blighted in June by drought, and July brought a further decline, the report states.

The unsatisfactory conditions are regional, however, the report continues, and the final yield of the wheat crop will depend upon the acreage affected.

Bolaco Islands

Tokyo, Japan An investigation to determine whether Japan would be justified in annexing the Bolaco Islands recently announced occupation of nine hitherto ownerless coral islands is being conducted by the foreign office. The islands lie between the Philippines and French Indo-China at 11 degrees north and 113 east.

Ridge In Oil Relief

Toronto, Ont. — The ridge is off the relief problem. A large percentage of Ontario's unemployed have been absorbed," said Hon. J. D. Monteith, Ontario minister of public works, in a statement here.

Thanksgiving Day

Ottawa, Ont. — Thanksgiving Day this year will be celebrated on the second Monday in October, as was the case last year, it was learned here on good authority.

Journalist Passes

Viscount Burnham, famous British journalist and former publisher of the London Daily Telegraph, who passed away at the age of 71. For twelve years, 1916-1928 the distinguished newspaperman was president of the Empire Press Union.

Flight Postponed

Mollison's Plane For Further Flight Off For the Present

New York —Captain James Mollison said the projected flight of himself and his wife, Amy Johnson, is definitely off for the time being.

"I'm not through flying," the Scotsman said as he lay in bed in his hotel recovering from injuries received when his plane crashed at Bridgeport, Conn., after a trans-Atlantic hop.

Although he made it plain that their flying plans for the immediate future have not been made, Mollison intimated he had in mind obtaining on h s return to England, a "plane similar to the "Seafarer," the plane in which the couple crashed.

Meanwhile it became known that the "Seafarer" is being prepared for shipment to England on the liner "American Farmer."

Unemployed Congress

National Meeting Of Workless To Be Held in Ottawa

Ottawa, Ont The city council has been asked to provide accommodation for some hundreds of delegates who plan to hold a national congress of the unemployed in Ottawa, Sept. 6 and 7. The secretary of the national committee of unemployed councils, H. Sale, Toronto, also asked that the city provide food for the delegates.

Last August a similar gathering of the unemployed was held here, with hundreds of unemployed men and women coming to the capital by hitch-hiking, riding freight trains, and on foot. Some rode freight trains all the way from the Pacific coast.

The forthcoming congress was called by a committee appointed at the gathering last August.

World Ship Butter To New Zealand

Vernon, B.C The Okanagan Valley Co-Operative Creamery would receive a large order of Empire butter to New Zealand, taking in returns lumber or fish Directors of the company have petitioned the Minister of Trade and Commerce requesting him to try to arrange a shipment of Canadian butter to the antipodean dominion.

Viewed As Experiment

Believe Roosevelt Plan Would Not Be Immune In Canada

Toronto, Ont Toronto business leaders said they did not believe an industrial recovery plan along lines of that in United in the United States by President Roosevelt would succeed in Canada The United States plan of raising pay and shortening working hours, they said, would not be regarded otherwise than as an experiment.

C. H. Carlisle, president of the Goodyear Tire and Rubber Company said "I am not in favor of President Roosevelt s plan as a plan that would work out permanently. If it works at all it is a sort of anaesthetic for a bad case

C L. Burton, president of the Robert Simpson Company, described the scheme as "dynamite." In his opinion, Mr Burton said, "the loss in turnover by the government would be more the better for the wage-earner

J. Allen Ross, president of the William Wrigley Company, believed the plan would be successful but also had a good chance of success, but admitted "the industrial set-up of this country is different."

Improving Bay Railway

Work Being Done Between Mile 442 and Churchill

Churchill, Man. — Extensive improvements in the Hudson Bay Railway line are being made in this district in order to facilitate grain movements and industry in the far north

A work train employing 90 men is now in the district, and nearly 200 more are employed at the gravel pit five miles east of the harbor. Five hundred more are operating between the pit and Mile 442, Hudson Bay Railway. The embankments on the right-of-way are being widened and strengthened, it was learned here.

Churchill, Dec. 1.—Extensive improvements in the Hudson Bay Railway line are being made in this district in order to facilitate grain movements and industry in the far north

A work train employing 90 men is now in the district, and nearly 200 more are employed at the gravel pit five miles east of the harbor. Five hundred more are operating between the pit and Mile 442, Hudson Bay Railway. The embankments on the right-of-way are being widened and strengthened, it was learned here.

Harmon Trade Captures Prize

Takes First Place With Sample Of Durum Wheat

Regina, Sask.—Harmon Trade, champion wheat grower of Wembley, with his sample of Reward wheat took first place and a prize of $1,500, in the class of 10 bushels of hard red spring wheat at the World's Grain Show. Alberta growers carried off the first six places in this class, and a total of 12 prizes out of 25 offered. Prince Edward Island was the only province not going to Alberta in the class for hard red wheat, close to tallied 85.37%, out of 90.000.

Aged Couple

Mouche, Turkey Hsabi Hashim and his wife Hadji Haddidje who may they are 136 and 124 years old respectively, have appeared in Mosul after migrating from their village of Mutki. They have 45 children, grandchildren, and great-grand-children living.

Crowned Wheat King

Ireland Wilford Of Stavely, Successful In Previous Years

Calgary, Alberta, Ireland Wilford, crowned wheat king at Regina World's Grain Show, also is a prominent stockman of the Stavely, Alberta district. Proprietor of the 2,000 acre of Tamworth hogs, a flock of Massey-Shire sheep, a herd of Hereford cattle and a number of purebred horses on his four sections of land.

In every sense of the word a successful mixed farmer, Wilford will receive a rousing welcome when he returns to Stavely with the wheat crown. Stavely residents, while preparing for a great reception, hold how Wilford and his wife had quietly prepared since the fall of 1932 for the Regina show.

In the daytime and under artificial light at night the couple examined instant after instant of Reward wheat until he found the sample that carried him to victory at the world's greatest grain exhibition.

Ruling In Marriage Case

Alberta Court Determines Provincial Laws Governing Youthful Contracts

Calgary, Alberta. Alberta court of appeal has ruled any girl over 12 and any boy over 14 years of age may marry without the parents' consent as far as provincial laws are concerned, declaring such cases are exclusively under Dominion government control.

This judgment was handed down in Edmonton, Tuesday, during appeal court sittings and followed hearings of a case in which a mother attempting to have the marriage of her daughter annulled on the grounds both the daughter and youthful husband failed to obtain their parents' consent. The girl was 19 years of age and the boy 20.

The court held the marriage was valid in handing down judgment. A minority dissenting judgment was handed down by Mr. Justice Clarke.

Communists Arrested

Berlin, Germany The authorities announced that nation-wide police raids resulted in the arrest of many Communists and in the confiscation of large quantities of weapons, explosives, and subversive literature.

Canada Issues Special Grain Exhibition Stamp

To commemorate the opening of the World's Grain Exhibition and Conference at Regina this month the Canadian Post Office has issued a special set of stamps. Above we see a reproduction of a twenty cent stamp bearing the title "World's Grain Exhibition and Conference."

PART PLAYED BY EMPIRE IN WORLD PARLEY

London, Eng.—"The British Commonwealth of Nations was one of the greatest powers participating in the World Economic Conference," the Prince of Wales declared in addressing delegates to the British Empire conference of the British Empire Service League at a banquet here.

"Because of our position we can never have any narrow, national character," he continued. "For one of the greatest powers in the world to have no narrow, individualistic national character but yet be held by a great bond is a very great thing at present."

The Prince said that after ten years the British Empire Service League had proved its existence among ex-servicemen and among governments in all parts of the commonwealth of nations. All parts of the Empire had suffered severely during the last ten years. War veterans of the Empire had borne their burdens with great fortitude he said, because they knew what service and sacrifice were and knew it was up to them to help others who had not been through the same grueling.

The heir to the throne read a telegram from the King wishing continued prosperity to the league.

"Danger clouds are showing in many parts of the world," declared Rt Hon. Winston Churchill responding to a toast to the guests. "The glorious victory has not been followed by any slackening in the demands for exertion or any increase in the ease o the lives of our people but we can feel a certain satisfaction at the position we hold today."

Crowned Wheat King

Ireland Wilford Of Stavely, Successful In Previous Years

Calgary, Alberta, Ireland Wilford, crowned wheat king at Regina World's Grain Show, also is a prominent stockman of the Stavely, Alberta district. Proprietor of the 2,000 acre of Tamworth hogs, a flock of Massey-Shire sheep, a herd of Hereford cattle and a number of purebred horses on his four sections of land.

In every sense of the word a successful mixed farmer, Wilford will receive a rousing welcome when he returns to Stavely with the wheat crown. Stavely residents, while preparing for a great reception, hold how Wilford and his wife had quietly prepared since the fall of 1932 for the Regina show.

In the daytime and under artificial light at night the couple examined instant after instant of Reward wheat until he found the sample that carried him to victory at the world's greatest grain exhibition.

Ruling In Marriage Case

Alberta Court Determines Provincial Laws Governing Youthful Contracts

Calgary, Alberta. Alberta court of appeal has ruled any girl over 12 and any boy over 14 years of age may marry without the parents' consent as far as provincial laws are concerned, declaring such cases are exclusively under Dominion government control.

This judgment was handed down in Edmonton, Tuesday, during appeal court sittings and followed hearings of a case in which a mother attempting to have the marriage of her daughter annulled on the grounds both the daughter and youthful husband failed to obtain their parents' consent. The girl was 19 years of age and the boy 20.

The court held the marriage was valid in handing down judgment. A minority dissenting judgment was handed down by Mr. Justice Clarke.

Communists Arrested

Berlin, Germany The authorities announced that nation-wide police raids resulted in the arrest of many Communists and in the confiscation of large quantities of weapons, explosives, and subversive literature.

Where Work Goes Begging

London Millinery Factory Finds Girls Prefer To Draw Dole

Outside the office entrance of a London firm of millinery manufacturers hangs the notice:

EXPERT HAIRDRESSERS WANTED —APPLY WITHIN.

The matter is beginning to look a little weather-beaten but in spite of that the fact that an appeal has been unanswered by Premier, Government and applications to labor exchanges authorities no capable girls have yet come forward to fill the vacancies.

The reasons given me for this remarkable state of affairs reveal, in the one hand, the way of a girl's life is open to almost any one of the drawbacks of the dole-system of an unimaginative educational system.

"Optimism is our fantasy," a hatter's fitter told me. "In an empty time nothing to be occupied by may chance. We are eager to build an many customers as practicable, but we cannot get girls to work them.

"You have seen that notice outside our office. It has been endlessly advertised. We have interviewed and have done everything in our power to find suitable girls but in vain.

"If we could engage ten assistants tomorrow we would immediately put down ten machines. If we could engage thirty girls, then we would put down thirty machines.

"Why cannot we get them? A part answer was given to us recently by one of your former customers who has now married. When asked if she would reinstate work with us she replied that she had her husband every Wednesday on the dole, and it was not worth their while to go to work.

"That is the attitude adopted by hundreds of unemployed people. They balance the amount they are receiving from the Labor Exchange against the amount which they are offered by employers and decided not to put in a week's work for the difference between the two amounts.

"What makes our present position all the more astounding," he continued "is that wages and conditions we offer are exceptionally good.

"I guarantee that a smart experienced girl could by an 44 a week. Output could be making £3 per week after six months, and to that she would be increased to as much as £5 a week.

"Our hours, too, are reasonable. The girls begin at about a quarter to nine and leave at six. Sometimes by our clients insist that they work during could be later.

"We could engage for after work as many young girl clerks as we want at a salary of about fifteen shillings a week; yet the other people, carrying a wage which many young girls would like to earn, remain unemployed.

"I have often wondered why our schools do not supply girls for such posts as these, and try to show them that a factory is not necessarily a dingy, slave-driving institution, but something often providing a career equally attractive to that offered by an office.

"Two or three of our women employees who have, of course, been with us a very long time, now earn £500 a year. There are few careers which can show better prospects than this!

"Perhaps one day someone will wake up and realize these facts. Meanwhile we must sit back and hope gifted there every six girls who possess a good job to the dole, and that if we continue to make known our wants we shall get some sort of response." — London Sunday Pictorial.

Determined To Fly Pacific

Determined to pilot an aeroplane across the Pacific Ocean despite his 70 years, Charles Dickinson sailed from San Francisco aboard the liner "President Coolidge," for Japan. Dickinson, a licensed pilot, said that this was his fifth trip in the last 16 months to the Orient, in connection with his proposed trans-Pacific flight.

Made of special glass which takes the glare and most of the heat out of sunlight, a new type of skylight is a feature of the new post office in Dagenham, England.

Old Watches Sell Bulk

Quaker Man Discovers Peter Custer-ius Old and Still Running

They built quality into some watches, those long-dead horologists of the 18th century! So says John J. Lightcake and he should know. Some of his timepieces have been ticking off the seconds for close to 400 years.

Unboasting ancient watches is his hobby and at that boast in Germantown, P.G., he has one of the finest collections in America. It contains 100 pieces, many of them museum examples of the watchmaker's art, rich in historical associations, and still others just plain watches.

The gem of the whole collection is an ornate piece that was made at Germantown in the 16th century for a prince of the then young country. It is still running. The case is engraved on the back. And the movement is of solid gold.

The owner cherishes next to the case's maker the craftsman's workmanship. He was made in England at about the same time. Today, after a lapse of years, it still runs.

A century younger is the latest addition to the collection, which Mr. Lightcake considers complete. He purchased the new piece from a dealer on a visit to this province. It was constructed in 1691 and brought to this country by an emigrant from the old country.

He was probably a person of high station, for in those days ordinary men were made only for the rich. They were made entirely by hand and usually took months in the making. Consequently they commanded a high price of a watch was prohibitive to men of small means. He told of one that was made for Napoleon's bride, Josephine, that cost 100,000 francs.

Mr. Lightcake's great interest in watches began 20 years ago, when he bought an old one for 25 cents. Since then he has been adding to his collection at the rate of about one and he expects to continue indefinitely.

He began some day to present his watches to the Germantown Historical society, and have it placed on view at Ottawa, where the general public may derive pleasure as a means of the power of golden work.

Brazilian Experience

Aviator Hangs By His Toes Until Train Is Signaled

Lieutenant Daniel V. Gallery, Jr., of Washington was telling breathless naval officers how he hung from his single-seated plane by his toes 6,500 feet in the air.

Performing acrobatic manoeuvres in his plane, Gallery was going through a show not taken the safety belt suddenly came loose and he plunged downward out of his seat. He got a toe-hold under the top edge of the cockpit covering and held this for 2,000 feet, then worked some of his body into a vertical dive.

Gallery was able to get into his seat but the belt was broken and he could not fasten it. The cockpit and engine cover were damaged in the crash

The Fort Record

WHICH IS BEST?

At the recent concrete conference held in England, the subject of wheat carriage Saskatoon took up most of the time, costing governments thousands of dollars and so far nothing definite has been done, while over here, Mother Nature has done considerable all over the three western provinces in cutting the wheat surplus during the last few weeks. What with baldness as big as baseballs destroying large tracts of grain and in the southern parts of the province threats and grasshoppers have taken their deadly toll on grain crops. Now, we have the threats of frost, and in some districts a touch of white frost has been reported, due to the recent wet spell and sinking cold damp weather.

While crops are good in this district, yet this, the yield will be below last year and numerous districts are in a much worse condition. Poor crop reports have sent the price of wheat skyrocketing, but what use will high prices be to the unfortunates who have been badly hit by plagues, drouth and storms.

The way Mother Nature regulates things are more effective and easier done, but some reap the benefit of others misfortunes, while with wheat acreage limitation adoption plan under government supervision would be universal, it could not be controlled or arranged so consistently as when nature take its course.

Just what would be the outcome if countries adopted the wheat acreage plan and in the same year there were extra poor. Would conditions be any better?

SALADA TEA

Real Light On Russia.

So many conflicting reports as to conditions in Soviet Russia have been given to the public in recent years, and it has been so difficult to distinguish in each report what is pure propaganda either for or against the political and economic systems now prevailing in that vast country, that people have developed the habit of shrugging their shoulders when Russia is mentioned and refusing to place reliance in much that is told them. It was, therefore, with unusual interest that delegates to the World's Grain Conference at Regina listened to the first hand knowledge which was brought to them by R. J. Stirsimeon, consulting engineer of Brooklyn, Iowa, who was employed by the Soviet Government for several years in connection with its gigantic plans for the mechanization of agriculture as part of its famous five-year plan.

Mr. Stirsimeon had no political axe to grind, he had no propaganda to spread. He merely told an unvarnished story to the assembled world grain experts of the situation as he personally knew it to exist in Russia. And inasmuch as agricultural development in Russia cannot but have a direct effect on agriculture in Western Canada, it is of interest and value to have Mr. Stirsimeon's first-hand information.

Quoting Litvinoff, Soviet Commissar of Foreign Relations, as stating at Geneva last June that "unemployment, wage cuts, and strikes were unknown in the land of the Soviet," Mr. Stirsimeon commented that they were impossible in a country "where brand cards are granted only to the shock worker." Control of the country's food supply precluded strikes, he said. There is no unemployment because the country's census takes no account of any but the workers—the unfortunates do not officially exist. There is no necessity for wage cuts for the enemy the government puts its workers has no value outside Russia. It is paper money and will not be honored for one nickel on a purchase abroad, or on a purchase of imported goods within Russia. Mr. Stirsimeon explained.

Nevertheless there is wage-cutting in a sense, Mr. Stirsimeon giving the following example The Soviet Government fixes government loans each year requiring each worker in turn back a part of his wages. In 1931 the first job it amounts to a month's wages, which he could ill afford. The worker feels this keenly but he does not complain.

Russian workers, he continued, by report always poverty stricken, as a whole today have the worst living conditions of any of the workers of their neighboring countries in Europe. The Russian could meet conditions in his pleading peasant life, but uprooted and the remorse supplies taken from him, he has no way to cope with wide-spread cold and the horrors of hunger. The food supply available to Russian workers has fallen off in quantity steadily since 1928. Clothing, bedding and shoe supply are reduced to almost nothing Housing has become more and more congested in the industrial and agricultural centres promoted by the Soviet.

Describing the system of farming, Mr. Stirsimeon said farmers lived in villages going out to farm their own individual strips of land. Throwing the land into collective farms was only to eliminate the dividing lines by forming them in one unit. These collective farms were established before the State farms. The State farms were designed as models in each section for instruction and demonstration. Experiment farms, he might add, were the property of one as an enemy of the plan, and the promise of machinery through the government on their collectives quickly brought 90 per cent. of the farmers into collectives in the great areas of wheat and flax.

A Soviet State farm is never an independent farm in the Western world sense It remains only the hub in a vast network of farms, with Moscow as the centre From which emanate all plans, orders and supplies. The man directing these farms is not often an agriculturist nor even an engineer. The entire setup is wheat.

State farms are under the direction of a resident farm superintendent. He has several assistants, all with offices and residences in the main administration There are directors of the institute, the agricultural station, and of grain production. Each of these have further assistants, the number ever growing without end. All were specialists and did no manual labor. The administrative class grows larger and the working class relatively smaller. More and more offices are required and more duties are put in them. The working class gains recruits from only the more remote districts and in the absence of intensive work the women are brought in as "pinch hitters." Now, in 1933, it has become necessary to drive the office class back to the farms.

Describing how everything is centralized in Moscow, how even a provincial director of a State farm had to wait for orders to begin an operation or on his farm that he knew was long overdue, but which, although controlling perhaps thousands of workers, he had no right to execute without definite orders from Moscow, Mr. Stirsimeon said:

"One question looms large in looking over the situation in this modern dictatorship. How did the government get control over a vast country and over the destinies of a conglomerate people? The answer is simple; She got control of the food supply. Why should any government control the food of its people by such a strong hand? Because the government is of the minority party representing five to seven per cent. of the entire population. Then one wonders why do not more Russians join the Communist party and share the privileges which attend the 'party membership' in Russia today? The answer is that it is made very difficult for a Russian to join the Party, and of late only the children of Communists are allowed to join.

Everything, down to the smallest detail, is dictated from Moscow, and himself maintained through a collection of fines, taxes and shares of crop. There is never any lessening of restrictions by any one name in effect, however it is already neatly explained as an increasing of power in some particular field. This brings us to a very important consideration in a government dominated by five to seven per cent. of the population and it is this: Party Men must be kept in all the major agricultural posts, regardless of ability "comrades" because in these officials lies the power to control food, production, farming methods, all expenditure, education of the workers and his family That it is the concern of the government in appointing men to these chief posts that they are "safe" and "good party men." That is the reason why Communists insist that Farm engineering courses be separated."

Weakening Diarrhoea Dangerous Dysentery

Diarrhoea and Dysentery do not need to run for any length of time until the whole system is weakened and debilitated. Poor appetite, indigestion, loss of weight, the strength and being about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and tones up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of sickness. Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Grain Deterioration

Saskatchewan Research Workers Develop Method For Treating Damp Wheat

The practical value of the World's Grain Exhibition and Conference is revealed again in addresses contributed to discussion at the conference side of this smooth gathering by Dr. R. H. Larmour, J. S. Clayton, and O. L. Wrenshall, of the laboratories of the University of Saskatchewan. These men have been experimenting with wet wheat, with a view to eliminating the development of heat and consequent deterioration of the grain before it reaches the driers at the head of the lakes.

These experiments have not been a common thing in the agricultural life of prairie Canada of recent years, and yet on occasions we do get prepared rainy spells that carry their threat to cut grain. The three Saskatchewan scientific specialists have developed a machine called kilnene, that is held to be not unfeasonable in the of ghtest and that carries no danger to the quality of the wheat that yet effectively prevents damage from heat, moistness and fungi in the grain and consequent sprouting.

This would seem to represent a distinct advance in agricultural science, and that Saskatchewan men have been able to reproduce this treatment and import it to the World's Grain Conference will be a matter of satisfaction to all sections of this province.

Maxims Of His Majesty

Radio For Life Comfort In Workroom

An Encouragement Fodder

An Empire journal is to be current some given favorite quotations of celebrated people and shows quite clearly how many men and women whose names and deeds are known through the world fortify their lives by recalling great sayings and sentiments. This list of great people is headed by His Majesty King George and his list of quotations is worthy of being reproduced for its own sake as well as for the eminence of the one who uses it. These sentiments that appear in his workroom at Sandringham Pince read:

Teach me to be obedient to the rules of the game.

Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.

Teach me neither to prefer nor to reject cheap praise.

If I am called upon to suffer, let me be like a well-bred beast that goes away to some quiet place to die.

Teach me to win if I may; if I may not, teach me to be a good loser.

Teach me neither to cry for the moon, nor for cry over spilled milk.

There is a fine philosophy of life in these various maxims. Their reading enables one to understand better the character and training and great power and understanding usefulness of King George during his reign. Number 1 of fighting life's daily battles may find encouragement in these maxims. They are here given in that end.

—Regina Leader-Post.

Round Up Criminals

International Organization Perfected To Conduct Drive On Crooks

Police of several nations organized recently in Chicago the "International Criminal Police Commission" to round up criminal fiends and banish crime the globe.

The new international organization was formed at a meeting of European, American and European police officials attending conferences sponsored by Karven Collier, special counsel to the attorney general of New York, the international police conference, and the international association of police, Winnipeg was represented by Chief Chris H. Newton.

Foster Mother Workers.

Many thousand foreign residents in Chile are affected by a new law stipulating that 75 per cent. of all factory and office workers must be of Chilean nationality. Many will have to leave the country to seek work elsewhere. A law of boundary has been in the country 20 years, or is married to a Chilean, he will be counted as a Chilean, and he will be exempt if he is performing duties for which a native is entitled.

BYRRENDD SCHOOL FOR GIRLS

Manitoba Institution Devoted To the Educational and Aesthetic Development Of Young Canadian Womanhood

Attended by students from its inception, Riverbend Schools for Girls, Winnipeg, will continue work as a boarding and day school for girls with the reopening in September, according to the programme just off the press. A hundred per cent. academic record was again maintained when the 1932 results of the departmental examinations appeared in July, a tribute to the efforts of the teaching staff under the principalship of Miss Jean M. V. Foster, M.A., and to the dual advantage of limited enrolment and small classes, with consequent individual attention to the pupils.

The school was established in September, 1929, under the auspices of the United Church of Canada, starting with one building, the home of the late Sir James Aikins, bequeathed to the church for the purpose of giving western Canada one more cultural institution to fill a special need in a growing population. The following year a new building, to be used as a main school, was erected and the present group of three beautiful structures includes also the former residence of Col. G. H. Aikins, K.C., a son of the original donor.

Regularly inspected by the department of education, the school has faced scrutiny with a proud record, its student body, fully drawn from the significance of establishing tradition for their Alma Mater.

Riverbend begins the fall term with a teaching staff of fourteen, with Miss Foster again as principal and of structure in history. All holding academic standing of a high order and with tested teaching experience, the members of the staff are specialists in pursuits devoted to the educational and aesthetic development of cultured Canadian womanhood. Assisting the principal are: Miss Barbara May Erth, B.A., London University, in English; Miss M. Floyd Stinson, B.A., also London University, in French and German; Miss Beatrice Wilson, B.A., Toronto, in Scripture and Mathematics; Miss Mary H. White, M.A., of Oxford and Queen's, in Latin; Miss Helen Mac-Dougall, B.Sc., of Dalhousie, in Science and Mathematics; Miss Pierston P. R. Mewa, of the Margaret Eaton School, in Physical Education; Mrs. Donald Munroe, Manitoba Agricultural College, as house manager.

In the junior school, presided over by Miss Laura Call, are Miss Sadie M. Gregory, B.A., of Manitoba University, for grades V. and VI.; Miss Verna V. Vass, for grades III. and IV.; Mrs. Gordon L. Jamieson, in the kindergarten and Mrs. Miss Ferguson Dempsey, A.T.C.M., L.R.A.M., in school singing and music appreciation. Miss C. M. Laing is the efficient secretary.

Increased attention has been paid to the teaching of Grade XII. work, and the course of study, following in general that of the Manitoba school system, begins at the kindergarten and includes that grade

Special emphasis, explains Miss Foster, is placed on those studies which are most important from a cultural standpoint, such as, for example, English, French and music, the teaching of French, including conversation at meals, a French club, and other extra curricular activities designed to help to make it something more than a class-room subject.

From a graduate of the Margaret Eaton School of Physical Education, Toronto, pupils of Riverbend are given instruction in corrective gymnastics and physical education which includes practically all the indoor and outdoor sports of well-rounded living.

Ideally situated on the wooded corner of the Assiniboine River, the school, capable of accommodating 100 pupils and with an attendance in the first few years between 120 and 130 including both day and boarding students, Riverbend with its new building providing model class rooms, gymnasium, music room, and dining hall, supplies a "school away from home" of the highest standard.

Many names prominent in the social and church life of the west appear on its enlarged advisory council. Besides thirty-one from Winnipeg including Mrs. E. C. Harte, chairman of Government House, and Mrs. John Bracken, wife o fthe provincial premier, are Mrs C. S. Armstrong, Moose Jaw; Mrs. Robert Forke, Pipestone; Mrs. C. F. Adams, Calgary; Mrs. A. F. Laird, Yorkton; Mrs. R. C. Wallace, Edmonton; Mrs. J. E. Brownlee, Edmonton. Mrs. W. C. Murray, Saskatoon; Mrs. T. A. Nesbitt, Brandon; Mrs. Douglas Hagins; Mrs. A. M. Scott, Calgary, and Miss Alice Fife, Lacombe.

With the distinguished patronage of His Honor Lieutenant-Governor J. D. McGregor and Premier John Bracken, the school functions under a board of governors and directors of prominent citizens. Associations of Winnipeg have just arrived back in China and more are to follow.

Misses Jessie Forbes, West Indies and the Philippines rank just ahead of the United States in Chinese residents Following thereafter in decreasing proportion come Australia, Japan and the South Seas Islands. Canada with 43,000, Peru and Latin America, with 30,000, Russia with 29,963, South Africa, Panama and Central America with 20,000 and Europe with but 15,000 Chinese.

Speedy Results

A young man who had suddenly inherited a fortune decided to learn how to carry himself in society. He went to a school of deportment, and a bowing Frenchman bagged him to enter.

"Do you give lessons in deportment?" inquired the young man.

"The best, m'sieu!" gushed the proprietor. "My system ees perfect. Two weeks ago a young man—like you, m'sieu—he take only three of my lessons in deportment—and yesterday he was deported."

United States And European Radio Programs To Be Heard Over Canadian Stations

Canadian radio listeners will hear over Canadian stations outstanding United States and European radio programmes as a result of arrangements completed between the Canadian radio broadcasting commission and the big broadcasting companies of United States National Broadcasting Company and the Columbia broadcasting system.

These arrangements were concluded in New York by Thomas Maher, vice-chairman of the commission. In return for the American programmes, which are to be supplied to the commission for its relayed network, the commission is to supply the American companies with some of its famous programmes by broadcasting Dominion United Nations Announcement of the arrangement was made Friday by the commission.

Programmes to come to the commission's time for United States include grand opera from the Metropolitan Opera House, New York, and the concerts of the New York Philharmonic orchestra. The American broadcasting companies are also to supply programmes of their own creation in which famous singers and orchestras will be employed

In addition to supplying the commission with American programmes, the United States broadcasting companies are to make available to the commission the best-talent of import and events and other features which they bring across the Atlantic from Great Britain and the continent

As the programmes will be carried on the Canadian network in addition to all parts of Canada, reception difficulties in connection with these will be overcome.

The exchange of programmes in a co-operative step and is without cost to the network.

The United States end of the exchange will commence about October 1.

Over Twelve Billion Chinese Living Abroad

Population In Canada Is Given As Forty-Five Thousand

Chinese agitation against the so-called foreign imperialism never tell their listeners the magnitude of China's commercial interests in other countries. The Chinese overseas affairs commission announces that 12,786,172 of their people reside in United States and elsewhere beyond China.

Out of 22 nations or groups of nations listed by the commission Straits Settlements is number of Chinese residents, the total being 74,804.

Burma ranks well ahead with 2,400,000 Chinese, Siam with 2,000,000 to second and Malaysia is third with 2,000,000 In Dutch East Indies there are 1,233,856, in Korea 910,000, in Hong Kong 839,645, in Indo-China 480,000, in Formosa 240,000, in Soviet Russia 300,000

Mexico, which is rapidly becoming the graveyard of Chinese settlers, is listed as having 139,000 and ranks tenth in the list of countries. Thousands of Chinese have just arrived back in China and more are to follow.

Misses Jessie Forbes, West Indies and the Philippines rank just ahead of the United States in Chinese residents Following thereafter in decreasing proportion come Australia, Japan and the South Seas Islands. Canada with 43,000, Peru and Latin America, with 30,000, Russia with 29,963, South Africa, Panama and Central America with 20,000 and Europe with but 15,000 Chinese.

Speedy Results

A young man who had suddenly inherited a fortune decided to learn how to carry himself in society. He went to a school of deportment, and a bowing Frenchman bagged him to enter.

"Do you give lessons in deportment?" inquired the young man.

"The best, m'sieu!" gushed the proprietor. "My system ees perfect. Two weeks ago a young man—like you, m'sieu—he take only three of my lessons in deportment—and yesterday he was deported."

Retire Civil Servants

Order Passed To Retire Those Who Have Passed Age Of 65 Years

Pursuant to the governments efforts to reduce the annual cost of public services by an amount estimated in the budget speech last March to reach $16,000,000, the government in council passed an order providing for the retirement of civil servants who have reached or may reach the age of 65 years.

This is only one of the methods being adopted by the government in its economy efforts and the number of employees concerned is estimated at about 1,500 throughout Canada. Those retired will receive their superannuation allowances as provided under statute, and if not contributors to any retirement fund, will be given pensions amounting to one month's salary for each two years they have been in the service up to a maximum of six month's salary.

Something New In Oil Wells

Blue Goose Producing Pure Vaseline For Ten Years

A fresh oil well which came in ten years ago as a producer of almost pure vaseline is still pumping the heavy golden substance and paying its owner at Lamar Oklahoma, handsomely.

Perhaps the only well of its kind in the world, the well is a marvel to veteran oil men, both as to the oil it produces and its life Men who have followed the oil industry in many climes said they never have seen or heard of a similar well.

The well was drilled in at 3,710 feet on Jan 26, 1923 for production estimated at 250 barrels a day The vaseline well still produces around this amount and still is the only well in the area. Other drilling attempts have produced dry holes

The strange kind of oil flowed over the derrick 200 feet when the well was drilled in. Dark green in color, the oil turned a brilliant golden yellow when it struck the outside air Analysis showed it to be almost pure vaseline It was so heavy that it hung in ropes from the derrick for days.

Because of its thickness ordinary pipe lines would not carry it A special line with a steam pipe to heat the almost solid lubricant was used

New Guide For Airship

Pilot Can Locate Cockpit Without Endangering Craft Or Self

After two years of experiments, the "airshot," a compact hot one foot square and weighing less than 30 pounds has been perfected to take complete charge of an aeroplane after it leaps off.

Encased in a metal box, the automatic pilot would guide the ship to any predetermined height, level off and start on a chosen course while one at a human pilot touching the controls

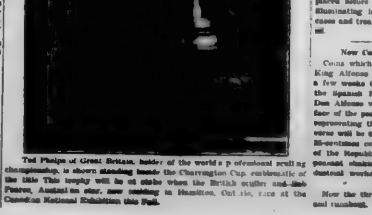
Gyroscopically controlled and hydraulically operated, the device includes an automatic turn control, and automatic climb lever and a descent control The human pilots can leave the cockpit for any length of time during which flight without endangering the flight.

One of the airshots now in its initial test campaign of a well-known air line The machines average 150 miles an hour on a transcontinental jaunt

The device does not dispense with the services of the pilot or co-pilot Pilots are required to take off and land the machines and to keep a lookout for other aircraft.

Experts experimented on humans and devise the surest diet course noticeable improvement, but that it does not equal that of animals

The Rolling Crampion and the Coveted Trophy



Ted Phelps of Great Britain, holder of the world a p ofessional sculling championship, is shown standing beside the Charrington Cup emblematic of the title This trophy will be at stake when the British sculler and Bob Pearce, Austral an champ, now racing in Hamilton, Ont tie, race at the Canadian National Exhibition this Fall.

Week In Civilization Enough For Trapper

Makes No Apologies For Desire To Return To Northland

A week in civilization is enough for Ranger Johnson, one of the best known trappers in the far north, in Prince Albert recently on his annual jaunt into the land of automobiles and dogtrains.

He left again for Big River where he planned to push off his big camp and paddle his way to his trapping grounds on the Hatchet Lake country, 400 miles from Fin Flon, Manitoba. It and his dog followed the yearly trips to Flin Flon from their northern home stopped the canoe to Big River, spent four days in Prince Albert, and then away again.

He was a visitor at Prince Albert last summer and promised to go back next year Civilization has its attractions but the hardy trapper makes no apologies for his desire to get back to the land of trees and water.

Listening to the stories of experiences and looking at the wonderful collection of snapshots of his outfit, his fur catch and of his master woodsmen of the northland, makes that desire understandable.

Despite the rigidity of carrying his canoe and equipment over mile portages necessitating seven trips back and forth or a total of 14 miles' walking. On the round trip, there are 6 of them, though only a few are that long

A leader in the city stated that each year Johnson comes in with the largest catch from the north. In addition to that, he is what is known as a "good trapper" that stark is civilize in good shape on his arrival.

Carrots Good For Colds

Result Shown In Nasopy and Gloomy Cases

Experiments of some Chicago experts for several years have proved that the lowly carrot, favorite food of rabbits is one of the best internal hair tonics yet discovered

The remarkable beautifying effects was first noticed when cattle were fed on carrots. They soon became fine, glossy animals.

Experts experimented on humans and decline the carrot diet causes noticeable improvement, but that it does not equal that of animals

WORLD HAPPENINGS BRIEFLY TOLD

It has been officially announced at Ottawa, Monday, October 9, would be the earliest Thanksgiving Day for Canada.

Henry Ford recently passed his 70th milestone, in excellent health and no impressed with many handsome that he has no time think of such things as retiring.

Chorkoung has opened a $1,500,000 munitions station, 100 feet long and 350 feet wide, in which Paris-bound travelling will be transferred from ships to special trains.

C. Bowlby Drummond, vice-president of the Mechanical Equipment Company, died recently in Montreal, after a long illness. He was 39 years old and a son of the late Dr. William Henry Drummond, the noted poet.

Hunt Combe colony of the Dominion Leather Valley coal fields, on strike against wage reductions for three months, demanded 15 per cent. statory increase. Five mines are affected by the strike.

Thirty-three thousand, three hundred and sixty sheep, 32,671 cattle, 103,193 hogs, and 32 calves were shipped from western to eastern Canada during the first 24 weeks of this year.

Nelson's personal log book has been handed over by Prime Minister Ramsay MacDonald to Sir George Hill, director and principal librarian of the British Museum. The entries in the book are in the admiral's hand.

The appointment of Malcolm's ex-service for rehabilitation of her countrymen into through a six-year programme has been hailed by the command of General Pinheiro Elias Calles, the "iron man" and former president of Mexico.

Colombia revenues for the first quarter of the present fiscal year were $60,000 greater than for the corresponding period last year, states Hon. J. W. Jones, Minister of Finance. Receipts were $6,310,000, compared with $6,720,000.

The first colonist of new wheat from Manitoba was landed at the elevators at Groton, Man., with wheat from the farm of D. Kinnear. The grain was an excellent sample, grading No. 1 hard and indicated a yield of 16 bushels to the acre.

Tool H.B. Ready

Will Investigate High Insurance and Cargo Rates

The Federal Government is prepared to consider the feasibility of India by Canadian government vessels of the Hudson Bay route before the present congested season and after the season, it is indicated by Edward Brass manager of the Southern Saskatchewan stock yards at Moose Jaw. The suggestion is the result of the recent Saskatchewan stock growers conference and its purpose is to determine the justice or otherwise of existing insurance and cargo rates. Mr. Evans has received notification that an edict of the Federal Department of Trade and Commerce will shortly come to Saskatchewan to discuss the proposal.

Danger Spots For Pedestrians

Five Are Listed For Guidance Of Careless Drivers

Five principal danger spots lurk in traffic for the unwary pedestrian, according to an analysis of accident reports. A large proportion of traffic deaths involve persons on foot and the circumstances listed the order of their frequency, are: Crossing the street between intersections; coming into the street from behind parked cars; walking on or along rural highways, particularly when failing to walk facing traffic; and children playing in the street.

Accidents Victims Found

With the melting of the snow on the Seton Alps six of 13 avalanche victims have been found 7,500 feet above Lytton. The 13 were engaging sugar and coffee across the frontier when the avalanche swept down from a pass and buried them under snow, ice and rock 1,500 feet below. Search for the remaining seven is being continued.

Prompt and Efficient

Member Of British Automobile Club Road Service

Day and Night

Depression or no depression, some accidents or repairs are necessary. Our service organization continues to give prompt and efficient service. Take the case of the Detroit Automobile Club. A friend of ours who is a member of it says writes:

"I had a little car smash recently, and presently received a letter from two lawyers demanding that I pay $250 for damages to the other car. As I felt the accident was not my fault, I sent the letter to the automobile club, and the next day both lawyers were struck by lightning. Personally, I think that is carrying things too far, but I suppose the automobile club knows what it is doing."

—London Advertiser.

Hot Air Superstition

A hot-minute checkup on the person trying to negotiate a bidder set up on the sidewalk in Sacramento, California, was as follows: Of the forty-six women passing, thirty-four walked around and thirty-eight of the thirty-seven men did the same. Twenty-three men and twenty women breathed under. Possibly some didn't want to be hit with a brick—or a gob of paint.

Best Quality Shaving Brush FREE for POKER HANDS

Shaving is a real pleasure with a fine quality shaving brush like this one . . . bristles set in rubber . . . a gift you'll surely appreciate and use. Given in exchange for only 5 complete sets of Turret Poker Hands

One 20c package of Turret Fine Cut will prove the quality and economy of this mellow, cool Virginia cigarette tobacco. You can roll at least 50 cigarettes from one package . . . and cigarettes of sweet Virginia fragrance and flavour . . . supremely satisfying.

SLIPPER, LACES OR CHARMEUSE SUIT ARMS YOUTHFULLY

DESIGN

Just a glance at this lovely model and mature years are not under the hand will recognize its possibilities. Youthful lines are not under-branded in such a modish way.

It affords an opportunity for contrasting fabrics, for the vogue for Paris favours so much this season.

And don't you think the sleeves are especially smart? The low puffed effect is a charming way of adding arm length.

A conservative blue and satin crepe would develop splendidly in this model with white crepe.

It can easily be carried out in one color.

Design No. 479 is designed in sizes, 34, 36, 38, 40, 42, 44 and 46 inches bust. 36 requires 3¾ yards of 39-inch material with 1½ yards of 39-inch contrasting.

Price of pattern 20 cents in silver or coin (coin is preferred). Wrap coin carefully.

A Genius For Organizing

Lord Of Thousand Ships Was Millionaire At Thirty-Nine

One of the reasons why the "sun never sets on the British flag" was the organizing genius of Sir John Elliverman, son of a German banker, Sir John died recently in France, but in a hundred ports from Southampton to Sydney, his flag is flying on the ships which keep Britain fast on the seas.

It was quite appropriate that Elierman, the ship owner, should be the wealthiest man in Britain, whose 150 and prosperity depend upon sea-borne commerce. A few years back when many values had not flown as far as they have today, Sir John's wealth was estimated at from $100,000,000 to $200,000,000. That put him far ahead of any other Britisher and in the Henry Ford and Rockefeller class. Even today the lower limitation now looms given the private family fortunes of the rest within the sanctuary precincts. But Hannah could not sail, for and and bitter thoughts filled her mind as she contrasted her children left with that of Pan-Jesus. Elhanah's other wife, who was blessed with many children. After the meal was over she proceeded herself to the temple to pray to Jehovah. Her prayer was accompanied by many tears as, standing with her face toward the ark, she made her vow that if Jehovah would bless her with a boy, she would consecrate him all the days of his life to Jehovah.

"Jehovah prayed for a child from God, that he might give him back to God. Praying for gifts that we may give gifts back to God has in it a high and noble motive. Do you pray for money that you may give it back to God? If so, would that there were more of you. Do you pray for success in your life-work, that you may lay it at the feet of Jesus? If so, the largest possible success will be a blessing."—A. C. Dixon.

Hannah also declared that the child should be a Nazarite, one set apart for the Lord, of which his unshorn head should be a token. The Nazarite was a novice of the Nazarite were the refraining from wine and all intoxicating drink, letting the hair grow long, and the avoidance of defilement by the dead.

"Every child in a truly Christian home is a dedicated child. He is committed to God's service in so far as one person can commit another. His name is written in the Book of Life, in pencil it is true, which may be erased out. Still, his name has been entered. He is nominated for the University Company and is being trained for it."—R. C Ollie.

Forestalling End Of World

Prophets Always Find Credulous People Who Believe Them

Once again a prophet has been made to look foolish by contemning the end of the world on a certain date which has gone without anything happening. In this case it was a rich business man in London, who if he was sane enough to manage a successful business, ought to have been sane enough not to believe such tomfoolery. Yet he had sufficient faith in his beliefs to give away enough of his wealth before the prescribed date, and unfortunately he persuaded a number of others to do the same. Today they are all sadder and wiser men.

It is strange that this sort of crankiness occurs from time to time. It has happened in nearly every country under the sun, and the procedure is the same in every instance. The prophet induces credulous people to whom he transmits his religious mania to give away almost everything they possess on the ground that they will stand a better chance of entering the Kingdom of Heaven if they are as penniless when they leave the world as when they came into it. The fact that the end of the world has been predicted often without result does not appear to deter other prophets from arising.

At Chatham, England, not far from London, is a huge building known as "Jerusalem Tower," about the size of Eaton's store in Toronto, which was erected about sixty years ago by a religious fanatic known as "Jezreel." He raised thousands of people to believe that the world would end on a specific day, and they subscribed a huge sum of money to build this place so that they would all assemble within the walls in preparation for the day, the together and pass into the Kingdom. Of course nothing happened, but a large number of dupes retained faith in him and felt that "Jezreel" was just a bit out of his reckoning. So they lived on in the immediate vicinity until they died, handing on the belief to their children, and although "Jezreel's Tower" is now a ruin inhabited only by rats, there are still some people occupying houses in the neighborhood who call themselves the "Jezreelites," and can be distinguished by their mode of dress.—St. Thomas Times-Journal.

SUNDAY SCHOOL LESSON

AUGUST 13

HANNAH

Golden Text: "A woman that feareth Jehovah, she shall be praised."—Proverbs 31:30.

Lesson: 1 Samuel, Chapters 1, 2. Devotional Reading: Psalm 126.

Highlanders and Commando

**Hannah's Prayer For a Son, Chapter 1:9-11.—Hannah and Elkanah, her husband, went regularly every year to the sanctuary at Shiloh, there to worship and offer sacrifice at one of the great religious feasts, probably the Feast of Ingathering, or Feast of Tabernacles, which was held after the grape and olive harvest. The sanctuary was the tabernacle. The temple was not built until about a hundred years afterwards.

As was customary, after a portion of the sacrificial victim was burnt at the altar, and another portion had been given the priests, the family portion of the rest within the sanctuary precincts. But Hannah could not eat, for sad and bitter thoughts filled her mind as she contrasted her childless lot with that of Penninah, Elkanah's other wife, who was blessed with many children. After the meal was over she proceeded herself to the temple to pray to Jehovah. Her prayer was accompanied by many tears as, standing with her face toward the ark, she made her vow that if Jehovah would bless her with a boy, she would consecrate him all the days of his life to Jehovah.

"Hannah prayed for a child from God, that she might give him back to God. Praying for gifts that we may give gifts back to God has in it a high and noble motive. Do you pray for money that you may give it back to God? If so, would that there were more of you. Do you pray for success in your life-work, that you may lay it at the feet of Jesus? If so, the largest possible success will be a blessing."—A. C. Dixon.

Hannah also declared that the child should be a Nazarite, one set apart for the Lord, of which his unshorn head should be a token. The Nazarite were the novice of the Nazarite were the refraining from wine and all intoxicating drink, letting the hair grow long, and the avoidance of defilement by the dead.

"Every child in a truly Christian home is a dedicated child. He is committed to God's service in so far as one person can commit another. His name is written in the Book of Life, in pencil it is true, which may be erased out. Still, his name has been entered. He is nominated for the University Company and is being trained for it."—R. New Low Rate Precedent

Quebec Penalty For Kidnappers In Year 1926

If New York state legislators decide to enact a law providing the death penalty for kidnapping, as has been urged, they will have precedent in the province of Quebec, Canada, and precedent is dear to the legal mind.

On March 1, 1926—360 years ago—were promulgated the Duke of York's laws which enacted 13 offences for which the death penalty was inflicted. One of these was kidnapping. It read: "If any person forcibly steales or carrieth away any man or woman, he shall be put to death."

Australia's wool clip is estimated at 1,000,000 pounds.

Tired Feeling

Depression or no depression, some accidents or repairs are necessary. Our service organization continues to give prompt and efficient service. Take the case of the Detroit Automobile Club. A friend of ours who is a member of it says writes:

"I had a little car smash recently, and presently received a letter from two lawyers demanding that I pay $250 for damages to the other car. As I felt the accident was not my fault, I sent the letter to the automobile club, and the next day both lawyers were struck by lightning. Personally, I think that is carrying things too far, but I suppose the automobile club knows what it is doing."

—London Advertiser.

Hot Air Superstition

Twenty-three men and twenty women breathed under. Possibly some didn't want to be hit with a brick—or a gob of paint.

Preventing Bum Fires

Ontario Fire Marshals' Records Show Spontaneous Combustion

The Ontario Fire Marshals' records show that in the past year there were more than one-seventh of the fires originating from spontaneous combustion to beg than from any other cause except lightning to unprovided burns.

Harvest weather conditions in 1925 were so close together that in no year since then ever were expected. Instead there were 270 fewer barns burned in Ontario and a decrease of 17 per cent. in the number of barns burned.

Credit for this is given to the more general use of mil. The adequate use of mil is the most certain way of reducing and preventing spontaneous ignition fires.

Canada's Diagnosis

Many well equipped the most simplicity of Canada's hospitals are in general by the fact that of the 32 given on the total, no fewer than 600 maintain their own X-ray departments, while 204 have their own medical laboratories. All these physical therapy departments.

Foretelling End Of World

Prophets Always Find Credulous People Who Believe Them

Once again a prophet has been made to look foolish by contemning the end of the world on a certain date which has gone without anything happening. In this case it was a rich business man in London, who if he was sane enough to manage a successful business, ought to have been sane enough not to believe such tomfoolery. Yet he had sufficient faith in his beliefs to give away almost everything he possess on the ground that they will stand a better chance of entering the Kingdom of Heaven if they are as penniless when they leave the world as when they came into it. The fact that the end of the world has been predicted often without result does not appear to deter other prophets from arising.

At Chatham, England, not far from London, is a huge building known as "Jezreel's Tower," about the size of Eaton's store in Toronto, which was erected about sixty years ago by a religious fanatic known as "Jezreel." He raised thousands of people to believe that the world would end on a specific day, and they subscribed a huge sum of money to build this place so that they would all assemble within the walls in preparation for the day, the together and pass into the Kingdom. Of course nothing happened, but a large number of dupes retained faith in him and felt that "Jezreel" was just a bit out of his reckoning. So they lived on in the immediate vicinity until they died, handing on the belief to their children, and although "Jezreel's Tower" is now a ruin inhabited only by rats, there are still some people occupying houses in the neighborhood who call themselves the "Jezreelites," and can be distinguished by their mode of dress.—St. Thomas Times-Journal.

Cannot Be Classified

Two fishermen have caught a unique monster that defies classification at Tacoma, Washington. The strange creature has the head and body of a reptile and the gills and fins of a fish. Powerful jaws enclose fangs nearly an inch long. The body is large and muscular for about 16 inches behind the head, then tapers off rapidly into a dark, scaleless, reptile-like tail five feet in length.

Sense Of Supply

Teacher—What are the products of the West Indies?

Boy—"I don't know."

Teacher—"Come, come! Where do you get sugar from?"

Boy—"We borrow it from next door."

U. S. PRESIDENT APPROVES LARGE NAVAL PROGRAM

Hyde Park President Roosevelt has approved plans of the United States navy for construction of 21 new war ships in the $238,000,000 building program.

The president carefully analyzed the bids recently received by the navy and the allotments decided on by the commanders. His approval signalled an immediate start on work providing jobs for thousands in government and private shipyards.

Admiral William Standley, chief of naval operations, and Rear Admiral Emory Land, chief of construction, brought the naval construction program to the summer White House by aeroplane.

Mr. Roosevelt talked the plans over with his naval chieftains and after giving his approval left with them the formal announcements of assignments to yards for construction of the ships.

The start of America's huge naval construction comes just after word from Japan of the start of a building program there.

Mr. Roosevelt's ship building plan comes under the public works program and is intended to give the American fleet the strength it is allowed under existing naval limitations agreements.

Both Republicans and Democrats in congress have urged that the Americas fleet be built up to the terms allowed by the London agreement.

About $46,000,000 is to be expended this year and a total of $238,000,000 over three years.

Rhone Newspapers

Code Of Ethics Needed In Treatment Of Crime News

Chicago. A special code of ethics for treatment of crime news by newspapers as an aid to law enforcement officials was asked by Malcolm W. Bingay, editorial director of the Detroit Free Press.

Addressing the International Association of Chiefs of Police, Bingay placed partial responsibility for the rise of the gangster upon what he termed the "sensational, irresponsible and scandal mongering element of the press."

The element, he declared, had served as publicity agent for the criminal.

War On Kidnapping

President Roosevelt Maps Out Plan To Control Menace

Hyde Park, N.Y.—President Roosevelt mapped a war against kidnapping and racketeering with his intimate adviser, Raymond Moley, an authority on crime, and scanned every available federal statute to aid an immediate campaign.

To beat down kidnapping he is counting on a super police force, already in communication and at work, to co-operate with state authorities.

Scouts' Fourth Jamboree

Lord Baden-Powell Present At Gathering of Scouts

Gedollo, Hungary —The fourth world jamboree of Boy Scouts started here with the parade of 30,000 boys led Admiral Nicholas Horthy, regent of Hungary.

A telegram arrived from the Prince of Wales, sending the Scouts for a greeting sent to him and wishing them success. Lord Baden-Powell, founder of the Scout movement, was present.

Space For Cattle Shipments

Calgary, Alberta.—Fourteen vessels were now available for shipment of Canadian cattle to Great Britain, according to A. E. Partington, of the commercial intelligence service, Ottawa. He said Hon. H. H. Stevens, Minister of Trade and Commerce, had concentrated on the cattle shipping problem and had increased the number of ships from five to 14.

Bank Investigation

Personnel Of Commission Is Announced By Sir George Perley

Ottawa Civil Personnel of the royal banking commission to inquire into operations of the Bank of Canada was announced by Sir George Perley acting prime minister at the conclusion of a cabinet council session.

Lord Macmillan, noted British jurist, has been appointed chairman and other members of the commission are Sir Charles Addis, English banker and economist; Sir Thomas White, war-time minister of finance; Hon. J. E. Brownlee, Premier of Alberta and Beaudry Leman, general manager and director of the Banque Canadienne Nationale of Montreal.

Make Heavy Payment

Saskatchewan Pool Elevator Issues Cheque For Large Amount

Regina Sask The Saskatchewan Pool Elevators recently paid $1,894,614 to the liquidators of the Saskatchewan Co-Operative Elevator Company in final payment on the purchase price of assets.

With the exception of a payment on a mortgage to the Saskatchewan provincial government of $307,500 plus interest which is to be paid at the end of this month, the entire liability has disappeared from the books of the pool.

The purchase price of all the assets in 1926 was $11,061,300.

Balloons Rise To Stratosphere

Record Temperature of 87 Degrees Below Zero In Alberta

Calgary, Alberta. A height of nine miles and a temperature of 87 degrees below zero is the record so far attained by meteorological balloons released from Calgary by Captain C. H. Brownlee in connection with the polar year tests.

Twelve of the 22 balloons, equipped with instruments to record atmospheric conditions in the stratosphere, have been recovered, Dr. Brownlee reports. The balloons have remained aloft during a month since last September.

B.C. Legislature Dissolved

Elections May Be Held About Middle Of October

Victoria, B.C. The seventeenth legislature of the province of British Columbia was dissolved by proclamation of Lieutenant-Governor J. W. Fordham Johnson, acting on the advice of Premier S. F. Tolmie and his ministers.

No official date was announced for the general election to follow, but voting is expected about the middle of October.

Refuse To Aid Trotsky

Paris, France.—Leon Trotsky was reported to have failed in a desperate effort to get the Soviet Ambassador, Maxim Litvinoff, to help him return to Moscow. The exiled Bolshevik conference here. If we have so many small establishments the public is called upon to share an overhead which is unfair," he said.

Mergers Better Than Combines

Toronto, Ont. "The day must never come when we have a combine, but a merger is different thing," Mayor W. J. Stewart of Toronto told the Funeral Service Association of Ontario convention here. If we have so many small establishments the public is called upon to share an overhead which is unfair," he said.

Freedom Lightning

Minden, Ont.—Perhaps lightning never strikes the same spot twice; but it comes pretty close to it. Five head of cattle on the farm of Donn Gibbs were killed by lightning recently. Last autumn a large barn on the same farm was struck and burned to the ground.

Want Shorter Hours

Winnipeg, Manitoba.—Adoption of shorter working hours in all Manitoba industries and more rigid enforcement of the Minimum Wage Act will be urged upon the provincial government by the Winnipeg Trades and Labor Council.

HEADS BANK COMMISSION

Lord Macmillan, Noted British jurist, appointed chairman of commission to inquire into operations of Bank Act in Canada.

Encounters Obstacles

Dog Number From The Pen May Not Reach Chicago Fair

Winnipeg, Manitoba. Pat Campbell famed northland dog breeder, has almost given up hope of reaching the World's Fair at Chicago with his team of racing huskies.

Campbell, and two companions, mushed the 500-mile trail from The Pas to Winnipeg, arriving here 13 days ago. Since then he has been trying to arrange for entrance to the United States, and has appealed to Chicago fair officials for aid.

Immigration authorities demand a bond of $300 each for Campbell and his sister, and another bond of $3 against for the seven dogs in his team.

Churchill Port Opening

Formal Opening May Be Postponed Until Next Season

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways and Canals, stated that formal opening of the new port of Churchill will, in all probability, not take place until next year.

In response to a question by E. M. Stitt, M.P. for Nelson, Dr. Manion stated in the House last session that the official ceremony would probably take place this season. However, it is the desire not only of the Minister, but of the government and the Prime Minister himself that the latter should be present at the open.ng

Welcome For Prime Winner

Plan Reception For Premier Willmott At Stavely

Calgary, Alberta Premier J. F. Reid, member of Alberta, and Hon. George Hoadley, Alberta Minister of Agriculture, are expected to attend the royal welcome being prepared to Premier Willmott, winner of the world wheat king crown at Regina World's Wheat Exhibition and Conference, at Stavely, where his farm is located.

Willford is expected to return to Stavely August 7

BRITAIN'S AIR MINISTER BECOMES A PILOT

Lord Londonderry, British Secretary of State fo Air, evidently believes in practising what he preaches. Two weeks ago he gained his "A" certificate for flying and a week previous his second daughter, Lady Margaret Stewart, also qualified for her "A" certificate. Lord Londonderry's youngest daughter, Lady Mary Stewart, who is not yet 12, is rapidly becoming an accomplished flyer. Our picture show Lord Londonderry in the cockpit of his plane and Lord is a photograph of Lady Margaret.

Loan Easily Subscribed

Five Reception Accorded Canadian Loan On London Market

London, Eng The most optimistic expectations were borne out when the Loan for the new Canadian loan of £15,000,000 were closed directly after they had been opened.

It was understood, although not officially announced, that the first mail of the day had brought a substantial over-subscription.

The enthusiastic reception accorded the first Canadian loan on the London money market in 20 years was fully up to the welcoming comments of financial authorities after announcement of the loan last week, summed up by financial correspondents of the daily newspapers who called today "Canada's day."

Success of the loan will promote the financial co-operation between London and Ottawa, "which is necessary if the policy of last week's empire declaration is to be made effective" said the Times.

That declaration called for closer financial relationships with stability of exchanges and directly preceded the re-entry of the Dominions into the London loan market.

Today's loan was in four per cent bonds, sold at par and with no discount for cash, in 20 and 25-years issues. The proceeds will not go outside the empire, but it is understood they will be used to pay unconverted victory bonds of 5½ per cent. redeemable this fall.

Frost Damages Wheat

Will Be Used For Cattle Feed In Southern Alberta Area

Calgary, Alberta.—Fully frost attacks on the High River-Nanton district of Southern Alberta has injured 20,000 tons of wheat, which will now be used as cattle feed, it was revealed at a meeting of farmers and ranchers held here.

The meeting, attended by Hon. George Hoadley, Alberta Minister of Agriculture, was held to ascertain feed conditions in the district.

Drought and frost has seriously affected the district and plans were being made to solve the feed problem this fall with the aid of the cabinet minister who declared that a crop of grain and hay should be harvested at any cost.

Bank Act Inquiry

Is Expected To Be Completed Early In October

Edmonton, Alberta.—Inquiry into operations of the Bank Act by the royal commission, announced by the Dominion government, is expected to be completed early in October, according to Premier J. E. Brownlee of Alberta, selected as a member of the commission.

Mr. Brownlee revealed Prime Minister R. B. Bennett had invited him to join the commission before the Canadian government board left for London to attend the world economic conference.

TRIBUTE IS PAID TO OLD TIMERS OF THE WEST

Prince Albert.—The real makers of a nation,' to quote Rt Hon. Mackenzie King, passed before cheering thousands at the fair here. Men and women, some bearing the century mark, with grey hair, skins tanned by prairie sun and wind and shoulders bowed by toil, walked by the grandstand in the 'old timers' parade, the hero of Prince Albert fair. Ninety years had passed over the heads of a few, years in which they had seen man take possession of the prairie, had seen settlements grow swiftly up out of the plains and empty into stirring western cities. Some were in their prime when the [illegible] were the frontiers to construct. They had served at Batoche, and Duck Lake; they knew those stormy days and they knew Rest.

The parade, in which veterans of the prairies who had lived in that district for more than 50 years were eligible to take part, drew from Mr. King words of admiration. In his speech opening Citizens' Day, the Liberal leader referred to 'the splendid band of old timers pioneers in settlement and government, who have helped to build up Canada.'

This is the golden anniversary of the Prince Albert fair. Today it draws to the platform men and women in the life of the province and the Dominion. With Mr. King were, Sir Frederick Haultain, Chief Justice of Saskatchewan, Hon. J. F. Bryant, Minister of Public Works in the government of the province; T. C. Davis, a former district fur trader, and Charles Young, president of the Prince Albert Agricultural Society.

The Liberal leader expressed regret that the death of his mother had prevented him. J. T. M. Anderson, Premier of Saskatchewan, from attending the opening.

Introduced as "one of the outstanding real old timers of the west," Sir Frederick Haultain paid a tribute to the pioneer women of Saskatchewan. "We take off our hats to the old timers, but we must not forget and keep them off to the women," he said.

Mr. Bryant, representing Premier Anderson, followed with the greetings of the government and people of Saskatchewan. He also expressed his pleasure at being on the same platform with the leader of the Liberal party. Some interesting facts about pioneer people of Prince Albert were told to the gathering by Mr. Bryant. Mr. Young introduced the speakers.

Then followed the parade. As the 'old timers' marched by those on the platform rose in tribute to be followed by the great crowd in the stands. The pioneers smiled as a cheer arose. A tribute to their achievement for Canada.

Wheat Pool Payment

Further Payment May Be Made In Alberta

Edmonton, Alberta.- Possibility exists a further payment may be made to wheat pool members on the 1930 crop if present increased wheat prices continue, according to Premier J. E. Brownlee of Alberta.

Mr Brownlee said the pool, which handled the crop under the guidance of John I. McFarland, of Winnipeg, may show a profit due to wheat 'winnings' jump recently. "There would seem to be good reason for using such profits by way of partial equalization, at least, of payments on the 1930 crop," the Alberta premier added.

No Parolees For Rod Riders

Alberta Relief Commission Chairman Would Send Men To Relief Camps

Calgary, Alberta Efforts by A. A. MacKenzie, Alberta relief commission chairman to have parolee granted to rod-riders serving terms in Port Saskatchewan jail, have failed. Also the attorney-general's department has turned down Mr MacKenzie's request.

The Alberta relief commission chairman had suggested vagrants convicted of stealing rides on trains should be sent to single jobless relief camps if they wish-ed to go, while those refusing the offer should serve out their terms.

Gambling With Wheat

Speculators Control Size and Full Of Grain Market

The ordinary man in the street must be a bit puzzled at the violent fluctuations in wheat. One day he reads that there is a great wave of buying at Winnipeg and Chicago, the central markets for Canadian and United States grains. Wheat shoots up by over a dollar a bushel, i.e., 60 lbs., twenty and even twenty-five cents at a time. The same with corn, rye and barley. Next day he reads that the joyous feelings of yesterday have subsided. Wheat and the other grains have fallen by almost as much as they had advanced. Tomorrow he may read that they have shot away up again. And so the game goes on. Up and down alternately sound frenzied excitements on the part of those who buy and sell grains by the hundred thousand or million bushels, and to whom a matter of a cent one way or the other may make all the difference between being rich or poor.

Weather and other conditions do not suddenly create all that disparity in the value of grains. One does not read of violent fluctuations in the price of carrots, potatoes, cabbages or apples. And yet they are subject to the vagaries of weather and trade in the same way that wheat is. The reason for the gyrations of the grain markets, more especially wheat, is the manipulation by speculators who gamble with one of the vital necessaries of life. They bid for wheat that they never see and never intend to take delivery of. They possibly would not know wheat from barley if they saw two samples side by side. To them wheat is just something to gamble with. The interest of the millions of consumers means nothing to them.

The gamble so to the wheat exchanges were unchangly exposed by Frank Morris in a famous article in "The Pit," and at one time it seemed as if something would result in the way of control of speculation. With the "spread" in touch to twenty-five cents a bushel in a single day there is room for reform on evidence.—By Thomas Thomas-Symonds.

From Back Of Beyond

Australian Girl Travels 12,000 Miles To Sing in London

Miss Joy Hall is about to travel 12,000 miles from the Australian bush, riding fifty miles on horseback, and crossing seven fierce rivers in which there are crocodiles, before she could reach London.

And it was worth it," she said when Miss Hall was in the city last night, and has sent as much of life in the raw that it became monotonous. Her father is a cattle manager.

She has gone to see London for the first time.

"Our farm, or station, as we call it in Australia, is a desolate stretch of country in Northern Queensland. The nearest town is Cairns: a small port 200 miles away.

"The station is larger than the whole of London. We have about 10,000 cattle.

"Our nearest neighbors are eighty or ten away, but it is risky paying a social call in May might be out rounding up cattle. That means they might not be home for days on end. The nearest doctor and the nearest cinema are a hundred miles away.

"We have learned to do our own doctoring, and as for the cinema I take a trip of 2,000 miles to Sydney, where I have friends, if I want to see a really good show.

"Shearing? Good heavens, no. There are no roads which make it the Athlonne station."

Miss Athlonne has been shopping in Bond Street.

"That is what I wanted to do most," she said.

Here is the endurance test Miss Athlonne had to pass before that hour in Bond Street was possible.

After riding fifty miles on horseback and dodging crocodiles in the rivers she swam across which she had to swim, she made a number of railway journeys in which the trains would hold up for hours on end while mend your pan on to slippery rails.

Other brain services were required of her when the bridges were washed away. Her luggage had been sent on two months in advance.

Art Of Clipping Trees

Students Attempt Search For More Delegates In Holland

The art of training and clipping trees in hedgerows and in the shape of animals is rapidly returning to fashion in England, says an article in Answers Weekly.

Young trees, to be trimmed and shaped by the gardener, can now be bought for a small sum. Trees already clipped cost a good deal more, while really intricate designs such as a spiral with figure of a bird on the top will almost run into hundreds. The largest and most delicate trees may reach as much as fifty pounds. This does not mean that such a tree may when it is remembered, "that it may have taken nearly or even hundred years to perform.

Bird figures are the simplest for the amateur topiarist to cut, and they take between five and ten years to reach maturity. Dogs require twice as much growth, and a perfect specimen would take years and a pyramid, at least high, about fifteen years.

Large h. d. ntrees should be taught to be trained and supported on wires while they grow, but yoke bird designs are made by splitting a bush during its early life, pruning hedges and trimming every autumn.

Advantages of climate and hereditary skill of her people in the air have made Holland the modern home of topiary, where dealers from all parts of the world search for good designs. The designs are sometimes bought outright, but a particularly good tree will secure for its owner, usually a remote farmer, a substantial cash sum for an "option." The cash sum for an "option." The final cash sum is paid years later when the tree is ready for the market.

Britain is beginning to take a new interest in the art, and there are now enthusiasts in Surrey and Kent, where thousands of trees are set up.

Man Fly Church Build

Pantheist "Legions of the Lord" have aided in raising Temple

Methodist Church of the deaf. The idea is claimed by Rev. C. C. Frye, black housewife was to designate one hen, whose eggs would be devoted to the church fund. Each of these hens was designated "The Lord's hen," and their eggs sold and money given to the church's treasury to build their.

Lead Bantam Discovered

In order to be of the greatest value to its community a newspaper must receive local business from practically all merchants and professional men. Neither, a sufficient amount to be able to put out a paper worth while. The publisher supports our home page, he does able it to be serve the community.

Search For Coals Oil

Will Endeavor To Locate Field In Alberta To Meet Manufacturing Supplies

Efforts to locate crude oil in Alberta will be resumed immediately by Imperial Oil Company, it was announced recently. Work will start on the Cousins' well, consisting of 7,000 acres, about 100 miles south of Medicine Hat, near Manyberries.

J. H. McLeod, production manager for Imperial Oil pointed out that large quantities of crude had to be transported from Ontario and from the from Turner Valley oil fields of Alberta. He said Montana supplies were diminishing rapidly and there was a possibility when crude oil was located in Alberta soon, it would have to be imported from distant fields.

Manitoba Many Candidates

C.C.F. Getting Ready For Elections In British Columbia

British Columbia may be made a battling ground for working and the Co-Operative Commonwealth Federation ideas, as laid down in the recent convention at Regina, if the federation can gain power in the coming provincial elections. This was stated by W. A. Pritchard, former reeve of Burnaby, B.C., who spoke at Vernon while en route home from the Regina gathering.

The federation has already nominated some 35 candidates in British Columbia.

Daily exports bumper crops this year.

Loss Salmon Packed

Industry In British Columbia Suffers Last Year

British Columbia's salmon pack showed that of last year, according to figures issued by the chief supervisor of fisheries.

So far this year 32,440 cases, each weighing 48 pounds, have been packed, as compared with 43,682 at this time in 1932. In 1931, the pack at this date was 43,265 cases; in 1930, 60,585 cases; in 1929, 37,747 cases.

This year's pack is made up of the following varieties: Sockeye, 11,280 cases; blueb.ocks, 8,000; springs, 1,-926; coho, 1,324; steelheads, 181; ten of the pack is from the Fraser rivers, 92; pinks 8. The largest purser area.

Ushers In Outdoor Theatre Uses Bicycles

Increasing Visitor Uses Are Gaining Gobbled To Position

One of the first outdoor theatres, where you ride in your car to the pictures, has just installed ushers on bicycles.

The rows of seats are so banked that those in the rear seat of an automobile can see and hear the picture After two weeks the proprietor discovered that the walk from the entrance to the "seats" or parking places, was so long that the ushers were unable to accommodate the patrons.

So now ushers ride in front of the incoming cars leading the machines with a tiny red light on the rear.

Australia faces a plague of eggs

Searching For Steel Alloy

World Scientists Waging Secret Fight Involving Untold Millions

Today half a dozen nations are engaged in a most secret struggle for a prize of millions The fight is being waged in laboratories the fighters are scientists, and the prize is a steel alloy lighter stronger and more elastic than before

The nation that wins will be able to revolutionize ship and aircraft construction, bridge designing, building and engineering The discovery will create a new era in industry and make a vast national fortune

The object over which the world scientists are fighting is a metal called beryllium Twenty-five years ago nobody thought it had any use other than as a base for the semi-precious stone the beryl, worn in necklaces and rings

But when aeroplanes and modern metallurgy brought a demand for light strong metals scientists turned their attention to beryllium and sought its commercialize it

Then beryllium soared to great heights of value Ten years ago, after a lot of research, it was worth about $35,000 per pound Since then, owing to increased knowledge of it and the discoveries of fresh sources the price has fallen to $75 a pound

For the past ten years the research into the possibilities of beryllium has been carried on in secret. The leading rivals in the race for the conquest of all its secrets are Germany and Britain.

In Britain the National Physical Laboratory at Teddington are working with X-rays, microscopes and delicate chemical processes. In Germany the famous firm of Siemens-Halske, whose works outside Berlin are so vast that they have created a self-contained township, have a ton and ton of ammo, each working on a special study of beryllium

Britain's interest in the beryllium campaign is a young scientist, H. A. Classon, working at Teddington as a fund in 1929, 27,000 cases.

This year's pack is made up of the following varieties: Sockeye, 11,280 cases; blueb.ocks, 8,000; springs, 1,-926; coho, 1,324; steelheads, 181; ten of the pack is from the Fraser rivers, 92; pinks 8. The largest purser area.

Can Turn Time Backward

Austrian Scientist Says Results Can Be Obtained Because Of Their Silence

A new way of turning time backward, enabling geologists to map with absolute accuracy the mighty mountain-making, rock-forming cataclysms of the earth's past, has been discovered by an Austrian scientist.

The new method was devised by Dr. Bruno Sander of Innsbruck, Austria, who told the International Geological congress about it.

Rocks preserve within their material structure an indelible record of all movements they have undergone since their final creation, Dr Sander explained.

Japanese will build a motion picture producing studio and theatre in Manchuria.

"Rubber," says a writer, "love might colors." More bun, say.

LENDER SURVEY ROUTE

Colonel Lindbergh's aerial survey of Greenland, on which Mrs. Lindbergh accompanies him as radio operator, is one of the most hazardous of the numerous aerial exploits Their task is to survey and photograph the coast and ice cap for possible landing places for the projected trans-Atlantic air service of the Pan-American Airways The Lindberghs will twice fly across the icy wastes between Godthaab and Scoresby Sky An emergency base, Julianehaab, in Greenland, will be used Cpt. and Mrs. Charles A. Lindbergh made the hop from Hebron, Labrador, to Godthaab in six and a half hours.

Col. and Mrs. CHARLES A. LINDBERGH

◆ FANCIFUL FABLES ◆

Occasional Wife

by IRMA ROSE WEBSTER
Author of "LAUGHTER OVER 40"

BY INGRID

Camilla Hoyt, young and beautiful student in an art school, unconsciously starts the head of a fellow student, during class And when she is supposed to be drawing a Grecian urn, the professor, looking at her sketch, embarrasses Camilla by leaving Peter Anson the boy whose head she sketched, criticizes her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder It is Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means but he promises to go through with it.

(Now Go On With The Story)

CHAPTER III.

"Good evening sir," said the butler. "Good evening." Peter replied. "I'm Mr Anson, calling for Miss Hoyt. "Yes sir. Come right in, sir."

Peter stepped into the cavernous hall He hoped that he wouldn't have to meet the family His apprehension soon relieved at once by a familiar voice from above. "Rates is that Mr Anson?"

"Yes, Miss Camilla." His austere voice implied his disapproval of her unconventionality.

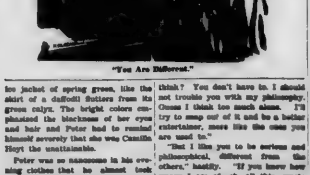
"Tell him I'll be right down."

"Yes, Miss Camilla." He turned solemnly to Peter as if he had come a long way with the message "Miss Hoyt will be right down sir."

Peter grinned. "So I heard."

"Yes, sir?" Bates inclined his torso slightly, straightened and marched away with dramatic precision.

Camilla fluttered down the broad stairway like a brilliant flower. Diaphanous folds of soft bright yellow swirled from below a smug little beret.



"You Are Different."

loo jacket of spring green, like the skirt of a daffodil flutters from its green calyx. The bright colors emphasized the blackness of her eyes and hair. Peter had to remind himself severely that she was Camilla Hoyt the unattainable.

Peter was so nauseous in his evening clothes that he almost took Camilla's breath away. In fact, both of them were so flustered with the realization they were together at last, that they were silent for some minutes after they were settled in the cab.

"Sorry that I couldn't have a car for you, tonight," he began awkwardly.

"I don't mind," she said quickly. "I have an idea that you are one of those generous persons who would give up anything he had to anyone who happened to need it more."

Her reply was maddening, but after a fleeting hesitation he let it go at that. "Do I look that easy?" he demanded.

"About things that don't mean much to you. And I guess that material possess don't."

"Well, that's better. Anyway, there are only a few things that mean a lot to me Everything else is just accessories."

"Sculpture is one of them," suggested Camilla.

"It is several of them, and that's about all I can consider for awhile"

"Will the other important things wait?"

"I hope they will," his voice was lower "But they might have to wait a long time Friends of M is, life is too short. We need to do everything at once, and if we don't, we soon discover it's too late to begin."

"What for instance?"

"Whatever a man's ambitions are And sometimes we even outgrow them, realizing to realize them A person can miss a thing he wants to do for so long that he finally discovers he doesn't care about doing it any more. You hold an ambition ahead of you for a long time, then when you finally catch up to it, you discover that in the process of growing up to it, you have gone beyond it in experience That is especially true of minor ambitions. Ever think about that?"

"No," Camilla replied. "I never did much thinking about anything until recently, and I've been so ill mixed up that I haven't arrived anywhere yet."

He laughed indulgently. "Oh, well, why should a girl like you try to think? You don't have to. I should not trouble you with my philosophy. Guess I think too much alone. I'll try to snap out of it and be a better dance partner."

"But I like you to be serious and philosophical. It differs from the others," hastily. "If you know how weary I am of—oh, all this—waste of time and energy—being with people I don't like—"

"Then you would rather not have come tonight—?"

"Oh, you! That's just what I'm trying to tell you. You are different, and that's why—I like you," she finished gaudily, her soft eyes turning to him with appeal.

He shivered, with a delightful sensation at her words. "Bloody, then," he acknowledged himself. To Camilla, he said gently, "That's nice. I'll try to deserve your—liking me."

In the incandescent glare of the sumptuous theatre foyer, Peter was ill-at-ease, but his manner did not betray his fear of the startling scene that lay beyond the doors of the cafe. His only knowledge would be serious enough, but Camilla's manner is unperturbed. Of course they encountered friends of Camilla's, who inspected him critically when he was introduced. Society bored him, but he realized that if he were to become successful in his profession he would have to command a prominent place in his life. Fame embraced more than public admiration of accomplishment, it demanded for that public a complete surrender of the private life and affairs of the beloved There was no escaping the payment for fame.

Peter decided that this was an excellent opportunity to enter the inner circle, if only as a spectator, and discover what it would be like. It wasn't that he sought personal approval. He only desired success, But he knew that the way was impracticable. It was evident that he could command the former without the latter, however Camilla revealed the way Cathie Harris and Lilian Berger flirted with Peter and let him know that he would be welcomed in their set at any time She wondered if Peter knew—and led him away.

She had not wanted to see the stunning, extravagant revue, but it was thrilling to sit close beside Peter in the dimly-lighted theatre and look up to find his eyes and lips close to hers when they exchanged murmured comments. The splendor of the stage, the swaying velvet curtains, the groves and levels and suave luxury of the audience oppressed her. It might be so different, if—

But Camilla resolved that such thoughts should not mar this perfect evening. Perhaps some day she would she have the exquisite joy of being close to Peter, alone with him, his eyes caressing her at every glance. She must tell him the truth. Of all the people in the world with whom she wanted to be fair—it was Peter, even if she never saw him again.

Her friends sought them in the lounge during the intermission. Camilla found that Peter knew her party in their box, but Camilla was there. This was her evening with Peter, and she was determined that no one should interfere. Peter wondered, uncomfortably, if she were reluctant to join her friends because of her attempts. Cathie, outlined more and all the other conveniences he once the white man was.

Americans are very well educated. While they may have started in a reserve school, the records show that many are attending high schools and universities, some of them even become citizens. Looking at the pictures of such graduates as they appear from year to year in one such school, it may not be worth a far cry from a feather bonnet to a silk hat.—Regina (Evening) Leader-Post.

THE RHYMING OPTIMIST

By Allen Richardson

O VIOLIN!

O violin, sing them away,
The cares that vexed my heart today!
The joys that went unsatisfied,
The shining dreams that are denied,
The long-sought goal I failed to win,
For these give pause, violin!

Deep, deep your throbbing tones can reach
And to my rebel spirit teach
The truths that were otherwise for me.
O violin, sing on, sing on,
Till life has not one fret or stain!

London has a new anti-gambling slogan.

Little Helps For This Week

"Be strong and of a good courage; be not afraid, neither be thou dismayed, for the Lord thy God is with thee withersoever thou goest."—Joshua 1:9.

By Those unerring Spirit led
We shall not in the desert sleep;
We shall not faint nor fear nor need,
Nor miss our providential way;
For Thou dost Manna to us from Thee,
While love, almighty love, is near.
—Charles Wesley

Whisk your way thru the sea a restless traveller, and do not be gazing at the mountain or the river in the darkness and saying "How shall I ever get over them?" Keep straight to the present little inch that is before you, and accomplish in the little moment what belongs to it alone. The mountains and the river can only be passed in the same way, and when you come to them you will find that the help and strength that belong to them.—M. A. Kelly.

Let not future things distort them, for that will come to them in the same reason which they now meet for present things.—Marcus Aurelius.

Air Transportation

British Plan To Use Planes For Work In Labrador

An ambitious scheme to provide air transportation to the gold mining camps in the interior of Labrador, is announced by Major Christopher Draper, known as the "Mad Major" on account of his daring air exploits during the war.

Major Draper said a 400-ton yacht had been acquired to have England with a fleet of aeroplanes, one of which will be a bullion carrier. The yacht will sail to a base on the Labrador coast where a camp will be established. From this point the aeroplanes will operate on a regular schedule carrying supplies and passengers.

Glad To Hear Him

Newspapers Hailed General Hale Baiko's reception here as second only to the greeting that Col. Lindbergh got when he returned from his Paris flight. Perhaps 700,000 people cheered Baiko as he paraded.

The Italian community gave Baiko and his 96 comrades a dinner and heard him say: "We Italian flyers think that life is a poor gift if we cannot risk it every day for the greater glory of our country."

Irish Leaders Not Dead Yet

Arch hates have not yet learned the habit of travel, which is why King Feisal left his Queen at home when he journeyed to England. She is his cousin, and they have a twenty-year-old son and three daughters.

A PARADOX

"It is an ill wind that blows no body any good". In fact the present system seems to flourish on ill winds. The present joy in the wheat market (at the time of writing) recalls a statement made last December by Mr. McFarland, the Wheat Pool manager, that "unless Providence intervened through crop failure, success could not attend our efforts." It is typical of the profit system that it should call upon Providence to extend a blighting hand upon the fields of our neighbors, and that its banquets should always include the potato bug and hail insurance.—Labor News.

Mr. and Mrs. W. E. Roberts and daughter Hazel left by motor for Lethbridge, and other points south on Tuesday.

UNITED CHURCH OF CANADA

Sunday, August 12th
11 a.m. Rev. Dr. Stanley Scott of New Norway will preach.
Evening service withdrawn.

ST. GEORGE'S CHURCH

9th Sunday after Trinity
Holy Communion 8 a.m.
Mattins 11 a.m.
Evensong 7:30 p.m.

The "little red schoolhouse" is not yet extinct. A recent survey shows that 69 per cent of the public school buildings in use today in the United States are of the one-room variety. In Canada, the percentage is even higher. And probably the children in them get a pretty fair education. The odds are not wholly in favor of the fine, graded city schools. Here depends upon the teacher then upon the school.

Born: Mr. and Mrs. William Robertson of Edgermont, Alberta, at the Hillcrest Hospital, on Tuesday, August 5th, a daughter.

Rev. Father Dubois of Battleford, Sask., spent two days here with his nephew, Jos. Lebeur.

Binder Twine Securities Act in Effect

By order-in council the Binder Twine Securities Act passed at the last session of the Legislature has been put into effect and will apply to the operation of the approaching harvest.

The Act enables the owner of binder twine on credit to obtain a charge note security for the price involved upon the grain crops of the purchaser grown in the year in which the twine is sold and upon their proceeds. Such mortgage notes are to take priority over all other charges, liens, mortgages, and encumbrances other than threshermen's liens and tax liens.

Considerable criticism of the Act has developed among country merchants, who claim it will not operate fairly to them, and Premier Brownlee has intimated that if the first year's trial is not satisfactory the government may take over the binder twine business as a monopoly.

LOCAL PEOPLE WIN PRIZE IN "PRIZE GOLD" CONTEST

During the past few weeks a contest "Prize Gold" or the "Lost Treasure Chest" ran in the Edmonton Journal as a special feature, with two hundred dollars to be given away in prizes.

Last week saw the end of the competition, and prizes were won by people in all parts of northern Alberta. The Fort came into a small share of the treasure, when Miss C. Turner and Mr. H. Ardley displayed ability in matching the words on the torn map, whereby they won a prize.

The awards came more or less as a surprise to the contestants.

LOCAL CLUB GUESTS OF C.N.R.

On Saturday, August 12, about fifteen members of the Community Tennis Club spent an exceptionally pleasant afternoon and evening of tennis as guests of the C. N. R. Tennis Club.

Many pair of ladies, mixed and men's doubles were played, the local club holding its own in the majority of the matches.

Ice cream was served in the afternoon followed by the serving of a dainty supper. After which more tennis was played.

CANADA HAS MANY CHAMPIONS

Canadian world wheat champions 1908-1918:
1908. Herman Trelle, Wembly, Alberta.
1909: Joseph H. B. Smith, Wolf Creek, Alberta.
1910: Herman Trelle, Wembley, Alberta.
1911: Herman Trelle, Wembley, Alberta.
1912: Herman Trelle, Wembley, Alberta.
1913: Forbe Wilford, Stavely, Alberta.

WORLD'S LARGEST ROSE GARDENS

The rose gardens at Kazanlik, Bulgaria, are the largest in the world. Around Kazanlik it is possible to ride for 20 miles and see scarcely any plants but rose trees. There are more than a hundred villages in the district and nearly all the inhabitants are engaged in making attar of roses, the chief reason, of course, for the existence of the gardens.

No machine being delicate enough to drill a hole in a diamond, the work is all done by hand or foot power.

A hole .004 of an inch in diameter takes two weeks of continuous drilling 24 hours a day.

Jackie Cooper, 10-year-old movie star, has taken a salary cut of $76,000 for the next two years. He'll receive $1,500 weekly for the next two years, instead of $3,800, with 40 weeks of work a year guaranteed.

THE ST. JOHN AMBULANCE ASSOCIATION EXTENDS INSTRUCT

The jurisdiction of the Edmonton Centre of the St. John Ambulance Association has been extended by the consent of the Executive of the Province to include all within a radius of 25 miles of the City of Edmonton. This district, therefore, is within this radius. The fall and winter season will soon be here, planning of classes in First Aid, Home Nursing, etc. will be started.

It is the desire of the Association to be of assistance to everyone in this laudable work.

This extension of jurisdiction is a privilege never before granted any district outside of the city and the association are asking for a class from this point.

All communications addressed to Secretary, Edmonton Centre, St. John Ambulance Association, Old Police Station, Edmonton will have full attention.

REGINA GRAIN EXHIBIT ENDS

Canada's wheat still stood supreme as the world's grain show and convention came to a close at Regina Friday.

Perhaps the biggest winnings of the $160,000 in cash prizes the Dominion Farmers now their banner at the top of the mast with hopes rising demand for Canadian wheat from other countries would rid from the 1923 carryover. Experts who attended the conference gave farmers encouragement in declaring European countries wanted the Canadian grain.

Taken from the Files
19 Years Ago Today

Wednesday, August 19th, 1914

A farewell dinner was tendered to the departing volunteers from Fort Saskatchewan and district to the world war. Some fifty horsemen sat down to a table at the Queens Hotel.

Mayor S. O. Jones, was chairman, and was supported by Frank Walker, M.P.P. and Mayor Whitaker.

The concrete work on the south wing of the provincial gaol is completed.

Spallin Bros. are erecting a large barn on their farm south of here.

Cutting is general throughout the district and in some cases threshing machines are expected during the next few days.

CONSIDER THE HAMMER

It hops its head.
It doesn't fly off the handle.
It keeps pounding away.
It finds the point, then drives it home.
It hits at the other side, too; and then often clinches the matter.
It makes mistakes, but when it does, it starts all over.
It is the only knocker in the world that does any good.
If you are inclined to lose your head and fly off the handle, consider the hammer.

—Klamath Falls Chb.

SUMMERFALLOW WORLD-OLD

Summerfallowing is nothing new. The ancient practice apparently was not always for the purpose of conserving the moisture, as the ancient writers say, for instance, "Break up your fallow land and sow not among thorns," suggests the use of the fallow as a means of weed eradication.

Five thousand men, women and children from the Edmonton district and outside points gathered Sunday in Victoria Park for the sixth annual German-Canadian reunion picnic.

The customs offices at Blackie and Bidgeburn in Ontario have been closed.

At Vulcan a loft of blazing straw from a burning stack, was carried on one and a half miles to set fire to a pig pen.

Josephburg News

No service will be held at the Reformed church on Sunday, August 24th, as Rev. Wiesbrecht will be away, holding service in Edmonton.

* * * * *

On Sunday, August 24th Mission Sunday will be held. There will be one district, therefore, is within this radius. The fall and winter season will soon be here, planning of classes in First Aid, Home Nursing, etc. will be started.

Mr. and Mrs. Ed. Mohr, Mr. and Mrs. F. R. Becker Jr., Mr. Marcus Mohr and Miss Nora Krebs motored to Ryley, Sunday to spend the day with Mr. and Mrs. Frank Krause.

* * * * *

Mr. and Mrs. Albert Mohr and Rev. A Wiesbrauch visited with Mr. and Mrs. A. Dorscheim at Meadow View last Thursday.

TENNIS TOURNAMENT TO START MONDAY EVENING

The Fort Community Tennis Club will be pleased to receive entries for their cup tournament which will start Monday evening, August 21st.

Competitions are open to any member of St. George's Tennis Club, Gaol Club and any member of the Community Club holding a full season membership ticket.

The entry fee is 50c and all entries must be in the hands of the tournament, committee by Sunday night August 20, 1923.

All events will be played in evenings only and players must play when notified or default.

Draws will appear in local paper.

L. E. Hodgins,
Chairman Tournament Comm.

INTERMEDIATE SENIOR-CLUB TENNIS LEAGUE STANDING TO DATE

CLUB—	Matches W.	L.	Rounds W.	L.
Civil Service	60	36	9	0
University	39	26	6	2
Garneau	49	26	6	2
C. N. R.	42	30	6	2
Scona Centre	41	31	5	3
Eastwood	31	41	3	5
Alberta Avenue	30	44	2	6
Highlands	27	45	2	6
Glenora	26	47	2	6
Fort Saskatchewan	8	64	0	8

The above is the standing of the tennis league up to August 14th.

The Fort Club actually won more matches than it is credited, with in the standing. It seems when some clubs won more than five events they counted a win for nine events, and there were numerous games where only one set each was played, these were counted on to whoever won 5 events.

The league finished on Tuesday evening with Garneau playing the Fort Community Club here. Four events were played with the locals losing 2 and tieing the fourth. The remaining five events will be played off today (Wednesday) at Garneau courts.

Although the Fort Club is at the bottom of the league, the members have greatly benefited by playing against players with more experience and no doubt next year will give a better account of themselves.

By entering the league this year, it has stimulated the game during the whole season, while in former years play somewhat slackened about this time and it was usually hard to get enough interest aroused to start the club tournament held each fall for cups. This year players are turning out and according to reports a big entry list is expected to play for the trophies.

A large number of local tennis fans have been attending the league games this season, which has been very encouraging to the players and makes the matches very delightful and interesting.

HOT WEATHER SETS NEW HIGH MARK

Another heat record was established on Sunday last when the thermometer trembled 90 above at 3 o'clock.

Monday morning started showing signs of another hot week, and there is a possibility of records being smashed for this time of the year.

The heat during the past week has hastened grain ripening and cutting is getting under way with ideal conditions.

Lakes and beaches were crowded over the week-end with citizens trying to find comfort from the intense heat.

SALADA

Lessons Of The World Grain Show.

The great World Grain Exhibition and Conference has become a matter of history, but to the thousands of visitors who were privileged to view its wonderful display it will long be remembered as one of their most delightful and instructive experiences. Western Canadians, in particular, who have never had the opportunity of visiting the other provinces of their own Dominion must have been deeply impressed with the variety, magnificence and richness of the resources of their country, and to have obtained through the various provincial exhibits a renewed confidence in the future of Canada.

A tour of the British Columbia exhibit could not fail to have impressed one with the amazing wealth of resources in that great province. Divided into three sections, the exhibit depicted first the forest and mineral wealth of the Pacific Coast province; then the magnificent fruit products, with their attractive orchard scenes, and finally the fisheries whose products are known and in demand the world over.

Or, jumping over the prairie provinces and into Ontario, the visitor found, not an amazing display of manufactured products from that great industrial province, but they were impressed with the wealth which is being produced from the mines of the province as indicated by the thousands of dollars' worth of minerals on display. They learned how Ontario was providing with a vigorous reforestation policy to maintain its forest wealth, how forest fires are fought, and other steps taken to conserve this great natural resource.

Studying the Quebec exhibit, depicting the quiet pastoral life of the people away from the industrial centres, one could not fail to get a new understanding of the ancient province, and to realize what a stumbling influence it is bound to exert upon the development of the Dominion. In the naming summer on the mighty St. Laurence, its great maritime ports, with the best, intensively cultivated farms stretching back from the river banks, all conveyed a picture of beauty, strength and progress, the lessons of contented thrifty people.

To visitors from other provinces and countries, the exhibits of the prairie provinces must have been a revelation indeed. Holding the view, as undoubtedly many such visitors did, that these provinces produce nothing but grain and other agricultural products, they certainly had their ideas expanded. Manitoba devoted its exhibit to a display of the wild bird and animal life of that province, and Saskatchewan and Alberta added to the mineral life of their provinces, and Saskatchewan made a display of fruit and vegetable exhibits. It was one of the show exhibits of the Exhibition and people stood before it in interested crowds and in admiration.

Alberta demonstrated that it could grow wheat by carrying off the world's wheat championship, but it also let visitors know that 14 per cent. of all the coal supplies in the world were located within its borders, that it produces tons of millions of pounds of best sugar commonly, that its lakes and streams are filled with fish, that the lumber areas are very large.

And Saskatchewan, popularly known as the "bread basket of the Empire," which in normal years produces more than one-half of all the wheat grown in Canada, and many other staple products, made a fine showing that surprised everybody with its wonderful exhibit of huge logs from its timbered regions, its many varieties of fish, and big fish at that which would do credit to a province by the sea, its display of fruit, grain and clean, well raised cattle in the north, its wild bird and animal life, its scenic beauty spots.

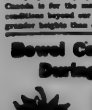
The usually accepted picture of the province as flat, uninteresting fields of grain, and nothing else, was relegated by these truly wonderful exhibits to the limbo to the people living on these prairies they were a revelation. And to quite the whole were the comprehensive exhibits of the Dominion Government revealing to all their richness and variety the magnitude of the resources and products of Canada.

But why recall these things now the Exhibition is over? Because one of the objects of the Exhibition was to bring this knowledge in its most interesting and fascinating and compelling form to the people of Canada and the world. Seeing is believing, and those who saw Canada on parade at Regina cannot fail to have been impressed and convinced of the development and prosperity which the future has in store for the Dominion, and for every part of it.

And such conviction was reinforced by the pages upon the west which were also offered. One had only to climb their hard benches, the window of the old Hudson Bay trading post and examine its contents, or gaze upon the means of transportation in the days of the pioneer.—not so very long ago at that,—the old Red River cart, the dog sled, the Peace River canoe, and from there through the years to the present day, and note the progress made in a short space of time. Then they showed at Winnipeg and Calgary, to mention only two, and with the C.P.R. and C.N.R. exhibits and the automobile exhibits of modern means of transportation, to appreciate the fact that Canada has made amazing progress in the short space of the national existence. Such progress offers but a glimpse and a promise of the still greater progress and development that is to be.

Then in the face of a movement which has to some extent at least shaken the confidence of many of our people, the World Grain Exhibition came with its wonderful and beautiful story. It also brought a message. It is not a message of despair, but of hope. A message that, trying and difficult as many have undoubtedly be, they are, after all, only temporary because a nation with such resources, with such culture, with such virile and progressive people, cannot fail to surmount any and all difficulties. Canada is for the moment caught in the maelstrom of world events and conditions beyond our control, but it will win through and rise to greater, greater heights than ever before.

Bowel Complaints of Children During the Summer Months



Mothers should look well after their children during the hot summer months. Despite all they can do the children will suffer from bowel troubles, such as Cholera Infantum, Diarrhoea, Dysentery, or other forms of bowel complaint.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has restored the appetite and given health and strength to thousands of little ones. It has been on the market for over 70 years and has never failed to do its work. Don't experiment with "just as good," and be on the safe side.

Dr. Fowler's Extract is put up by The T. Milburn Co., Ltd., Toronto, Ont.

Edmonton Shooting

Village Bad Man Killed By Other Members Of the Tribe

Story of the slaying of an Indian village "bad man" by other members of the tribe, is told in a wireless report received at Royal Canadian Mounted police headquarters at Ottawa from Fraser T. Sandys Wunsch, on board the Northern supply steamer "Nascopie."

On-Shaman-ee, an Indian who 15 years ago killed a fellow-aborigine at Cape Dorset, in Baffin Land, met retribution at the hands of his own tribe when he was taken by a trio of Ikkimos whom On-Shook-Juke had been threatening.

The dead native was regarded as insane. He had shot at his wife some time before his own death, and for no apparent reason he had informed the three men who eventually killed him that he intended shooting them.

The trio found him asleep, and took the law into their own hands. They decided that the tribe would be better off without On-Shook-Juke, and forthwith shot him.

When Inspector Sandys-Wunsch reached Wolstenholme on board the "Nascopie," he found the chieftain and all interested parties were produced and an inquiry set on foot. The investigation was conducted with care, a complete report would be mailed when the "Nascopie" reached Moosonee on her homeward trip.

WIFE'S DELIGHT AT HUSBAND'S LOSS

20 Pounds of Fat!

Here is something all wives of fat men will be glad to know. It is the experience of a man whose wife recently weighed 230 lbs. She writes:—

"I really feel I must write and tell you that, after taking Kruschen Salts for a month, I have reduced myself to get the weight down from 230 lbs to 210 lbs. This has been achieved by nothing else but Kruschen. I am too heavy also, and I started taking Kruschen the three months ago. Already I have got down from 158 lbs. to 144 lbs. We are delighted."—(Mrs.) C.

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—a little of each day those waste products and poisons which, if allowed to accumulate, will be stored by the body's chemistry into fatty tissue.

Nothing To Worry Them

Newfoundland Is Lucky To Have Banking Of Matter Country

It may be a bit of a shock to Newfoundlanders to learn that the people they scorn have their dominion status virtually taken away from them by the appointment of a governor of the nation which will perform all the duties and wear all the gorgeous togs. This, at anyrate, is the recommendation of Sir Thomas Lipton, commissioned by Chief Shalla's family has got into a financial mess, and the old man is coming over to the rescue. He says in effect: "Sure, your island needs her a whole lot; I'll put you on your feet, and when I see that you are all right I'll step out and you can run your own house again."

That is one of the advantages of being akin to Mother Country." — St. Thomas Times-Journal.

How the Rule Works

National Problem Readily Solved When Men Combine Forces

As a national problem is a man thrown out of work is very hard to be considered. It matters not how one looks at the matter, the burden of one more dependent. Fortunately, the rule works the other way when it comes to increased employment. A man in a new job means for the whole nation one more tongue to carry one less supported.

Imagining that at the depth of the depression in March we had 13,000,000 people at work. It would mean that we had 26,000,000 persons at work. We had three people with jobs to carry one without a job. If today employment has increased by 2,500,000 jobs, it means very nearly 60,000,000 persons at work, against 52,000,000 when we were at the depth. Each of these workmen to carry one idle person. The total burden is almost cut in two.—The Liberal.

Britain May Capture Coveted American Cup

New All-Steel Cutter Revives Hope Of Sportsmen

A beautiful new streamlined racing cutter, wining rare after rare by spectacular margins, suddenly has revived British hopes of capturing the American cup.

The cup "that old mug" so persistently pursued by Sir Thomas Lipton for 25 years probably is more coveted by British sportsmen than any other trophy in the world. Why Britain never has been able to regain it since it crossed the Atlantic in 1851 is a riddle.

But Britishers believe that the answer has been found in "Velsheda," ultra-modern all-steel creation of Charles E. Nicholson, who designed the last two Shamrocks for Sir Thomas Lipton. "Velsheda" embodies all the lessons Nicholson learned from the defeat of "Shamrock V" by Harold Vanderbilt's "Enterprise" in 1930.

The success of the new cutter has made it almost certain that her owner, W. L. Stephenson, will succeed the picturesque and beloved Sir Thomas as challenger for the cup. Stephenson, chairman of the British subsidiary of F. W. Woolworth & Co., named the yacht after his three daughters, Velma, Rhetia and Daphne.

No contest could be held this year, as the challenge must be made at least nine months before the race, but British yachtsmen before Stephenson will issue it in the fall if "Velsheda" keeps on winning in the great Scottish racing festival known as "Clyde Fortnight," which she started. "Velsheda" won five firsts and three seconds out of nine races over "Shamrock V," and King George's "Britannia." The two when "Shamrock" scored over "Velsheda" were by margins of only a few seconds, while all "Velsheda's" victories were decisive.

"Velsheda's" chief feature, aside from her speed, is her "Park Avenue" boom, frankly copied from the "Enterprise" with a few new ideas added. It projects 14 feet beyond the end of the material. Moreover, she is equipped with all the other time-saving mechanical devices which Lipton and were prepared able for "Enterprise's" victory, in the last cup race.

Almost a new sign "Velsheda," was built to challenge for the cup is the fact that it is 65 feet on the waterline and 127 feet overall. That is longer than "Shamrock V." which felt the need of more length in the rougher American waters for the cup races. Likewise, "Shamrock," moreover, was noticeably inferior to "Enterprise" in sailing to windward. "Velsheda" is on this account, in this respect also.

Otherwise the new cutter adheres pretty much to the international measurements for "J" class yachts. It is of slightly more than 300 tons, has a sail area of 7,200 feet, a 155-foot mast, a beam of 21 feet and draft of 15 ft and load weighs about 90 tons.

"The Other Club"

Distinguished Organization Is Looking Celebrating Twenty-Third Birthday

One of the most distinguished dining clubs in the world, known as "The Other Club," has just celebrated its 21st Birthday by a dinner at the Savoy Hotel, London, England, among the guests being Sir William Jowitt, former Attorney-General, and Lord Kylsant, former President of the Federation of Chambers of Commerce of the British Empire, General Sir Christian Smuts, South African statesman, presided at the coming-of-age party.

The club founded by Winston Churchill, and the late Lord Birkenhead nearly once a fortnight for dinner in a private room at the Savoy during the time that Parliament is sitting. It was intended to provide a ground whereon political opponents might meet. One of the rules is that "nothing in the intercourse of the members should be allowed to interfere with the full assertion of party politics."

Hunter's Hard Valuable

Loss of the use of his right hand is an unbearable accident, has brought to Dr. Abraham Goldfrost, of Manchester, England, a verdict of £50,000 damages. His wrist was broken when he was struck by an automobile. Unable to write paper-pushers he has to take an examination with his left hand.

Ambassador To Russia

Viscount Chilston To Represent Britain At Moscow

The king has approved the appointment of Viscount Chilston as ambassador to Russia, succeeding Sir Esmond Ovey. His majesty received the new ambassador in audience at Buckingham Palace.

Lord Chilston has been under secretary of state for foreign affairs since 1935. He will leave for Moscow in September, when the first time since March 30 the United Kingdom will be represented in Russia by a full-fledged ambassador.

The world is too small for the man who knows it all.

Broomhall Declares Canadian Wheat Will Always Be At A Premium In Markets Of World

Canada's wheat still stood supreme as the world's great show and conference came to a close at Regina.

Pocketing the biggest winnings of the $160,000 in cash prizes, the Dominion's exhibit under their banner at the top of the mast, with hopes rising that demand for Canadian wheat from foreign countries would cut down the 1933 carryover. Experts who attended that conference gave farmers encouragement in disclosing European countries wanted the Canadian grain.

The big share of the prize money from all grains went to the Dominion. Its growers took $64,873, more than double the $25,536 which went to United States growers and $4,321 won by farmers in countries other than Canada and the United States. Approximately $2,000 of the prize money was not awarded because judges felt some entries were not worthy.

A surveyor of Canadian wheat of approximately 200,000,000 bushels, as the crop year ended July 31, compared with 12,962,941 bushels at the same date at the close of the previous carryover, was a problem for farmers to ponder in view of their record wheat crop.

But the Canadian growers were given assurance it was not the lack of quality in their product that kept it from being purchased in still larger quantities on international wheat markets. In a paper to the conference, Britain's noted marketing expert, Broomhall, declared it was protection by foreign countries which caused the difficulties.

All sellers, Broomhall disclosed, did not and could not buy Canadian wheat because of high duties and embargoes against importing countries. Millers wanted Canadian wheat, and, the conference was told, Canadian millers could sell flour in the markets of the world. The message was echoed by other experts.

Led by the nearly crowned wheat king, Fretand Willard, of Stavely, and the noted northern grower, Herman Wells, of Wembley, Alberta captured the greatest share of the prize money going to Canadians. Alberta's carriage were $30,153, almost equal to the total amount won by Utah-Idaho farmers.

Saskatchewan was second in the list, earning $13,293 with British Columbia, third, earning $11,437. Ontario, $7,502; Manitoba, $5,602; while the rest were scattered from Quebec, New Brunswick, Prince Edward Island and Nova Scotia. Showings of countries other than Canada and the United States were: Australia, $6,706; Eire, $741; British Guiana, $300; New Zealand, $139; Ireland, $50; England, $24; Scotland, $40; Southern Rhodesia, $40; India, $20.

The curtain rang down on the greatest grain show ever held in the Dominion, while proposals were being framed to establish a permanent branch of the Federal Department of Agriculture to ensure similar events at future times. Another world's show for the Canadian provinces, is being suggested for 1938.

Keep Eyes On Road

Dangerous For Motorist To Relax Vigilance Even For Second

It is dangerous to take the eyes off the road for even a second in this day of high speed driving. If the motorist is driving at thirty miles an hour, his car is going at the rate of forty-four feet each second. If another car is coming toward him at the same speed the cars are approaching at the rate of eighty-eight feet per second.

When travelling at sixty miles an hour and approaching another car going at the same speed in the opposite direction, the two cars are coming together at the rate of 176 feet in one second. It is easy to see that in circumstances such as these it is not safe to have to look for more than a fraction of a second at the speedometer, oil gauge or any other dash device.

Cheaper Than Detective

Berlin Police Furnish Personal Information For Twelve Cents

It costs only 12 cents to find out all about the lady in Berlin

often ambitious dowry-chasers in France have to hire private detectives or bribe janitors in order to ascertain whether she is single married, divorced, 21, or 60, rich or poor the obliging Berlin police, under new regulations, furnish all the information for 50 pfennings.

Being German police, and the orders thoroughness personified, they keep tabs on everybody. And being police and therefore proverbially unsentimental, they will not only divulge the above-mentioned data, but come through with her religion birthplace, and maiden name.

The lady, if she wants to get even can do the same. She may obtain, for the same fee, the gentleman's full name, occupation, parents' names and previous residence. If he has real property, she is entitled to know that too.

To prove that sophisticated Berliners are just as inquisitive as small-town folk, written application for requests for information of this sort in the past, under more stringent regulations, averaged 800,000 a year.

Fisheries Production

Had a Market Value Of Nearly $66,000,000 Last Year

Canada's fisheries production in the calendar year 1932, as shown by statistics prepared for publication by the Dominion Department of Fisheries and the Dominion Bureau of Statistics jointly, had a marketed value of nearly $66,000,000 to be exact, $65,-997,153. Of that total, $31,765,111 came from sea fisheries production and $4,184,022 from the inland or freshwater fisheries.

The year's aggregate was $4,560,-173 less than the 1931 total, the falling off is explained, of course, by the difficulties of the depression years through which prevailed. Fish were as plentiful as ever in Canada's vast expanse of fishing waters but marketing was difficult and prices low. The Dominion's fisheries figures will climb again as normal world conditions recover.

Fisheries production value showed a decrease in each of the provinces and in Yukon Territory in 1932, although in Alberta there was a drop of only a little more than $1,000, and the Manitoba decrease was relatively small. By provinces, the marketed value was as follows:

British Columbia	$29,289,135
Nova Scotia	6,697,288
New Brunswick	1,973,795
Ontario	2,147,220
Quebec	1,915,544
Manitoba	1,304,092
Prince Edward Island	288,919
Saskatchewan	186,174
Alberta	148,799
Yukon Territory	89,989

709

SPORTSY TAILORED JUMPER DRESS IN DUAL MODE

It is savvy blue crinkly crepe silk with a fresh white tubbable crepe silk gumpe.

The leather belt is coral-red. The blue bone buttons have coral-red rims. Then there is still another touch of red at the neckline in the pert crepe silk tie.

It's so girlish and smart.

It could also be worn with a white organdie gumpe.

A coral-red crepe silk printed gumpe with long sleeves offers still another change.

Style No 709 is designed to size 14, 16, 18, 20 years, 36, 38 and 40 bust. Size 16 requires 2¾ yards 39-inch for dress, with 2 yards 39-inch for blouse

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Elaborates General Plan For British Community Settlements Under Migration Scheme

Wealth Idle Found

Embedded In Rock Age Is Set At Billions Tonnes

Harold Putnam supervisory magistrate for Truro, Nova Scotia, has a plan which he believes may recall the days of a million years or more ago. Going to the Salmon River for a fast canoe, Robert Fielding found enough cordable for a stop to Mr Putnam's garage. On close examination it was found that the remainder of the coal was a petrified stock of wood That the wood has been treated by human hands the exhibit gives every indication.

Judging by the rock which is said to have been brought from Walton for a railway bridge at Truro, the upset set at a million years or more and for the wood to be come embedded it is showed that the stick is at least a million years old. Around Great Village are many fossils showing the movements of animals of the ages gone by but the exhibit which Mr Putnam guards very closely is butter, and will show the methods and modes of prehistoric humans.

Grooves at equal spaces apart that might have been made by man or machine are discernible and a sort of corrugation. Sometimes the stick gave further evidence that the wood was used for some implement or weapon. A stone cutter will be engaged to cut away a portion of the rock so that more of the petrified stick might be seen.

The stick is at least three inches in diameter and more than ten inches long. The ends are not exposed and it is thought from that it was a branch or a tool of some kind used in the prehistoric ages.

Brighter Prospects

Improved In Business Conditions Noticed In Fisher Lower

Momentum attained by business during the second quarter of 1933 has carried several hopeful signs to observers through July, states the August commercial letter of the Canadian Bank of Commerce. Alberta says:

"It may therefore be expected that complete reports for the second month will show the volume of business as a whole to have been maintained at about the June level.

In view of the serious crop damage, the breakdown of the World Economic Conference and recent drop in market losses, the stability should be regarded as the best showing that could be expected. The August letter continues:

The 1933-34 "wheat year" opens now with a short new carry-over certainly the letter continues, but the abnormally large carry-over of old wheat, some 200,000,000 bushels will make up for the shortage of the new crop and Canada will therefore have for the coming 'wheat year' a normal supply and an exportable surplus practically equal to the exports recorded for the 1932-33 year."

BRITISH DRIVER HOPES TO BEAT NEW RECORD

Our picture shows Mr. J. Cobb standing in front of his new Napier Railton car, in which he hopes to maintain an average speed of 150 miles an hour for twenty-four hours at the Brooklands Track, London. During tests on the track Mr. John Cobb lapped the course at more than 150 miles an hour.

Elaborate General Plan For British Community Settlements Under Migration Scheme

Declaring opinion in favor of re-... some scheme to be guiding ground throughout Canada, and mentioning a plan has the broad support of the Dominion and provincial governments, Brig.-General H. L. Mowbray has circulated a new explanation of his plan for British community settlements in Canada.

The Mowbray plan would establish ... areas of proven good farming land of 5,000 to 10,000 acres in extent to be sponsored by the establishment of voluntary migration committees of the counties and towns in the United Kingdom.

Declaring Canada, by the establishment of as great transportation, educational and other facilities as already made its share of any 70-C financing, Brig.-General Mowbray proposes the United Kingdom make the necessary loans to the counties, city or town committees here as a low rate of interest.

Brig.-General Mowbray declares the objective of the plan is to establish what may be called "Four-Initial Community Farm Settlements," consisting of a number of small British farms, established on areas of proven good mixed-farming land of 5,000 to 10,000 acres in extent, to be sponsored by the new settlements by the counties, county and town voluntary migration committees, and subject to which the latter may take play the part of strong county and town spirit which exists throughout the United Kingdom.

Each committee would acquire by purchase a block of from 5,000 to 10,000 acres of well-situated farm land suitable for mixed farming. The land would be held by the committee in perpetuity, it would not be sold to the individual settlers but would be worked by them on a rental basis, the rental being a proportion of the annual produce. Each committee would be responsible for the initial supervision from this district from which the settlers come and through this manager would subdivide and develop the area into suitable farm holdings of varying sizes. The manager would have the assistance of a field foreman and clerical staff with local Canadian experience.

In order to safeguard the committee's interest in the land at first purchase it is proposed the Canadian Government be asked to nominate an advisory committee to each province which would function with the committee in the initial purchase. The committee would guarantee that new settlers there would be allowed to become purchasers at least during the 5-year period during which the settlement is acquiring legal Canadian domicile.

It is not the intention of the scheme that settlers remain permanently tenants on the committee's lands. After proving their ability to farm as tenants they would acquire farms in their own. The aim is to have the settler save as much as possible out of his returns on the first three to five years, or longer where necessary.

Literacy In Canada

Slightly More Women Than Men In Canada Can Read and Write

Women have a higher degree of literacy in Canada than men, it was shown in the 1931 Dominion census survey received that 95.7 per cent. of Canada's male population above 10 years of age could read and write, as did 95.8 per cent of females.

Ontario had the highest percentage of literacy of any of the provinces, 97.4 per cent followed by Prince Edward Island with 96.8 per cent. New Brunswick had the lowest percentage, 92.36. The percentage for the other provinces were: Nova Scotia, 96.05; Quebec, 91.6; Manitoba, 96.1; Saskatchewan, 96.2. Alberta, 96.1; and British Columbia 96.7.

Opposed To Replacement

His car had taken fire and was destroyed. He being insured he wrote at once to the insurance office and demanded his money. He was given a claim form to fill up, and was told would not get the money, but that car would be replaced.

"Oh," said he, "if that's the way you look after your customers I'll return I paid the other day on my wife's policy."

WORLD HAPPENINGS BRIEFLY TOLD

Decline of $1,500 in the number of persons on relief in British Columbia between March and June of this year, is recorded in official figures released here.

Crow's Nest Pass Coal Company of Fernie, B.C., has secured the contract of the Winnipeg Electric Company for coke, amounting to 50,000 tons a year. Formerly United States supplied Winnipeg fires.

Three White Leghorn chickens, owned by Harry Knapp, have been sent from Sault Ste. Marie, Ont., to Rome, Italy, where they will be exhibited in the world's poultry congress.

British Columbia lumbermen, particularly shingle manufacturers, are concerned over possibility of an embargo being placed on their products by United States under the new Reciprocity Act.

Because of the increasing importance of Canada and other American nations in Japan's foreign relations, the foreign office is planning to establish a new office bureau to handle dealings with nations in north, south and central America.

This year's cotton production in the United States was forecast by the Department of Agriculture at 15,- 254,000 bales of 500 pounds gross weight, compared with 10,088,000 bales last year.

John Cuppleton, 72, veteran of the 1st Rebellion, died at Victoria recently. A native of Cork, Ireland, he came to Canada in 1883 and for many years owned a cattle ranch at Jumping Pound, Alberta. He has been a resident of Victoria for 19 years.

Britain's disarmament program in reducing her navy by much more than 50 per cent. since the war had been ignored and it was time she entered a policy, Hon. Bolton Hartwell, former admiral of the fleet, declared when he opened naval week at Portsmouth.

Hughes, previously vested, is being rescued by the new Imperial Oil absorption plant in the Turner Valley district, to the extent of 971 barrels a day, equivalent of first class producing wells' output. A total of 20,000,000 cubic feet of waste gas is being run through the new plant daily, from which the valuable naphtha is obtained.

Sunny Treatment

London Investigator Claims He Has Found Specific For Flu

Prevention.

Two cures of influenzal pneumonia by sunray similar to that for tuberculosis were announced "the" recently claimed by Dr. Donald Hare, a London investigator.

In both he treated two victims, one of whom was dying. Dr Hare said "both cases showed a very dramatic fashion" and recovered.

The serum was prepared from human convalescing from influenza.

Dr. Hare reported in The Lancet, British medical journal, that his first case, a woman of 37, was in a grave condition.

After two injections of serum four hours apart, he said, she began to improve. A third injection was made on the following day. Thereafter her recovery was steady in the normal case line, Dr. Hare said, there was no subsequent recovery.

Peanuts Had Good Men

Deadly Behind Problem Of Welfare Studied In Regina

Overproduction of watermelons has been solved by the peanuts now flourishing, without calling in the scientists for advice To the neighborhood of St. Constantine, came thousands of summer visitors, all fond of watermelons. The peanuts, which grow there they came, will take their surplus to huge bonfires to burn in the woods and do not plant them there. Over the bet is a ring—as many as you want, and will have as much money as you have. You fail to pay a watermelon for one, for the nobles, the rustic nobles only down a thriving business and no watermelons have yet robbed the 10th.

World "Time Lines Spread

Inauguration of telephone communication between India and Australia recently has continued the spread of the world service. Two days later Australia connected with Palestine and South Africa. Since the opening of these between India and Palestine and South Africa, since the opening of these between India and Palestine and South Africa, since the opening of these between India and Palestine and South Africa,

The Result Of Carelessness

Drowning Accidents in Majority Of Cases Could Be Avoided

Once more the news of nearly every day has brought its stories of drownings. Many of them, no doubt, are unavoidable, but in the majority of cases, and sometimes where less is expected they are unfortunately the result of carelessness. People who are unable to swim or who scorn a little, venture too much, the very best of swimmers venture grossly. Pamfl arity breeds contempt, and there is in most of us a propensity to over-estimate our powers, to dare just a little more This, dangerous at all times, is particularly perilous when it comes to swimming.

Johnny Wearmuscle is perhaps the world's greatest swimmer Not long ago, commencing upon drownings, he said this

"He man, not even these in the first rank of swimmers, should swim so far from shore without aid being near 1 would be more think of swimming a mile from land without assistance be ing at least than I would think of committing suicide "

This is but common sense. To the best swimmer there may come at any time a cramp leaving his most powerful stroke impotent; and this reduces the chances of many drownings considerable.

Every year there is much that most of the time that kept and girls should be taught to swim. It is not enough. What is needed as well, and almost as much, is the time learned people are sensible, that they take this finest of pleasures and exercise without risking their lives by ignoring their lives.

Many drownings are due solely to carelessness. Waders who think that the waters are consistently shallow, step into a hole are helpless. Bathers, especially those who cannot swim should be ever on their guard unless to refuse the contempt of the reckless and the thoughtless.

The other day we were amused that it was growing tired of reiterating this type of advice, but each day's news makes such pitiful reading that it cannot keep from offering "further wearisome" in the hope that it may prevent some tragedies. – Ottawa Journal.

Good Help To Farmers

Crooked Steel Given Him Chance To Make Good Record

That grueling taken the growing out of buying in fully horse out by the sensible $ 1,000,000 mounted and in the Dominion. Steadily increasing sales of officially graded beef will have a very important and beneficial effect upon the prosperity of the farming community from which says the Prince Live Stock Branch. "the cities draw much of their trade."

"If, in her eagerness to save, we are buying poor quality beef we are penalizing those enterprising men who are getting broken beef and offer into their live stock operations. We are also penalizing ourselves by practicing false economy, and retarding rather than assisting the return of more prosperous conditions. The man who sells his cattle this at 3c. or 3c. per pound has no margin of profit, and is therefore not a potential employer of labor or purchaser of goods the city merchants have to sell. On the other hand, if we help to increase the demand for good beef by developing officially graded beef we make it easier for the man who has real, first-class, well-fed cattle to dispose of them at a price which will give him a small margin of profit on his operations He is the only class of farmer who can be remained satisfied and is able to pay for the goods he purchases."

New Sport For London

Free bumping is the new rage spreading sport of "Longwave" are now being given daily in the sports department store in each of these departments of more than a dozen big London is a specially trained bumping stunter to show the public how simple and bumping rope spinning is. Already thousands of people have mastered the whole rope with the 1.5 ole novice.

Canada's Ten Separate Drop

What is happening to tea-drinking in Canada? Canada's importations of tea fell from 36,599,000 lbs., in the fiscal year 1921 to 32,900,000 lbs in the year 1922 Coffee and cocoa, however, are entering Canada in as large quantities as ive years ago, 22,252,- 000 lbs. of green coffee and over 17,000,000 lbs of cocoa beans in the fiscal fiscal year.

This picture was taken in London, England, and shows the game in progress between the United States bridge team, Mr. Hly Culbertson and Mrs. Culbertson, and the British team, comprising Lady Ilsra Rhodes and Lieut.-Col. H. M Beasley. The British team lost for several days but the United States team ultimately triumphed and carried off the Charles M. Schwab trophy Reading from left to right at the table are Mr Culbertson, Lady Dora Rhodes, Col. C. J. J. Waldie, the referee; Mrs. Culbertson, and Lieut.-Col H. M. Beasley.

Mountains are Growing

Some Interesting Information In Respect To Earthquake Disturbances

An earthquake epicentre (origin of disturbance) can now be located even when reports from the affected area are lacking the generated earth waves which are recorded by seismographs furnishing sufficient data to fix the position. The Dominion Observatory, of the Department of the Interior at Ottawa, co-operates with seismological stations throughout the world in mapping out the seismic regions of the earth. During 1925, earthquakes to the number of 292 were registered at the Dominion Observatory. For 22 of these it was possible to determine the distance to the epicentre

Seismological investigations during the past 30 years have revealed the main seismic regions of the earth as follows, the coasts around the Pacific Ocean; the East Indies the region beginning in the Himalayas and extending through Asia Minor to the Alps and the northern part of South America. Severe seismic disturbances occur in many other parts of the earth.

Up to the present time no earthquake epicentre has been located at or near the poles. Quakes have occurred in positions up to 75 degrees north latitude and 60 degrees south latitude, but there has been no evidence of any great seismic activity in the higher polar regions. Recently seismological stations have been opened near the polar circles, and some information on seismic activity in these regions may now be forthcoming.

In seismic regions there are, in nearly every case, great variations in level between different parts of the earth's surface Seismic areas are mountainous regions in which mountains are growing, so that the ground is in a state of frequent adjustment.

Many Acres Under Plus

Production In Ireland In Focus Campaign Shows Steady Increase

Canada and the Irish Free State are the only Empire countries other than the United Kingdom producing flax in any appreciable quantity The production of the United Kingdom comes mainly from the United Kingdom acreage in Northern Ireland, and, in recent years the effort is interesting to note that the seed has been grown for the Department of Agriculture of Northern Ireland by the Flax Division of the Government Experimental Farms at Ste Anne de la Pocatiere, in the Province of Quebec

Canada's Poland and is the neighboring countries, a considerable quantity of flax is grown primarily for the seed, from which the oil is extracted and used in cooking or as a substitute for other edible fats. Only a poorer grade of flax fibre is obtainable under present conditions, but where purchasing power and standards of living are higher, the finer fibre becomes more valuable.

Canada exported 1,000,000 bushels of flax seed in 1925, and the United States imported 1,500,000 bushels. Last year there was a small crop in Canada, though well above the average, and the United States imported only 500,000 bushels. The Canadian section of the Commission is a part of the organization of the Department of the Interior.

A New Trick

The Mounting always get their man but they had to think of something new in the way of traps to capture the runaway lads from the Truro Training School Two officers went into the woods near by to hunt and found a circus and wrestling. One by one, the boys walked into their arms. Curiosity did the trick.

Some Things To Know

That cold added to the sealy into which you put cut flowers will keep them fresh and prevent them from opening too quickly.

That an excellent polish for furniture can be made by mixing vinegar and methylated spirits.

That more iodine will be extracted from coffee if a little salt is sprinkled over it before pouring on the boiling water.

Importance Of Accuracy

Miracle Of One Letter Often Causes Serious Trouble

General P. D. Grant, at a dinner at West Point, once analyzed the military genius of Washington.

"Washington," he said, "gave us independence by campaigning faithfully. He never made mistakes. There have been more brilliant soldiers than Washington, but there has never been so sure a one.

"In warfare, you must know, the smallest mistake may lose a whole battle, a whole campaign, a whole cause. And that reminds me of poor Tom White.

"Tom White failed in business owing to the mistake of one single letter made by his stenographer Tom's partner in business was a dead millionaire, who was very touchy about his deafness. This millionaire turned from a good friend to a bitter enemy, he foreclosed on Tom because the unhappy fellow's stenographer accidentally began a letter to him:

"'Dear Sir'—Seattle Argus.

Know All the Answers

The new office boy had been instructed how to answer questions. Just before noon a man called, "Is the boss in?"

"Are you a salesman, a bill collector or a friend of his?" the boy inquired.

"All three," was the answer.

"Well, he's in at luncheon. He's out of town. Step in and see him."

Fancyful Fables

Bankers In England

Engaging In Any Business Outside Bank Means Dismissal

A. A. Berle, member of Roosevelt "Brain Trust" and formerly of Corporation Law at Columbia University, tells Harper's Magazine that England a banker is not allowed to make a fortune. He must found himself out of a job if he gambles in the stock market, engages in business outside his bank or accepts office in his himself up with outside groups. It is considered that he is paid for what he does —paid rather well Sometimes he is even rewarded with a peerage, but it is not the place to make it. Therefore

An Unusual Engine

The engineer of the Royal Scot has been trying out the Twentieth Century Limited in the United States, and is amazed at the amount of coal consumed compared with the requirements of his engine. Of course, an locomotive would expect to compete with the Royal Scot in economy.

Headaches?
Act at once! Is your system poisoned by bowel sluggishness? You need Eno every morning.

OCCASIONAL WIFE

By
EDNA ROSS WEBSTER
Author of "Jocelta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt young and beautiful student in an art school, unconsciously absorbed the head of a fellow student during class and when she is supposed to be drawing a Grecian urn The professor, looking at her sketch embarrasses Camilla by having Peter Ashton, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she appears an expensive night club It is far beyond his means but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends

(Now go on with the story)

CHAPTER IV.

Peter danced with Cathie, his arms aching for Camilla's lithe form closer, and self-conscious. But Cathie took him gushingly. "You're a marvelous dancer, Mr. Ansen. I could dance with you all night."

"I'd never last that long. And I don't like to dance, anyway," he told her instantly.

"Not even with me?" she pouted. "Oh, you're all right. It's just that I don't like to dance."

"Then why did you bring Camilla here?"

"Because she wanted to come here, I believe."

"That's just like her. She gets everything she wants."

"I suppose so. But why shouldn't she?" demonstratively.

"That's what everyone seems to think. But she never troubles how to get ahead, making anyone else happy —any more," Cathie amended.

"Has she changed recently?"

"She is more changed every time I see her, which isn't often. She doesn't play with the crowd like she used to, and she acts most of the time as if she were far away, when she is around."

"Perhaps she's getting serious about life and trying to find some definite work for herself, as I am at Mainest."

"I know. She's been going for the intellectual stuff in a big way and cutting the rest of us. She is downright snooty, lately," Cathie shrugged.

"Perhaps you just imagine it," Peter defended her. "Any kind of study takes a lot of one's time and mind. I'm sure she doesn't intend to high-hat you."

"You're pretty crazy about her, aren't you?" Lizzie's eyes narrowed. "Chal me crazy if you like," he smiled.

"Well, she will treat you like all the rest Almost every fellow in our crowd has had his crush on Camilla and his cure. They all get over it after she has kept them miserable for awhile."

"What nice sharp claws our kitten has!" Stinger Payne last replied. "That makes it nice for me. that she gave them all the gate, because I might be the exception to the rule, after all." His eyes flashed sternly. "Take that step in the face, now You asked for it."

But nothing daunted Cathie. "Oh, yeah." Well, if she's too cruel, bring your wounds to me and I'll bandage them up for you. I might feel sorry for you because you're a nice boy Heart wounds are serious"

"Thanks a lot, Miss Harris. You are very kind." She ignored the reproof in his voice, and when they danced again, spoke only in gay banter. Several more followed Camilla's dance card as Terry's arms, until dinner He grudged the loss of one moment with her, the more because he knew he would never dare to take her out again.

The supper order appalled him. Lucky he had brought a little extra money He was in for it, all right And he might expect the same thing to happen any time he made a date with Camilla. Terry, used across of wealthy friends whom they would encounter everywhere As her escort, he had to be prepared to act as host any time

Passing her on the floor, he sang to her with the orchestra, "Have the last dance for me, sweetheart."

She nodded smiling The last dance, he thought Their last, for everything, he wondered if she would care much if it were

Terry ordered more drinks when they returned to the table

"Nothing for me [illegible]

As host, Peter felt obliged to [illegible] Gingar ale," he said, and ordered one for Camilla "Eight o'clock classes tomorrow and a headache won't go."

"Don't you hate the grind?" drawled Terry, luxuriously sipping his high ball.

"Grind!" Peter exclaimed with surprise.

"Mr. Ansen is one of those rare people who likes to use his brains," Camilla explained

She was laughing at him, Peter wondered, and grew miserable. Perhaps Cathie was right. She was beginning deliberately to punish him for his absent hopes.

The waiter presented two bills, one for the food and one for the drinks. Peter had expected Peter, but he paid without a flicker of hesitation. He had had his fling and it would be worth terrible. Cal that he had to lesson to you," mocked the musicians and the tenor soloist, in a manner, crescendo. It seemed to Peter that the tenor knew he took Camilla into his arms for the last dance, he forgot bank balances that looked like sug- and he changing rhythm of the music, gar-coated pills in every second of time there must be about 180 flashes of his arms, and in every flash closed to earth or lines closed to stood in close contact with the lithe, young body.

Thunderstorms reach their greatest frequency in equatorial regions, where 100 to 150 a year is quite an ordinary number. In parts of Java and near the mouth of the Amazon the normal annual number is said to be exceed 200. Most with each regularity do the storms break out there during the latter part of the day at certain times that is nearly each regularity do the storms break out there during the latter part of the day at certain times that is nearly

A notable feature of the [illegible] Empire Exhibition at Wembley will be the [illegible] Pavilion, which will provide valuable information on such questions as the numbering of grain varieties.

Needed Sea Trade

A Polish poet of the 16th century said that "a Pole need not know what the sea is if he ploughs diligently," but modern Poland has learnt that her prosperity demands sea trade, and 60 per cent. of her foreign trade is now sea-borne.

MINARD'S KING OF PAIN LINIMENT

BABY'S OWN SOAP

War Enemies Never Met

Peck and Shadbourne Demonstrated When Peace Were Signed

Shadbourne and his great antagonist Peck never met.

Nor did the field-marshal-presidency ever have the opportunity of talking over the war with Pelisie, Joffre, Lyautey, Fayolle and Franchet d'Esperey, the other French marshals. Yet this a great professional soldier, he would have liked nothing better.

However he came within an ace of meeting Peck, for whose character and tactical ability he had the highest regard. It took his elevation to the presidency of the Reich to forestall what would have been an historic re-

In the autumn of 1924, Peck told his aide, Major Sonn L'Hopital, that he hoped some day to meet Hindenburg, "not as a Frenchman and a German, but as two old soldiers."

L'Hopital, who knows Germans as thoroughly as he knows Englishmen got busy. Through personal friends in Berlin, he let his chief's desire be brought to Hindenburg's ears. The old marshal readily responded to the overture. Then came the problem of how to arrange the meeting. Nationalistic feeling was running high in both France and Germany. Hindenburg, notwithstanding with the hereditary decency would have censured or arrested any person who attempted to make political capital out of a meeting with his German counterpart would have made the Third Republic rock.

L'Hopital, always a diplomat, found a way out. He got to go down to Strasbourg ostensibly to inspect the view to take place in the early spring maneuvers. Hindenburg at the same time would be taking the cure in [illegible] Germany. The co-operation of the Kehl bridge, commanded, with L'Hopital to act as interpreter.

The stage was all set for the historic meeting of 1925. Then Hindenburg's fellow-countrymen elevated him to the presidency. And while a retired German field officer might well meet a retired French army officer privately, it was naturally out of the question for the president of Germany to receive Marshal Foch under any circumstances.

Foch regretted the missed opportunity until his dying day. "I have the highest regard for Hindenburg," he frequently told friends, "I would like to have met him. But—"

THE RHYMING OPTIMIST
By Arthur Stanley
PERSPECTIVE
Let me not ever live too near
The things that cause me fret and fear,
Lest someone I look upon
May loom as vast they take the sun,
And I, in my perspective shut away
The glamour of the golden day.

Let me not hold too near my heart
The loves which form life's happiest part,
Too much of brilliance blinds the eye
May I love well, yet still in vim
Be able to see clearly what will
Each regularity do the storms break
Lest someone earth's loveliest dream.

Let me not ever live too near
The things that cause me fear and
Right, dimmed or denied, is the same
As if we see no blue or stride
As part, but not the whole of life!

Thunder Storms Never Cease

About 1,500 Ringing In Sundered Parts of World Every Minute

It is estimated that the approximate number of thunderstorms on the earth is constant at 16,000 in the course of a year is 16,000,000. The total number of 44 each minute. The calculation tells us that at any one minute there are probably about 1,500 storms in progress, and nearly over the continents. Thunderstorms are rare

From the known mean rate of electrical discharges in a storm it is calculated that in every second of time [illegible] [illegible] [illegible]

Big Fish—Happy Fisherman

Watch a 15 pound muskey for it yourself the fish are and then sympathize with J. A. Gibson of Toronto who landed the and tired from in order to see Bear and a half hours near French River Bungalow Camp 712 miles north of Toronto, to land it. It is the seventh muskey to be caught near the camp by guests this season and was caught on Friday, July 21st. as fisherman's luck seems to be a combination of opinion. The scene took place

him in the afternoon right in front of the outlying camp dock in full view of guests who lined the shore the finish, forgetting dinner and later celebrating the latest muskey in the bungalow camp annual muskey competition. Although almost every muskey to date has practically been larger than the last the winner of the challenge shield this year may become famous... if he can land it.

Sir. Thomas Horder, distinguished physician of London, England, has stated:—

"The willing and happy worker will get more work done and do it better than the unwilling and discontented worker. It is in this direction that alcoholic beverages like beer make their great contribution to economic efficiency.

"Appetite is a function of the brain as much or even more than of the stomach, and its importance in the physiology of digestion and nutrition is very great. It is stimulated by a moderate use of such a beverage as beer, and at the same time rest is given to life which results in larger and richer activities."

Fort Saskatchewan Record

VOL. 13 No. FORT SASKATCHEWAN, ALBERTA WEDNESDAY, AUG., 19[illegible] $2.50 PER YEAR IN ADVANCE

Provincial Good Grounds Now at Alberta's Beauty Spots

Surrounded by fifteen acres of lawns and flower beds, shrubs and trees the provincial good in Fort Saskatchewan is the centre of a garden encompassed in extent or beauty, by any in western Canada. Visitors from many gazebo climates them cure in whose gardens the rose and other aristocrats of the flower world hold sway, say that this, the realm where snapdragon is king and. potamin queen is not less lovely than theirs.

An imposing entrance, up a wide drive with double rows of large evergreens and poplars on either side, on the right hand is an unbroken bed of petunias of dark and rich shades bordered by nemesia; and on the left a row of beds of crimson snapdragon edged with golden yellow of tagetes alternating with diamonds of pinks and nemesia. Farther away to the left stretches the lawn broken by bluffs of shrubbery fringed with showers in varied and perfect combinations of color; tall yellow snapdragons with intermediate white, rosy pink snapdragons edged with yellow tagetes, tall mauve with nemesia in pastel rainbow hues and still another with white snapdragons and blue lobelia edge. Between the bluffs brilliant beds of apricot, yellow and crimson snapdragons.

Nearing the large triangle which fronts the main building, two long beds on either side flank, with bluffs of shrubbery between, and horse shoe, diamond, shield and oval shaped beds of geraniums, snapdragons and phlox., all edged with many hued nemesia, blue of lobelia and mauve white alyssum. In the centre of all is a magnificent bed in the shape of an egg with a pointed end, a perfect glory of crimson, white and pink. This bed alone contains 3000 snapdragons and is edged with white and green variegated geraniums.

To describe the lovely front of the woman's goal, or to cross the north lawn between two winding rows of hedging to the rock cairn, in its setting of shrubbery and red and rosy blooms, would require space and time; but it is a perfect symphony of color, all fitting together and contrasting in the way most designed to [illegible] planning to the eye and mind.

The author and artist of all this loveliness is Mr. Allen Murray, the gardener, with the enthusiastic cooperation of Warden McLean under whose kindly and beneficent rule all things seem to flourish. Mr Murray, with only unskilled labor, often illiterate and ignorant of English, organized his forces so that 50,000 plants were set out this spring, and saved for [illegible] could begin, in about one weeks time. Gardens of this size and smaller usually have their staff of gardeners of from five to twenty trained men. Mr. Murray came to the Fort in 1920 and the good grounds have grown in size and beauty ever since.

JUNIOR GRAIN COMPETITIONS

Judging is now in progress by officials of the provincial department of agriculture of the field crop competitions of the junior grain clubs.

There are this year 117 of these competitions, an increase of 45 from last year. Of these 46 are wheat, 21 oats, 20 with 31, barley 7, corn 1 and potatoes 1. The membership in the [illegible] clubs now totals 1,200, and the clubs extend from Bow Island on the south to Grouseville and Grande Prairie on the north and as far west as Edson.

PRINCE'S RANCH SOLD

The model of the Prince of Wales ranch which attracted so much attention at Regina grain congress, is to be removed to Toronto national exhibition there, and will also be on display at the Royal winter fair.

The model is 120 feet long and is an almost perfect replica of the ranch in every detail.

Good Hope

A social evening was held at the Good Hope ball grounds on Monday, August 14th. Partridge Hill and Good Hope played softball, the former winning by a score of 21-20.

After the ball game the Junior U. F. A. served a very appetizing lunch. The Juniors raffled off their cushion, and Mrs. Lloyd Seymour held the lucky talent.

Born to Mr. and Mrs. Alex. Henderson on Monday, August 14th. A daughter.

Born to Mr. and Mrs. Dave Burton, on Saturday, August 15th. A daughter.

Harvesting is in full swing in the Good Hope district again.

Alleged to Have Destroyed Truck

Ardrossan Farmer and Farm Hand Face Charge of Arson

E. E. Lawrence, Ardrossan district farmer, was remanded by Magistrate Primrose in police court Tuesday for trial at the supreme court on a charge of arson. He is alleged to have burned his truck on a roadway 25 miles east of Edmonton in September, 1926. Bail was set at $10,000.

Douglas McConaghy, his farm hand at that time, also was remanded for trial on the same charge, with bail set at $6,000. Lawrence was remanded on a second charge of obtaining a ride and rim by false pretenses, this crime arising out of the first.

McConaghy, under protection of the Canada evidence act, told the story of the burning when he testified against his former employer.

Tells Story of Burning

"We drove the truck to the side of a road," he said, "and he got out. I then drove it into the ditch, and I got out. Then both of us tipped it over. He took the top off the gasoline tank and set fire to the gasoline with a match."

McConaghy quoted Lawrence as saying that he wanted to get the insurance money on it. He added, however, that Lawrence tried to put the fire out and sent for help. Help was obtained but not before $250 damage was done to the machine.

Crown officials said that family troubles resulted in the occurrence coming to light at the late date.

School opened [illegible] with a good attendance.

The local Masonic Order is having its building extended twelve feet with a concrete foundation.

The Bowman medal was won by the Fort cadets at the Edmonton encampment.

The Adult Bible Class of the Presbyterian Church held a social evening in honor of J. Wright who started Friday night enroute to join his Regiment.

NUMBER HOTEL CHANGES

Attention is called to the important advertisement of the Queens Hotel in this issue, which is to the effect that its Dining Room will, from the 1st. of September, be conducted as a cafe, that is, meals will be served at all hours. The new cafe will specialize in hot and cold light lunches, and afternoon teas, and this arrangement should appeal to everyone and to the travelling public in particular.

The proprietor of this [illegible] business, Mr. S. A. Brown, has had large experience in the Hotel business and patrons can be assured of excellent up to date service in the cool and delightful dinning room.

Frank Hawkins, American speed pilot, flew from Calgary to Edmonton last week in 40 minutes.

Death of Esteemed Old Timer

Mr. Thomas Bell McClellan, one of our most respected townsmen, passed away on the 14th. instant at the age of 73, in the Royal Alexandra Hospital after a lingering illness, which actually began on the occasion of his last public appearance when he took the leading part in the presentation of the play sponsored by the "The Saskatchewan Choral Club.

The funeral was held on Friday afternoon at 2:30 p.m. at Howard and McBride's chapel. Rev. G. H. Villett officiated and interment took place in the Beechmount cemetery.

The pallbearers were Messrs. L. D. Parsely, W. R. Nesbitt, S. O. Jones, A. S. O'Brien, G. McIldoon and Dr. G. H. Turner.

Many beautiful floral tributes were received.

He is survived by his wife, three sons, William N. McClelland of Edmonton; Thomas Dunbar McClellan of Vancouver, and Robert A. McClellan of Winnipeg; two daughters, Mrs. Reg. A. Bungay of Wembley, Alberta, and Miss Anne C. McClellan of Larne, Ireland; one brother, W. C. McClellan of Vancouver, B.C.; and three sisters, Mrs. W. English and Miss Margaret McClellan, both of Belfast, Ireland and Mrs. Brotherick of Barnsley, England.

Mr. McClellan has for many years been deeply interested in all matters pertaining to the welfare of the Town, and was regarded in the country as a leader in the activities of the United Church of which he was a valued member. He was with the firm of Jones, Graham & O'Brien for the last 16 years.

We extend our heartfelt sympathy to Mrs. McClellan and family in their bereavement.

Tennis News

The Fort Community Tennis Club tournament got under way Monday evening. Entries for Men's Singles Cup were A. H. Rogers, I. Hutton, T. Holt, A. Simmons, G. Neale, L. T. Hodgins, S. Davis, Herb. Holt, A. Mann, M. Gibson, D. Magor, Tom. Murray, H. Oxley, R. Scarbrough.

The results of the draws to date:
Monday 6:15 draw
G. Neale defeated A. H. Rogers 6-3, 6-0.
I. Hutton defeated T. Holt 6-4, 6-3.
7:30 Draw
A. Simmons defeated L. Hodgins 6-3, 7-5, 6-2.
H. Holt defeated S. Davis 6-3, 6-1.
Tuesday 5:45 Draw
A. Mann defeated M. Gibson 6-3, 7-5.
H. Oxley defeated D. Magor 6-3, 6-0.
R. Scarbrough defeated to Tom Murry by not appearing when drawn to play.
Tuesday 6:30 Draw
G. Neale defeated I. Hutton 6-4, 6-4.
Wednesday 6:15 Draw
H. Holt vs A. Simmons.
H. Oxley vs A. Mann.
Thursday 6:15 Draw
Winner Holt & Simmons vs G. Neale.
Winner of Oxley & Mann vs Two Blocks.
Finals for Men's Singles will be played on Friday evening.
Entries for Ladies Singles must be in the hands of the tournament committee by Friday night.

ANNOUNCE DATES FOR GAME SEASON

Game season for Alberta was announced by the provincial game commissioner. North of the Clearwater and Athabaska rivers the season for game birds starts at noon on September 1st and continues to November 15th.

South of these rivers the season opens at noon on September 15 for game birds, which are classified as ducks, geese, rails, coots and Wilson snipe.

In September the bag limit on ducks is 15 a day, with 30 a day from October 1st on, and with a bag limit of 100 for the season. The daily limit on geese is 10, with 20 for the season.

The open season for prairie chicken south of the Kerrobert, Coronation, Lacombe railway branch is from October 1st to October 15th, and south of that line from October 1 to October 31. The open season on Hungarian partridge is from September 15 to November 30, with a bag limit of 10 a day, or 200 a season.

In specified areas the open season on blue grouse, sprues partridge and ptarmigan is October 1 to 15.

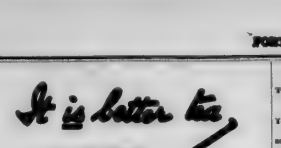
Everything for your pickeling requirements in stock nothing but the best and at reasonable prices.
See us before purchasing your preserving fruits.

Jones, Graham & O'Brien's



A Call To Service.

The prairie provinces of Canada are again this year faced with the heavy issues, and the resulting problems, which confront the nations over extensive areas brings in its wake. The Western United States are in the same deplorable state. Drouth, grasshoppers and other insect pests, wind and hail, have all taken their toll, and hundreds of farmers for the third, fourth, even fifth year in succession have nothing to show for their year's labor it is a discouraging situation.

According to the reports of the Dominion Bureau of Statistics the yield of wheat will be the smallest, with the exception of one year, since reports began to be compiled by the Bureau 35 years ago. What is true of wheat is true of other grains. Officials and inspectors of the Saskatchewan Relief Commission state that the relief problem will be as great, if not greater, than in any previous year in that province, while a Manitoba cabinet minister is reported as saying that 2,000 farmers in one section of that province will be in need through a number of weeks.

The enormous direct loss thus imposed on the people of Western Canada, and the largely reduced purchasing power of the country, will have a direct and adverse effect upon employment not only throughout the West but in the factories of Eastern Canada, upon our railways, and upon our national, provincial and municipal finances.

Governmental relief must be forthcoming to meet all absolute needs of people, to prevent actual suffering, to conserve the health of people able to work, to sustain them and provide for their needs for another year at least. This is the least that any government can do for its people; it is, in fact, a primary responsibility of any government, a duty that must be discharged.

There have been periods of crop failure all down the years in this and in all countries, and governments have had to care for their people. But plenty has also always followed famine. Discouraging as the present outlook may be, there is no cause for despair. People will be provided with the necessities of life; they are not going to be left to suffer and starve They will have nothing to show for their year's work, it is true, but they will be able to start again next year.

But there is surely something that people can do for each other in times of discouragement and need like the present. There must be scores of ways in which people can assist and encourage each other even though they may have little in the way of available resources. While governments can provide absolutely essential needs, cannot people through voluntary effort of their many organizations, and as individuals, without not merely sympathy and practical encouragement and help to others who have suffered much more severely and are in danger of losing confidence in themselves, in their country, in mankind itself?

In this connection it is gratifying to read of the action taken by the citizens of Carrot River town and district in Saskatchewan. Representative citizens have banded themselves together, and are promoting a relief organization for their district, which will not interfere in any way with the work of the rural, municipal, or town councils, or government relief, but which will be supplementary to all these official agencies. These citizens will themselves bring that sympathetic human touch, and provide assistance in various forms which no official body can do. but which are so essential in maintaining the morale of people.

Voluntary organizations of all kinds throughout Western Canada should appreciate the fact that, whatever the object of their organization, there is no finer, better, more important and necessary work they can do this winter than in extending co-operation in all measures of relief. There is really little excuse for the existence of any organization in our community life which does not at a time like the present, make all else bow to the welfare of people who are in need, and across its membership to assist in meeting those needs whatever they may be.

The State, represented all the people, will discharge its obligations, but let the great heart of humanity as represented by each and every one of us, and by as many of us organized under different names and for many different purposes, respond to the call, carry all the cheer that is possible into discouraged homes, and let the comforting assurance that help is on the way spread about, and thus bring encouragement to those who are inclined to think there is no longer even hope left to them.

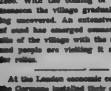
Submerged Village Uncovered

A fishing village near Tollgberry, North Malabar, with a temple at one wheel constitute the staple crops and are consumed by the men, is raised on the upland farms in Japan, in 1896. With the coming of the 1868 monsoon the village gradually is be- and excellent milling qualities of ing uncovered. An extensive stretch Canadian barley. Japanese of sand has emerged connecting the use it in a standard mixing substance ells of the village with the mainland with other wheats from the other and people are visiting it searching countries from which Japan draws for relics. supplies.

At the London economic conference, the Germans installed their own telephone switchboard and German operation.

India is importing more commercial motor vehicles.

Summer Complaint Plays Havoc With the Bowels



Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it comes you how it is going to end. Let it run for a day or two and see how weak and miserable it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will check the trouble.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

The Age Of Aluminum

Two Railroad Cars Made Of This Metal Exhibited At Chicago

David Dietz, in an article in New York World-Telegram, says:

"Two all-aluminum railroad cars are among the most interesting and most important exhibits in the Hall of Transportation at the Chicago Century of Progress World Fair.

One is a combination of coach, parlor and observation car. Both are gleaming, lasting works of art. On the day I visited the Hall of Transportation thermometers were registering a temperature of 100 on the sidewalks of Chicago, and the air-cooled interiors of these two cars were the most comfortable spots on the fair grounds.

The bodies and trucks of these two cars, with the exception of the springs, axles and wheels, are made entirely of aluminum. This is the first time that this has been accomplished, aluminum car bodies and cars were fabricated two years ago.

To many engineers, these aluminum cars represent the direction in which the railroads must go in order to cut their business. In other words, they must make travel by rail so attractive that people shall learnedly will prefer it to their own automobiles.

But in addition, many engineers see more than railroad progress in these two cars. To them they are the symbol of the new age, the Age of Aluminum.

Many railroads are beginning to turn their attention to the subject of aluminum rolling stock."

Agents On Wave Lengths

Canada Satisfied With Agreement For Radio Canada Broadcasting

Judge J. C. Sykes, of Mississippi, chairman of the United States radio delegation at Mexico City, in a press statement, said Canada and the other eight North and Central American countries representated at the conference, radio broadcasting, reached entire agreement regarding frequencies or channels for radio other than broadcasting. No mention was made in the conference of television, aircraft, state police, point to point telephone and telegraph, coastal telegraph and telephone, ship telegraph and telephone and amateur.

He further said agreements reached by individual members relating to broadcasting would be of great benefit. While the conference failed to reach agreement on clear channels for broadcasting to various countries, it agreed on certain technical regulations of this class of radio.

Functions Of Central Bank

Would Not Necessarily Be Away With The Present System

Warning against influences adopting the view that the particular function of a central bank, in the event such is established in Canada, is to extend credit to agriculture, was given by Professor T. E. Gregory, British economist, who addressed the Canadian Club in Regina.

"It is fundamental to any view of central banking that it should not be the friends of any particular industry," said Professor Gregory," whose address dealt with the subject of central banking. W. G. Yule presided at the meeting.

Dr Canada, as a result of the work of the Macmillan commission, established a central bank it would not necessitate doing away with the present banking system, he said.

Cream Quota Limited

A considerable number of cattle are finding their way to Canada for export. Ocean space, however, seems to be inadequate to meet the requirements of many producers who wish to export their own live stock. Due to the steady flow of cattle leaving Canada, this condition should remedy itself in time. Intending shippers should try to secure space from the broker some considerable period prior to the contemplated date of shipping.

While the human population of the world is estimated at 1,800,000,000, the rat population is placed at 10,000,000,000, or at the proportion of six to every human being.

Poor Crop In Canada

Wheat Crop Lowest In 35 Years With One Exception

Agricultural reports thumbed record books, comparing crop conditions with those in past years. This is what they found:

The condition of the Canadian wheat crop is the lowest in the records of the Dominion Bureau of Statistics, going back 35 years with the exception of 1931!

The barley crop is in the same position as wheat—the lowest in 35 years with the exception of 1931.

The flax and oat crops are the lowest on the records of the bureau.

Only once, in 1914, were Canadian pastures in worse condition.

The crop year 1931 was particularly bad for Canada because of drouth conditions throughout the southern growing areas of the prairies, particularly Saskatchewan. This year drouth and heat, reinforced by plagues of grasshoppers, have taken a toll of millions of dollars. Dry weather this year extended from Quebec westward to the Pacific coast

Russia Caring For Horses

Automobile Now Given One "Free Day" Each Week

Every dog has his day—but now it's Old Dobbin's turn

There are 20,000 equines in Moscow and they are poorly fed, badly cared for, and abominably treated, even though drivers caught beating or otherwise maltreating their horses face dismissal, heavy fines and fast cards and are liable to prison sentences.

The plan of the transport department of the Moscow Soviet has taken steps to remedy this distressing state of affairs. It has decreed that each horse shall enjoy a "free day" every sixth day, just as the human being is permitted to do in the U.S.S.R. This "free horse will be out of service every day in the year.

The plan of the transport department for the care of its animals goes further. It is establishing a rest home for its horses. Free, green pasture for the lame and the tired, special diet for the poorly nourished, medical care for the sick.

Canadian Radio Broadcasting

Western Canada To Have Its Own Regional Directors

Western Canada will have its own organization working within the Canadian Radio Broadcasting commission and this machinery will be set up shortly, according to T. Mahler, vice-chairman of the commission.

Three regional directors will be appointed for western Canada, one stationed at Vancouver, another in Winnipeg, and the third appointed manager in the office of G. F. Swift in Chicago, has been appointed food commissioner of the United States by President Roosevelt under the recent agricultural stabilization bill passed by congress, according to word received by Doctor Robertson, manager of the Edmonton Swift Canadian plant.

According to meagre information received the former Edmonton man was requisitioned for the important post by the stabilization bill board because of his extensive experience and knowledge of the provision industry.

Mr. Lund was appointed Edmonton manager of the Swift Canadian plant in 1917, coming from Toronto where he had worked for the company for several years.

He left in December, 1930, to assume duties as assistant general manager in the Chicago office of the company.

Cigarettes smoked in Australia in the last year averaged 675 p.r each person.

DRIVES HIMSELF TO WORK AT 82

And Still Plays a Lit'e Golf

How many of us, when we are 82, will be equal in health and activity of this vigorous old Scottish engineer? In a letter he says:

I arrived here from Scotland on the 5th April last. I am over 82 years old. I drive my Ford car 60 miles over hills and dales to a factory, and can still play a little golf. I have taken the little dose of Kruschen Salts in my cup of coffee every morning for some years, and I believe it is keeping me in good health and enabling me to keep on working at the factories as engineer."—L.A.

Whether you are still in your teens or past your prime, it is neither too early nor too late to start on the "little daily dose." Just a tiny, tasteless pinch of Kruschen Salts in your morning cup of tea or coffee! They ensure internal cleanliness, and keep the blood-stream pure. New and refreshed blood is sent coursing to every fibre of your being. Rheumatism, headaches, indigestion and backache all pass you by.

Alberta Sugar Beet Industry

Has Brought Greater Stability And Security For The

Introduction of the sugar beet industry to southern Alberta has brought greater stability and security to farmers in the irrigation areas and the factory at Raymond, Alberta, is now a steady source of revenue for the grower

Outlining the growth of the industry, D. W. Buchanan, student of western affairs, points to its success in a paper prepared for the Institute of Pacific Relations conference. Effective control has made development of sugar beet growing a great aid to signed farmers of the area, he said.

For the past two years the total sugar tonnage secured has run over 100,000 tons. The factory was in operation for nearly of 1,256 tons daily and in 1932 the factory worked 130 days to handle 150,000 tons of beets, though equal running to operate 90 days during and immediately after the cutting season.

Dealing with payments to farmers for the sugar beets, Mr. Buchanan points out the basic price varied with a bonus being paid to growers of the beets of the Raymond district. The basic price has been around $5 and $6.50.

Canadian is Appointed

Former Edmonton Man Made Food Commissioner For U.S.

S. W. Lund, general manager of the Edmonton plant of the Swift Canadian Company for nine years and later assistant general manager in the office of G. F. Swift in Chicago, has been appointed food commissioner of the United States by President Roosevelt under the recent agricultural stabilization bill passed by congress, according to word received by Doctor Robertson, manager of the Edmonton Swift Canadian plant.

According to meagre information received the former Edmonton man was requisitioned for the important post by the stabilization bill board because of his extensive experience and knowledge of the provision industry.

Mr. Lund was appointed Edmonton manager of the Swift Canadian plant in 1917, coming from Toronto where he had worked for the company for several years.

He left in December, 1930, to assume duties as assistant general manager in the Chicago office of the company.

Abandon Trackage

United States Railways Find Trash And Motor Bus Best Business

A combination of factors, of which officials find the primary one to be the rapid development of hard-surfaced highways, is causing the railroads of the United States to abandon trackage at a greater rate than ever before.

Figures in interstate commerce commission reports show 1,500 miles of track were abandoned in the nine months ending August 1, which number is double the 906 miles abandoned in the entire year ending November 1, 1932.

Upside-Down Flying

U.S. Aviator Travels 300 Miles In Inverted Position

Flying with his landing gear turned skyward, Lieut. Tito Falconi, Italian Royal Air Force officer, regained his upside-down flight record only 24 hours after he had lost it to Milo G. Burcham, 25-year-old Army Reserve pilot, aviation instructor.

Falconi flew in an inverted position two hours, eight minutes, 54 seconds, making a round trip to Santa Barbara, about 300 miles.

England Has Five Flags

May Use Of Which Denotes British Nationality

Exponents of a national flag for Canada may find some comfort in the suggestion that the United Kingdom itself has none.

An inquiry in the London Times asking what flag an Englishman might "legally and appropriately" fly from the staff on his house, brought this terse rejoinder from Lord Glanegay, former captain in the Royal Navy

"None, for we have neither national flag nor colors."

In the many attempts to refute the statement it was brought out in the columns of the Times that there are at least five flags which denote British nationality, but each one, particularly the Union Jack, is so hemmed in with restrictions that, according to one writer, "the ordinary man is apparently not entitled to fly a flag at all on his own house."

"I entirely agree with Lord Glanegay," this correspondent added, "that the Union Jack is not a proper flag for any British subject to fly on shore. It is an official badge. It cannot be flown at sea except by the Royal Navy, and not always then. It may be flown by host-lieutenant, or on houses of Parliament, or on castles, or remains of castles formerly used for defensive purposes.

"The White Ensign can, at sea, of course, only be flown by the Royal Navy and the Royal Yacht Squadron. On shore, I believe, naval officers claim it on their own houses, but, to my astonishment, an admiral told me the other day that anyone could fly it on shore.

"The Red Ensign, a sea flag, denotes British nationality afloat. But, being a sea flag, it should surely not be flown ashore.

"The Blue Ensign (official transport) has also its definite uses afloat and also forms the base (as does the Red Ensign) of the Canadian Red Ensign. But it is not a land flag.

"The Royal Standard is, of course, the purely personal flag of the sovereign.

"Finally we come to the St. George's Cross (red cross on white ground). I maintain that it is not, or should not be, confined to the use of admirals alone—except with a number of red ships—by Mr. Bumble. George, being a purely English saint (though I believe he was originally a Cappadocian), does not belong to a Scotsman or a Welshman fly it?

"A man is undoubtedly entitled to fly his own banner over his own house; but very few people have their own banners, and what is a man to fly if he is not entitled to a coat of arms?"

Seeking Lost Islands

Location Unknown For Years But Search Is Continued

Search that has been going on for almost 50 years for five islands in the Bay of Penguins in the northern Pacific ocean will be resumed with new vigor by Mrs. Marie Pina, owner of the islands under the will of her husband, she has announced.

Her husband, Washington V. Pina, a piano teacher and prominent character in San Francisco before the fire of 1906, inherited the islands from an ancestor who had obtained them by grant from a Spanish king, according to Archie Treat, Mrs. Pina's attorney.

Five parties have endeavored to colonize the islands. Later he tried to sell them. The map giving the location of the islands was destroyed in the 1906 fire. Pina died a year before the fire.

Since then Mrs. Pina has been trying to have her estate. The state department interested itself in the search for years, but without success.

The only hope it was pointed out was in ancient records of Spain.

An Easy As That

An applicant for relief at Brockville, Ont., has no qualms about taking money from the government for he belittlves they obtain it easily enough. In conversation with a relief official he said it was easy for authorities to feed so many people. "Why they just dig the gold out of the ground and make all the money they need," he explained.

WHEN THE BRITISH TEAM ARRIVED HOME WITH THE DAVIS CUP

London's usually calm exterior was badly ruffled when the British Davis Cup team arrived in Victoria Station with the coveted Davis Cup, emblematic of supremacy in the lawn tennis world. For twenty-one years the trophy had eluded the grasp of British players till this year when Austin, Perry, Hughes, Lee and Company confounded the so-called experts and defeated Australia, United States and France in the semi-final and final stages of the series. Here we see the excited team enjoying the tumultuous welcome which was handed out when they reached the station. Left to right: H. W "Bunny" Austin, H Roger Barrett, the non-playing captain, with the trophy, Fred J Perry, G. P. Hughes and H. G. N. Lee

Collecting Bird Specimens

Two Hundred and Fifty Birds Collected on Hudson Bay Area For Royal Ontario Museum

Bird specimens, numbering 250, collected along the Hudson Bay coast by Terrence Cochrane and Eskimo Peter, are ready for shipment to the Royal Ontario museum to be added to the collection of 18,000 used for research and ornithologist studies. The collector, Arthur C. Twomey, of Edmonton, student of the University of Alberta, who undertakes the work as a private enterprise, has had many specimens accepted by the museum during the past few years, and a number have been made from the shipment when it arrives.

L. L. Snyder, ornithologist at the museum, says the collection of birds from the sub-Arctic is still sound. The limitation used for studies are kept in steel cupboards and placed in long trays, several members of a species together for comparisons and examination for variation. The birds appear in natural form, but are, in fact, merely the skins with feet, bush and feathers intact. The skins are turned and stuffed with cotton to provide a body.

The birds from Hudson Bay will be on exhibition, but share the extensive moth-proofed cupboards that already contain close to 20 000 birds.

Mr Twomey will spend the remainder of the summer, it is learned, in collecting other specimens found in northern Alberta. He is one of several ornithologists and naturalists who make collections for the museum.

A Double Score

Sunday Had Five Paid And Was Not Paid

A gentleman out Oyster Bay way always avoids the smoking car when he commutes can't stand smoking himself, and doesn't like others to smoke. He found a seat in a non-smoking coach the other morning. Across the aisle a chunky man sat in and :at facing him and lighted up a cigar. Not wanting to make a scene, the other man waited till the conductor came around to punch his ticket. As he handed it to the conductor, he nudged him and nodded to the brawny smoker. The conductor nodded back, took another punch out of the ticket, and went on.—The New Yorker.

Eyeglasses Like Binoculars Appear

Seventy-five per cent. of the opticians in Egypt come from Canada, most of them from the Okanagan Valley of British Columbia, according to Ivan Lamontagne, Canadian trade commissioner at Cairo. A few years ago Egypt had never seen a Canadian apple, and until recently United States had monopolized the trade.

Argentina plans to launch a 12-year plan of highway construction.

Germany's New Electric Train

Claimed To Be Fastest Of Its Type In World

The German National Railways recently put through its trial run from Munich to Stuttgart an electric train which is claimed to be the fastest of it stype in the world.

Over the 300-kilometre stretch, which is covered in two hours, 36 minutes, the train averaged over 96 kilometres, or almost 64 miles per hour.

The greatest speed, 121.4 kilometres an hour, is the highest ever reached by an electric train, it is reported.

The "Flying Hamburger," a streamlined Diesel-powered double unit operating between Berlin and Hamburg, makes much faster time, but it is not to be classed with heavy trains such as the new Munich-Stuttgart express, which includes a locomotive and seven cars.

Canada's Fine Ireland

Vancouver merchants and all others shipping to Chinese ports are officially advised by Kenyah Wu, acting consul for China in Vancouver, that the fee for obtaining consulate certificates has been increased from $2.50, the rate formerly imposed, to $5.00. Canadian funds, in accordance with cabled instructions received from the Ministry for Foreign Affairs in Nanking, China.

Flying At Seventy

Dame Ethel Locke-King, one of the first women in England to fly, is preparing to hop to northern Rhodesia despite her 70 years. The trip is of 6,000 miles each way. Two years ago Dame Ethel spent a flying vacation in Egypt, using here own light plane.

The Queen Of England

Traveller Prefers Privacy Of Little Saloon To Wide Open Spaces

The traveller returning to England after a voyage of discovery in America is instantly and overwhelmingly struck by the difference between this canal, that country and that unreasonably vast and open continent. This observation, which I have recently had occasion to make for myself, may be trite; it may be obvious, but it is at any rate poignant. The absence of hedges, fences, walls; the disregard for privacy; the contempt both of intimacy; the absence of the cosy corner, of the nook and of the alcove, perhaps above all, of aged buildings, whether the hideous huts, the secret mausoleums, or the haphazard villages—these things compel the English traveller to look upon his own island with a new and gladdened eye. How can the plains of Kansas compare with Romney Marsh, and who would exchange little Beatrice for all the silo flowers of Canada?—W. Beckville-West, in the Spectator, London.

Says Big Wireless Plant

John Simon, Halifax, has purchased the wireless plant and all the equipment which was owned by the Imperial government during the war. The plant which is situated about three miles from Barrington Passage, Nova Scotia, has two steel towers each three hundred and twenty feet high.

Although the dandelion is a nuisance on the lawn, field experts of the Canadian Department of Agriculture have observed that sheep prefer dandelions to good Kentucky blue grass.

FANCIFUL FABLES

Market For Soy Beans

U.S. Farmers Find They Are Good Paying Crop

Soy beans, heretofore regarded by most farmers as good cattle and hog feed and as an excellent crop to raise in order to give his land a rest, have entered the common cash field and give promise of being a new and profitable crop for the midwest farmers.

Soy beans are just coming into their own and already a half dozen millers are developing various flours with the beany beans as their base.

The past three years has seen soy bean flour introduced into this country, but so little has been circulated that many farmers who have raised the beans in order to rest their land have merely "plowed under," not realizing that soy beans can be sold on the open market the same as wheat, oats and corn.

Chemists and dietitians have repeatedly discovered what the Chinese and Manchurians have known for centuries—that the soy bean contains food elements similar to those found in meat, milk, butter fat and sugar, all in one harmonious whole. They have also discovered that the bean contains no starch.

The chemists declare that a properly processed pound of soya flour has, for example, the same protein as 3½ pounds of meat or 880 eggs or 14 pints of milk.

It was pointed out, however, that soy bean flour must not be used to be manufactured for human consumption as that it retains all of the valuable fats in the bean. Soy bean flour made after these fats have been removed is excellent food for diabetics.

The industrial of soy beans has been increasing steadily. In general the beans can be eaten in any climate or soil which will raise corn. In the farm bureaus, the soy bean crop many individual cases, reported by of a farmer was the only one which the farmer could readily turn into cash.

Many farmers paid these last year's crop at from $1 to $2 per bushel in order to obtain the much needed seed. Most of the beans are bought by huge manufacturers of cattle feed. The beans are now selling for from a dollar to a dollar twenty a bushel

Railway Saving Time

Speeds Up Express Trains To Sixty Miles An Hour

The fastest regularly service ever operated in the United Kingdom is that of the London and North-Eastern since July 17 last year.

There are 28 expresses with start-to-stop speeds of 60 miles an hour and over. All the companies pushed up various services, on the date mentioned, and although a 105 hours a day are being saved on journey time.

The world's longest non-stop run has been captured for Britain by the London and North-Eastern Flying Scotsman, which covers the 392½ miles between King's Cross and Edinburgh in 7½ hours.

Why she's a She

The question of why a locomotive is called "she" has been referred to a railroad official He replied:

"There are many reasons for the appellation, she wears a jacket with a yoke, has a bell and a whistle, has an apron and a lap, too. Not only does she have shoes, but she sports pumps and even hose while she drags trains behind her. She also calls attention with puffs and snuffs and sometimes she foams and requires work At such times she is switched. She needs guiding and she requires a man to feed her. This is characteristic of all of that sex. A much slender when she is fat."

Prize For Cowboy-Off Bull

Jeremiah, a bull more than 10 years old, wearing an old-fashioned cutaway, carpeted grand 1934 cowdolls, including some of the latest models and he carried off first prize at the doll show at the Washington Public Library Jeremiah was awarded Red by Mrs. Alice Recroft The exhibits ranged from a quart-sized kitten two feet in length, and the smallest ranged from 5 to 80 inches in ages

Tomatoes thrives best on well-drained and fertile sandy loam.

WORLD HAPPENINGS BRIEFLY TOLD

Hundreds of men have gone to work in lumber and fishery operations on the British Columbian coast according to government officials.

Harold Lake, who wrote the words for the song, "I Hear You Calling Me," died at his London home after a long illness. He was 51 years old.

Forty-six hand World War veterans travelled from all parts of Scotland recently to hold a reunion in Edinburgh.

Thought paying as some localities, the honey crop of western Canada will be a little higher this year than last year according to C. W. Gundersen, Dominion apiarist, who completed a trip to the Pacific Coast.

Prominently mentioned as a possible Liberal candidate for Peel county in the forthcoming Ontario provincial election is Duncan Marshall, former Alberta Minister of Agriculture.

Renewed efforts to untangle problems that must be solved before the wheat and oil industries are brought into the field of "Blue" were promised by Hugh S. Johnson, U.S. Industrial Administrator.

Thomas Leaghman produced a sack and passed 2,000 coins on the desk of Miss Evelyn Robert, secretary of the Golden Gate Junior College in San Francisco, to pay his entrance fee who saved the pennies during his high school days.

First of its kind in Australia is the special police branch organized by the air force, and first of the flying police is Aircraftsman Snook, who is being specially trained to head the peace officers of the air. An expert flyer, he has had no previous experience in a policeman's.

An improved mail service to Churchill began recently and will continue during the navigation season. Instead of only one mail each week, Churchill residents may now receive letters and newspapers on Wednesdays and Saturdays. Outgoing mail will also have Churchill letters weekly.

Hundred Fewer Flushes

Even His Dentist Cannot Get Him To Admit Pain

It Does never flinches—not even in a dentist's chair.

"Quote at fore reflects on pain," says his dentist, like most of his profession when about to embark on some definite explorations of the oral cavity.

And Mussolini's answer to his probing remark, where Lenonzini means: "Pain is going to hurt a little," invariably is:

"Non fanno li dolore (I do not fear pain)."

Sir Arrigo Pinero, of Rome, the man who for eight years has been the Italian dictator's private dentist, told how his patient carries on through the trials that make many strong men quail and whimper.

In Chicago to attend the Centennial Eucharistic Congress, Dr. Pinero said Il Duce bore neither the smart of the drill, or its descent into the tenderness of the teeth.

Assured by his patient that he has no fear of pain, he has been given powerful novocain, said Dr. Pinero. He hasn't been able to get a good out of Mussolini in eight years.

Not a Catalexis

Hitler Regime Will Go The Way Of All Such Movements

Chancellor Hitler says that the Nazi regime will endure forever. The interesting thing about that is not that he is wrong but that he thinks he is right. After five or six thousand years of recorded history the people and women know that nothing, in this world at least, can endure forever, or even for any really long time. But movements such as Hitler's never used the kind of historical information he commences to keep them going even the little while that they may endure.—New York Evening Post.

Postcards can now send the time by a clock on the Eiffel tower, the illuminating of night lighting up a dial of face in circumference.

Problems Of Statesmen

Not So Easy To Manage Affairs In These Days

It is, of course, unfair to judge modern statesmen by the old standards. Statecraft today has not only to handle competition that were undreamed of fifty or a hundred years ago, but it has to reckon with a democracy so keenly alive to its own importance that in all the chanceries of the world it has become the terror that walketh by night. It was easy to run Europe—even to ruin it—when the Man on the Street was merely a speck on the horizon.—Glasgow Weekly Herald.

Caravans Travel By Tractor

Canada No Longer Take Motorcades Due To Hudy City

The romantic camel caravan of the Arabian deserts has gone into history, according to Rev. S. M. Howard, Presbyterian missionary.

Automobile bodies adjusted to caterpillar tractors have entirely supplanted the camel, he said today, in conveying the thousands of Mohammedans across Arabia on their annual visits to the Holy City.

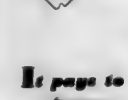
Even in those dull years, he said, at least 20,000 annually make the pilgrimage.

Razor Blades FREE with POKER HANDS!

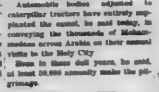
You can get these five keen, well-honed safety razor blades (fit any Gillette type razor). Given free for just one complete set of Turret Poker Hands . . . any man would appreciate such a gift!

Mild, yet sweet and full of flavour Turret Fine Cut is a particular favourite with men who "roll their own." A 20 cent package of this mellow Virginia Tobacco will make at least 50 cigarettes . . . in it are combined satisfaction and genuine economy.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO



SAVE THE POKER HANDS



By Seth Boyer

YOU'LL BE NURSING SOMETHING NEARLY FOR TOOT! HERE'S YOUR NURSE.

It's a youthful affair, rather suggestive of military styling.

Especially those who might consider a little shadetening will find this model exceedingly attractive.

While a pinkish tone soft crinkly crepe is in required the original model, a red and white patterned crepe, a dark blue and white polka-dotted crepe or grey crepe silk are other good choices.

The cape is removable.

The pattern provides for long or for short sleeves.

The Style No. 2940 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Size 16 requires 4¼ yards 39-inch with ¾ yard 39-inch lining for cape.

Price of pattern 20 cents in change or coin (coin is preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

AUGUST 27

SAUL

Golden Text: "Behold, to obey is better than sacrifice."—1 Samuel 15: 22.

Lesson: 1 Samuel, Chapters 9-11, 15.

Devotional Reading: Psalm 40:1-8.

Regulations and Commands

Saul Strengthens Stewart's Order, verses 1-12.—Samuel had found it necessary destroy the Amalekites all the people and all their possessions. Saul carried out the order, only he spared Agag, the king of the Amalekites, and the best of their sheep, oxen, fatlings and lambs. It was reality a test, for Saul knew he would be ruled by God through Samuel his prophet, or he would be ruled by a self-willed despot. He proved to be the latter.

On learning what Saul had done Samuel was very angry and set out to meet him.

Saul's Falsehood and Then His Admission, verses 13-23. When he met Samuel he said, "Blessed be thou of Jehovah." were Saul's words of greeting when Samuel met him at Gilgal. This was a common form of salutation, yet Saul's use of it here may be considered a guilty conscience and a desire to conciliate Samuel by a gracious greeting.

"When my 5-year-old son comes in from school with an affectionate greeting, I begin to sit up and take notice. When he is apparently very much pleased with himself over something he has done, I think at once of a particular failing among across the teacher's path with a dropping wing, to lure him from his base by me." When he manifests an extraordinary solicitude for my health and for my spiritual welfare, I suspect the duty I am sure that something has happened or will happen; and if he is careful to steer all the conversation away from the subject I know that I must begin to conduct a catechism.

Then Saul sought to forestall the accusation which he felt was coming by stoutly announcing, "I have performed the commandment of Jehovah." He was convicted of hypocritical deceit almost instantly. His sheep and oxen were the spoil of the battle, the people were responsible, was very much. Having shifted the blame from his own shoulders he proceeded to excuse the people, claiming that the sheep were the best of the spoil and had been preserved for the best purpose, to be offered in sacrifice to God. Recall Aaron's excuse for the golden calf. The people had brought their gold and he had cast it into the furnace—"and there came out this calf." he said to Moses, when Moses arraigned him for his sin. He, too, declared that the motive was good, he had built an altar before the image and proclaimed a feast to Jehovah. Adam blamed Eve, and Eve blamed the serpent.

"Very rarely indeed does a man excuse himself to other men and yet remain absolutely unmoved in his own eyes. When Pilate stood washing the responsibility of Christ's murder from his hands before the people, was he feeling himself as if his hands grew cleaner when he washed? Men do not

their disposition to face the acts of their lives and to recognize their personal part in the responsibility for the things they do. I did it, I did it not me say to all my wickedness. Let me refuse to listen for ever to excuse to any voice which would make my sins less mine."—Phillips Brooks.

Ignore Shell Fire

Hellish Racketeers Have Faith In Marksmanship Of Artillery

Artillery men who direct their fire at floating targets in Mal fax harbor pay no attention to yachts that cross their line of fire and the yachtsmen pay no attention to them.

Racing yachts turn back and forth in the firing area each Saturday afternoon but none of them has ever been hit. High velocity shells stream directly overhead, passing within a few feet of the boats before they splash into the water near the targets and the yachtsmen continue placidly on their course.

Time was when the yachtsmen would keep a wary eye on the guns as their craft entered the danger zone; but now, so accurate is modern artillery marksmanship, they no longer regard it as a danger zone and sail by with scarcely a glance at the battery.

Recipes For This Week

(By Betty Hastings)

RIFE GRAPE JELLY

4 cups (2 lbs.) juice.
7½ cups (3½ lbs.) sugar.
½ bottle fruit pectin.

To prepare juice, stem about 3 pounds fully ripe grapes and crush them thoroughly. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. Place fruit in jelly cloth or bag and squeeze out juice. (If Malagas or other tight-skinned grapes are used, the juice of 1 lemon should be added to prepared juice.)

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add bottle of fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ½ minute. Remove from fire, skim, pour quickly. Paraffin hot at once. Makes about 11 glasses (6 fluid ounces each).

CARROT AND CABBAGE SALAD

1 package lemon-flavored gelatin.
1 pint warm water.
2 tablespoons vinegar.
1 teaspoon salt.
1 cup raw carrot, grated.
1 cup raw cabbage, finely shredded.

Dissolve gelatin in warm water. Add vinegar and salt. Chill. When gelatin thickened, fold in carrots and cabbage. Turn into individual molds and chill. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 6.

Tells Time By Lights

Flags Check In Paris Has Not Regulation Face and Works

Parisians are seldom concerned over the time of day. There is inherent in the French temperament too great a capacity for enjoying fully the present moment to permit any particular preoccupation with the passage of the hours. Engrossed in the pastime of appreciating culinary delights, for instance, the Parisian would probably be inclined to resent having a "Big Ben" boom out the fact that he has been at the luncheon table two hours already The absentmindedness of any connoisseur time-piece is probably suppressed by some such scruples, and at the same time explains the exceptionally great interest taken in the debut here of what is authoritatively described as "the biggest clock in the world." Certainly it is one of the "firsts" for it is pinned about two-thirds of the way up the Eiffel Tower, at the height of 626 feet, and it measures 58 feet in diameter. Besides its unusual dimensions, however, the French version of "Big Ben" has other claims to distinction. For although it is visible from almost any point in Paris, it has no face, no hands, and no works—at least not in the usual sense of the terms. The answer is that the new clock is a luminous one. The hours, from one to twelve, are simply great colored lights, or reflectors. The "hands" are lines of electric light bulbs, which turn for a minute, then go out, and the line further on is then illuminated to turn in its succession for one minute. The hour "hand" operates in the same way, but of course more slowly The "movement" is regulated by a synchronized electric motor.—Christian Science Monitor.

Historic Site

Movement For Preservation Of Places Of National Interest Started In 1919

The movement for the preservation of national historic sites in Canada dates back to the year 1919. Representations were made to the then Dominion government urging the necessity of a national organization for the preservation of historic sites and the creation of an honorary Historic Sites and Monuments Board was created. This board is composed of a number of eminent Canadian historians who have given the'r services without compensation. The recommendations of the board are submitted to the Department of the Interior, which through its national parks branch takes the necessary action.

Used Near Type Rollout

In a new type balloon, Dr. Max Cosyns, in connection with Professor Pichard last summer in his ascent into the stratosphere, and Ernest Demeurter, a noted Belgian aeronaut, have made several trips lasting 24 hours or more. Most of their trips have been over Belgium and France. Their craft is equipped with devices to permit it to rise or descend at will or remain stationary. Dr. Cosyns plans to make a trip into the stratosphere.

Licenses to keep cows are issued by the London County Council to fifty persons in the County of London, most of them living in the East End. There are more than 1,000 cows kept in this way.

DECREASE IN RELIEF COSTS IS FAVORABLE SIGN

Toronto, Ont A substantial drop in unemployment relief costs throughout Canada in the last two months is giving governments, national, provincial and municipal grounds for hope that the load is being more than seasonally lightened and that a gradual tapering off in expenditures may be expected.

Figures gathered by the Canadian Press in Ontario and the western provinces reveal a considerable flow from relief columns to regular pay rolls as industry stirs here and there into new life In Ontario where relief expenditures reached a total of $17,000,000 in the eight months between November last and July 1 this year the latest returns show that the 25 per cent drop in direct relief costs in May and June reflects decided improvement.

In British Columbia ranks of unemployed were thinned to the extent of 22,000 between March and June. The number of men in federally-maintained camps was also reduced by about 2,000 in that period. The numbers under provincial care in March were 32,830. July figures, 120,605. May, 120,515, and June, 119,669. Improvement in the relief situation is due to the fact that thousands of men have been absorbed by the lumbering, mining, and fishing industries Coast lumber companies are reported to have increased logging operations on a large scale.

Relief costs in Alberta have not been reduced quite so much as in B.C. Expenditure in May, June and July totalled $26,530, compared with $674,725 in February, March and April Farmers in that province (one eighth) and angle unemployed relief drew paid $31,000 in the last three months.

Urban centres in Saskatchewan had 27,700 (partly estimated) persons receiving direct relief in July at a cost of $140,000, the lowest monthly total of the year so far in March, 30,300 obtained direct relief at a cost of

In Manitoba direct relief costs dropped from $438,300 for 76,437 persons in April this year to $376,316 for 64,178 persons in June. In April alone there was an outlay of $78,052 for indirect relief, benefitting 963 persons and no indirect relief expenditure in June.

Prince Edward Island reports a greater demand for relief this year than last. For the months of May, June and July, 1933, provincial expenditure totalled $5,494, and for the same months of this year combined provincial and municipal expenditures were $11,706.

Nova Scotia figures have not been compiled but officials report "some improvement over last year."

Christmas Mumeral

Imported 300 Assyrians Slain By Iraq Troops

London, Eng. The Daily Herald reported today that more than 300 Assyrian Christians had been massacred in villages in northern Iraq within two miles of an Iraq army camp.

The killings were attributed to the commander of Iraq troops in northern Iraq, who was said to have used Mavels to attack the Assyrians as they were returning from French Syria after recent border disturbances.

The commander also was alleged to have caused 14 Assyrian prisoners to be summarily shot.

The Herald said the affair would be investigated by the League of Nations.

Wins Cadet Medal

Connaught Ranges, Ont.—Young cadet R. H. Tupper, of Wayne, Alberta, posted a fine score of 99 out of a possible 100 in the open match till cadets to take the Cadet medal, and $6 in the D.R.A.'s annual meeting. The open match is one of the features of the cadet miniature rifle shoot being conducted along with the great service rifle classics.

Receipts Farmers

Millions Of Dollars To Be Paid To United States Growers

Washington Millions of dollars in benefit payments to reduce and wheat farmers for agreements to curtail their production will be freed under a policy made public by Henry Morgenthau, Jr., governor of the farm credit administration, after approval by President Roosevelt.

Under it, payments will be made to cotton farmers, who agreed to plow up 25 to 50 per cent of their growing crops, without requiring deductions for amounts they owe the government for seed and crop production loans.

Morgenthau said a similar policy will be pursued in the case of payments some time next year to wheat farmers for agreements to reduce their acreages planted for harvest in 1935 and 1936.

About $100,000,000 is scheduled for distribution to wheat farmers and $110,000,000 to cotton farmers.

Where corn-hog reduction contracts is involved a claim against the farmer for the benefit cheque will be made out jointly to the farmer and the administration

Tax Revenues Increase

Figures For July Higher Than Corresponding Month Last Year

Ottawa, Ont. For the first month since the beginning of the current fiscal year Canada's revenue from taxation in July showed an increase over collections for the corresponding month last year. The national exchequer came out of it $642,920 to the good. For the four months, however, revenues were down by $9,153,457

The improvement was due to collections last month totalled $5,-869,139, as against $7,510,966 for July, 1932, or a betterment of $1,378,170. This gain was partly offset by a drop of $408,900 in excise duties, $270,747 in customs duties, and $52,-000 in sundry revenues. Even with the declines balanced against the gains, revenues were still on the right side.

Trial Shipment Possible

Cattle Available For Export Via Hudson Bay Route

Saskatoon, Sask. The possibility of a trial shipment of cattle to England this fall via the Hudson Bay route still exists, according to information in Ottawa.

A large livestock company, in a communication to the Saskatoon Board of Trade, pointed out that the firm could furnish 200 head of cattle for such a shipment. This company is in communication with overseas buyers.

It also is known, too, that a limited number of cattle suitable for export purposes still are available in the Saskatoon district.

Shearer Has Competition

Toronto, Ont.—In a special despatch from its Ottawa correspondent, the Globe says another conference of representatives of the Federal and Provincial Governments will be called to meet in November by Hon. Dr. R. J. Manion, Minister of Railways and Canals, to deal with the problem of bus and truck competition with the railways.

French Fliers Greeted

Paris, France.—Several thousand persons cheered Maurice Rossi and Paul Codos at the city hall, when they were greeted on behalf of the city of Paris in recognition of their recent flight from New York to Rayak, Syria, which set a new distance record.

Alberta's Debt Reduced

Edmonton, Alberta.—Reduction of $4,371,456 in Alberta's public debt is indicated in the first quarterly statement of the provincial government issued today. This leaves the net funded and unfunded debt, as at June 30, at $140,237,273.

$13,000,000 Barley Crop

Ottawa, Ont.—Private advices to capital place this year's west-rn wheat crop at not more than 315 million bushels, or about nine bushels per acre

Returns From Northern Trip

Major-General MacBrien Inspects Posts At Herschel Island

Edmonton, Alberta. Major-General J. H. MacBrien, C.M.G., D.S.O., commissioner of the R.C.M.P., arrived here after making an aeroplane trip to the north on Hermit Island to inspect posts He made the flight from Herschel Island in 48 hours aboard an R.C.A.F. Fairchild piloted by Squadron Leader E. L. McLeod.

The commissioner expressed himself as delighted with the trip He had no announcements to make, however, beyond stating that there was a possibility of some changes.

British Columbia Floats Loan

Part Of $8,000,000 Bought By Victoria Syndicate For Relief

Victoria, B.C. Hon. J. W. Jones, Minister of Finance, announced recently he had floated a loan of $3,-000,000 at a cost to the province of 5.67 per cent.

One million dollars of 30-year five per cent. bonds was sold outright to a syndicate here. This sum will be used for unemployment relief

The same syndicate took an option on an additional $2,000,000 on the same terms.

Flood Destroys Crops

Peiping, China. Missionaries at Tsao-Chowtu in Shantung province telegraphed the China famine relief commission saying a break in a Yellow river dike had caused a flood over an area 80 miles long and 20 miles wide between Tungming and Tsao-Chowtu. All crops were destroyed, the message said.

Fisher Body Contest

Saskatchewan Boy Wins In Canadian Western Section

Chicago, Joseph Oldham, Medway Park post office, Lanlo, Saskatchewan, was awarded one of the Canadian scholarships in the Fisher Body Craftsmans guild contest.

His award was in the senior Canadian section, and he, with David Tennant of London, Ont., topped senior Canadian entries in this year's contest.

R. Guthrie, also of London, Ont., was given chief Canadian award in the junior section.

One hundred and twelve preliminary winners in Canada and the U.S.A attended the banquet at the armories here to learn who would be the four American and the three Canadian boys to be awarded $5,000 university scholarships

R. H. McLaughlin, president of the Canadian section of the Fisher's Guild, announced the Canadian awards Oldham was the winner in the senior competitions of the Canadian western provinces

Investigate Cuban Affairs

Probe Bank Accounts Of Deposed President Machado

Havana. Bank accounts and properties of the deposed President Gerardo Machado and his followers were investigated with a view to requisition by their successors.

Secretary of the Treasury Joaquin Martinez Sieara, a leader in the A B C Secret Society, began the probe as Provisional President Carlos Manuel de Cespedes' administration wrested out persons suspected of profiting by the Machado regime.

It was reliably reported embargoes are planned on fortunes and property of the Machadistas.

Reports from the Bahamas said the erstwhile president planned to rent a place near Nassau

U.S. Recovery Plan

Entire World Is Watching Results With Interest

Washington. Franklin D. Roosevelt, in a statement in Washington, says in a statement that in his opinion not only the United States but the entire world has a vital stake in the success of President Roosevelt's recovery plan.

Henry Bushnell is following the course of business recovery plans in the United States with the keenest possible interest, and with every hope that they will be fully successful."

Names Crop

Gray Farmer, ninth occupant of the machine, escaped with only minor hurts.

Prince Likes Horrix

Is Spending Holiday At Popular Resort In France

London, Eng Hatless and wearing a grey flannel suit, Prince of Wales took off by aeroplane from the lawn of his home at Fort Belvedere, near Windsor, bound for Biarritz, France, where he will holiday the rest of the month. The prince will spend most of his time at the Chiberta Country Club. He will visit Bordeaux with homes in the vicinity for a few days.

The prince always receives a hearty welcome in France, where he maintains the tradition established by his grandfather, King Edward.

The prince is fond of Biarritz because the inhabitants and visitors restrain their curiosity over his movements.

Premier Returning To Canada

London, Eng.—After a two-months' stay in England, during which time he represented Canada at the World Economic Conference, Prime Minister R. B. Bennett leaves for home on the "Empress of Britain," sailing August 26. The Prime Minister returned here Monday from Harrogate where he had been operated on a few days since the close of the conference.

No Change Yet

Washington.—Inquiries at the White House on President Roosevelt's policy for inflation and managed currency brought the response that there had been no change and that future action depends on conditions.

JAMAICA FLOODS CAUSE HEAVY LOSS OF LIFE

Kingston, Jamaica.—Seventy persons were drowned in floods which struck this city and the parishes of St. Thomas, St. Catherine and St. Mary, following a storm accompanied by lightning and high wind

The damage was estimated at approximately $1,500,000 as bridges and buildings were swept away and banana plantations levelled. One hundred houses were abandoned as they were damaged so badly.

The government established relief stations to care for the homeless The storm which lasted six hours, was described as the worst in 50 years.

The water rose as high as six feet in the streets, and rushed through dwellings washing away many occupants trapped within. Two children were swept away from their mothers' arms by the floods and drowned.

The weather had improved later but the miseries and the city were strewn with wreckage Many homes were struck by lightning and railway and telephone services were disrupted.

Known deaths were confined chiefly among the poorer residents, trapped in the low-lying district adjoining the rivers.

In the rural sections of Jamaica

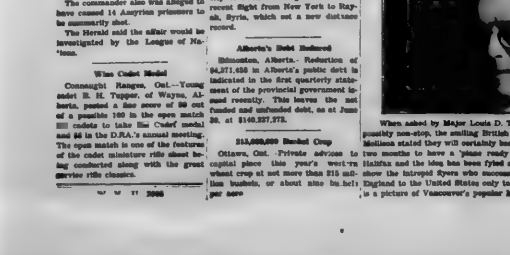
Sanglame Tragedy

Three Lives Are Lost In Crash In British Columbia

Vancouver, B.C.—Fog hovering over Anderson Lake, 115 miles north of Vancouver, was believed responsible for loss of three lives, one of a woman, and serious injury to two other occupants of a machine which crashed into the lake at dusk Tuesday evening. A ninth occupant was slightly hurt.

The machine, piloted by Gordon K Mackenzie, left Vancouver for Bridge River carrying five passengers.

Ernest Dent, 33, with his wife, a bride of a few months, bound for Bridge River, and W. J. Butt, 50, Vancouver, business man and proprietor of MacKillivray Lodge, near the scene of the accident, lost their lives, while Pilot Mackenzie and Otto Deener, Prince Rupert prospector, suffered fractures and other injuries.



When asked by Major Louis D. Taylor, to make a flight across Canada, possibly non-stop, the smiling British flying family of Captain Jim and Amy Mollison stated they will certainly hear it in mind. Unfortunately it will take two months to have a plane ready for the long hop from Vancouver to Halifax and the idea has been tyfed away for future reference. Our picture shows the intrepid flyers who successfully navigated a non-stop flight from England to the United States only to crash within sight of their goal. Inset is a picture of Vancouver's popular Mayor.

Tests Are Being Made In Extensive Program To Improve Quality Of Western Wheat

Details of an extensive program to improve western wheat crops and thereby raise the prosperity of Canada seldom if ever equalled, were revealed by Dr. L. H. Newman, Dominion cerealist from Ottawa, who is carrying out tests of the seed with Major H. G. L. Strange, former wheat king of the world.

Description of the extensive scheme was given by Dr. Newman in this manner: "We are scientifically," he said, "to obtain a picture of the variation of wheat being grown across the northern farm belt to learn where the grain is fairly pure and where it is badly mixed. Now that we are getting this picture we are trying to improve the seed used by the farmers.

"Last fall," the cerealist explained, "samples of grain were collected from 4,000 farms at carefully selected points and this year grain has been grown from this seed. We established 10 pocket nurseries and 100 small plots at each. Now we are going over grain samples at each place. From this, we are hoping to build up a system of the classification of the varieties.

"In short, the Dominion did not even know the names of the varieties of wheat they were growing. The farmers, at the time the samples were taken last fall, were asked to give the name of the variety they thought they had. This was noted by the men who collected samples and the grain was pooled. Now, we are classifying the remaining grain under these three heads: Seed, which is fairly pure and which can be used for plantable, suitable seed for carrying on with for a crop, and unclassified, made up of a number of varieties, which should not be used for seed."

Sailing Information

S.S. Pennsylvania Trip Takes 350 Members Of 91 Groups

In enticing a record passage of three days through Hudson Strait and Bay, the S.S. Pennsylvania docked at the C.P.R. piers on the Montreal harbor front here on the way to be fitted out into the new Canadian port this summer. First of all her triumphant crossing was commemorated by a "1928."

Her sailed Friday, and made her maiden trip to Hudson Island 13 days after clearing from Antwerp. She is also on her first at Churchill Bay, of 13 hours 15 minutes, ship's time, 13 days after leaving the British Isles at Portland Pitch, and at Resolute the 18th ship to touch Churchill. Her voyage since the port was established two years ago.

When the ship's log was handed in at outside Churchill harbor, it registered entirely 13 miles, and the Pennsylvania showed a draft of exactly 22 feet when the ship was moored at the dock.

And then Captain Clifford Pearson, herself he celebrates his birthday on the 19th.

Britain To Build Ships

A substantial increase in the British navy, including several cruisers, destroyers and submarines, is being planned as a sequel to the present ship-building programme of the United States, Japan, France and Italy. The Admiralty is understood to be planning to provide for the program in its next budget. The ships, however, cannot be completed before 1933, because of the shipyard beauty.

New Cheese

. An epidemic in a man who rejoices in news of drought, floods, locusts, chinch bugs, tumbleweeds, phylloxera, hail and smuts disease, but recoils and other contagious forces tending to raise prices. A pessimist is a man who discourages more about the growing weather, thriving flocks and other factors inimical to a fixed price structure.

Each passenger riding in a Turkish commercial aviation engineer is automatically insured for $4,700.

W. N. U. 2000

Soil Fertility

Conditions and Treatment Is An Essential

An Essential Consideration

In considering the matter of soil fertility and the value of soil analysis, it is well to bear in mind, says the Dominion Chemist, that the question of increase or fertility of a soil is by no means entirely determined by the percentage of plant food constituents present, nor even by the proportions of these which may be actually available for the immediate crop use. The soil, for healthy and profitable growth, must not only contain a sufficiency of the chemical elements in readily available forms to supply the food requirements of the crop, but the soil must be of such a mechanical condition or texture as to offer a fine seed bed for germination, and present of a ready entrance of the soil system as growth advances. While sufficient free water to prevent leaching and drain away, the soil must have an absorptive capacity to hold over sufficient moisture for the supply of the crop during periods of drought. This is very important, and it would not be too much to compare to medium air seat, at the same time, it must be firm enough and fine enough to give the plant support and rooting members. The land is said to be in "good heart" or, otherwise stated, mellow, friable and open. The condition in comparison upon its presence of sand to clay and particularly upon its percentage of humus, or semi-decayed vegetable matter, derived from manure or crop residues.

Quite An Occasion

Royalty Used To Take Cheese Big With Great Ceremony

It is no honor of George the Fifth's holdings to receive with the royal arms, fulfilling the function of a test-deal. Weymouth should have a better memory than that. It might be remembered that day which Fanny Burney speaks of, when his majesty stopped down to the bridge to the theatre of the National Anthem recited in a neighboring stadium. It took her act of bathing a long time to get over the excitement of the occasion.

When the Duchess de Berri visited her brother-in-law at Cheltenham, Dorset, she was received with a salute of artillery; after which "the Inspecteur de Beaux, clad in a full dress uniform, bowed and, and white gloves, led her royal highness into the inn until the water reached his knee, when he retired with these profound compliments."—London Times.

Individual Effort of Every Citizen Is Needed To Work For Solution And Elimination of Economic Ills

Air And Stored Potatoes

Thorough Circulation Of Air Is Necessary To Keep Stored Potatoes In Good Condition

Circulating storing of wet potatoes is responsible for unnecessary annual losses. Potatoes ought to be stored dry in a cool well-ventilated cellar which is perfectly dark. Piling potatoes in heaps in warm and poorly ventilated buildings creates the most favorable conditions for rotting. Before placing the potatoes in a cellar, wooden slats slightly apart should be nailed about six inches or more from the wall, and a temporary floor with cracks between the boards should be laid about six inches above the permanent floor this will ensure air to circulate around and under the pile of potatoes. If it should be thought that the pile has to be very large, square ventilators made of wooden slats and running from top to bottom of the pile should be put in here and there. Together with the circulation of air at the sides and at the bottom of the pile, these ventilators will keep the potatoes in a much better condition than if they were in a solid pile. Another good plan recommended by the Dominion Department of Agriculture is to keep the potatoes in large crates lined with slats. The remainder between the crates assisting very much in keeping the potatoes in good condition. The temperature of the storehouse or bulkhead should be kept as nearly 35 or 36 degrees Fahrenheit as possible.

Home Just Reversed

Fonds Of Odd Spots In New York Recall England

The business of one of those obliterated fellows who are bothered by odd spots has taken him along Chrysler building, and there he found a hole. He discovered a peculiar thing. At No. 43 is a firm of jewelers named Kovitz & Pushinsky, and five doors away, at No. 51 is the jewelry firm of Pushinsky & Kovitz. This got on his mind to a point where he went into one of the stores and asked for an explanation, which was graciously given as follows: The firm of Kovitz & Pushinsky was founded at No. 43 some years ago, and the two partners took a younger brother of each in as clerk. All went smoothly until it was felt the firm wasn't doing well enough to support all four. The younger brothers were admitted to make new jobs. They went up the street and opened a shop, reversing the names in the original title There was some hard feeling at first, but now all speak cordially when they meet. Both firms seem to get enough business.—The New Yorker.

Argentina exports bumper crops this season.

Individual effort by every citizen in frankly facing his or her problem and thereby making a maximum effort to solve this problem was the high point in the address delivered by Hon. H. H. Stevens, Minister of Trade and Commerce, put forward this belief.

"First," said Mr. Stevens, "the individual citizen should study how he or she can contribute the most to the relief of those in need. Not by giving charity but by a mere effort to help themselves. Each one, in a useful way so as to provide added employment for those who require it." Painting or repairing the home, purchase of clothing or any other useful means, he illustrated, would give employment of personal resources and afford the finest contribution which could be made at this time.

"I challenge the right of a landlord to receive rentals from an insanitary and dilapidated building when he is financially able to replace it with a decent accommodation. This proposal seems there could be afforded enough new and needed construction to give much stimulus to employment as to materially, if not wholly eliminate want and suffering.

At no time had the number on relief been reached since little more than 10 per cent. of the population, and this total had been reduced, declared Mr. Stevens. If the remaining 90 per cent. put forward the best effort of which each individual was capable, a substantial absorption of those in need could be achieved.

Touching on the world economic conference, he said to turn it a failure is a mistake. Without doubt, the gathering together of such a concourse of distinguished persons and the personal contacts which inevitably ensued, must bear fruit in the future.

The steady increase of the business of Canada with other parts of the empire as a result of the imperial conference agreements, said Mr. Stevens, gave evidence that where genuine efforts of co-operation were made results advantageous to all may be achieved.

New Kind Of Blonde

Idiot Man Turns Into Maniac When Driving Car

Powerful stuff—gasoline. There is a kind of gasoline intoxication that transforms the entire natures of some men. Sometimes it is found that even the mild-mannered man who loves his family, is kind to animals and courteous to everybody, cannot stand gasoline at all. As soon as he gets into an automobile he isn't polite to anybody, not a policeman.

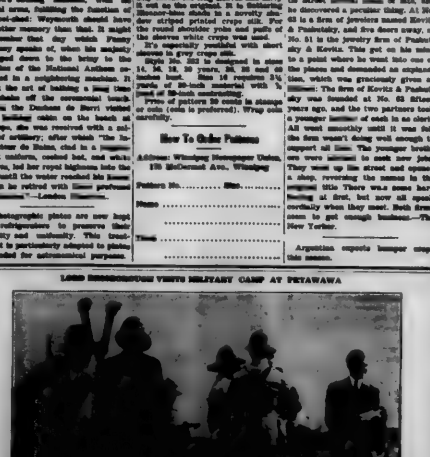
On foot, he says "You first," or "Pardon me sir, may I step ahead?" or "That's all right, old man. I'm in no hurry." But seated in a vehicle propelled by gasoline, he gets a megalomaniac's view of the value of time. He may set up a superiority complex in particular but he wants to get there right away.

He watches for the smallest opening to jam ahead. If he is thwarted in the attempt, he glares at the fellow who got in his way and perhaps hurls an insulting epithet. If that is an unavoidable delay for a moment, he bawls his horn ,and the aggregate effect of the entire group of gasoline-intoxicated maniacs turns bedlam loose.

Filling the air with raucous mechanical blowing, hooting and screeching is an attendant symptom of gasoline madness. Dashing ahead through the traffic and wrong everybody out of the way is another. The manifestations vary with age and temperament of the subject, but even in the mildest natures the tendency is toward crude summons and lack of consideration.—Kingston Whig-Standard.

Are you thin or fat? If you are here is advice for you. If you are thin, don't eat fast, and if you are fat, don't eat—Phat.

Bombay, India, now has 2,221 electric establishments.



LORD BESSBOROUGH VISITS MILITARY CAMP AT PETAWAWA

"Cost You Plenty, I'll Bet."

BY INQUIRER

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during the class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson the boy whose head she sketched, criticism her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and comforts her. Camilla secretly adores him. He makes a date to see her that evening but is astonished when the latter has an impressive night club. It is far beyond his means but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends. After taking her home Peter realizes and to take Camilla out again because of the expense. He is only a struggling artist [illegible] Camilla has [illegible] and her to go out again.

[Now Go On With the Story.]

CHAPTER V.

Peter let himself into the ugly room which he shared with Gus Mitson. He despised its blatant vulgarity and flaunty furnishings, but his artistic and imaginative eye looked beyond it to the beautiful studio suite that he would occupy some day, and endured it. Gus Mitson was concerned with gray modeling clay. He wore a soiled red suede jacket Peter's and smoked a brier pipe.

"This is a swell hour for you to be check'n' in," he reproached Peter "Out with some skirt."

A grin Peter retorted hanging up his hat and coat.

"Another high-hat dame, I suppose, since you didn't invite me to the party. If you'd take my advice leaving that he knew all about the proper attitude toward a hard-boiled world At the same time he profited by other advantages which his association with Peter afforded him Obliged on he was to economize as Peter never owned personal, and his personal charms enabled him to earn more than Gus, who resented that his friend was favored everywhere by the hostesses, the landlad) employers friends and acquaintances Peter was popular everywhere this was an outsider only Peter's friend which rendered him a certain advantage.

"Got you plenty too, I'll bet," Gus continued his reproof.

"I'm much," Peter confessed But it was worth it."

"Is she going to finance you for a couple of years in Paris?"

"No, no, I only meant that being with her tonight was worth the money it cost her."

"Not smart. If you don't watch your step you'll be falling for some dame and lose your balance completely Well, come on it's time we hit the hay."

"You must on waiting up for me, don't you mama Peter grinned with good humor I appreciate your concern, but really I'm a big boy now and can tuck myself in."

"That's what you think But you know I can't sleep unless you're properly arranged, and you might be considerate enough to turn in at a decent hour once in a while."

Quarreling with Gus was worse than arguing with a woman, because he not only had the last word but he never resented it. A reconciliation or Peter kept his silence He was determined to see this through the year Next month would be the end. He had offered to help him early in

TAKE ENO'S 'FRUIT SALT'

He had been startled, too, seeing her there where they had first talked together, but had had a moment to calm his violent reactions before she discovered him

He smiled restfully. "Is this a fairy tale—rendezvous of poems?"

This is a public park, sir!" If she retorted with a calmness that belied the furious beating of her heart which she sudden appearance had disturbed. Always, she felt as if she must resent anything Peter Anson chose to be, at the same time that she wanted so much for him to talk to her. And wondered why she could resent him so much when he was so.

"Why of course." His tone was punished at the defense in her voice "That is why I take this path from the art school to the museum. And because I like to wait here, especially now when the lilacs are in bloom."

"That is why I like to come here then," her voice was gentler and she looked up at him with a timid smile.

(To be Continued).

Pure White Swallows

Strange Albino Birds Found in Quebec Village

Reports that a nest of pure white swallows has been discovered in a barn at Danville, Que., have aroused considerable interest among ornithologists in Montreal.

Miss Edna E. Wilson, of Danville, who made the discovery, declares that the nest of pure white swallows has been raised by ordinary barn swallows.

"There are three fully grown birds now," she says.

M. Mousley, bird expert at McGill University, points out that while white swallows are not unknown, it is phenomenal that the entire brood of two swallows apparently normal should be albinos.

"The finding of a nest of white swallows," he said, "is extremely important in research work or ornithology and genetics. I intend to follow up the matter immediately."

If it is true that the entire brood are pure albinos and that the parent birds are normally pigmented, the finding, it is pointed out, will cause heated discussion among scientists in the field of heredity, for such a discovery seemingly transgresses the known laws of heredity. The natural condition would be to find the brood mixed, some showing signs of albinism and others being normal.

THE RHYMING OPTIMIST

VIMS

Time is so kind, yet strangely cruel,
For slowly, hour by hour, and day by day
He blurs the well-loved image in the mind
Although the heart would have each dear line stay.

He toils unremittingly, without a pause,
With imperceptible, small movements vitals
The memories that are the cherished cause
Of all the grief the stricken spirit feels.

Those things once held most precious in the thought:
More faint, more dim, until no misery
Of voice or eye or passion's self is wrought
Forgetting, then, all glories left behind.

Our lives grow calm, we say that time is kind.

Population Of India

Census Shows Increase Of 34,000,000 In Ten Years

Growth of more than 10 per cent in the population of India between the census of 1921 and that of 1931 added nearly 34,000,000 to its people This is the figure produced by the final computation which has just been completed. The increase is nearly equal to the total population of such important European countries as Poland or Spain. It brings the total population to a figure higher than the latest estimate of the population of China.

Electric power use and carloadings are increasing in Italy.

Little Helps For This Week

"I have taught thee in the way of wisdom; I have led thee in right paths."—Proverbs 4:3.

We know not what the path may be
As yet by us untrod,
But we can trust our all to Thee
Our Father and our God.

—W. J. Irons

We have very little command over the circumstances in which we may be called by God to bear a part, unlimited command over the temper of our souls, but until we are summoned under the outward form of trial. The most energetic will cannot order the events by which our spirits are to be tried. Poverty, sickness, the loss of our reach, death, accident, fortune, another's sin, may change in a moment all the conditions of our life. With tomorrow's sun existence may have new aspects for any one of us.—J. H. Thom.

Look not out of what stands in the way, but look in where the law of life is written, and the will of the knower what is the Lord's will concerning thee. . . I. Pennington.

Japan Stages Sham Battle

Elaborate Performance Of Aerial Attack Seen By Newspapermen

Fifteen million people in Tokyo and surrounding prefectures tasted wartime life when a three-day sham battle for possession of the capital was launched by the army and the navy.

Three times during the day "enemy" aeroplanes roared overhead and drove screamed warnings to the people. Bombs burst and anti-aircraft vapors were loosed in the streets, simulating poison gas and incendiary explosives.

Emergency hospitals were set up and to them stretcher-bearers wearing gas masks carried the supposed wounded, while from public parks and the roofs of big department stores anti-aircraft guns and machine-guns boomed and chattered.

There was one gesu ne casualty. A girl watching one of the air raids from a roof fell and was killed.

The assumption was that the air raiders came from enemy battleships approaching Tokyo Bay from the mid-Pacific The whole show formed the second phase of the grand air manoeuvres of the navy.

Chess is again becoming popular in Great Britain.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel necessary

Do you to feel healthy and happy, your food must pass two pounds of bound bile into your digestive tract every day. If bilious, this bile does not flow freely. Your digestion is poor. Food turns sour. Gas bloats you. You feel sick, headachy, constipated. Your skin may break out. Your whole system is poisoned. Then you feel "all in." Dr. Edwards' Olive Tablets, the substitute for calomel, were prepared to bring this bile flow. Test them. Use only as directed. 15c, 30c and 60c per box.

Simms: "It's a boy, sir, and weighs six pounds."

Happy Father (a butcher): "Without bone?"

Wheat-cutting is now general in Manitoba and under way in the other prairie provinces, according to a recent weekly report issued by J. M. McKay, general agricultural agent, Canadian Pacific Railway Western Lines. There is still, however, great need for further moisture, especially in the central and southerly parts of the grain-growing provinces.

Prom from a victory in which he carried an appeal for a Chinese sentenced to hang, to the Privy Council, ending in representations to his Majesty-in-Council here, Father Joseph A. Donovan, of Maryknoll, N. Y., landed at Vancouver from Hong Kong aboard the Empress of Canada recently. He was frankly pleased at his success in the role of priest-lawyer, but his only comment was: "We try to help where we can."

Basking the big fish in natural coloring when he was standing in company their inspection the Class and Queen of Siam to Campbell River in September 1931 during their Canadian-American tour, Brig.-General E. de B. Panet, chief of the Canadian Pacific Investigation Department, is on a trip to the waters of the fighting type, one of the prize game fish of British Columbia lakes and streams.

Cultural and educational relations in the Pacific will be stressed at the fifth Biennial Conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel, August 14-26, though economic problems will naturally be in the limelight, Mr. Stanley Greene, editor of the Institute's Journal, on her arrival aboard the Empress of Canada at Vancouver recently en route for Banff.

LOCAL NEWS

Mr. Jack Gaul and Geo. Pappas are spending a few days at the coast.

A number of Fort children have taken advantage of the new low railway rates to the coast.

Mr. and Mrs. J. B. MacLennan, Dr. MacLennan, Margaret and Janet of Edmonton, spent Sunday with Mr. and Mrs. W. J. Foster.

Dr. and Mrs. W. F. Calhoun spent a short visit to the Fort Monday. In the evening the Calhouns' witnessed some of the tennis games in the Cup tournaments now being played at the Community courts.

Miss R. Shackleton of the Royal Bank staff is on her vacation.

Mr. J. F. McGillvary of South Edmonton branch of the Royal Bank is relieving here until the end of the month.

The Edmonton Chamber of Commerce are endeavoring to bring the "Royal Scot" the famous train, which is now on view at the Century of Progress exhibition in Chicago to Edmonton. If arrangements are made thousands of people will have an opportunity to see this crack train.

A large number of unemployed arrive almost daily in the Fort and there seems to be very few jobs for the small housing stocks.

"Shooting Prohibited" cards are on sale at this office.

On account of a freight train east of Regger, Sask., being derailed, trains were rerouted. The rerouted for the large passenger train that went through the Fort Monday evening and again Tuesday morning.

Mr. Jos Lajeur left today with a number of ball players from the Fort to play in Markham, where they will take part in the big ball tournament in that town.

There are six teams entered with a first prize of $60.

Tommy Campbell of Edmonton is visiting for two weeks with Mr. and Mrs. Stanley Dench.

Mrs. C. Reed is visiting her brother, Mr. John Mellish of Vancouver for two weeks.

Mr. A. S. Fillmore is visiting at the Coast.

Born to Mr. and Mrs. A. Roy Shackleton of Fort Saskatchewan on July 26th. A son, Leroy Albert Rudolf.

SUMMER SCHOOL ATTENDANCE

A total attendance of 870 was recorded at the annual teacher's summer school just closed at the university. Officials of the campus with 201 last year. The school was operated jointly by the university and the department of education.

Miss Winifred Sullock has left for the coast, where she will visit her sister Mrs. James Southern of Powell River, B. C.

Congregational Picnic

The Annual Picnic and Open Air Evensong will be held next Sunday at the Sturgeon River. People with extra room in their cars are asked to go to the Church at 2 to 2:30 p.m., and bring some one with them.

Gone a-hops

Miss Beulah Bird, from Westlock, is visiting friends and relatives in Good Hope.

Born to Mr. and Mrs. Lloyd Burnett on Monday, August 28. A daughter.

Mr. and Mrs. J. O'Gorman and family were Edmonton visitors last Saturday.

FIRST LOAD OF WHEAT

First Load of 1933 Wheat Taken to Elevator Grades High

The first of the 1933 wheat threshed in this district was brought to the Alberta Pool Elevator here by W. J. Williamson, Monday. It was Garnet variety and graded no. 2.

Cutting wheat is about nearing completion in this district and continuation of fine weather it should all be out by the end of the week. Threshing rigs are getting ready to start in soon.

ST. GEORGE'S CONGREGATIONAL PICNIC SUCCESSFUL

The annual Congregational Picnic of St. George's congregation was held at the Sturgeon River on Sunday evening last at 7 p.m., with a very good attendance. Supper, picnic style, was served at 6 p.m. and all gathered round the good things making almost a clean sweep.

Service was held in the shade of the trees, Dr Mason at the organ. The text was taken from Ps. 19, last verse, "The heavens are telling the glory of God, and the firmament showeth His handy work".

A few people arrived too late to join in, but the interest in such a service showed little falling off.

SUMMER SCHOOL GRADUATES BY MAIL

For some years the provincial department of education has conducted correspondence courses in the elementary grades of school for the convenience of those unable to attend a school. Some 2,500 or more, chiefly those in outlying parts of the province, have taken advantage of these. It is now the purpose of the department to extend these courses to include instruction in all four grades of high school work, with the addition of commercial and technical courses. A small fee of $5 per unit course will be charged to cover administrative costs.

To Revive Plan To Cut Municipalities

Municipal Districts Convention to Be Held in Edmonton in November

The annual convention of the Alberta Association of Municipal Districts will be held in Edmonton from November 22 to 24, inclusive, it was announced Tuesday by E. Micklethwait, of Spruce Grove, secretary-treasurer of the organization.

Some 300 delegates are expected to attend from all parts of the province. Among those to be invited to give addresses will be Premier Brownlee and Hon. R. G. Reid, minister of municipal affairs. Hon. W. L. Walsh, lieutenant-governor, will be invited to open the convention.

Reduction of municipal districts in the province will be one of the chief subjects for discussion. When this scheme, which was drafted by the provincial government, was explained at the last convention, the delegates turned it down.

Financial note: Money isn't everything, but it comes in handy when you are trying to live.

Monday being Labor Day all stores and business places in the Fort will be closed.

Partridge Hill

Mrs. James Whitson is away on a fortnight's visit to her brothers Simons Edwin and Amidee Gaul of Vermilion.

Mr. and Mrs. R. Warring were Lamont visitors last week.

Mr. Norman Lassby is on a holiday trip to his home in Victoria, B.C., and is reported here by the end of the week. School opens September 5th.

Mrs. C. H. Fluter[illegible] was a patient in the Lamont hospital last week.

Mr. Wilmot Allen and in company with his brother Dr. Alton of Lamont, made a flying trip to Craigmyle, Alberta and spent the week-end with their father, Mr. W. G. Allen of that town.

Bruce Whitson was an Edmonton visitor Monday, writing off an exam. preparatory to taking grade 11 this term.

Mrs. Edith Cobaldeston and two little sons Orville and Eldon have been welcome visitors in the district during the past week. Mrs. Cobaldeston returns to a school at Lafond, Alberta at the end of the week.

Rev. and Mrs. Sid Pike and daughter Beryl of Halkirk, Alberta, were the guests of Mr. and Mrs. Raymond Wallis last week. Mr. Pike took the Church service here on Sunday.

Ted Cobaldeston is spending a few days with Leonard Underwood of Edmonton.

Taken from the Files

19 Years Ago Today

September 2, 1914

Two new homes in the Fort are nearing completion namely: Percy Shepherd's and Clayton Ashton's.

Crops in the Fort district are nearly all cut and threshing will be under way next week.

While canvassing for a cover at the barracks, a one-ton conveyed and one of the prisoners had his leg broken.

Gen. D. Farris, son-in-law of W. Allen, and well known here, has gone to the front with Major Sanford, who is taking a company of the R.N.W.M. Police.

Dank cement opened on September 1st., and immediate local sportsmen were successful in securing good bags.

Some three hundred entries are in the hands of the Agricultural Society Secretary, for the fair here on Tuesday, September 5th.

Coming Events

The United Church Ladies Aid will meet at the home of Mrs. J. D. McLean on Thursday, Sept. 7th. at 2:30 p.m.

ANNOUNCEMENT

Dr W. F. Calhoun, Dentist will resume his practice in Fort Saskatchewan on Tuesday, September 5th., in the Williamson Block. Office hours 9 to 6 o'clock daily.

POLICE COURT ITEMS

Two harvesters, Peter Jackson and George Napoleon were, in the local police court, each fined $25.00 and costs for being drunk and disorderly in town last Monday.

A young domestic servant suffering from dementia was brought to town last Monday night from the Josephburg district by Constable Thomson of the R.C.M. Police and a canteen, and accompanied by Dr. Money. The girl was taken to the Provincial Mental Hospital the next day for treatment.

Tennis News

Mr. H. Oxley, the old master of tennis in Fort Saskatchewan convinced the tennis patrons Monday evening that he has not forgotten the fine points of the game. This was displayed in the fine set series of the finals for the Men's Singles Cup.

His opponent, Gordon Neale, served the racket to vault H. Oxley in the finals by defeating Mr. H. Holt in the semi-finals. Mr. Oxley secured his place by defeating T.W.E. Henry.

Friday evening was the opening match with play continuing till darkness, with four sets being played, two games divided and score standing at 4-6, 6-3, 4-6, 6-1, Oxley not used to Neale's style of playing encountered some difficulty in returns as Neale played a high lob game in which Oxley had little chance to use his fine volley skills. Oxley showed the spectators the value of placing the ball when he found Neale out of position many times and with no chance to reach ball would return. Gordon Neale is steady, careful and determined player and looked like a victor at many stages of the games and the issue was in doubt until the deciding set Monday evening.

The deciding game was of the same high brand, of tennis as the preceding game, but Mr. Oxley through his experience of practice, took the set at 6-1, earning the right to hold the cup for one year without challenge.

Congratulations Mr. Oxley.

MRS. HENRY WINS LADIES' SINGLES CUP

The Ladies' Singles Cup has a new home and Whitman this year. The was decided when Mrs. Henry defeated Miss M. O'Brien in three set series terminating with scores of 6-4, 4-6, 6-3, 6-4. Although Miss O'Brien lost, a very great deal of credit must be given to her, as the many tennis fans who witnessed the games will attest. Mrs. Henry serving wonderful balls worked it to its fullest advantage, serving very few double faults. However good her serve was Muriel, found them not invisible and broke through to take the new cup-holder's serve, and win game and sets. Muriel, playing a steady forehand cut stroke, often outplayed Mrs. Henry to win deciding points. Muriel's backhand not being so reliable as it could be, forced her to run unnecessary distances to take a backhand stroke with her forehand. This gave Mrs. Henry a decided advantage which she was quick to make use of; placing a deep drive to Muriel's forehand she would then retaliate with a well placed ball to her backhand, forcing her out of position.

In spite of a very hot evening, the brand of tennis played by both was offensive. Compared to the men's singles, which was offensive, defensive game, both ladies played an aggressive game expecting little and giving less, as the score indicates. A great deal of credit must be given to both players, and the loser should not feel any remorse at her loss as to be defeated as she did is no disgrace. I'm certain Mrs. Henry, if any, will agree to this.

Are congratulations in order, Mrs. Henry?

It has been decided to hold a ladies' doubles competition. All ladies contemplating on entering, kindly hand their entries in by noon Monday, September 4th.

Owing to a limited amount of space this week, some of the tennis news was left over until next week.

G. Neale defeated I. Hutton 6-4, 6-4.
H Holt defeated A. Simmons 6-3, 6-3.
H. Oxley defeated Tve Henry 6-4, 6-3.
G. Neale defeated H. Holt 6-4, 5-6, 6-4.
H. Oxley defeated G. Neale 4-6, 6-3, 6-4, 6-1, 6-3.
M. O'Brien defeated M. Oxley 6-2, 7-5.
Mrs. Henry defeated R. Truby 6-2, 6-4.
Mrs. Henry defeated M. O'Brien 6-4, 5-7, 6-3, 6-4, 6-4.
T. Henry & H. Oxley defeated G. Neale & H. Holt 12-10, 6-2.
A. Simmons & I. Hutton defeated T. Holt & E. Davis 10-6, 6-2.

Exports of farm products to the United States were more than doubled in July as compared with the corresponding month of last year, said a report of the dominion bureau of statistics.

"Are they fresh?" asked a woman buying fish from a costermonger. The owner looked at his long dead stock. "Fresh mum? Why, just look at 'em." And turning to his young helpmeet, "Liz still, can't you? Liz still!"

BEAVER LUMBER (NORTHERN) LUMBER

ALBERTA'S SUCCESS AT REGINA

A review of the winnings in the various seed grain classes at the world grain congress at Regina recently, shows Alberta's total prize to be $24,250 with an additional $1,700 won by members of the junior, intermediate and inter-college grain judging teams. The above prizes taken constituted more than one-third of the prize money offered in the classes concerned. In two classes of wheat Alberta took 80 per cent. of the money, and in two classes of oats won 33 per cent. of the money.

IN AGAIN

The novice had hooked a very small trout and had wound it in till it was reposing at the end of the rod. "What do I do now?" he asked his companion. "Climb up the rod and stab it."

An outbreak of mosquitoes of a species unknown in Canada resulted in the death of 80 cattle, 67 hogs, 2 horses, 1 mule, 10 chickens and 2 dogs in Florida.

Frost on the 20th of July damaged garden crops in the coast plains of British Columbia.

Harvest Days are here!

You will perhaps need for your work some of the lines we are showing.

Everything for your pickeling requirements in stock nothing but the best and at reasonable prices.
See us before purchasing your preserving fruits.

Jones, Graham & O'Brien's

You will forgive it

Canada As a Leader.

Judged in terms of years, Canada is a very young country, and this fact is brought home to any one who studies the histories of the countries of Europe and Asia. Canada, too, while a country great in area, is of sparse population and in this respect is more comparable to the other countries of Asia and Europe, or of the United States.

But during its brief history, Canada and the Canadian people have achieved some truly great things and pioneered in numerous fields which have resulted in conferring outstanding benefits upon all mankind.

Our thoughts are turned in this direction by the centenary of one very notable Canad an achievement. On August 5, 1928, Canadians celebrated the passing of one hundred years since the first vessel crossed the Atlantic Ocean. -ing ocean it, steaming the whole way. It was a Canadian vessel, the "Royal William," built at Quebec and launched on April 29, 1831, and with Canadian built machinery except the cranks and shaft, which made this epoch voyage, sailing from Pictou, Nova Scotia, on August 5, 1833, for London, England.

Other vessels had previously crossed the seas using steam to a certain extent, but no other vessel had ever made the voyage with "steam up" all the way. According to an account of this world-famous vessel appearing in the August number of the Canadian Geographical Journal, the "Royal William" actually established seven primary records,—two Canadian records, three foreign records, and two world records.

The "Royal William" was: (1) The first seagoing steamer ever built in Canada; (2) the first steamer that ever plied on international waters from Quebec to Halifax; (3) the first steamer that ever entered a U.S. harbor under the Union Jack, (4) the first steam transport in Portugal, (5) the first steam man-of-war in Spain; (6) the first vessel in the world that ever fired a shot in action under steam; (7) the first vessel that ever crossed any ocean steaming the whole way

In celebration of the centenary of this last mentioned achievement the Canadian Government has issued a special commemorative postage stamp which, unquestionably, will be greatly prized by stamp collectors throughout the world, and which will serve to bring to people in all lands knowledge of this great Canadian achievement of one hundred years ago.

This centenary of the "Royal William" also serves to remind one of other outstanding achievements standing to the credit of Canada, young in years as this Dominion is in relation to other nations. Canadians may well feel proud that it was one of their countrymen, Andrew Graham Bell, who invented the telephone, thus giving to the world one of its most useful and widely used means of communication.

It was a Canadian who developed Marconi wheat, the effect of which has been to greatly extend the area of the world's surface in which wheat can be successfully grown, and it has been Canadians who have continued that work and developed still earlier ripening varieties such as Garnet and Renown.

Great in area but small in population and wealth, Canada has built up in the Canadian Pacific Railway the greatest transportation system in the world. There are other great railways, other great steamship companies, other great telegraph, express and hotel companies, but no other company in the world combines all these services to the same extent and with the same world-wide ramifications as does the C.P.R. The inauguration of the Canadian Pacific was a tremendous undertaking for a mere handful of people in an enormous but undeveloped country, and its success is a tribute to Canadian initiative, energy and determination.

A Canadian gave insulin to the world, that wonderful agency of relief to the diabetic sufferers of the world, and which has prolonged the life of thousands of people afflicted with such disease.

Nor is it a small matter that through the efforts of a few millions of people they have made their country, Canada, the fifth trading nation in a world of trading nations, surpassed only by older, much more populous and wealthier nations.

There are many other facts in which Canada, during its brief history, has led the world, but neither time nor space will permit of their being thus recited; suffice it to say that Canadians have reason to publish the truth. Canadians have reason to entertain great pride in their country and in its achievements. May more, that there is every reason why the people of Canada should have unbounded confidence in the future of their country. All nations throughout the world's history have suffered temporary reverses and setbacks, all have passed through periods of depression and hardship. But ever the hearts of the people have been true, where they have not been given over to indulgence and sloth, there they have developed their virility and strength, where they have been courageous and determined, they have always risen above their troubles and reverses, and gone forward to greater achievements, greater glory, greater prosperity and happiness.

All Canada's past history provides a splendid encouragement to its Canadian people of today. Opportunity has not ceased to knock at the door of Canada. The future holds more of promise than anything yet realized of our people enjoy the occasion when "Opportunity" does knock.

Church thieves are busy in Scotland.

Norwegian fishermen caught $5,000,000 codfish this year.

Glasgow, Scotland, will establish a radio patrol police force.

All foreign workers have been prohibited entry into Spain.

Any Looseness of the Bowels is Always Dangerous

When the bowels become loose and diarrhoea threatens, any common complaint and other bowel troubles set in, instant attention should be given and the discharges checked before they become serious.

To check them unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 82 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

World's First Black Rose

No Sign Of Shading Appears In Fragrant Petals

Flowering under the watchful eyes of numerous park attendants, the world's first black rose, pride of the great Leverhulme, is expected in dressing throngs of visitors to this small Hars town.

The rose flower, the creation of which was recently announced, is a cross between two extremely dark varieties of roses. They are known as "Prospero" and "Lord Chatterough." It is of a velvety deep black-red hue, so dark—especially in dry, hot weather—that it may be described as black. That fragrant petals show no shading whatever.

Some 600,000 roses in 9,000 varieties are on display. Most of the credit for this achievement belongs to 60-year-old Peter Grant, head gardener of the gardens, who is officiously known as the "rosarian" (father of the rose).

SHE LOST 32 lbs.

Now Frocks No Longer Worried Her

"How did she lose that 32 lbs. of fat?" is what you will be asking. Let her tell you herself:—

"About 18 months ago I weighed 176 lbs., which I can assure you was entirely too much for me. Everything seemed a worry to me, especially new clothes. Nothing fitted. It me quite fortably and washing was becoming more and more a friend to try Kruschen Salts and I am very glad I did. During the first two months I lost 20 lbs of fat. Now, for the last 6 months my weight has been 144 lbs. I feel much better in health, and I have all my weight tickets to ask-tain my weight.—(Mrs.) M. E. P."

Kruschen contains those six mineral salts, proportionately balanced, found in the kidneys of those famous Kurt spas. Pass used by generations of fat people to reduce weight.

Kruschen helps the blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel years younger—look much better.

Poison Antidote

Discoverer Effective Medium To Offset Effects Of Carbon Monoxide Poisoning

Discovery of a sulphur-sodium antidote more effective against carbon monoxide poisoning than anything previously known is claimed in a report presented in New York by John W. Drake of the University of Wyoming.

The antidote likewise surpasses anything else in effectiveness against cyanide poisoning, he says. He credits the cyanide discovery to H. Fernbach, an English scientist.

The antidote is sodium tetrathionate, a well known synthetic chemical, the constituents are sulphur and sodium. Drake used it by intravenous injection on poisoned rabbits.

Has Monkey Fingers

Russia Planned Big Year In Production Of Wool

With the beginning of the second Five-Year Plan, Russia has outlined a programme of massive production for the year 1933. Great big improvements are planned in agriculture, electricity, coal, oil, iron and other metals, machinery, chemicals and in general manufacturing. Thus, whereas in 1932 about 64,000,000 tons of coal were produced, 94,000,000 are budgeted for this year, and the output of 6,000,000 tons of steel in 1932 is to be increased to nearly 9,000,000 tons. It is also planned to raise the number of cattle from less than 5,000,000 in 1932 to 9,000,000, and that of pigs from 6,000,000 to 8,000,000.

Land For Ships

Considerable bracing has been given on Australia to the proposal recently made by Dr. Duhig, the Roman Catholic Archbishop of Brisbane, that the mandated territory of New Guinea be handed back to Germany or failing that that Germany contribute adequate ships for Australia's defence. Manifestations for the former German possessions in the Pacific were divided among Australia, Japan and New Zealand.

Bank notes are being gold in used in Catalonia, Australia.

Experiments In Taxation

Ground Of English History Shows Very Few Things Escaped

There have been many strange experiments in taxation in English history Henry the Eighth taxed beards, and graduated the tax according to the position of the wearer The Bishop of Canterbury was constrained to pay the sum of three shillings and fourpence for the privilege of wearing whiskers Elizabeth likewise put a similar tax on every board of over a fortnight's growth Elizabeth was also bent on making the country of a religious turn of mind, and all who stayed away from church on Sunday rendered themselves liable to a fine in 1695 it was decided that births should be taxed. The birth of a child to a Duke cost the proud father thirty pounds in taxes, whilst the coming of a commoner child into the world was made the occasion of a tax of two shillings. Bachelors and widowers were compelled to pay for the privilege of single blessedness. It was William Pitt who instituted the window-tax. In the reign of George the First it was necessary to have a license in order to sell hats. Then there was a tax on armorial bearings, a tax on watches and clocks. In the reign of George the Third a duty of two shillings and sixpence was imposed on bricks. At a later period in the same reign bricks were divided, for the purpose of taxation, into common and dressed bricks, and the duty on each kind of brick was regulated according to its size

Paid For Grumbling

Man In England Earns Good Living Finding Fault

A London man earns a living by going round the city finding fault with everything One day he went into a big tea shop and found that the shops of the teacups they used was cheap It was impossible to drink out of them without spoiling the tan. So he wrote to the company to that effect and the cups were changed. He wrote to the London Underground and told them that passengers could alight at a certain station without paying for a ticket. Upon another occasion he saw that a big sign in the West End of the city was not working properly. He told the company owning it that anyone standing on the other side of the street could not read it, and it was changed His job arose from a life-long habit. If ever he saw anything was wrong he used to write to the owner about it. He merely used to do it as a matter of principle, but when he was out of a job he thought of that if his criticisms were of any use he should be paid for them. Now he has made a handsome income from being a grumbler!

Good Crop Of Hay

Thousand Tons Cut At The Pas Being Two Weeks

More than 1,000 tons of hay were cut for local use during two weeks in the Carrot River Triangle, all within a 15-mile radius of The Pas, according to estimates made there.

Several outfits have been operating in the area. Hay is good this year, and the timber did not affect it. It is better quality than for many years past, haymen say.

A. St. Onford cut 400 tons, Trumpet Limited 300, and others including Frechette, Allard, as well as natives of the Carrot River Valley, farther back.

The Indians of The Pas reserve have also garnered enough for winter fodder.

LUNCHEON TOMATOES

Two cups cooked tomatoes; ¼ cup sweetened condensed milk; 2 cups dry bread, broken in pieces; 1 teaspoon salt; ¼ teaspoon pepper Grated American Cheese. Heat tomatoes to boiling point. Add sweetened condensed milk and stir until well blended. Remove from fire, add bread and seasonings. Cover tightly two minutes. Pour into serving dish, sprinkle generously with grated cheese. Serve at once. Serves six.

Radium contains a tremendous store of energy. Although it gradually breaks up, only half of a given quantity will disappear in 1,600 years.

Cyclists of New Zealand are to be compelled to observe traffic rules.

One Good Roll

Deserves Another

This is what men say when they make the acquaintance of Ogden's fine cut cigarette tobacco.

It rolls more easily—that is the first thing that you discover — then light up, and learn the rest of the good news. Smooth, more fragrant, mellower — all any smoker could ask in a fine cigarette.

That's why so many men have tried it—liked it—stuck to it. Use Chesterfield cigarette paper with it and you will get a still better smoke.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

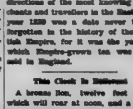
Tea Is Old Beverage

Beverage Used Long Before Beginning Of Christian Era

Tea was known long before the beginning of the Christian era, and though by the thirteenth century it was a universal drink in China it was not until nearly four hundred years later that Europe began to hear of tea through the Portuguese and the Dutch. The first Englishman to mention tea was a Mr. Wickham in 1615. He wrote from Japan to a friend asking for three silver porringers from which to drink tea. Tea was first sold publicly in England in 1657. It fetched from 15s. to 50s. a lb. in the land. It was also sold in liquid form, such as the vendor sold, according to the directions of the most knowing merchants and travellers in the East. The year 1839 was a date never to be forgotten in the history of the British Empire, for it was the year in which Empire-grown tea was first sold in England.

The Clock In Battersea

A brown Box, twelve feet high, which will roar at noon, and a cock, six feet high, which will crow at sunrise and sunset, are features of a new clock erected in Meadow, Study.



First Crossing Of Atlantic By A Vessel Using Steam Was Made A Hundred Years Ago

This year marks the centenary of the first crossing of the Atlantic Ocean by a vessel using steam all the way. The historic voyage was made by a Canadian-built wooden paddle-steamer, the "Royal William." To commemorate the notable event the Canadian Post Office Department is issuing a special postage stamp.

The "Royal William," built at Quebec, was launched in April, 1831, and towed to Montreal to be fitted with engines developing 200 horse-power. Her coal when ready for sea was 176.000. Her dimensions were: length over all 176 feet; depth of hold 18 feet; breadth over paddle-box, 64 feet. She was originally intended to ply between Montreal and Quebec and Nova Scotia, and the enterprise of building her was carried out by a company of Canadian merchants and others, assisted by a grant of £15,000 from the Government of Lower Canada. Among the subscribers appear the names of three Canard brothers, one of whom later founded the prosperous Canard Line.

After this moderately successful voyages in 1831 to Halifax and intermediate ports she laid up for the winter. In 1832, owing to a cholera epidemic, she made only one voyage, and her owners became bankrupt.

In the spring of 1833 a new company was formed, which purchased the vessel and, for a time, used her for towing and local excursions. Then on June, 1833, she sailed on a trip to Pictou, where she was refitted and fully received as being the first steamship flying the Union Jack to enter a United States port.

On her return to Quebec her owners decided to send her to England for sale. It was on this voyage that she made history, Captain Graves and the world the feasibility of navigating the ocean by means of steam-propelled vessels. Graves obtained the necessary orders that "they might as well talk of making a voyage from Quebec to the moon."

Early in August, 1833, she left Quebec for Pictou, in the Northumberland Strait, where she remained a few days coaling, during repairing engines, and awaiting passengers. Eventually, on August 17th, she steamed out of Pictou Harbour for England. Her passengers numbered 94, she was a vessel of 363 tons burden for London, that meaning the goods carried were of considerable value. Her master was Captain Campbell, and her engineer, a gentleman of Philadelphia, named Dunbar. Her log-book, kept by the chief officer, Mr. Wickham, is still preserved.

In 1834 the ship was bought by the Spanish government for conversion into a "war-steamer," and renamed the "Isabel Segunda." Later she returned to the Spanish coast, and on May 6, 1836, in the Bay of Biscay, was captured after the declaration of being the first steamer of war to fire a hostile shot. In 1840 she was sent to Bordeaux for repairs but was condemned as unfit. Her engines were transferred to a new ship of the same name, which ultimately made off the Algerian coast during a violent storm in 1848.

Mind so, with her hull resting in a harbour, and her engines lying at the bottom of the Mediterranean Sea, the "Royal William" ended her distinguished and varied career.

A memorial tablet in the Canadian House of Commons commemorates the first trans-Atlantic voyage by the "Royal William."

France is laying out a new type of vast pocket warship.

Lives High Above World

Home Of Forest Reserve Guardian 3,130 Feet Above Sea Level

Perched on a narrow patch of crumbled rock, 3,130 feet above sea level, where he lives all summer as one of the provincial government's New River forest reserve guardians, Arthur Shenis told a reporter that it'd be all right if I could keep the place warm and the government would give me enough paint to cover the cabin."

There were the only complaints about a job which keeps him high above the world, sometimes for more than a month without seeing another human being. His domain is only 50 feet wide by 80 feet long.

The lumber for the shack occupied by Shenis, who likes to call himself the "Old Man of the Mountains," was hauled up the mountain by hand at considerable risk and expense.

SLIMNESS AND ELEGANCE LINGER LONG IN THE LOVELY BATTING DRESS

Here's a charming model for the summer figure. The partial belt treatment creates a lengthened line.

The skirt while slender, indicates no easy fit for the hemline.

It is simple, smart and becoming in every way. Choose printed silk, light weight or a silk-like yoke of white crepe. It's a dress that will carry you through the whole season.

It will cost you but a small sum to make it, and will take very little of your time.

Pink, gray, beige or black with white is delightfully lovely.

Style No. 643 is designed in sizes 32, 34, 36, 38, 40, 42, 44 and 46 inches. She 34 requires 5¼ yards of 39-inch material with ¼ yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Canada's Fruit Crop

Apples Will Be Plentiful But Other Fruits Scarcer

The Dominion Department of Agriculture estimates the 1933 crops of pears, peaches, grapes and plums will be lower than last year, but that apples will be more plentiful. In a survey published recently, the department placed an estimate of 4,650,000 barrels on the Canadian apple crop, compared with 3,977,000 barrels last year.

Canada's pear crop this year was estimated at 484,000 bushels, compared with 689,000 bushels last year. The peach crop was placed at 813,000 bushels, a drop of 21 per cent. from 1932. The plum crop was estimated at 23,000 bushels, only 79 per cent of last year's total Due to failure in Ontario, the commercial grape crop was estimated at 41,548,000 pounds, compared with 54,150,000 pounds last year.

Trade Within Empire

Canada's Trade Shows Increasing Exports To Empire Countries

All British Empire countries, but the British West Indies imported more goods from Canada during the first four months of the current fiscal year than for the corresponding period a year ago, according to figures issued by the Dominion Bureau of Statistics.

Australia's imports from Canada rose from $2,098,363 to $3,183,694 or 53.2 per cent., while those of the United Kingdom increased 34.8 per cent., from $46,967,511 to $63,322,386.

Imports of Canadian goods into British India rose from $2,709,209 to $3,663,146 and to South Africa 16.8 per cent. to $1,536,182. New Zealand's imports were up by 9.3 per cent. to $1,095,533 and those of Newfoundland 1.1 per cent. to $1,823,954.

Russians Content Own Dogs

Must Be Killed For Sales To China

In a short while there will be no dogs in Russia. A new Soviet decree orders all owners of dogs to deliver their animals immediately to the dog pounds The animals will be killed and their skins sent to Government fur factories to be converted into clothing for the Soviet Army. It is expected that 3,000,000 skins will be obtained in the manner, sufficient for the army's requirements.

Man But Not Work

Following complaints of exotic Americans that supercilious natives in Tokyo were refusing to serve them, the big stores in Tokyo were ordered to close three days ever month Now the smaller merchants report that on those days customers stay at home and the sales of stores remaining open have decreased.

Wheat Situation Is Discussed At Round Table Conference Of Pacific Relations Institute

Outlook To The Last

Banking Head Believes Price Reduction Unwarranted

Drought Continued

"Midnight," without a cloud in it, stamped across the inside wall of the canvas tent, and the voice of the speaker continued: "Midnight," without a cloud in it, stamped across the inside wall of the canvas tent, and the voice of the speaker continued.

Midnight," perhaps the greatest banking name ever known to the rodeo world, plunged out of the Cheyenne arena chute and, reaching for the sky with his front feet, bent down and hind feet poised ten feet above the ground, sent Turk Greenough of Red Lodge, Montana, 1932 Cheyenne round-up champion rider flying. Greenough stuck to "Midnight's" back much less than one and a half seconds The performance climaxed the big show and the Canadian horse was given a great hand by the crowd in the grandstand He was unridden to the last.

Mighty "Midnight" was once a docile, sturdy cow pony of the Alberta foothills. One day a tumbleweed blew under his belly and sent him on his first bucking spree and on to fame For a decade he has furnished thrills to rodeo crowds from Calgary to Tucson and now at seventeen years of age he will be taken north for a year from the arena by his owners, Verne Elliott and Eddie McCarthy Both are retiring him to their ranch in the foothills.

The celebrated bucking horse nearly outstrips the renowned cutter among the cow ponies. He is more powerful, bigger, faster He has the weight of a truck horse and the speed of a mustang. He goes when released from the chute hind legs otherwise in kind and docile. "Born to buck—that animal," said an old-timer recently. And that about sums it up.

The Friendly Bear

Pat Campbell made the 550-mile trip from The Pas to Winnipeg with his dog outfit on the way to Chicago Fair and on reaching the border found that he would have to put up $300 and $2 for each dog entering the land of the free. Once again, says Stanford Reckford, Manitoba land, is the same friendly international border Hotel which orders meals at banquets.

Cougars Menace Ranchers

Residents Of West Coast Of Vancouver Island Lose Livestock

Residents of Port Alice, on the west coast of Vancouver Island visit the streets armed with shotguns and rifles in pursuit cougars and to protect property against marauding cougars that descend almost daily on the town.

Among exterminated the deer and fur-bearing animals in the district between Port Alice and Cape Scott, the cougars invade the yards and corrals of settlers and steal poultry, pigs and heifers, practically all the dogs have fallen prey to them

This information was brought by Rev William Grazer of Port Alice. "Unless drastic action is taken soon many of the ranchers will be forced to abandon their ranches." Mr Graver said.

Famous "Bull-Dog Ants"

Professor Finds Primitive Australian Insects Are Blessing To Farmers

The only formidable "animals" in the Australian bush are poisonous snakes and the famous "bull dog" ants, according to Professor Malcolm Wheeler, professor of entomology at Harvard University.

The "generation" of primitive ants of Australia sometimes reach more than an inch in length, are savage, by alert, wasp-like, large-eyed, honeyed and fiercely stinging creatures. The larger species live in carved nests which may be from 1 to 3 feet in diameter and the population of a colony is from 150 to 200 individuals, said Dr. Wheeler.

Carrier For Parents

Thomas Chesters left upon them by others a carrier law which provides that all children under the age of sixteen shall be in their homes by 9 p.m. The rest arrangement hold be for one of the parents to be home to receive them for explanations. Note that it is mainly guidance of parents who have greatest light, states the Stratford Expositor.

EXPLORER'S WIFE PREFERS HOME

Expeditions to the north and south poles are thrilling, but Lady Hubert Wilkins, wife of the famous Australian explorer, prefers the less adventurous joys of domestic life. She is now in New York while her husband is with the Ellsworth Antarctic Expedition. Lady Wilkins plans to accompany her husband on one more polar trip and then settle down to real home life.

WORLD HAPPENINGS BRIEFLY TOLD

Russia had a favorable balance of trade for the first six months of 1923 — for the first time since 1909.

Gold held by the Minister of Finance on July 31 was $71,980,300 or $68,382 in excess of statutory requirements. Dominion notes in circulation totalled $183,113,584.

Twenty million feet of British Columbia lumber have left for world markets. Three-quarters of it is destined for China on the Dominion-subsidized service.

High import duties and other emergency measures will be continued as part of the Italian government's program to maintain a sound national wheat market, Premier Mussolini has announced.

Raymond Poincare, France's war president, was swamped by the town which he received Republican and neighbors in a quiet celebration of his 63rd birthday at his summer estate at Sampigny, France.

Hanged in his cottage by a surprise landslide on August 21, trees were uprooted and flower gardens ruined at Quebec, the Canadian tourist playground for the day was 44 and the minimum 51.

Thomas William J. Webber, 69, General of Ireland died during the wave of Mad Grey as governor-general, and for many years on the staff of the Dominion militia, died recently at his home in Ottawa.

New cosmic ray studies announced by Dr. Robert A. Millikan, of New York, claim these rays constitute a power-house of energy from 30 to 100 times greater than all the rest of the visible energy in the universe.

One of the men who discovered the route to Klondyke gold fields via Great Slave Lake and Fisher River, Samuel Edwards, 70, is dead at his home in Snowhill, England, according to word reaching Calgary. He was a pioneer resident of Calgary, visiting there in 1883 to become a keen business and polo player.

Payment Of First Cable

Baltimore Sun: The Duke of Marlborough is 1,800 miles from Cape Race nearly a fortnight dragged up from the ocean floor a fragment of the first submarine telegraph cable sent in successful waters. It was a piece of the line laid in 1858 by Frederic Samuel Morse and Cyrus W. Field between Valley Bay, Cape Breton, and Cape Ray. The cable was manufactured in England, the last stranded conductor over made. Despite its long immersion, the insulation remains in some of pieces perfect. Until 1866 the common carrier of telegraphic intercourse was Cape Race. But that point westbound ocean liners dropped overboard communications concerning European happenings and dispatches and telegrams from passengers. A boat was always stationed there to pick up mailbags. Newspaper men condensed the dispatches and put them on the wire, bringing news of world events to New York ahead of the steamships.

Speeding Up Hail

Fast Plane Is Undergoing Final Tests In England

Speedy mail planes which can fly at 150 miles an hour, is undergoing final tests in England. It is fitted with special apparatus for dropping and picking up mails while in flight, and will fly 450 miles, weighing hard-to-run, can be carried. These could be flown from London to Capetown in 60 hours and from London to every country in Europe, with the exception of Turkey and Greece, in less than seven hours.

Salt Cure Wool Blankets

The low price which Canadian farmers' wives receive for their wool has introduced the knotted blanket industry into farm homes. The Manitoba Agricultural Guild has shown them how to knot blankets from their own wool pulled out into lumps, thick pieces.

Small cake owners in Bolivia find it difficult to get workers.

W. N. U. 2000

Aluminum Ore Found

Discovery in Kimistino District of a great body of aluminum ore-bearing clay has been reported to the government by Dr David Flood, geologist, who has spent six years investigating in the north country. He states that the discovery is one of the most important to have been made in the history of the province.

Thirty development of the area, which lies about 50 miles northeast of Kimistino is forecast by Dr. Flood, who has made a full report to the government on his find.

The discovery also means, according to the geologist, the earlier development of the hydro-electric project east of Prince Albert, the proposed site of which is just 13 miles from the ore-bearing clay.

This is the first discovery of its kind in Canada, Mr Flood said. There is a small deposit of aluminum in Arkansas, but the bulk of the world supply comes from British Guiana.

Dr. Flood, who is a native of Sweden, also touched upon the other possibilities of Northern Manitoba, Saskatchewan and Alaska that North Saskatchewan would one day produce gold, and other minerals found them all, he declared, in his wanderings as chief geologist for a big syndicate.

Recipes For This Week

(By Betty Barclay)

BERMUDA ECHO SALAD

1 package lime-flavored gelatin.
1 pint warm water.
½ cup canned crushed pineapple, drained.
3 tablespoons pimentos, cut in strips.

Dissolve gelatin in warm water. Pour ½-inch layer in loaf pan. Chill until firm. Chill remaining gelatin mixture until cold and syrupy. Place in bowl of cracked ice or ice water and whip until creamy and fluffy, but still soft and thick like whipped cream. Fold in pineapple and pimentos. Pour over firm first layer. Chill until firm. Unmold on crisp lettuce or chicory. Serve with mayonnaise. Serves 8.

CHEESE DOUGHNUTS

Mix in a saucepan two tablespoons of flour with one tablespoon melted butter. Pour in gradually one cup of boiling water. Stir over the fire until the mixture forms a smooth paste. Add one cup of corn, one teaspoon sugar, one teaspoon salt, pepper to taste, one teaspoon each of chopped parsley and Cape Ray. The cakes were manufactured in England, the last stranded conductor over made. Despite its long immersion, the insulation remains in some of pieces perfect. Until 1866 the common carrier of telegraphic intercourse was Cape Race. But that point westbound ocean liners dropped overboard communications concerning European happenings and dispatches and telegrams from passengers. A boat was always stationed there to pick up mailbags. Newspaper men condensed the dispatches and put them on the wire, bringing news of world events to New York ahead of the steamships.

AN EXCEEDINGLY WEARABLE DRESS

All you have to decide is the material.

Whether you want a dress for street, afternoon, or office wear, this model is suitable.

For town and office wear, it looks well in jersey, tricotine, satin, crepe or tweed and trim in light navy blue crepe silk. And it takes but 4½ yards (44 inch material) for the 36 inch bust.

Print in crepe silk in blue and white or in red and white are stunning.

For afternoon, grey or beige crepe silk is especially nice.

Note the chic sleeve detail to give the fashionable wider shoulder line. And the bias seaming that makes the sleeves "fitting."

It's a very simple model to make. There are but few major parts to the pattern.

Style No. 749 is designed for sizes 34, 36, 38, 40 years, 36, 38, 40 and 42 inches bust.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Lays Foundation Of Fortune

Indiana Man Finds Walnut Tree An Legacy For Daughter

By planting, in his spare time, 14,000 walnut trees on 20 acres of cut-over land, Thomas Jefferson Hale, Brighton, Indiana, has laid the foundation of a fortune for his young daughter.

In 40 years, according to the national forestry department, 6,000 of the trees should have survived and will be worth $60 per thousand.

David appeared—ruddy (this author by had red cheeks or that's how they was nature), and withal of a beautiful countenance and bearing. A lesser at once that he was the chosen one.

Calf Who Used Gunboat

Two of a kind of calves being transported by truck across Montreal's harbor front recently escaped from their truck. One struck off through the city and was soon caught, but the other headed for the river and, swimming downstream had gone nearly a mile before being rescued and brought to shore in a fast motorboat.

SUNDAY SCHOOL LESSON

SEPTEMBER 9

DAVID

Golden Text "Man looketh on the outward appearance, but Jehovah looketh on the heart" 1 Samuel 16:7

Lesson 1 Samuel 16:1-13 Psalm 78:70-72

Devotional Reading Psalm 101:1-8

Explanations and Comments

Samuel's Mission To Bethlehem, verses 1-3 Saul's failure recalled Samuel. He realized that he must take steps to action about Saul's movement; that this was God's will. He must go to Bethlehem with a flask (horn filled with oil) to anoint one of the sons of Jesse as the Lord's chosen king. Yet he hesitated to go. Would not Saul kill him if the fact became known." Then a way out of the difficulty came to his mind—it a matter of prudence he would give as the object of his visit the holding of sacrifice, and would keep silent about the more important reason for his coming. He would give one reason for his visit, which was a true one and would say nothing about another reason, which he was under no obligation to divulge.

"It was not concealment the object of which was to mislead any one, or to induce anyone to do what he would not have done had the whole truth been known to him. When concealment is practiced in order to take an unfair advantage, or say one, or to secure an unworthy advantage over him, it is detestable. But in connection with you are under no obligation to reveal, when some important end is to be gained, to quite a different thing".—W. G. Blaikie.

"A man always is to be himself the judge of how much of his mind he will show of it to other men. There are important inquiries made; your rule is, to leave the inquirer informed on that matter not at all."—R. L. Stevenson but prevents by as dark as he was." Carlyle

Samuel's Reception In Bethlehem, verses 4, 5. When Samuel reached Bethlehem the elders of the city came to meet him trembling, and said, "Comest thou peaceably." It had been Samuel's duty as judge to go from town to town to render judgment and punish offenders (1 Sam 7:16); and the elders feared he had come to their town for that purpose. Samuel reassured them, saying, "I am come to sacrifice unto Jehovah: sanctify yourself, and come with me to the sacrifice." Before participating in any concert set the Israelite "sanctified" by ablutions and by refraining from whatever would make him ceremonially unclean. Jesse himself superintended the purification of Jesse and his sons, and called them to the sacrifice Jesse was now an old man. 1 Sam. 17:12.

The Selection Of The King, verses 6-13 When they came to the sacrificial feast, Samuel looked upon them and said to himself, "Surely Jehovah's anointed is before him." But Jehovah spoke to Samuel, we are told The choice was an inward one The prophet is described as looking on in the depths of his consecrate a discipline with God, as the sons of Jesse one after another, passed before him. Eliab was another Saul, tall and handsome, and the voice within Samuel's soul warned him. "Look not on his countenance, or on the height of his stature," it said: because I have rejected him: for Jehovah seeth not as man seeth; for man looketh on the outward appearance, but Jehovah looketh on the heart."

"An apple may look fair to the eye quite red and ripe, and yet it may be full of rottenness within; so, on the other hand, the fruit may be brown, and dashed with spots, and harrowed into by wasps in search of its sweetness, but if we cut it open, and find it sweet in its substance and sound to the core, it is good. It is the same with man in relation to his fruit."—Man judges by seeing; Jehovah by being. What then art before Him, and then are all studying saints!

Abinadab, Shammah and Four more of Jesse's sons passed before Samuel, and he rejected them all. "Are these all thy children?" he asked Jesse. On learning that the youngest was away keeping the sheep, Samuel ordered him to be sent for. Declaring that he would not sit down to the meal which followed the sacrifice until he arrived. And Jesse sent for David.

David appeared—ruddy (this author by had red cheeks or that's how they was nature), and withal of a beautiful countenance and bearing. A lesser at once that he was the chosen one.

"In the hour of Israel's anointing it seemed upon him that his was a royal destiny. And he was not apart for an unusual destiny; what thought is greater than this to a soul that is built by"—C. C. Hall.

Canada A Healthy Nation

Bulletin Of Life Insurance Company Gives Interesting Facts

The lowest mortality on record was registered for the first six months of 1923 among nearly 1,250,000 Canadian industrial policyholders of the Metropolitan Life Insurance Company and the prospect of a new minimum death rate being established in Canada in 1923 is considered excellent.

The death rate for all causes combined among this group of Canadians at 4.6 per cent lower than for the first half of last year Canadians are making a better health record this year than are United States industrial policyholders, for the death rate of the latter is running well over three per cent higher than for the first six months of 1922.

Reductions among Canadian policyholders from previous low points for almost all major diseases according to the insurance company's statistical bulletin are as follows diphtheria, 37 per cent tuberculosis 1.6 per cent; diarrheal conditions, 17 per cent typhoid fever 57 per cent and measles 12 per cent

Pointing out a number of decided contrasts in the course of the death rates from important diseases this year in Canada and the United States, the bulletin says:

"The mortality from diabetes, which had been steadily rising in both countries for years, has recorded a considerable drop in Canada; in the United States the marked upward trend is still importing.

The heart disease death rate is unchanged this year in Canada, whereas in the United States cardiac conditions are responsible for many more deaths than in the like part of 1922

"The cancer mortality rate has risen only negligibly in Canada, but it has come up appreciably in the United States Deaths from pneumonia, on the other hand, have increased a little in Canada as compared with a pronounced drop in the United States to a new low point."

An Underground Farm

Mushrooms To Be Grown In Famous English Caves

England may soon have its first agricultural industry to be conducted entirely below ground. If experiments now under way are successful, the famous Chislehurst Caves, near London, will be converted into the greatest mushroom growing centre in the country. The British Mushroom Company has been growing on the depths of his mushroom a distance of 300 feet, and in the case of Jesse after another, passed before him. Eliab was another Saul, tall and handsome, and the voice within Samuel's soul warned him. "Look not on his countenance, or on the height of his stature," it said: because I have rejected him: for Jehovah seeth not as man seeth; for man looketh on the outward appearance, but Jehovah looketh on the heart."

"An apple may look fair to the eye quite red and ripe, and yet it may be full of rottenness within; so, on the other hand, the fruit may be brown, and dashed with spots, and harrowed into by wasps in search of its sweetness, but if we cut it open, and find it sweet in its substance and sound to the core, it is good. It is the same with man in relation to his fruit."—Man judges by seeing; Jehovah by being. What then art before Him, and then are all studying saints!

RECOVERY SIGNS ARE NOTED IN BANK REVIEW

Toronto, Oct — Signs of recovery in Canada are stressed in the current monthly reviews of both the Bank of Nova Scotia and the Bank of Montreal made public here.

"After a period of almost four years in which the palmiest chronicler of events could find little record of conditions of ever-increasing gloom," stated the Bank of Nova Scotia, "it is with relief that he is at length able to present the reader with the fact of a definite increase in business activity.

Similarly, the Bank of Montreal letter states "The past month has seen, on the whole improvement of the favorable trend sometime since the spring, general business is now for the first time the year definitely above the level of the corresponding period of 1922 and this notwithstanding the decided check to the speculative upswing administered during July."

The Bank of Nova Scotia review considers the most significant feature in the general rise in commodity prices, and the better equilibrium obtained as between the various groups of prices.

"From a strictly Canadian viewpoint," the letter adds, "the better balance as between the prices of farm products and manufactured goods is especially important. It means, roughly, that what the farmer sells has a greater value in terms of what he buys than was the case say six months ago. This relative improvement should do much to mitigate the unfavorable effects of short grain crops in western Canada."

Ocean Route Possibility

Colonel Lindbergh Has Faith In North Atlantic Air Route

Reykjavik, Iceland. — Colonel Charles A. Lindbergh believes it will be technically possible to establish a north Atlantic air route to Europe within two years.

With good planes and experienced pilots, he said, flights will be possible under any weather conditions, but there is the question whether the route would be feasible financially at present.

Copenhagen, Denmark. — Colonel Charles A. Lindbergh and his wife left Oslo for Stockholm this afternoon. It was reported, but not confirmed, that they were bound for the Faroe Islands.

Reduced Fare For Students

Railways Cut Rate For Those Attending Canadian Universities

Montreal, Quebec.—C. P. Riddell, chairman of the Canadian Passenger Association, announced that the Canadian railways propose establishing reduced rates for students, teachers and students attending universities located in Canada. Sale dates of tickets will be from Sept. 1 to Oct. 15 inclusive each year, and the fare will be one and one-third of the regular one way fare for the round trip.

The return limit will permit the purchaser to return home at the close of the term between May 1 and June 30 of the year following date of issue of ticket.

Preventing Silver Waste

Loss in U.S. Runs To Thousands Of Dollars Annually

Science is endeavoring to find some way to prevent the waste of one hundred tons of silver that are annually dissolved away in developing photographs in the United States. The value of the metal at current prices is nearly $600,000. Experiments by research workers indicate that the process of electrolysis promises more efficient than the other methods. Electrolytic methods employed at one large film studio saved $17,000 in six months Twelve hundred troy ounces of silver could be regained from every million feet of film developed.

A Pioneer Complies

Mrs. Alva Johnson of Oklahoma City has asked for a divorce from her husband. The court asked her on what grounds she desired to lay the case. "Why, your honor," she replied, "I want to get married to another man, and I've got to get a divorce first." Divorce granted.

Sheep Wanted

Thirty-three thousand, three hundred and seven sheep, 22,571 cattle, 162,264 hogs, and 32 calves were shipped from western to eastern Canada during the first twenty-four weeks of this year.

Ship Returns For Repairs

Ship Vessel Belonged Through Leak In Hold

Churchill, Man The leak in the hull of the S.S. Sorosis, Dreyfus line, which necessitated the return of the ship to port, was caused by galvanic action according to W H Harting of Thomas Harting and Sons, shipping agents in Montreal.

The Sorosis departed from Church ill, bound for Europe with 265,000 bushels of grain When the vessel was 180 miles northeast of Churchill, water started to pour into the engine room

A survey of the ship disclosed a hole about an inch and a half in diameter in the bottom of the steel hull under the engine room. Repairs will be made here. It is not known how long the ship will be in port

"It was purely a matter of corrosion, the action of water and on the metal," said Mr Harting, agent for the owners. "It might have happened to any vessel anywhere. There was no law in the region where the leak sprung.

Final Human Problem

Experts At Grain Conference Interrupted By Pathetic Incident

London, Eng.—Even world wheat conferences have their human episodes.

Technical experts from a dozen countries were gathered in a second concave at Canada House discussing plans to permit their peoples to eat better bread.

As they talked, a woebegone man entered the building. He explained he wanted to get back to his wife and family in Canada. Explained that he had tramped Scotland and back, 900 miles, looking for a job that would bring him home.

A Canada House official took him in hand to see what could be done.

And while the experts talked of grains, bushels, starch with food, a man, a war veteran, wondered where he would get his next square meal.

Carriers Of Infection

Suspects, Insects Are Spreading Sleeping Sickness Epidemic

St. Louis.—As the cause of a "sleeping sickness" epidemic in St. Louis widened to include victims in Oklahoma and Kansas, federal, state and city officials concentrated on a theory of insects suspected as possible carriers of infection which has been fatal to 17 persons.

Science has been unable to learn much concerning the spread of encephalitis, and never has definitely established the mode of communication.

A total of 191 cases of sleeping sickness have been reported in the greater St. Louis area. Four deaths also have been reported at Wichita, Kas., Kansas City, Kas., and Warrensburg, Mo. None of the disease have been located at Maryville, Mo., and Muskogee, Okla.

Raised Problem

Five Municipalities In Manitoba In Need Of Assistance

Ottawa, Ont.—Ira E. A. McPherson, provincial treasurer of Manitoba, conferred here with department of labor officials on a program of relief for municipalities of Manitoba in the 1923-24 season, embracing five municipalities, was hit this summer for the third year by drouth and grasshoppers, leaving hundreds of farmers destitute.

It was proposed by Manitoba the Dominion administer the dried-out area through the Saskatchewan relief commission on the federal treasury paying the whole cost No definite reply was made by Hon. Wesley Gordon, minister of labor, but it has been understood here for some time the Dominion intended closing down the Saskatchewan commission.

Salute For Premier Forbes

Chicago.—A welcoming salute of 19 guns was fired as Prime Minister Forbes of New Zealand arrived in Chicago to visit the World's Fair. He was accompanied by Mrs. Forbes and a party of eight, en route home from the London Economic Conference. They came by way of Canada and will remain two days

PLANS BETTER WHEAT

Details of an extensive program to improve western wheat crops and thereby raise the premium which Canada obtains on world markets for her grain have been revealed by Dr L. H. Newman, chief Dominion cerealist. He is at present doing research work in Western Canada.

Gandhi is Released

Nationalist Leader Freshs Fuel With Ganago Juice

Poona, India—M. K. Gandhi was unconditionally released from custody by the authorities here and shortly thereafter he broke a week's fast with a cup of orange juice

The Nationalist leader had served only a little more than three weeks of a one-year prison sentence for initiating a new civil disobedience campaign against the government.

Gandhi was very weak and it was believed there were minor complications, but two Poona doctors who examined him said there was no cause for alarm over his condition.

(Gandhi was released from jail under circumstances just May 8.)

Gandhi was eating at the home of Lady Thackersey, wife of a member of a Bombay merchant at Parnakuti.

Have Right-Of-Way

Pedestrians In Vancouver Favored By Council Law

Vancouver, B.C.—Ordinary pedestrian or "jay-walker" has right-of-way in Vancouver over motor traffic under a standard and unanimous law controlled or uncontrolled intersections, according to a decision in police court.

Traffic bylaws were designed to give the pedestrians right-of-way at marked intersections except those controlled by signals or police, but an old law prevents prosecution of the pedestrian or "jay-walker" no matter where or when he chooses to cross.

Percy C. Mumby, as the first motorist charged with failing to give right-of-way, was allowed to go with a warning after paying $3.50 costs.

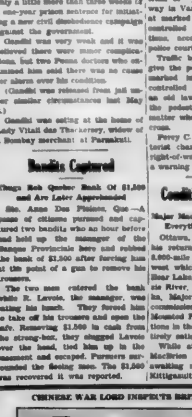
Bandits Captured

Things Rob Quebec Bank Of $1,500 and Are Later Apprehended

Ste. Anne Des Plaines, Que.—A posse of citizens pursued and captured two bandits who an hour before had held up the manager of the Banque Provinciale here and robbed the bank of $1,500 after forcing him at the point of a gun to remove his trousers.

The two men entered the bank while Manager Gauthier was eating his lunch. They forced him to take off his trousers and open the safe. Removing $1,500 in cash from the strong-box, they clogged Lavois over the head, tied him up in the basement and escaped. Pursuers surrounded the fleeing men. The $1,500 was recovered it was reported.

CHINESE WAR LORD INSPECTS BRITISH AIRCRAFT



Marshal Chang Hsueh-Liang, the Chinese War Lord, now visiting England with his sons, paid a visit to the Royal Air Force Station at Higgs hill, Kent, to inspect aircraft and the establishment. He is shown here with folded arms, accompanied by his son (right), Wing Commander Willcock (left), and Squadron Leader Crews, undoing an air display.

New Nova Scotia Cabinet

Personnel May Not Be Announced For Some Time

Halifax, N.S.—Although Angus L. Macdonald is not expected to announce the personnel of his new Liberal cabinet for about three weeks, many suggestions are going the rounds as a result of the party's 32 to 9 victory over the Conservative forces in the Nova Scotia elections.

The 43-year-old leader, to become Canada's youngest provincial premier, is expected to take the portfolio of provincial secretary-treasurer.

Dr. J. L. McIsaac, of Antigonish, and Dr. M. E. McGarry, of Inverness, both members of the last legislature, are mentioned for ministries of health, and J. A. Macdonald, of Kings, is said to have been promised the portfolio of agriculture.

A. S. Macmillan, who held the highways portfolio in the Armstrong government previous to 1925, is expected to be appointed attorney-general, and Michael Dwyer, Liberal, Cape Breton Centre, seems to be the favorite for minister of public works and mines. The post of attorney-general probably will be filled either by John R. Smiley, K.C., of Cumberland, or J. M. MacQuarrie, Pictou.

Typhoid Fever Epidemic

Toll Of Fever Lives Taken In Nunnery In Montreal

Montreal, Que.—Both the milk and water supply at the Mother House of the Sisters of the Congregation of Notre Dame have been tested and found in order and as a result Dr. Georgette Bourbeau, director of the Montreal health department, announced he was convinced the typhoid fever which has already taken a toll of 14 lives from the convent and now threatens 36 others, was introduced from an exterior source.

A ban of the order died Wednesday at a Montreal hospital, but she had been ill for many weeks and her disease was not typhoid, Dr. Bourbeau declared. A check up in the isolated convent infirmary revealed 36 and not 23 nuns have been stricken. Eighteen of the suffering from typhoid.

Meanwhile, precautionary measures are being taken to prevent spread of the infection within the convent walls, while special prayers are being said hourly in the convent chapel for the recovery of the ill and for the repose of the dead.

Fine Crop At Fence River

Edmonton, Alta.—One of the greatest crops in the Peace River area will be harvested this year according to Charles Frederick, editor of the Peace River Record. A long cold wet summer followed by warm remarkable ripening weather, he said, would result in a record-breaking crop this season.

Recovers From Injuries

Sutton, Que.—Captain Ernest Boyd, trans-Atlantic aeroplane pilot, was fully recovered from slight injuries received when his veteran aeroplane "Columbia," cradled in mid-air, of here. The Columbia, twice conqueror of the north Atlantic, was damaged to the extent of a broken propeller and crumpled left wing

Nothing To Say

London, Eng Prime Minister R. B Bennett, chairman o f the world wheat conference, was asked if he cared to offer any comment on the defeat of the Conservative Government in Nova Scotia. "No," was Mr. Bennett's brief reply.

Work Arrive At Fine Flon

Flon Flon, Man - More than half a million tons of ore will be loosened in the open pit of the Flin Flon mine when 150 tons of dynamite are fired in September, according to Mine Superintendent M A. Rothe.

Movie Strike Called Off

Washington.- The United States labor board announced that the strike of moving picture sound men had been called off and all striking employes would return to work immediately.

COMMUNISM IS NEWEST TROUBLE FOR CUBANS

Havana Soldiers and police were ordered on guard in the streets and parks of the capital after authorities received a report demonstrations were planned by Communists, the newest trouble of the new Cuban government.

The organization had been denied a permit to parade in observance of the execution of Nicola Sacco and Bartolomeo Vanzetti in the United States six years ago.

Speakers at Communist headquarters harangued an audience of negroes and whites, criticizing the provisional government of President Carlos Manuel De Cespedes, the A B C Secret Society, "Yankee imperialism" and capitalism.

Referring to the overthrow 10 days ago of the Cornelio Machado government, the speakers declared the victory is not the A B C's. The victory is Labor's and the Communist party's.

Reports from eastern Cuba said United States Ambassador Sumner Welles' activities in mediation of the Cuban political situation were criticized in speeches delivered. President Carlos Manuel De Cespedes was attacked Strikes have continued in that region. Employers blamed Communist influence.

Will Of Four Lives Taken In Nunnery In Montreal

Montreal, Que—Both the milk and water supply at the Mother House of the Sisters of the Congregation of Notre Dame have been tested and found in order and as a result Dr. Georgette Bourbeau, director of the Montreal health department, announced he was convinced the typhoid fever which has already taken a toll of 14 lives from the convent and now threatens 36 others, was introduced from an exterior source.

A ban of the order died Wednesday at a Montreal hospital, but she had been ill for many weeks and her disease was not typhoid, Dr. Bourbeau declared. A check up in the isolated convent infirmary revealed 36 and not 23 nuns have been stricken. Eighteen of the suffering from typhoid.

Meanwhile, precautionary measures are being taken to prevent spread of the infection within the convent walls, while special prayers are being said hourly in the convent chapel for the recovery of the ill and for the repose of the dead.

Conditions In Arctic Good

Major Macinnon Makes Re Found Everything Quite Satisfactory

Ottawa, Ont.—Interviewed here on his return from Winnipeg after an 8,000-mile journey through the northland which included visits to Great Bear Lake, the Copper Mine, Mackenzie River, Yukon Territory and Alaska, Major-General J. H. MacBrien, commissioner of the Royal Canadian Mounted Police, said he found conditions in the Arctic and sub-Arctic entirely satisfactory.

While at Shingle Point General MacBrien saw the reindeer herd awaiting resumption of its trek to Kittiganuit.

Feeling Business Recovery

London Operators Preparing For Big Coal Boom

Signs of business recovery are reported in Canada's mercantile, according to Dr. J. B. Phillips, Department of Chemistry, McGill University, who has just returned to the university after spending some three months in a wild area east of the upper reaches of the Ottawa River. Dr. Phillips combined his holiday with pleasure. Travelling some 300 miles by canoe, with Lorne MacLeod, of Barking-ton, Que., he ascended a number of streams in search of copper and found a deposit that henceforth has been owned by prospectors.

Dr. Phillips said he believed he had found the real thing, but that the real test will not be made until the opening of the university season, when he will submit the ore to a thorough analysis. He also found coal silver will also be found in the new copper ore district.

Everywhere they went there was talk of recovery and better times, Dr Phillips said. Experienced lumberjacks, who have been eking out a bare existence by trapping during the last winter or two are getting ready to join in the recovery movement. Large lumber operators are opening their men into the bush getting ready for a big cut next season.

Coming by land, night, a short distance from the city the party were accosted at midnight by a uniformed figure of the automobile type.

Dressed up their flashlights, they rushed toward the car to chase away the marauder and found a porcupine licking on the steering wheel. The porcupine had his forefeet firmly on the horn button and refused to budge. They played their flashlights on it until eyes until he turned tail and ambled out of the car

Mountain Climbing Fatalities

Four British School Masters Lose Lives in Switzerland

Word was received at Ilton College recently that four of the school's masters had been killed in a mountain climbing accident in Switzerland.

Bodies of the men, who left Reginald several days ago for a holiday, were reported found at the foot of a steep wall of rock on Rosog Peak in the Bernina Massif. The victims were H. H. Bowman, E. V. Slater, E. W. Powell, all housemasters, and C. R. White-Thomson, assistant master and editor of the Bishop of Ely.

Powell, widely known as an oarsman, was an old Oxford Blue and winner of the Diamond Sculls at Henley in 1912.

History May Be Repeated

Caitlin Sailed Hudson's Bay Route 300 Years Ago

Re-opening of shipping activities at this Hudson's Bay port and the necessity to establish it as an ocean outlet for livestock shipments to the United Kingdom recalls the fact that 300 years ago, a cattle shipment arrived at Churchill from England. The ir-gate "Hart," which arrived from England on August 3, 1725, brought two oxen and two bulls. They were sent to inland stone for the benefit of Fort Prince of Wales. Ruins of the new historic fort are still to be seen at the harbor entrance. It took years to build the structure, considered one of the strongest on the North American continent.

Trying Climates

Two yokels visiting a big city saw a sign announcing that Dr. Thal Hall was dentistry at both west hands, and one of them lit a cigarette.

The conductor politely told them to go upstairs if he wanted to smoke, so up he went.

A couple of minutes elapsed. Suddenly he came tumbling downstairs and set down beside his pal, who asked him what was wrong. He said: "It's no use upstairs—there's no driver up there!"

Shipyard Workers In Sorry Plight

The most unique incidence of its kind in the world is located in Japan. It makes the boast that every single book published—non-fiction as well as fiction, is available within two months of publication and kept in stock thereafter. What a country!

Canadian Income Companies Are Issued Warning

Show Cause Why Licenses Should Not Be Withdrawn

Will Enjoy Colors

At a time when credit is being cut in many directions as to the amount of financial institutions will grant when many have found it difficult to stand up beneath the strain of the depression, it is more than gratifying to Canadians to know that their insurance companies have come through the lean years with flying colors. Not only is business with the people of Canada such as the second and insured people in the world, but the companies are also financially strong, as the Canadian Insurance Companies Act demands.

With the minimum sum of $1,750,000 as guaranteed protection, Canadian insurance companies are playing an important and increasingly larger part in the development of the Dominion through fostering all sorts of industries, commercial and developmental, and encouraging. That there have been losses in the course of this stands to reason. But they have been such as can met with in any ordinary carefully conducted business undertaking.

Said it speaks volumes for the Canadian insurance companies as a body that never since they first began operations in this country has any Canadian policy holder lost a dollar through the failure of any company entering a Dominion licence.

Montreal Star.

A Cure Of Champagne

Thousands Of Cases Kept Beneath "White Cliffs Of Dover"

It is not generally known that beneath the "White Cliffs of Dover," so often celebrated in poem and song, is a grim cave which contains many thousands of cases of champagne. The vaults and roof are secured by the picks of French prisoners who were forced to build the cave during the Napoleonic wars.

After the wars were over, the cave became the favored drinking den of the bravest from a convoy. Then wine took the place of beer, and during the World War cases of Moët and Mumm lay side by side with mines and explosives placed there by the Dover garrison.

Today the champagne that remains beneath the cliffs is the property of the city of London Every companies has stacked in the cave Every night the "champagne ships" leave Calais for Dover to replenish the stock, which is guarded by a solitary watchman in a sentinel's jersey And in the morning a boat and crew arrive from Dover, the cases stamped and examined by the customs, and a fresh consignment taken for the week's drinking. Some of which have lain in the cave since the war.—London Correspondent.

Aid Prisoners To Escape

Secret Organization Said To Assist Escapes From Devil's Island

British Guiana police are convinced that a secret organization in Cayenne has been established to assist escapes from Devil's Island and other French penal colonies in French Guiana. It is believed that the organization has headquarters in Trinidad and Venezuela to help convicts reach Colombia.

Many successful fugitives from Cayenne have passed through British Guiana this year after braving the terrors of the jungle and sea. Forty escaped by way of British Guiana in 1932.

Only Human Like Kaiser

A young barrister, in a hurrying cross-examination of a landlady, was trying to discredit her boarding house to the eyes of the jury.

His spoke of certain lodgers who never went out at night, and the horrified landlady agreed to that.

"A queer set of people seem to live in your house, madam," he said.

"Is there any reason for hiding themselves from the public.

"They're studying for the law," replied the landlady.

Broadcast Sermons

Radio broadcasts are to be shown to the public in London. These are the biggest broadcasting studio in the world is being erected. The whole of the National Hall, at Olympia, is being converted into a studio with seating accommodation for 2,000.

The mud-pit in the Victoria Tower Gardens adjoining Lambeth Bridge, is a favorite resort for youngsters from the poorer districts of Westminster and Lambeth

Increased Car Loadings

Grain and Grain Products Help To Increase The Total

The upswing in cars loaded on Canadian railways, which began at the beginning of the present month has continued, and for the week ending August 12, the figure exceeded by 929 the number of cars loaded for the corresponding week a year ago. Totals were 69,287 for the week ending August 5, and 68,644 for last week.

Grain and grain products increased by 1,040 cars, from 4,700 to 5,740, while coal loadings were up by 434. Pulpwood, ore and miscellaneous freight increased, while livestock rose by 147 cars.

Commodities with decreased loadings compared with the week ended August 5 were: coke, lumber, pulp and paper, and other forest products.

Hot Good Enough

Bank borrowers who forget to return the loan are seldom as lenient as a former student of St. Andrew's University, Scotland, who borrowed a copy of Plato's "Republic," fifty years ago. He has just returned it with the apologetic explanation that though he has kept it so long he has been too busy to finish reading it.

According to scientists the sun and its planets are rushing at 12 miles a second in the direction of the southern constellation of Dorado, the Dragon.

West Representation

Western Indians Would Have Voice At Pacific Relations Conference

Chief Hector McLean, Indian graduate of the University of Manitoba, petitioned Sir Herbert Samuel to use his good offices to secure representation for McLean's tribe, the Stonyx, at the conference of the Institute of Pacific Relations. He believed he spoke also for the other Indian tribes of Canada.

Chief McLean said the Indians wished to submit certain matters of interest sociologically to the conference to the end they might be taken up by the Dominion and British Governments.

Sir Herbert replied he was sorry he could not act in the premises but, as this was strictly an internal affair, it did not fall within the scope of the institute's activities.

Veteran Water Diviner

Although he will be 88 in a few days, Joseph Wrightsmith is journeying into the Beaver Hills to find a water well for a client. He has many times demonstrated his skill as a water-diviner. He has been in British Columbia since 1862, when he arrived from England, and took part in the Cariboo gold rush.

France expects an early revival in the heavy industries.

Employment has been increasing in Hungary recently.

Dreaded Sleeping Sickness

Pioneer In Field To Be Rapidly Travelling

Sleeping sickness is one of the world's growing diseases

Although known for two or three hundred years, it is only since the Great War that this fatal malady has been reported of world-wide occurrence Little of it was known in the United States, until after the "flu" epidemic which swept this country in wartime 1918.

The cause is a specialist virus which has escaped isolation and of a disinfectant. The victim is usually given intravenous. He should be seriously considered by those of Italian descent. Also the prevalence the Negroes suffers some attacks or with a special affinity for the central nervous system. Parasites and the allergic accident, however, attack differ-ent some

It is one form which produces progressive lethargy and stupor the eyes attacks in or about the third pair of cranial nerves Then into the eyes of the large nerve channels It controls the [illegible] of the eyes. The symptoms which gives the disease its popular name does not, however, come from the fact that these eye nerves are affected. The stupor is indeed by [illegible] drowsiness.

The direct effect of the virus upon the eye nerves is the destruction of vision. The distortion is the "ophthalmoplegia, which is one of the names of the disease Dr. Alban J. Rosenow, one of the authorities on sleeping sickness, says that this ophthalmoplegia occurs in about 75 per [illegible] of the

According to Dr. Rosenow, the mortality is high, the "incidence" of the disease is not declining incidence is growing slowly He says that almost no other infection is so irregular and has so many different forms

World's Quietest Place

Room in Holland Specially Built For Scientific Research

The quietest place in the world is not the summit of a high mountain or a distant lake in the middle of the ocean, of an isolated spot in the desert.

It is in the heart of the city of Utrecht in Holland. In this quiet place is a room for scientific research, specially built to avoid all vibration. Professor H. Zwaardemaker, a well-known Dutch physicist and physiologist, had it built.

Professor Zwaardemaker built three rooms, one inside the other; then, since a vacuum is a poor conductor of sound, he had the air pumped from between the walls The interior walls of the rooms were covered with six layers of materials; one layer was of stone blocks, treated by a special process. The cavities between the layers were filled with horsehair, and in the stone were placed layers of wood and cork. The other coverings were layers of lead plate, von gruss and paper.

The walls were further lined with tapestry, to absorb the internal sounds. Not the slightest sound can penetrate to the innermost chamber.

Third Of Road Built

Work To Continue On Lake Louise Scenic Highway

Over 50 miles or one-third of the Jasper-Lake Louise scenic highway has been built while only 16 miles will be continued on the road throughout the 1933 season, according to Hon. Thomas G. Murphy, federal minister of interior.

It is proposed to resume work on the Jasper highway west to the British Columbia Boundary when crews finish a road to Miette Hot Springs.

Proved Trip Possible

Two young medical students who risked their lives to prove they could paddle a 22-foot canoe from Ste. Agathe, Que., down the Gatineau, Ottawa, Kenogami and Albany Rivers to James Bay, and then make their way down the western coast to Moosonee, completed the trip.

Brazil has appropriated large sums to aid its drouth sufferers.

Some of the world produce have been worth $4,000,000 a year.

FANCIFUL FABLES

OCCASIONAL WIFE

By
MRS. ALEC WILLIAMSON

Author of "Loretta," "Lipstick Inn" [illegible]

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously shatters the hand of a fellow student during class and when she is suspended is he drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose hand she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club It is far beyond his means but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends After taking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist Camilla wonders why he did not ask her to go out again. In school they are cool to one another, and for a few days things go badly between them until he again meets her sitting in the park

(Now Go On With the Story)

CHAPTER VI

Camilla's shy smile was like an appeal to Peter to understand everything she knew and didn't know about herself. He understood that she needed him, yet he feared to remain. He glanced away through the lacy green of new leaves toward the glistening white walls of the [illegible]

"I live pretty much around here, day and night. You know I teach a beginner's class over there three evenings a week."

"Oh, do you?" her eager face lighted. "Then, that is why I haven't seen you, isn't it?"

"You, I've been—pretty busy," his words stumbled awkwardly. "I can't keep late hours often with so many responsibilities."

Then I shouldn't have kept you out late on Tuesday night," remorsefully.

"Oh, once in a while can't hurt me," he laughed, "and it's not that I can't stand the pace, but the pain don't SEEM SO BIG."

"I'm sorry. Did you get roused about Tuesday?"

"Oh, no."

"Why didn't you tell me you had classes of your own? I shouldn't have suggested—"

"We had a good time, didn't we?"

"Wonderful! Did you?"

"Best in my life!" he declared. "That is, except—except—evening now because you were angry with me?" [illegible]

"Of course not! And I haven't tried to avoid you," he protestioned. "What made you think that?"

"Well," her eyes followed the toe of her slipper as it drew imaginary lines in the grass. "you didn't call again, or ask to see me."

"But I wanted to," the words were impulsive, and spoken before he knew it.

She bushed up at him again with shining eyes "Then it's all right," she said softly

"You really cared that I didn't call on you?"

"Yes, very much."

"I'm sorry," he said gently "I should have phoned you, even if I was busy."

"And please don't think you have to take me places that keep you out late, just to see me" She forbidst her last comes of pride in a final display.

"What could we do, then?"

"Why—we might sit here and just talk, or you could come to my house

"I'd prefer it here."

"So should I."

He wondered if he could be dreaming Could it be possible that Camilla Hoyt preferred to come and sit in the park with him, to the society of her friends and their favorite haunts"

"Do you mean that you would like to come here and talk with me—sometimes?"

"Any time. I often come here and sit alone in the evening I never know, though, that you were coming over there, to hear me."

"And I never knew you were so near, either Will you be here, tonight?"

"Do you want me to be?"

"Very much. I'll be finished at nine o'clock."

"Then I'll be here," she promised They walked on together to the parkway and separated happily in anticipation of the evening. Peter tried to reprove himself for what he had done. He had resolved that the only way to manage his attraction for Camilla was to forget her and stay away from her. It would be a long time before he could forget—probably he never could—but he had

"It's about the longest hour I ever had," he confessed

"Shall we walk a little ? It's a marvelous night, isn't it?"

Perfect I like to walk around here at night It all seems so different out then in the daylight. Did you ever feel like that...as if a place that is very familiar to you in the day wore a different place at night?"

"Yes, I've thought that, too. It's something like the difference between the way people appear to be and the way they are, isn't it?"

"Why," he exclaimed with surprise, "you funny little thing! I never knew you could be so serious."

"You see, I am like this park by day and by night a dual personality You know the me who catches poetry in Professor Drake's class, but you don't know the me who comes to sit alone in the park and try to think things out."

"I like both of you." His voice was deeply tender with the effort of suppressed emotion

"But you don't know either of me," she objected, holding up her finger in a warning gesture

"Perhaps better than you think"

"But you must not like me very much."

His felt reprimanded for his boldness I know I shouldn't be so presuming But I wonder why you came here tonight to meet me."

"Because I have to tell you something that I want you to know about me. I just can't go on letting you think I'm "

"Are you sure that you should tell me anything about yourself?" he interrupted hastily. "I shouldn't want you to tell me something you might regret later."

"You are not interested. You don't want to listen?"

"Of course," he assured her earnestly "What is just the trouble I am too interested in you I have been, ever since the first day I saw you in Drake's class. I'll always remember the minute you walked into that

He found her there as she had said she would be.

room," he reminisced with pleasure. "You have been in my thoughts ever since."

She sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fear-ful apprehension. He was going to tell him that she was engaged to marry some other fellow in her price class? Probably that she didn't like very heavy about it. And why should she tell him—for sympathy! Was it possible that, over, girls were compelled to marry men they did not love because someone else expected them to? It sounded like medieval history of a fairy tale.

"Oh, if today is all I have had yourself, can help you any and make me forget, too, I'll listen to you," Peter finally consented.

"Let's go back to the bench where we first talked," Camilla suggested. "Perhaps the lilacs will help me to say what I have to tell you."

They walked back along the path in silence. He was mystified, but it was exquisite to be there with her in the sweet spring night with a new crescent moon filtering its light upon them through the gossamer filigree of new foliage. He knew that nothing she could tell him about herself would make him forget her, ever. And his heart was bitter with the thought that fate had arranged that she must belong to someone else. He couldn't control until now how much a part of his ambition she had become. Why! what was the good of any of the rest of it, after all, if he couldn't have Camilla?

(To Be Continued).

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile
—Without Calomel

Your liver's a very useful organ but it can't work properly when it's sluggish. Then you're constipated, your food doesn't digest, you're bilious, headachy, dizzy, sick, and you're miserable. You don't completely correct such troubles by taking pills, oil, calomel substitutes, laxatives, or anything else, or "doping" them. You've got to get your liver to work through—and you can do it with Carter's Little Liver Pills. Get some today from any druggist. Use as directed. Refuse substitutes. Ask for Carter's Little Liver Pills. Only 25c.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It soothes the nerves [illegible] gives you better appetite, better digestion, refreshes sleep and headache . . . makes trying days easier.

If you are not as well as you want to be, give this medicine a chance to help you. Get a bottle from your druggist today.

And get your copy of this ROYAL YEAST BAKE BOOK containing 33 practical, tested recipes for delicious bread. Address Standard Brands Ltd., Fraser Ave. & Liberty St., Toronto, Ont.

Little Helps For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeremiah 29:2.

Thy thoughts are good, and Thou art good, Lord,
E'en when we think it not;
How many an anxious faithless mind
Stirs grieving o'er its lot.

And frets and pines by day and night,
As though God had it out of sight,
And all its wants forgot.

P. Gerhardt

You should never complain of your birth, your training, your work, your hardships, never to think you could be something if only you had a different set of circumstances to work on. For God understands His own plan, and He knows what you want a good deal better than you do. The very things you most deprecate as fatal limitations or obstructions, are probably what you most need. What you call hindrances, obstacles, and discouragements, are probably God's opportunities. Bring down your soul, or rather bring it up to receive God's will and do His work, under your cloud of obscurity, against your temptations, and then you shall find your condition is never opposed to your good, but really consistent with it.—H. Bushnell.

Doing a Good Business

Monk Of Pilgrims To Wishing Well in Scotland

Strong denunciation by Highland ministers and the recent campaign by the Scottish Temperance Association against the famous Wishing Well at Childess, in Scotland, has resulted in a rush of pilgrims to the well, which is the greatest in its history. Thousands are dropping coins into the water and making a wish. Some, according to ancient practice, tie a piece of cloth to nearby trees, and these are now almost covered with tiny pieces of textiles. The money dropped into the well is recovered and donated to charities, which are getting record amounts.

Bureau Receive Profit

Profits received from the sale of the paragraph record of the inaugural speech of the King at the opening of the World's Monetary and Economic Conference, have been designated by His Majesty to Dr. Barnardo's Homes.

You Can Afford Pure Delicious Dishes Every Day When You Use

What's in a Name!

The Council of the Town of Fort Saskatchewan have set aside a number of lots along the River Bank from Government Street, east to the River Road as a Park These lots are beautifully wooded, with open spaces. The underbrush has been cleaned out, and a motor roadway will be constructed along the bank of the River. Two wells will be re-cribbed and open spaces levelled, and seeded to grass. In other words Fort Saskatchewan will have a park where visitors will feel welcome, but—at present, we have no name with which to designate our park.

The following merchants are donating a prize of Fifteen Dollars, ($15) to the person submitting a name for Fort Saskatchewan's new park, that shall be considered most suitable by three independent judges to be appointed from outside the Town. The conditions under which names may be submitted are very simple.

CONDITIONS!

For every Five Dollars worth of goods purchased from any one of these merchants during the months of September and October, you will obtain a nomination blank. Fill this blank in with your suggested name for the park, and the merchant from whom you received it will sign it, date it, and time it. The portion of the blank with your own name on will be held by your merchant, whilst the portion containing your suggested name will be submitted to the Judges.

Each portion bears a similar number

In the case of two or more persons submitting the same name, the which should be chosen by the judges as the prize award, the name submitted bearing the earliest date of entry shall be judged to be the winner. .

The judges' decision shall be final.

No personal names will be considered in connection with a name for the park.

Coupons may be obtained from the following merchants.

Beaver Lumber (Northern) Ltd. H. Barnett.
A. M. Carscadden Hardware Fort Confectionery
Fort Hardware Co. Bill Graham's Service Station
Jones, Graham & O'Brien. E. Ketterborn Meat Market
Latour's Bakery. Smith's Drug Store

Simmons Lumber Company

There is a $15.00 prize awaiting someone. Purchases do not have to total five dollars at one time. Save your cash receipts, and when they show purchases amounting to five dollars made in September and October, you will receive your coupon. Pay your account at date, and get coupons to the amount of your purchases.

Alberta's Pool Conducting Wheat Survey

The Alberta Wheat Pool is conducting through the Junior Wheat Clubs a survey of wheat being grown in all districts where clubs are located. Department of Agriculture field men in judging the groups and scoring the clubs plots for purity of variety are also making purity of variety counts on the other wheat of the farmers. The system followed is that the judge when he has finished the Junior plots, proceeds to the adjacent fields on the farm and prepares a purity of variety report on the wheat grown.

By this method the Alberta Wheat Pool hopes to obtain a fairly accurate idea of the quality of the wheat being grown by wheat producers throughout the province. The wheat clubs number 66, being located in districts extending from Bow Island to the south to Grande Prairie in the north. The total membership approximates 700 junior farmers and around 700 farms will be reported upon in the survey.

The Wheat Pool has been for the past few years taking a great deal of interest in the work of educating the junior farmers in the province to the benefits of growing pure varieties of grain. It is believed that the innovation introduced this year of testing the run of the crop on the various farms on which the Junior live will give further encouragement to the movement for seed improvement as well as providing valuable information.

Taken from the Files
10 Years Ago Today

September 9th, 1916

Atkinson Bros. are building a residence on the corner of Dennis Ave and Range St.

W. H. Corbett is in Wetaskiwin this week in connection with the Crawford murder case of that place.

R. S. Davidson of Tofield was among those who brought corn home to the fair here last week.

Isaac Watson, who has been employed with the Shaffer boys at Tofield, left for Edmonton, where he will enlist the Royal Navy.

The first electric flash sign to appear in the Fort, above the front of Norman Price's blacksmith shop. This sign was made by F. Watling.

The Fort annual fair was a very successful event.

Two fine large jumping deer were seen Sunday morning crossing the Beendale Farm.

A new school has been created at North Clover Bar.

ALBERTA SEED GROWER HONOURED

Distinction came this year to A. C. S. Granville, pure seed grower at Morrin, Alberta who was selected by the Canadian Seed Growers' Association as the Canadian farmer to be honored by election as Robertson Associate member, with the presentation of the accompanying medal. This distinction is awarded for outstanding work over a period of years in pure seed production. Mr. Granville is the only farmer in Canada to receive this honor this year, and is the second Alberta seed grower to receive it, two years ago the distinction having been given to Nels Lindes of Wetaskiwin, for many years a noted seed producer.

Mr. Granville has been an exhibitor of seed grains for a number of years, at Chicago and elsewhere and at the world grain congress in Regina he won second place in western spa grass seed. He was born in Devonshire, Eng., and came to Alberta in 1906, having farmed since then near Morrin.

UNITED GRAIN GROWERS DECLARE DIVIDEND

A dividend at the rate of four per cent, or one dollar per share, has been declared by the directors of the United Grain Growers, Ltd., for the financial year ending July 31st, 1926 Cheques will be mailed on September 15th, to shareholders of record at the close of business July 31st.

REDUCING WASTE OF NATURAL GAS

Success of the new absorption plant installed by one of the large operators in Turner Valley gas fields, in recovering large amounts of naphtha from the gas which has been going to waste year after year, has been amply demonstrated since its installation. The operation of the plant commenced in May, and in that month recovery of naphtha from the waste gas amounted to 6,605 barrels, and in June this had increased to 13,825 barrels for the month.

PACIFIC RELATIONS

The fifth biennial meeting of the Institute of Pacific Relations opened at Banff for a two-week's session, which is attended by delegates from the various nations bordering on or interested in the Pacific area. Questions of international importance have been discussed during the week. Sir Robert Falconer, late president of the University of Toronto, was chosen as chairman.

CITIZENS ATTEND MEETING AT LAMONT

At the request of Mayor Montgomery, Councillor W. A. Graham, Dr. T. W. E. Henry and Mr. F. M. Murray represented the town of Fort Saskatchewan at a meeting of The Elk Island National Park Association held at Lamont last Friday evening, to consider the organization of a Golf Club to co-operate with the parks department in the completion and operation of a golf course in Elk Island National Park.

Have you suggested a name for Fort Saskatchewan's New Park! Buy now, every five dollars worth entitles you to another guess.

DRILLING COSTS

Figures gathered by the Canadian Press indicated a substantial drop in unemployment relief throughout Canada in the last two months. There was a 16 per cent decrease in Ontario, and the attention was greatly improved also in British Columbia, where 22,000 men went back to work.

NOTICE

Rev. W. J. Kidd, B.A.,B.D. of Clover Bar United Church will preach next Sunday, September 12th, at Beaver Hills, Tyron Valley, and Partridge Hill, exchanging work with Rev. E. J. Hodgins.

RADIOS IN ALBERTA

A total of 39,389 radio licenses were sold in Alberta during the fiscal year ending March 31 last, according to figures issued recently. This is a ratio of 32 for each 1,000 of population.

HEDICINE HAT'S JUBILEE

The city of Medicine Hat celebrates its golden jubilee this year, with a two-day celebration Sept. 20 and 30. A feature of the 50th anniversary program will be the unveiling of a cairn to the Royal Northwest Mounted Police.

JULY OIL PRODUCTION

July production of oil in Alberta was 97,397 barrels, of which 63,660 was naphtha from Turner Valley.

COAL PRODUCTION

Coal production for July for the province totalled 197,145 tons, a slight reduction from the production of the same month of last year.

Tennis News

The Men's Doubles Cup goes to H Oxley and Tom Henry when they succeeded in defeating L. Hodgins and E. Scarborough in the final match which was played Saturday, Sept. 2.

The match was well contested going to five sets with the following score 7-5, 5-4, 1-6, 6-4, 6-3.

The cup for this event was kindly donated by Mr. A. M. Carscadden, and is a beautiful Spalding Tennis Trophy and is without doubt, the best cup the Community Club has ever displayed. The club appreciates Mr. Carscadden's donation and wishes to take this opportunity to thank him.

The next tennis event is the Community Tennis Dance to be held sometime near the First of Oct. At this dance cups and trophies will be presented to the winners. The Club hopes that the townspeople and country people will make this final tennis event of 1926 a success by attending in full force.

Coming Events

The United Church Ladies Aid will meet at the home of Mrs. J. D. McLean on Thursday, Sept. 9th. at 2.30 p.m.

The first meeting of this season of the Fort Saskatchewan Women's Institute will be held on Sept. 14th, at 3 o'clock at the home of Mrs. A. H. Rogers.

Today's day will be particularly dedicated to the Grandmothers of this Town, and it is to be hoped that they will turn out in full force to enjoy a pleasant afternoon.

DOWN THE ATHABASCA

A trip by river boat down the Athabasca river to Fort Fitzgerald was the interesting summer experience of two selected Edmonton Boy Scouts, as guests of the Hudson's Bay Company.

LOCAL NEWS

Slight flurries of snow and light rain showers Tuesday and Wednesday will delay harvesting for the next four or five days.

During the past few days there has been a chill tang in the air. Slight touches of frost has been reported, but nothing to any great extent.

oooooo

When purchasing articles at the various stores sponsoring the "Name the New Park", get sales slips and when the amount totals five dollars, take the slips back to the store and enter your name for the Fort's new Park. You may be the winner of $15 dollars in cash.

oooooo

Where different parts of the wire fence on the gravel rail on the Fort bridges west of town were broken, a gang have been replacing them during the past week.

The rail fence along both sides of the road approaching the bridge is broken and should be fixed before someone goes over the bank.

New gravel is being placed on the highway west of town and the curves are being raised up.

THREE LITTLE WORDS

There are three words, the sweetest words
I'll all human speech—
More sweet than are all the songs of birds,
On pages poets preach.

This life may be a vale of tears,
A sad and real thing—
Three words, and trouble disappears,
And birds begin to sing.

Three words will cheer the saddest days:
"I love you?" Wrong, by heck!
It is another sweeter phrase,
"Endowed find check!"

Sun shining on a lone near an upstair's window, not a house on fire at Westland, Alberta.

ALBERTAN'S MOTHER DIES

Stratford, Ont., Aug. 30.—Mrs. Edgar Taylor, 75, widow of Rev. Edgar Taylor, is dead here. E. S. Taylor, of Fort Saskatchewan, Alta., is a son, and Mrs. Francis Frost, Lowerea, Sask., is a daughter.

CARD OF THANKS

Miss M. R. Todd, Mr. T. Todd, and Mr. E. Todd wish to thank their many friends for the kindness and sympathy shown during their recent bereavement, also for the many beautiful floral tributes received.

UNITED GRAIN GROWERS LIMITED

A dividend at the rate of four per cent has been declared on the paid-up capital stock of United Grain Growers Limited, for the financial year ending July 31st, 1926.

Cheques will be mailed on September 15th, 1926, to shareholders of record at the close of business thereof.

By order of the Board of Directors.
July 31st.
R. S. Law,
President.

Winnipeg, Manitoba,
August 31st, 1926.

DIXIE

ONLY 20¢ A BIG PLUG

Changing Civilization, The State, And The School

Prevailing economic conditions throughout the world have had a direct and calamitous effect on Canada, and particularly on the entire western half of the Dominion which has to depend so largely upon world markets for the profitable disposal of its products. The situation still created was bad enough for the people to be called upon to face, but, unfortunately, it was intensified throughout very large areas by successive years of drouth and insect pests resulting in almost if not quite complete crop failure. Many districts would have been able to fairly well contend against one of these adverse conditions, but were ensnared by a combination of the two.

The load, of necessity, bore not only a loss of income and livelihood to thousands of individuals, because the losses in the agricultural world has brought unemployment and loss to the industrial world, but it has thrown a very heavy burden on all governments, while at the same time greatly reduced their revenues wherewith to meet that burden. People without income cannot, of course, pay taxes. Public services have had to be cut, and various economies enforced.

Canada, as a nation, and the Western Provinces in particular, have always been generous in making provision for the education of the youth of the land. They have been proud of their educational systems. They have never been backward in giving whole-hearted support to the improvement of education for their children and increasing the means of obtaining it by all. As a result, expenditures for education have been heavy, and school taxes high.

During to the necessity of cutting public expenditures in these times, some people have advocated a slashing of expenditures on education, involving drastic curtailments in the school facilities provided, and limiting the educational opportunities of the present generation. Serious reductions have already taken place, and in particular, teachers' salaries in rural schools have been reduced to a point where it is difficult for them to carry on. Nevertheless some short-sighted, penny-pinchers people still clamour for still greater "savings" at the expense of the education of the children of today. To all such we would recommend a careful consideration of the following article contributed by the Victoria, B.C., Times, inasmuch as the application of the truths contained therein are by no means confined to the Province and people of British Columbia:

While economic conditions as they are, we hear on all sides the most fantastic suggestions about closing the schools, doing away with high school education after the age of 14, save for those who can afford to pay fees, almost elimination of school services that make for education efficiency, school marathons slashing of teachers' salaries.

"Teach 'em till they are fourteen," said a man of reputed mental brilliance to me the other day. "Teach 'em til they are fourteen, then let them go,—except their parents can afford to pay for them to go in for higher education."

"Let them go." But where? In Vancouver alone 40,000 children are attending school. What if 5,000, 9,000 of them were turned out of the schools? Were not able to go back this year? And presently so many more throughout the province?

Twenty ages such children might have been absorbed in unconsidered labor of some kind, in apprenticeship, in farm work (though not in British Columbia this last).

What is there for them to do now? What?

And on every mother, every teacher knows, fourteen is a dangerous age. Britain has been through a pretty bad time these past ten years, but Britain has not cut her school services. As a matter of fact she has increased them. She knows she had to.

It seems to me if any of these drastic curtailments suggested by reactionaries of the day were in tentative moderation and as temporary expedients, a Dark Age will set in.

Of course, the highest work in the intellectual world always seems to be beyond the range of intelligence of the majority of persons. The value of work in the world may be estimated as high or low by the amount it allows itself for the higher kinds of work. That is for its teachers. So clergy, its lawmakers, its social service workers, its inventors of all kinds of art. Take the nations and see how they measure up in your estimation to this extent.

If a country wants all men and women to deal with and teach its children, it must pay for ability.

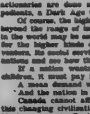
A mean standard will result with a mean supply.

And the nation in the long run will be the loser.

Canada cannot afford to lose in this matter of education. Children of this changing civilization for changing it is and very rapidly in form and ideals,—cannot afford to lose. We, the adults of this generation, have no right to steal from the future generation anything in the matter of educational opportunities or wisdom.

"Canada we stand on guard for thee" was the apt and inspirational interpretation used by Dean D. Buchanan in his address to the British Columbia Teachers' Federation, in convention. It hereby sums up the attitude of teachers and parents during this time of economic stress.

Weakening Diarrhea Dangerous Dysentery



Diarrhea and Dysentery do not need to run for any length of time until the whole system is terribly and dangerously weakened. For other diseases you have the strength and bring about a condition of prostration and often collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, stimulates and braces up the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of emergency.

Manufactured only by The T. Milburn Co., Limited, Toronto, Ont.

Five-Thirteenths Of Postage Stamps Remain Long In Railways and Hands

How many towels are, let us say, appropriated by railway passengers? The figures for English trains are staggering, an English railway detective being authority for the statement that 20,000 towels were taken from the trains of one system last month. His saga also has the thrills of cups, spoons, window straps and glasses; once a ham to British railway companion of thousands of pounds a year. Most of these disappearances occur in the summer holiday season. Hotels and restaurants, on the other hand, complain their heaviest losses at Christmas, when glasses, jugs, tablecups, cutlery and linen vanish by the hundred. According to an English hotelkeeper, this practice of picking up useful or fancy little articles is more frequent among well-to-do people than among the less fortunate. There is an aspect of this interesting custom which is not often thought of, and that is the necessity of not offending a good customer when mischance has revealed his fingerhandedness with more than a properly flame years ago a valued guest, having paid her bill, was making her way to the door of the hostelry when one of the hotel's spoons clattered to the floor. An attendant promptly picked it up and hastened after her. But the serious intention of handing it to her as it lit had been her own, but his well-meant effort to save the lady's face was foiled by an eccentric in her speed which almost turned it into flight. The attendant's fears were realized. She never stayed in that hotel again.—New York Evening Post.

Doing Good Business

With Other Countries

August Exports Passing Ahead Quicken Of British Shipments

"The thing that impressed most on my five months' tour of the world was the way Japan is forging ahead in her business with other countries, and the way she is leaving us far behind," stated H. S. Dalgleish, British shipowner of Newcastle-on-Tyne, who reached Victoria recently from Australia. He spent several days at Vancouver before crossing the continent en route to Scotland to complete a trip around the world. "Japan has knocked Great Britain and the United States flat," Mr. Dalgleish declared, "and the sooner we wake up to that fact the better for us. Her products are too high, and the sooner we get rid of tariffs, subsidies, restrictions and quotas the better."

Can Do Seventy Miles

Manitoba Police Using Midget Car For Highway Patrol Work

Two six-foot Manitoba patrolmen arrived at Cupar, Sask., last summer, driving a motor car which makes a Baby Austin look big in comparison. .

The midget motor vehicle arrived from England for highway patrol work. The two men stated they care and big cops form an ideal combination for the job.

Both men are employed by the Manitoba Motor League Safety Patrol and have authority to lay information and make arrests in connection with infractions of the Motor Vehicle Act and provincial laws.

They stated that their Little car can make 70 miles an hour, even on gravel highways.

Fingerprints Are Valuable

Worth Far More Than Photographs In Many Cases

Fingerprints as well as photographs should have their place in the files of police forces, Commissioner Austin Roche, Buffalo, N.Y., told the annual convention of the international association of chiefs of police at Chicago.

"These prints," said Roche, "would be of great value in cases of missing persons or kidnapping. They would be worth far more than photographs in many cases."

Roche suggested the fingerprints be taken of a person as a child, thus assuring him his identity would be preserved so long as he retained his hands.

A "radium clock" is used to find the age of the earth. Erosion of the soil and salt is also an "hour-glass."

Established New Record

French Artist Crossed Atlantic Alone In His Fast Sloop

Claiming a record for a one man crossing of the Atlantic under sail Marin-Marie, French seascape painter, whose real name is Durand Cyrap, pal, arrived at New York August 24, aboard the thirty-six foot sloop "Winnibelt II.", which he navigated single-handed from Brest.

Cleaning by way of Madeira, Dominica, and Port de France, Martin-Marie has covered 4,000 miles since May 10. The famous Captain Slocum, in the equally famous "Spray," set the previous record mark, with a crossing from Cape Roble to Lizard in twenty-eight days.

Marie took twenty-nine, but in that time he covered 250 miles more than the earliest mariner.

The "Winnibelt" was launched at Bodegne in February, and it has several devices permitting navigation by a one-man crew. The sloop can be steered from the cabin. All the hal yards run aft through leading blocks, a crowd can be placed over the cockpit, and the "Winnibelt" completely closed up, with her pilot inside.

Marie's purpose now is to gather material for his seascapes. During the voyage to Martinique he said he slept over the tiller only thirty seven hours. For twenty-seven days he did not touch the helm. En route from Martinique to New York, he slept only three days. When the robot was at the helm, he could go below and sleep for hours or lull on deck in grandeur, secure as much as Robinson Crusoe, until his sloop was on its course.

Like Canadian West

Lord and Lady MacMillan Hope To Return For Longer Visit

Lady MacMillan, whose distinguished husband heads the Royal Commission on Banking in Canada, likes the Canadian West and hopes to return for a lengthier visit soon. "We've been to Canada four times, but we've had only flying visits, most tantalizing short glimpses of the Rockies and the Prairies," she said. "Some day we hope to return for a real holiday and seek some of the far away mountain trails that appeal to us so much in 1928. Lord and Lady Macmillan were in Saint John for the meeting of the Canadian Bar Association, in 1928, they visited Regina for the Rotarian convention when Lord Macmillan represented Britain at that gathering.

The Macmillans hold a distinct appeal for Lady Macmillan, who is keenly interested in the Scottish people in Canada. "We are Scottish, you know, not English," she said.

While in Victoria, Lady Macmillan secured some flower seeds from the Butchart Gardens for their country estate in Surrey.

Veteran Engine Scrapped

Locomotive No. 5717 Only British Engine Captured By Germans

A battle-scarred British war veteran, an ex-German prisoner of war, with a travel record of more than 1,320,000 miles, has just passed away. The pet "hero" was locomotive No. 5717, believed to have been the only British railway engine to have been captured by the Germans. It has just been withdrawn from service and broken up.

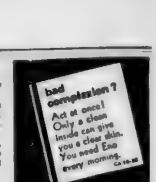
While in use on the British front at Cambrai in 1917, No. 5717 was captured by the enemy and for five months was used as a "show-gun" part in "No Man's Land." Following the March retreat the Germans removed the engine, patched up the bullet and shrapnel holes and used her for railway service until she was recaptured by the British in 1918.

Her return to home duties after the war the engine was decorated with a plate recording its war services.

Queen Receives Degree

When the degree of Doctor of Music honor of the Royal College of Music was conferred upon the queen, her majesty received from the Prince of Wales a jewel and chain as a gift from the college, of which he is president. The degree was conferred by Dunhington Palace by Sir Hugh Allen, director of the college; Lord Palmer, vice-president, and Charles Morley, honorary secretary.

Honesty is the best in the long run. But, on the other hand, if you are honest you do not have to run.



Financial Strength Of Britain

Deposits In One Bank Increased $173,000,000 In Year

There is a striking indication of the financial strength of Britain in the matter of the saving of money by Britishers, contained in the annual report of a leading bank, one of the Big Five. The deposits increased with last year show a clear gain of $173,000,000.

The general prosperity of the institution was shown in the maintenance of three classes of dividends, one of 10 per cent., the others of 14 per cent each.

With total resources approximating two billions of dollars, there is summoned up a satisfactory money prospect in regard to finance and progress which is somewhat different from as was hoped for by the action of the Economic Conference that is most reassuring.

The increased savings on deposit tell the story of latent financial reserves in England. This is fortified by the statement of the large dividends earned, and paid.—Winnipeg Tribune.

SOURED ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and "down in the dumps" really suffer because the bile in their liver is not flowing freely into the bowels and "sweet the food."

Don't feed this bile—make up your from your druggist a 50c bottle of Dr. Edwards' Olive Tablets. Take one or two tablets at night with a drink of water. Next morning you will feel like a new person. Your liver will be toned up, your bile flowing freely, your bowels regulated, your system purified and your whole outlook on life changed for the better.

Dr. Edwards' Olive Tablets are purely vegetable and mild in action. Know them by their olive color. 25c and 50c at druggists.

Television Tests From Crystal Palace Tower

Commanding Height For Seven Thousand Visitors Place Ideal

Negotiations have just been completed to permit experimental television transmissions from the south tower of Crystal Palace.

The transmissions will be made for the first time, on ultra short waves below eight metres.

This tower is regarded as ideal because of its commanding height. It stands 250 feet above the Thames level.

Recently H. Thomas, the assistant organist of Crystal Palace, a wireless expert, carried out experiments from the north tower with his amateur transmitter (Q6Q6), using a five-metre wave.

Reports of successful reception came from various parts of the country, some 200 miles away.

Statesman From Antipodes Issues Grave Warning Respecting Building of Warships On Pacific

Sir William Downie Stewart, M.P., former minister of finance in the New Zealand Government, the statesman who negotiated the trade treaties between New Zealand and Australia, Canada, Japan and Belgium, startled members of the Institute of Pacific Relations by declaring the battleships might well have taken up as a subject for discussion the present feverish building of battleships by great nations on both sides of the Pacific. His view was that if causes of friction were to be studied, building of war fleets could not properly be ignored. This should be done before serious events occur, he said.

"I am not a pessimist," he exclaimed towards the conclusion of his vigorous speech delivered from his wheel chair, for he is permanently crippled. "I may be a fatalist insofar as I realize if certain factors are at work they will produce a certain result under a solution is found.

"When I see on both sides of the Pacific great nations feverishly building battleships—battleships in the making, I am bound to ask myself what for. I am told a nation must be prepared to fight. I will say if you talk war you will get war. And also it is futile to say peace."

Canadians Eating More Fruit

Figures For Last Year Show 91.70 Pounds Per Person

Reminiscent of the brave old days when a barrel of pork constituted an year-round staple in the pioneers' larder, Canadians in 1933, according to the latest statistics, ate more pork and less beef and eggs than in the preceding three years. In 1932, also, more turkeys, ducks and geese were eaten than in 1931, but less than in 1930 and 1929. Again, in 1932 the consumption of chickens was less than in the preceding year.

Reckoning on a per capita basis, every Canadian man, woman and child in 1932 individually consumed 91.70 pounds of fruit, 64.02 pounds of meat, 6.97 pounds of eggs; 7.37 pounds of chicken; 1.79 pounds of turkey; .41 of a pound of duck; .53 of a pound of goose; and 32.50 dozen eggs. The estimated total consumption for the last year is: Fruit, 1,011,000,000 pounds; meat, 699,057 pounds; mutton, 73,923,000; chicken, 83,222,443 pounds; turkey, 19,436,340 pounds; duck, 4,368,253 pounds; goose, 5,670,000 pounds, and eggs, 357,949,320 dozen.—Dominion Department of Agriculture.

Canadian Height For Aerial

Thirteen Stakes Place Island

Negotiations have just been completed to permit experimental television transmissions from the south tower of Crystal Palace.

The transmissions will be made for the first time, on ultra short waves below eight metres.

This tower is regarded as ideal because of its commanding height. It stands 250 feet above the Thames level.

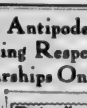
Recently H. Thomas, the assistant organist of Crystal Palace, a wireless expert, carried out experiments from the north tower with his amateur transmitter (Q6Q6), using a five-metre wave.

Reports of successful reception came from various parts of the country, some 200 miles away.

Somebody says mothers is more rampant at flower shows than anywhere else. Slaughterhouse, no doubt.

England will not pay its subsidy to grand opera this season.

Winnipeg Newspaper Union



By Ruth Rogers

THE CORRECT FOUNDATION FOR YOU!! IT MOULDS THE FIGURE

Here's the most popular slip of the season.

And easy to make—well, I guess! Practically only two parts to the pattern.

It is pressed into inverted pleats at the sides to allow perfect freedom without distorting from its straight hanging line.

It may be made in satin or street crepe.

Style No. 797 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust.

Size 16 requires 2¾ yards of 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Hon. S. J. Hanson Will Head Committee Named At Geneva

Canada will be represented at the meeting of the assembly of the League of Nations by Hon. R. J. Manion, minister of railways; Hon. Philippe Roy, Canadian Minister in Paris, and Dr. L. A. Riddell, Canadian Advisory Officer to the League. Announcement of the selection of the Canadian delegation was made by Sir George Perley, Acting Prime Minister.

Dr. Manion will head the delegation and left for Europe on Sept. 3. This will enable him to make a study of the situation before the opening of the assembly in Geneva on Sept. 20. Two substitutes were also named, Hon. C. Howard Ferguson, Canadian High Commissioner in London, who is now in Canada, and J. Dear, of the London Office.

Losses In Natural History

Fruit Planter In London Says Wasps Work For Mankind

Do you hate wasps? Yet, but what do you know of them. I have received my first serious lesson in natural history within a Daily Sketch correspondent.

Hyde Park is swarming with caterpillars, and Arthur, the 70-year-old chair attendant, informed me that he had been waging war against them for the past 30 years. The waste of time annoys him, who spends his days retailing fruit at a spot near the Marble Arch entrance.

"Serves 'em right," she informed me. "Serves everybody right who owns 'yde Park for hiding all the wopses like they does." She has an idea that wopses are the natural exterminators of caterpillars.

"To think 'ow they're treated nowadays," she said, with a shake of her head. "I allus use to everybody. 'Don't be too 'ard on 'em, for if it weren't for the wopses there would be no fruit, although I were likely to a bit of a nuisance when they commence to crawl.

"They don't sting unless they're provoked. Why, if it weren't for the wopses a working 'ard all May pass I couldn't get a decent crop, also a fruit 'arvest. Wopses be useful if they're let alone, and they do good work.

"I well remembers the time," she went on somewhat dreamily, "when the nests in the country used to be found on the wopses to keep down the grubs and insects, let alone the flies. Think of the hundreds of maggots they can eat in a single day.

"In some fruit trees and bushes the leaves be all curled back in a most curious manner. The farmers and gardeners call it 'blight,' but if they wasn't so fond of killing the wopses there wouldn't be so much blight, and the farmers and market gardeners can't do for their crops what the wopses can do. It's only since the farmers and the market gardeners 'ave 'unted the wopses and used 'oser'-killers that there's been so much blight."

Magazines For Sale

About 2,000 Received Regularly By Montreal University

McGill University, Montreal, is one of the largest subscribers of periodicals in the world. Records completed to show that the university regularly receives some 2,000 magazines, these are in addition to those received by the regular way, a total of 930 are presentation subscriptions, while 508 are on the exchange list with other universities. The remainder have been raised one of the best in the world by visiting librarians.

Constructed a century ago, the front of the British Museum, London, England, has been demolished for good time, only soap and water being used.

Forest Nursery Stations Show What Can Be Accomplished In Reforestation Of The West

The scheme under which trees are supplied by the Dominion government for prairie farm planting in Manitoba, Saskatchewan and Alberta, was first inaugurated in 1901 by the late Hon. Clifford Sifton, who was at that time Minister of the Interior. At that time the general opinion was that trees could not be grown on the prairie and for that reason it was very difficult to interest farmers in the line of work. In January and February of 1901 a large number of farmers' meetings were held in the three provinces, at which the scheme was discussed. Very little enthusiasm, however, was aroused, only some 30 trees, in all, in the three provinces altogether being distributed to any one applicant. Where trees are neglected, they quickly deteriorate, but the settlers, although very few, derived from well planned shelter belts are so great that one is well repaid for the comparatively small amount of labor entailed in keeping them in good condition.

The farmer in these lean-s of years is realizing to a great degree what it means to have a good garden and fruit plot, which cannot be developed satisfactorily without adequate protection. Perhaps it is on account of the very unsatisfactory farming conditions at present, but the fact that more interest is being shown in tree planting than ever before. Then, too, the system of loaning trees for the improvement of the farm home by plantings of ornamental shrubs and flowering annuals has now been established shelter belts are getting very satisfactory results with fruit of various kinds, such as apples, crabapples, plums, hybrid cherries and all varieties of small fruits. Besides adhering a very interesting list of well selected perennials all the fruit required for the farm family can be raised at home and there is a very considerable surplus is raised which can readily be disposed of to neighbors at very reasonable prices.

At the Indian Head forestry station the grounds are laid out attractively planted with trees, ornamental shrubs, flowering and hedges and provide an excellent demonstration of what can be accomplished under the most unfavorable prairie conditions. A small area is set aside also in which hardy varieties of apple and plum trees are grown. Several acres of different kinds of trees in various plantations, are also under cultivation, and to those who may have any doubt as to the practicability of growing a home supply of fruit the experimental farms system, under Dr. E. S. Archibald, director of experimental farms, at Ottawa has proved that from these out can be obtained.

Visitors are always welcome and any one who can within reasonable distance of either the Indian Head or Sutherland nursery stations, would be well repaid by spending a few hours looking over the grounds and plantations.

Danger In the Kitchen

Place Where Large Percentage Of Accidents Occur

The kitchen doesn't ordinarily seem like a dangerous place except perhaps when a truly .serapert cook concerting indigent ite dishes is he; and doesn't wish to be disturbed.

But there were 36,000 deaths in a year from accidents which took a part in the homes of the United States and fully 34 per cent of these occured in kitchens. Falls and scalds seem to be the most prolific sources of home accidents. And while it is not difficult to see just how a safety code can be devised and enforced for the home, a little care and forethought in the midst of the daily round of activities ought to save a good many lives each year.—Cashmen News.

An old bachelor says that if it is impossible for a woman to do anything better than a man. Evidently he has never seen a woman push a broom.

France has one doctor to every 1,500 persons.

EMBRACING HINDUISM FOR LOVE

A favorite resort at Chalk Farm, London, as Miss Jessie Wentworth Bishop, an English girl, was received into the Hindu faith. At the left is G. S. Pathar, son of a Hindu millionaire, whom she married a year ago. At the right is Dr. Mesonja, president of the Hindu Male Sadha, who performed the ritual that made the girl a full-caste Hindu.

WORLD HAPPENINGS BRIEFLY TOLD

The "Royal Scot" which has visited Chicago World's Fair, will arrive in Canada at Vancouver it will start its Dominion tour October 26.

Terms of a Franco-Russian commercial agreement for an interchange of products between the two countries has reported reached yesterday. Negotiations

Falling asleep in his field in a grain field at Clarvel, Alta., Mike Hamaguard three years, was instantly killed when his father, not noticing the sleeping boy, ran a binder over him.

Archbishop C. Maseberg, 64, former Canadian member trade commissioner in London, England, and prominent in Canadian lumber circles, died in hospital at Toronto, after a long illness.

The third "plane brought by the government of Saskatchewan from the Royal Canadian Air Force this summer has been brought from Ottawa, with Flight-Lieutenant F. M. Carter, chief pilot of the Saskatchewan flying service, at the controls.

Hope are better seeds than grain competing at the Canadian International exhibition, Toronto. Five cleaner, wood, rolls and bone, baking powder biscuits, ginger-bread and omelette — over hope into other pleasant girls eight in the 17 awards.

Moving of Bengal airmen Fitzgerald-Fort Smith flights perhaps by aeroplane now is under way, according to reports received from the north. The freight is placed in yard Mr. Brown of Fitzgerald and flown to Fort Smith at the rate of one ton per hour.

Canada's new convention loan may ready be launched around Oct. 1 instead of Oct. 15, the date previously announced, according to reports in well-informed circles. The success of the Canadian loan in London and the improvement generally in the money market are given as reasons for moving the date ahead.

Prefer Staying On Ship

Fort Of Churchill Has No Attraction For Sailors

While skippers of the deep water vessels who have arrived at Churchill this season say they are delighted with prospects of business in and out of the port, the crews turn a cold eye on the construction camps and the harvesters.

They claim it is the defiant of all the 97 varieties of ports they visit in the course of a year or two. Make no running ashore for the most part, they say an odd game of English billiards, say an occasional evangeuds, and purchase a few picture post cards of Churchill.

When signing for the "seas, women and cargo" of other ports sailors say they crouch their mail over the pages of maps and go without their holiday leave.

Deadlock Left Feature

Accumulated Loaga Stands In Lead Thirty-Five Yards

Pierre A. Jaccard, of Montreal, who accumulated a fortune chiefly from, left an estate of $180,815 gross and $131,901 net, according to a transfer tax appraisal herein, says Dail of July 17, 1926, owned the beneficial connection in the Grand Central Terminal in New York for 25 years. A native of Hughes, he came to America when he was 25 years old and started his career as a bookkeeper on the street. Only $17 of his estate was in stocks and bonds. He had $66,-000 in New York and Westchester real estate, 11 bank accounts totaling $33,000 and mortgages limiting $7,500.

Near Trade Honor

A new trade commissioner is to be appointed to represent Canada in Britain, it has been announced at Ottawa. The special duties will be to develop trade in Canadian fruit in the United Kingdom and he will receive the initial salary of $4,500 and full living allowance The department of trade and commerce expects to receive an expert in Canadian fruit growing for the position.

Veteran cleaners are replacing the basket and mop as dock cleaners on British war vessels.

Gas From Coal

Huge Industry Being Established, An Industry Which Will Furnish Much Employment

One of the most striking of all the developments that have recently taken place in Great Britain is that of the production of petrol from coal. A week or so ago Prime Minister Baldwin and Sir Alfred announced in the House of Commons that it had been decided to place a preference of fourpence a gallon on petrol so produced, and this was immediately followed by the public statement of the Imperial Chemical Industries that the construction of a plant to cost $20,000,-000 at Billingham-on-Tees would be proceeded with at once

Archbishop C. Maseberg, 64, former Canadian member trade commissioner in London, England, and prominent in Canadian lumber circles, died in hospital at Toronto, after a long illness.

Recipes For This Week

(By Betty Barclay)

FARMER SOUFFLE

Cook four medium-size parsnips in boiling water until tender. Remove skins and rub through a colander. Add one tablespoon butter, salt, one-eighth teaspoon pepper, one teaspoon sugar. Add to the parsnips together with one cupful thick milk. Beat two tablespoons of butter in a saucepan, stirring in two tablespoons flour and one cup milk. When the mixture thickens and boils add to the parsnips, together with the yolks of two well-beaten eggs. Mix lightly and fold in the whites of eggs and put into the baking dish and bake for 25 minutes in a moderate oven. Remove and serve immediately.

RAISIN AND APPLE CONSERVE

2 cups blueberries.
2 cups tart apples, chopped.
1 cup raisins.
Juice of 1 lemon, grated.
Rind of one-half lemon.
3 cups sugar.

Combine all the ingredients except the nut meats. Cook until the mixture is thick and clear. Add the nut meats just before taking from the fire. Pour into hot, clean glasses and seal.

Wrong Cod Liver Method

An electric "concentrator" is being tried out in the slaughter house at Milton, Italy. The carcass is boiled in a solution of a 70-volt current, which is said to make the tenderizing to pain for a time unnecessary. The result is not pleasing slaughter. Until it can be fully determined whether the electricity has a harmful effect on the meat, the new system will be used as an experimental stage. Technical reasons forbid use of a current strong enough to produce instant death.

Artificially dried hay contains practically 100 per cent. of the nutritive value of the original grass, when harvested, and every fed on it produces milk and cream of the same quality and produced when they are eating summer grass.

SNAPPY, WEARABLE AND CHIC
JAUNTY PEPLUM EARLY FALL MODE

Develop this modish dress in thin plain rough woolen weave in grey, topped by a tweedy striped grey woolen. You'll love it because it has so much dash and chic.

Plain or printed silks are also suitable.

It is lovely in grey crinkly crepe silk with contrast pulled sleeves in the small view.

Style No. 680 is designed in misses 14, 16, 18, 20 years, 34, 36 and 40 bust.

Size 16 requires 3¼ yards of 39-inch material for skirt and collar and 1¼ yards of 54-inch material for vest.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Flowering Flower Bulbs

Method Finds They Are Dug Up Started At Present

A method of flowering bulbs has been held in the Western states particularly and in Holland generally. The object is to force the bulbs of the Easter lily in forcing their native to reduce the supply and increase prices. The Dutch have always had the pride of the nation, are now a drug on the market, after having made fortunes for many growers. In Japan the Easter lily has been brought in to cultivate, and thrown into profusion each year and prices have declined. Many fortunes have been made and lost in the bulb business. Thousands of acres were destroyed in this manner. Destruction went on "Japanese Bulb" committee for rehabilitation of the industry."

Railway Accidents In Canada

A total of 122 railway accidents, with 56 persons killed and 207 injured occurred during the month of June in Canada, according to a statement issued by the board of railway commissioners. Of the 122 accidents 10 took place at highway crossings. Ontario led the provinces with seven highway crossing accidents.

One ounce of tungsten is used to make 17.7 miles of wire, three hundredthousandths of an inch thick, for three-watt electric lamps.

SUNDAY SCHOOL LESSON

SEPTEMBER 26

JONATHAN

Golden Text: "A friend loveth at all times." Proverbs 17:17.
Lessons: 1 Samuel, Chapters 18-20.
Devotional Reading: Romans 12:1-8, 16.

Explanations and Comments

The Shepherd Believes Jonathan and David, 18:1-4. Jonathan, Saul's son, had watched Samuel's tender David and he was present when Abner, captain of the army, brought David the victorious champion of Israel to the king's presence. While Saul talked with David, Jonathan's heart went out to him, his soul was knit with the soul of David, and Jonathan loved him as his own soul.

As the devoted friendship of the two young men is disclosed in the narrative, we marvel at the disaster that came on Jonathan. Though he was the heir to the throne, he had no personal ambition. He was content to be the king's companion. Saul's acts were all against his love for David. Nothing could better express the sublimity of Jonathan's character. Matheson says, "Thus the words 'Jonathan stripped himself of the robe that was upon him, and gave it to David, and his apparel, even to his sword, and to his bow, and to his girdle' form beginning to end, the love of Jonathan for David was a self-denying, a divestiture. Only the noblest nature can love one who is in debt and whose success means one's own ruin."

"As one lamp lights another, nor grudges less,
So nobleness enkindleth nobleness."
Lowell

"Blessed are they who have the gift of making friends, for it is one of God's best gifts. It involves many things, but above all the power of going out of one's self, and appreciating whatever is noble and loving in another."—Thomas Hughes

Biologist Speaks Or Heredity

Education Is Also Needed To Produce Brilliant Men

The children of brilliant parents will never be as brilliant as their parents, but they will be above the average," said D. Ward Cutler, in Shaugut, at the British Social Hygiene Council luncheon address at Caxton Hall.

Mr. Cutler was the guest of the luncheon which was attended by a number of leading physicians and scientists.

"Nor do I believe that heredity can ever produce any of these men without the right environment and education.

"Plenty of love and cod liver oil," was urged by Hon. Mrs. E. Phelps, as a better dietum than much of the so-called "modern" training of children, at the World Federation of Education Associations in Boston.

"With all our scientific planning," she said, "the child's heart still leaps when he beholds a rainbow in the sky. But this part of the child is often starved."

Symbol Of Friendship

Canadian Institute Of International Affairs Receives Fitting Present From Japan

Symbol of Japanese friendship toward Canada, a handsome picture by noted Japanese artist has been presented to the Canadian Institute of International Affairs by the Japanese group interesting the Pacific Relations Conference. The picture was presented to the Canadian group by Dr. Inazo Nitobe, leader of the Japanese group and accepted by E. J. Thornton, Sir Robert Falconer, Toronto, and W. H. Birks, Montreal.

The handsome-framed picture is about 3½ feet by 2 feet in size and done in silk which, it is said, will endure almost 1,000 years. The painting was done by Koppo Araki, one of Japan's great artists, especially as a gift to Canada.

Many Apply For Job

Advertising for a girl to assist in his St. Catharine St. office, salary dollars a week, John H. Bunting, contractor of Montreal, received 400 replies from men and women. Applicants included former office and factory managers, members of the architectural and legal professions and graduates of the business of arts, commerce and engineering of McGill and Toronto Universities.

Linking World By 'Phone

Tuesday Building In London Will Serve Over 12,000,000 Subscribers

Faraday building, in the city of London is to be the centre of a gigantic spider's web of world-wide communications, equipped to serve over 12,000,000 telephone subscribers.

When completed, its 11 spacious storeys, covering a superficial floor area of 160,000 square feet, will be the most scientifically controlled building in Europe

Many scientific devices to assist the operators and safeguard submarine lines have been added. These include:

Special automatic timing apparatus which checks conversations periods on the continental and inland trunk services to a fraction of a second.

Two stop-watches attached to the exchange panels used for radio telephony check calls to one-fifth of a second.

White and green lamps signify to the operator, by pressing a button the state of line at the continental exchange This saves time by advising subscribers of the length of delay.

Small spot light systems reveal also the special line when lodging radio telephone or inland trunks

Revolutionary changes are to be made in certain services be bring them up to date

Chief among these will be the extension to the extreme of the "service on demand" to practically the whole of the inland long distance system from London.

Service is housed at Faraday house will include: A new toll exchange to serve 1,000,000 subscribers in and around London; city and central exchanges to be transferred from Carter Lane, E.C., the international switchboard at Carter Lane to be removed.

Secret In Velocity

How Self-Mouthed Creatures Tunnel Hardest Wood Problem For

The following article by W. Booth Thomas, appeared in the London Spectator:

Will our men of science who concern themselves with natural history settle the following point? How do caterpillars and other rather self-mouthed creatures tunnel the hardest wood? Is their secret mechanical or chemical? I saw this week a hole of singularly hard English oak of considerable age converted almost into a comb by the caterpillars of the Goat Moth moth. The beast is large and powerful and of that warning yellow coloration which suggests vermin. Yet, even when even of the beasts is small, and a priori, it looks impossible that it should tunnel a substance which is more hard than nails. It is a natural inference that the caterpillar ejects some chemical to help it. If it, it might be of as little importance to discover exactly what is this wonderful stuff which may make collectors rest and painstake. Did not Mr. Holdane prognosticate this feat as one of the final revolutionary developments of the future.

Loss Made In Lepers

British Optimism Have Produced Unbeatable Glass For Spectacles

The great fear of spectacles being broken while worn and causing serious injury to the eyes is to be removed following long research by British opticians.

A lens made in layers, which, said the manufacturer to a newspaper representative, did not break when hit with a hammer, has been perfected.

It was tested for 500 hours with ultra-violet rays; boiled up to 500 degrees Fahrenheit, and baked in ice cream.

After that it was frozen in a refrigerator.

Records Not So Meagre

Recalling that when Henry Travis of Pelham, Wash., won a local "brain-wheat" contest, fellow grain growers promoted him with three gallons of ice cream, Junior is inclined to think that probably the records of agriculture are not so meagre as they recently have been pictured.

Aberdeen, Scotland, faces a water shortage.

CENTRAL BANK PLAN IS OPPOSED IN THE EAST

Halifax, N.S. Board on of a central bank, widely advocated before the royal commission on banking in western Canada, did not receive support from the Halifax Board of Trade when that body made representations to the commission here

It was the final sitting which Lord Macmillan and his four colleagues have held in the Maritime provinces

The head of the board of trade was presented by A. B Whynell, vice president of that body. It concluded by saying that the chartered banks be permitted to carry on as in the past, subject to such amendments of existing legislation as the commission might consider advisable The board of trade expressed the view that "the federal government should at Ottawa, by keeping in touch with the Canadian Bankers' Association, or heads of the larger banks, be capable of providing for the financing of the country, the movement of the crops and to meet any emergency which may arise from time to time"

The Canadian banks had come through the years of "stress and depression" with credit to themselves and with the commission at other centres where serious banking conditions had prevailed, the board of trade asserted. It expressed the view that the expense connected with establishing a central bank would outweigh the benefits to be derived from its creation.

Lord Macmillan interjected that a central bank would not necessarily be a very costly affair. The control of credit and the issuance of currency were functions usually associated with a central bank, he said

Under present conditions, for instance, there would come from the criticism because the control of the note issues was in the hands of a political body. Dominion notes were issued by the government after the deposit of certain securities by the banks.

Miners, fishermen, agriculturists and lumbermen in eastern Canada were also having a hard time, Mr Whynell reminded the commission in referring to western representations on behalf of the wheat farmer.

This view was heartily concurred in by A. H. Whitman, who took up the situation from the point of the dry fish industry.

"As far as I can judge there is no demand or desire for a central bank or for any radical changes in the Bank Act," Mr. Whitman said. "It is not never been refused adequate credit for his requirements by the banks.

Search For Old Forts

Expedition To North To Unfold Glamorous History Of Early Days

Prince Albert.—A unique expedition left here recently when Professor M. A. Innis, of the University of Toronto, and J. B. Tyrell, Toronto, president of the Kirkland Lake Mining Company, set off in an outboard motored freighting canoe with two guides to search for locations of old forts on the North Saskatchewan and Saskatchewan rivers, east of here.

One of the objects of the expedition will be to relocate the remains of Fort a la Corne, originally established in 1746 by La Verandrye and first named Fort St. Louis. Some doubt has arisen as to the exact location of this fort and these on the novel expedition will attempt to remove these doubts. This is one of the oldest forts known in the history of the west and about it and the other forts in this part of the province is written the glamorous history of the early fur trading days when the flowing streams in this part of the province were the main arteries of travel. The two will spend a month in their quest.

Guinea Fowl Disease

Toronto, Ont.—Food shortage in Ennis county, announced the Ontario Department of Agriculture, has left the cattle and hog-raising industry in the southern county in a serious condition. Probably 10,000 head of livestock, including cattle and hogs, will have to be sold at a sacrifice on account of food shortage.

Deplores The Debt

Speaker At Calgary Contended That Relief Is Becoming A Racket

Calgary, Alta. Unemployment relief in Canada is becoming little more than a racket, with both politicians and unemployed engaged in "playing" it, declared Rev. J. H. Craig, of Wilkes, in addressing a service club. The Canadian system is a dole, pure and simple," he said, "encouraging pauperism and

The nation owes no man a living and should not be in debt over him the opportunity to make a living. The plea for "easy money" is based on false understanding, and easy money has ruined the western farmer, Mr Craig declared

The speaker asserted the Canadian Goodrich Industries of Wilmington had started with nothing but donations of used clothing, furniture and other articles and the voluntary work of a few men and women, had grown into an institution paying $15,000 in wages annually and providing employment for 160 to 150 persons.

Cutoff articles were collected, repaired, and sold for wages Thousands did not have to be permanently on unemployment relief measure, yet it believed such schemes whereby a man could earn a tool to his hand is better than a coin in his hat were immeasurably of greater value

The state was being called on to do what the individual should be doing or the community he added The western church had almost reached the limit of its helpfulness, for the reason its social service activities were left to the pastors.

Experiment Of United States Being Watched

Countries Interested In Stabilization Of Currency Through N.R.A.

Opinion

Banff, Alta. If the United States can stabilize its dollar through the operation of the N.R.A. stabilization of currencies by three or perhaps four other great nations will follow, and thereafter will come stabilization of currencies of the rest of the world This, in brief, was one conclusion reached at the conference of the Institute of Pacific Relations just ended.

Meanwhile, other countries are closely watching the progress of the N.R.A. application, and the importance of the experiment, having regard to the social and economic welfare of the people of the world, cannot be overestimated, it was agreed.

Currency stabilization in United States, Canada, Japan, China, and solutions of the problems of population pressure, as insistent in Japan and China, of trade conflicts, as for instance, the bitter rivalry between Lancashire and Japanese textile spinners, and of disturbed relations between countries like Angola of China and Japan over Manchuria was given as an example.

Ontario's Relief Bill

Estimated Total Of $60,000,000 To End Of Present Year

Toronto, Ont.—At the end of Ontario's fiscal year, it is estimated a total of $30,000,000 will have been expended within the province on relief by the provincial administration and municipalities. Of this sum the provincial exchequer will have provided about $12,750,000, the Dominion about $5,-500,000 and the municipalities about $4,750,000.

Should the first of 1930 to the end of July this year, the total bill was $77,980,000, of which the province has contributed $27,986,000, the Dominion $22,100,000 and the municipalities $28,900,000.

Brandon Aviator Injured

Accident Occurred When Propeller Of Machine Broke

Brandon, Man.—Crashing to the ground when the propeller of his aeroplane broke, Alvin Kennedy, instructor for the Brandon Aero Club, escaped serious injury, but was detained at the Brandon General Hospital, where minor injuries were attended to.

The machine had been built locally and was owned by Gordon Brown. It had been taken up as high as 1,000-feet, Kennedy said, as the pilot put it, "behaved well."

Angus L. MacDonald, 43-year-old native of Inverness, N.S., leader of the Liberal Party in Nova Scotia which secured 21 out of the 30 seats at the polls in the provincial election held on Tuesday. He succeeds Premier Rhodes, who was defeated in his own constituency.

Americans In Danger

Request For Warship To Protect Priests At Foochow, China

Washington The state department received a request from a member of the Asiatic Fleet has been requested to send a naval vessel to Foochow China, where American missionaries were reported to be in the danger zone of operations of Communist forces

The request for a warship was made by the American Minister at Peiping The department said the purpose of the vessel was "to be available for the protection of Americans in the event of an emergency."

Two warships the Tulsa and the Sacramento, are within short steaming time from Foochow the former at Swatow and the latter at, Hong Kong

The three Americans reported in the danger zone were Father Paul Carver, Father Richard C. Wermer, and Father John H. J Werner.

Conquers English Channel

Dover, England.—The English Channel was conquered for the first time this year when Miss Sunny Lowry, 23-year-old Manchester girl arrived at South Foreland after swimming from Cape Gris Nez, France, in about 15½ hours She had made two attempts hours succeeding in becoming the 19th swimmer and the eighth woman to swim the treacherous strip of water.

Battery Driver Was Asleep

Lethbridge, Alta.—Automobile accident which caused the deaths near Macleod, Alta., of Constable Joseph Farrell and Sergt. J. Stockdale, both of Lethbridge points force, resulted when Farrell fell asleep at the wheel in the opinion of the coroner's jury empanelled here.

Conciliation Board

Will Hear Wage Disputes Of Railway Employees

Ottawa, Ont.—Hon W A Gordon, Minister of Labor, announced he had appointed two boards of conciliation to hear wage disputes between the Canadian National and Canad an Pacific Railways and their employees

The first board will inquire in a dispute between the Canadian Pacific Railway and its clerks, freight handlers and station employees, numbering about 1,000 George R. Carre Montreal and W. F O'Connor, Toronto will be two members of the board, representing the company and the men. They will select a third member who will be chairman.

The second board will investigate two wage disputes between the Canadian National Railways and its men. The first dispute involves 4,200 men, clerks freight handlers laborers and employees of the ferry service between Tumucumpe, N.B., and Borden, P.E.I., and wharf employees at Halifax. The second dispute involves 847 employees, clerks of the railway's headquarters at Montreal Two members of the board will be F. C. Dobell, Montreal, representing the company, and Rev. Russell McGillivray, Ottawa, representing the men. They will choose a chairman.

Dawson Has No Unemployed

Summit Activity In New Gold Fields Has Absorbed Labor

Victoria, B.C.—Dawson, in the Yukon, is one city in Canada that can report an absence of unemployment, according to G. A. Yardley, customs inspector, who has returned from an annual inspection tour of the Yukon All labor in Dawson has been absorbed by recent activities in new gold fields. Mr Yardley stated, and he predicted another boom in the Yukon country.

Freight imported into the country this year was 800 tons greater than 1932 figures, which in turn were 800 tons greater than those of 1931.

He predicted that output of gold from the Yukon this year would be between $250,000 and $400,000 greater than last year.

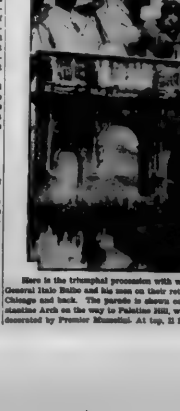
Raps National Recovery Act

Nebraska Man Describes New Movement As "Pure Bunk"

Lincoln, Neb.—John H. Simpson, Farmers Union of the National Farmers' Union, said he didn't blame individual farmers for taking all the government could give under the United States crop reduction plans, but added:

"It is against the laws of God and nature to plow up cotton, destroy things that could be used for food, and limit production."

The N.R.A., Simpson asserted, is "bunk, pure bunk to keep the workers' minds off the real thing and is inspired by Morgan and Mellon and others."



Here is the triumphal procession with which the Eternal City welcomed General Italo Balbo and his men on their return from the epic mass flight to Chicago and back. The parade is shown coming through the historic Constantine Arch on the way to Palatine Hill, where the fliers were received and decorated by Premier Mussolini. At top, Il Duce is shown decorating Balbo.

Train Goes Through Bridge

Five Drown And Many Missing In U.S. Mishap

Tucumcari, N.M.—At least five persons were killed, injured and many passengers were missing when the "Golden State Limited, crack Rock Island train, plunged through a bridge into a water-filled draw five miles west of Tucumcari.

Seven coaches went into the water, along with the locomotive The draw, ordinarily dry, was a raging torrent fed by heavy rains.

The "Golden State Limited" was enethound from the Pacific coast.

Passengers Get Thrill

Sky-Riders Stalled Between Towers For Over An Hour

Chicago Several passengers on the sky ride at the world's fair had a thrill when three cars were forced to halt at mid-trip by a broken telephone wire that fell across the cable supporting the cars. Hanging 210 feet above the lagoon across which the ride takes passengers between 600-foot towers, the passengers remained calm and surveyed the fair grounds for some time, an hour while workmen in tiny chairs that run out on the cables fixed the wire.

U. S. EMBARGO ON GOLD EXPORTS IS WITHDRAWN

Hyde Park, N.Y.- Acting with dramatic suddenness, President Roosevelt issued the United States gold embargo to permit sales of the newly-mined metal to foreign markets, where prices are higher.

At the same time the president tightened the prevailing restrictions against hoarding by requiring all persons holding gold coin, gold bullion or gold certificates in excess of $100 to file statements of their holding, within 15 days.

After 30 days all private gold holdings of more than $100 will be p. chinded unless valid reasons are shown why the metal cannot be replaced by currency.

It's decree would appear to nullify the recently authorized plan permitting American producers to export concentrates and semi-gems to foreign refiners for refining and export. Leading United States producing mines had applied to Canadian authorities for refining of their gold ore, but the order relieves United States producers of the necessity and expense of exporting for refining and round-about marketing.

Treasury officials interpreted his order as meaning that newly-mined gold could be sold in the world market at prevailing prices of around $20 an ounce as contrasted with the fixed price of $20.67 an ounce.

Gold mining shares immediately shot upward on the New York stock exchange, one issue advancing more than $15 to a record high.

Treasury department officials foresaw a quickening of activity in the gold mines of the west with profits increasing by more than $15,000,000 a year, as the president reopened the export trade to American and foreign presidential decree to effective immediately

Junior Trade Commissioners

Two Western Candidates Qualify For Appointments

Ottawa, Ont.—Robert A. Chitheron, Edmonton, and Christopher H. West, Cranbrook, B.C., were among the six high ranking candidates for posts as junior trade commissioners, the civil service commission announced. They probably will receive appointments shortly.

J. M. Boyer, Hartland, N.B.; Greig B. Smith, Ottawa; G. J. Hamm, Montreal, and Leland Aumaun, Toronto, were the others in the first half dozen in examination marks.

More than 400 candidates wrote on the examinations after which oral examinations were given to 37 who stood highest, the examining board being across Canada for the purpose. The six candidates will be named junior trade commissioners, it is expected.

Air Service Across Pacific

Dodgers For Powerful Machines Necessary Are Now Completed

Within two years' time 12 passengers will be able to board a 6,000-horse power plane in Manila and arrive in San Francisco four days later, if present plans of the Pan-American Airways for a passenger-freight service between San Francisco and Hong Kong are realized, according to Major James H. (Jimmie") Doolittle, famed American speed flier and test pilot.

The schedule of stops includes Honolulu, Wake Island, Guam and Manila. The company estimates coverage of the proposed route in Hong Kong in five days their aeroplanes reaching Manila in four.

Dooliga for the powerful machines necessary for such an undertaking are nearing completion. Outstanding features will be four 1,500-horse-power engines in each machine.

The passenger service, according to Doolittle, should be postponed until flights with mail and cargo have proved the safety of the trans-Pacific venture

An Interesting Study

Bee Keeper Who Is Interested Discovers Many Mysteries

Bee farming is a most interesting study to one who wishes to delve into the mysteries of nature. The little winged sugar makers certainly are clever insects and provided one can, especially in these northern climes where the winters are severe. William Pulleyblank, a local bee fancier, is engaged in on the other day mentioned his hives and the fact that he had lost quite a number of them by burning as a result of which the queens escaped. We asked him about the new kind of bees with the long tongues—the insects that are able to reach further into the red and crimson clover blooms and extract honey that the ordinary bees cannot access. He said that these new bees were of a Russian breed and that a bee keeper in Bedingfelds had secured some of them for Provincial purposes. The Bedingfelds man brought them from a Texas bee man and then the bees were put on exhibition. Another peculiarity thing about bees is that the insects raised in southern climates, where they are gathering honey all the time do not lay up honey to any extent but when they are brought to a northern country they immediately begin to lay up food for the winter. Nature apparently informs them of their necessity and then the bee keeper is able to profit by the talent of Providence.—St. Mary's Journal-Argus.

Have Faith In Future

People Could Learn Lesson From Farmers In West

The Minister of Agriculture for Manitoba has made a survey of farm conditions in his province, and has this information to find there are 1,000 farmers who have a total crop failure this year and many more there are who have not registered total failure who are not bad, but the most we would be large.

The farmer who has a total failure can do nothing about it. The results in the season which would have given him a chance to get a crop are gone and gone; they will not again return this year It is dishonest to think of anything without and therefore more than the farmer who has registered a total crop failure. He cannot in conscience do more; he has secured no reward for his labor.

And yet, in face of that, we are informed that many of the people in that district are beginning to be discouraged and talk in terms of the crop they expect to have next year.

If men who have a small crop failure in 1931 are able to hold up their heads, then the rest of us should feel ashamed when we do much complaining.—Stratford Beacon-Herald.

England Has Unusual Law

England has a new home law. It authorizes the magistrates to deprive the owner who has been convicted of cruelty to his dog of his ownership, or to even have the custody of a dog. No other country in the world, it is stated, has adopted such a measure.

Expert At Nest Building

Birdside Are Queer Fish Seen In London Zoo Aquarium

Birds aren't the only creatures who build nests writes Craven Hill, F.Z.S., in Tit-Bits. There are fish who can build nests, too, and some of them are every bit as expert at the business as nesting birds.

You don't need to go out into the countryside to see them. You can see them quite excellently, at the London Zoo aquarium.

Spring makes its influence felt among the animals there every bit as much as in the rural districts. Not only do some of the male fish take on brighter colors then usual, but they are very much more lively and pugnacious than at other seasons, while as for the nests they make—well, look at the exhibits.

The exhibits are very beautifully colored fish from African waters. At the proper season you can see both parents preparing a nest. This they do by sucking in mouthfuls of sand from one part of the tankbed and throwing it out again as another, just as a savvy digs away at one spot and throws the debris into another. Presently they have a nice little hole in which the females eggs are laid.

Another aquarium fish, the East African perch, when hatched with the eggs in a family, actually turns her own mouth into a nest. As soon as she has laid her eggs she collects them all up in the running round gathering up a few hundred thousands!" and carries them about inside her mouth till they hatch, which is in about three weeks. She manages to feed without swallowing her infants at the same time is a mystery.

Of course, when the babies hatch out, the mother lets them feed for themselves, for she might find it awkward to go swimming round with a mouthful of vigorous young fish inside. But if the babies are in any danger, they do not hesitate to rush back to their mother's mouth.

Yet another nest-maker in the Chinese paradise fish, only in this case the mother leaves all the work to the harassed father. He makes the nest unaided, and he does it by blowing bubbles of air through bubbles on the surface of the water. The bubbles are so made that they all hang together and look something like a transparent sponge.

The father's duties do not end there, for when his wife lays her eggs he takes them in his mouth and puts each one carefully inside the curious floating home that he has made. For the mother-fish has a reputation, and, if the father retained her vigilance for a moment, she would gobble up the lot quite cheerfully.

Origin of the Soil

Evolved Steps Build Root By Chemical and Other Changes

Many people look upon the soil as a cold, inert, inviolate mass of mere sand and dirt, about which there is little to know, and in which there one be no interest," says Professor Sumner Cosper, of Ohio State College. "On the contrary to this, the true facts are that it is teeming with life. Its history is that of the history of the world; and its problems are as many and as deep as to challenge the best minds of the country. All soil was at one time solid rock. By a long series of chemical, mechanical, and biological changes it has been changed from the original rock into soil. Also new products grain, hay, pasture, apples, potatoes, violets, and geraniums. Many are the combinations which have operated in and formation. We may be astounded to thinking of rock as unchangeable, but, very slowly and surely, changes do take place. As measured in terms of the life of man, the soil is very old. It has been estimated that the formation of an inch of soil from limestone rock takes about ten thousand years. The processes which have changed rock into soil are still going on and now exert a very important influence on the fertility of our soils." — St. Thomas Times-Journal.

"I'm terribly worried. I wrote Jack in my last letter to forget that I had told him I didn't mean to young—after my decision not to change my mind, and he seems to have misunderstood me."

Given Good Results

Crested wheat grass has been tested extensively at the Dominion Range Experimental Station, Manyberries, Alberta, for the purpose of reseeding abandoned fields. Under the very dry conditions in the ranching area, this grass has given excellent results, Dominion Agrostologist.

Legion Is Not All

Men Of Some Of England's Residences Are Women Workers

Canada has entertained an interesting personality in Lord Snell, who is a member of the United Kingdom delegation to the fifth biennial conference, held in Banff, of the Institute of Pacific Relations. He is 61 years old, began his career as a farm laborer and has been successively groom, ferryman, clerk, agent, accountant, and a notable speaker on religious topics.

In a speech in the House of Lords on the subject of women's work, the Lord Snell, who is a bachelor, gave his views on marriage. "Men who fall in love and marry should be punished," he said. "Parents make a fuss if a daughter marries a poor man, but the prosperity for people who marry, a sort of compensation for reducing society of their intelligence for a time, would be a good idea."

Lord Snell admitted that marriage was sometimes happy, but "I don't pretend to understand why people get married," he declared. "But as far as I can see, when a fellow falls in love he goes completely off his head. He is absolutely lost to all sense or reason, and will do anything or think of anything but the welfare of the object of Providence.—St. Mary's Journal-Argus.

Trebled Salary For Artist

"Tipperary" Was Lucky Song For English Woman Singer

The woman who bought the very first copy of "It's a Long Way To Tipperary," and was the first woman artist to sing it, 21 years ago, is Miss Winifred Bay, of Birmingham.

Miss Bay, a music-hall artist, bought the just rights of the "song that won the war" from its author, Jerry Judge, for 15s. 6d. (about $3). Early in February, 1912, a few weeks after the song had been written,

"I produced the song first at the Grand Theatre, Greenwood, on March 12, 1913, and sang it with success both in London and the provinces. It soon became one of my assets and helped to treble my salary and I still sing it to-day.

"By the end of 1912 the song was being sung all over the country, and at Christmas I sang it at the Manchester pantomime," she says.

"Tipperary" world fame through a series of chances. When the Lancashire troops landed in France in the early days of 1914, they happened to enjoy singing the song. Someone at Blackpool and the tale of that holiday season "Tipperary" was the song hit of the moment.

Signed The Pact

A Negro taxi-driver was charged with having run down a pedestrian.

"When you are driving," said the magistrate, "and you see you are about to hit some person, you should signing your car."

"I did signed your Worship," said the Negro, "but dat man was signing, also, and he signed so much dat I or dat I could sing dat it just snicker-ly give me de automatic to do heed, dat's how I come to hit 'im."

Electricity-operated rods are being used to catch fish in England.

Effect Of Electrical Storms

Individuals React To Them In Various Ways

Some people were discussing the effect which electrical storms had on various individuals One lady admitted that she was terrified. She explained that when she was a child of eight years she had been looking out of the window of her home and had seen the lightning strike a tree. The tree was close to the house and she had been knocked over by the shock. Since then she said she had never been able to put away that feeling of fear when a storm was on. Some other person who always laughed at her, a foolish and useless thing to do.

It was also recounted that a youth of 12 who slept outdoors on the verandah of his home had declined to come in the house during the storm at the conclusion. His answer was that he rather enjoyed it all, and was on safe on the verandah as he would be elsewhere. He was having a good view of the storm and thought it was remarkable. His attitude is to be preferred to that of the person who wants to hide.

And yet it is natural to attribute the feelings of those who fear electrical storms. We can readily understand that the boy who, as a part of sport, saw the bare strands and received a shock at the same time, has a lasting memory in her mind. It also feels any better in the clothes closet during a storm, then that is the place which should be reserved for her.

OCCASIONAL WIFE

by

Author of "Jeretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Amon, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then proposes he marry him, but because Camilla does not stand the financial pace. A chance meeting, however, proves the way for another date. This time they walk in the park.

(Now Go On With The Story.)

CHAPTER VII.

"You think I am going to art school for the novelty of having something to do," Camilla began, as they walked through the park, "and that I haven't a serious thought in my head. You think I am a girl with a fortune and not an idea of earning a penny of my own. That's the girl you think I am as a savvy digs away at one spot and throws the debris into another. Presently they have a nice little hole in which the females eggs are laid.

Another aquarium fish, the East African perch, when hatched with the eggs in a family, actually turns her own mouth into a nest. As soon as she has laid her eggs she collects them all up in the running round gathering up a few hundred thousands!" and carries them about inside her mouth till they hatch, which is in about three weeks. She manages to feed without swallowing her infants at the same time is a mystery.

Of course, when the babies hatch out, the mother lets them feed for themselves, for she might find it awkward to go swimming round with a mouthful of vigorous young fish inside. But if the babies are in any danger, they do not hesitate to rush back to their mother's mouth.

Yet another nest-maker in the Chinese paradise fish, only in this case the mother leaves all the work to the harassed father. He makes the nest unaided, and he does it by blowing bubbles of air through bubbles on the surface of the water. The bubbles are so made that they all hang together and look something like a transparent sponge.

The father's duties do not end there, for when his wife lays her eggs he takes them in his mouth and puts each one carefully inside the curious floating home that he has made. For the mother-fish has a reputation, and, if the father retained her vigilance for a moment, she would gobble up the lot quite cheerfully.

AN EASY WAY OUT OF A MEAN JOB

Stains flush off with Gillett's Lye . . .

ONCE a week just pour Gillett's Lye—full strength—down your toilet bowls and drains. It removes all stubborn stains *without hard scrubbing and rubbing.* Cannot harm enamel, is non-injurious to plumbing. Kills germs and banishes odors, too.

Keep a solution of Gillett's Pure Flake Lye on hand for all your household cleaning. One teaspoonful dissolved in a quart of cold water makes a safe, economical cleanser. Use it for greasy pots and pans, the kitchen floor, sinks and bathtubs.

And be sure to get the genuine *Gillett's Pure Flake Lye.* Order a tin today. Ask for it by name at your grocer's.

GILLETT'S LYE

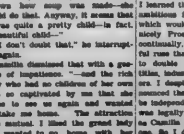
EATS DIRT

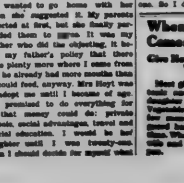
Free Booklet

The Gillett's Lye Booklet tells you how to avoid drudgery by using this powerful cleanser and gives the informant for dozens of other cleaning jobs.

Also contains full directions for soap making, dishwashing and other uses to which Gillett's Lye may be put. Standard Chemical Company, Limited, Toronto 2, Ontario.

Where cleanliness is next to godliness, Gillett's Lye is part of the line.





When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the sake of her health. Thousands have been helped by it during this critical time. When she is a happy, healthy girl and mother she will thank you.

THE RHYMING OPTIMIST

by Allen Hancock

WITHIN THE DREAM

In truth, I know I cannot mold
Life's ways to my desire;
But could you know the hopes I hold,
And share a flower and fire!

Could you not glimpse the loveliness
Which is my goal and guide,
Like shine and sheen of April's
tress
Like sunlight on the tide.

Yes, too, would then forget the care,
The hazard of the day,
And, caught within the dream I share,
Would walk the magic way.

The world, perhaps, must laugh at us,
The dreamer passing by,
With spirit drenched in mutiny
And rapt, unseeing eye.

But though I know I cannot mold
Earth's ways to my desire,
I dwell within the dreams I hold,
My vision's flower and fire!

In Italy silk is now used for the covering of sausages. What is used for the inside remains an ever a mystery.

Little Helps For This Week

"They go from strength to strength."—Psalm 76:7.

"First the blade, then the ear, then the full corn in the ear."—Mark 4:28.

Build thee more stately mansions oh my soul,
As the swift seasons roll;
Leave thy low-vaulted past;
Let each new temple nobler than the last
Shut thee from heaven with a dome more vast,
Till thou at length are free,
Leaving thine outgrown shell by life's unresting sea!

—O. W. Holmes.

High hearts are not long without hearing some new call, some clarion clarion of God, even in their dreams, and soon they are observed to break up their camp of ease and start on some new fresh search of faithful service. And looking higher still we find those who reach until their mental work accumulates who do the good only to see the better, and see the better only to achieve it, who are faithful in some, but unfaithful in repose, whose worship is action, and whose action is ceaseless aspiration.—J. Martineau.

Three Teachers Rescued

Three teachers whose alleged encouragement resulted in seven women thinking and Nanching that caused between 20 and 30 persons to be killed in a riot were saved by Chinese authorities. The wreck occurred when the train jumped the track. Of the 500 passengers, 250 were killed or injured.

RHEUMATISM GOT HIM

80-years-old Pianist is Relieved by Kruschen

Although old age has not yet kept this man from his occupation as a pianist, rheumatism did seem to do so recently.

"Two years ago," he writes, "I was suddenly taken with rheumatism, all over my left arm. I tried many things—all to no purpose. I then commenced taking a half-teaspoonful of Kruschen Salts every morning, and soon felt benefit. My arm, which was painful and nearly useless, to my astonishment is now, after a few weeks' treatment, quite better. I am more than pleased, as I am a pianist and playing makes matters worse. I am just entering my 80th year, and am in good health."—L.A.

The six mineral salts of Kruschen have a direct effect upon the whole bloodstream, one's kidneys, uric acid, which is the recognized cause of rheumatism. They also restore the eliminating organs to proper working order, and prevent constipation, thereby checking the further formation of uric acid and other body poisons which undermine the health.

ECONOMIZE . . . . . But ADVERTISE

Win 15 Dollars!

The following merchants are donating a prize of Fifteen Dollars, ($15) to the person submitting a name for Fort Saskatchewan's new park, that shall be considered most suitable by three independent judges to be appointed from outside the Town. The conditions under which names may be submitted are very simple.

CONDITIONS:

For every Five Dollars worth of goods purchased from any one of these merchants during the months of September and October, you will obtain a nomination blank. Fill this blank in with your suggested name for the park, and the merchant from whom you received it will sign it, date it, and time it. The portion of the blank with your own name on will be held by your merchant, whilst the portion containing your suggested name will be submitted to the judges.

Each portion bears a similar number

In the case of two or more persons submitting the same name, the which should be chosen by the judges as the prize award, the name submitted bearing the earliest date of entry shall be judged to be the winner.

The judges' decision shall be final.

No personal names will be considered in connection with a name for the park.

Coupons may be obtained from the following merchants.

Beaver Lumber (Northern) Ltd.	Bd. Bazaar.
A. M. Carswelden Hardware	Fort Confectionery
Fort Hardware Co.	Bill Graham's Service Station
Jones, Graham & O'Brien.	E. Kotcheron Meat Market
Latour's Bakery.	Smith's Drug Store
Simmons Lumber Company	

There is a $15.00 prize awaiting someone. Purchases do not have to total five dollars at one time, Save your cash receipts, and when they show purchases amounting to five dollars made in September and October, you will receive your coupon. Pay your account at date, and get coupons to the amount of your purchases.

A Message to the Alberta Grain Growers

The Alberta Wheat Pool closed its books on July 15th for the 1922-23 business year. The organization is pleased to state that the volume of business transacted during the year was the largest Pool elevators have ever enjoyed.

The natural conclusion is that the thousands of grain growers who have given their patronage to this grower-controlled co-operative are appreciative of the services rendered and are determined to stand up within their ranks and give a strong and aggressive organization on a co-operative basis.

The organization invites and would appreciate during the new crop year a continuation of the patronage generously extended in the past. Those who have never before utilized Pool elevator facilities are invited to do so with the assurance that careful, courteous and efficient attention will be given to all business entrusted to it.

The welfare of agriculture in Alberta would suggest that all grain growers should be concerned in the upbuilding of a truly co-operative elevator organization, owned and governed by the grain growers of the province and interested primarily in the welfare of Alberta agriculture.

Important Business Dealt With At Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Town Hall on Wednesday the 6th September at 8 p.m. Present Mayor Montgomery, Councillors Lalonde, Fillmore, Watt, Graham and Neale.

The minutes of the last meeting held were called for and read. It was moved by Councillor Watt that minutes of meeting held on the 2nd. of August be adopted as read. The Motion carried. The Mayor demanded a registration of the vote. The members voting for the motion, Councillors Watt, Graham, Fillmore and Neale. Voted against the motion, Mayor Montgomery and Councillor Lalonde. Councillor Lalonde then made a resolution That the motion granting Mr. Geo. Cranston the privilege to haul gravel for the payment of arrears of taxes was not in order, and the registered vote upon this motion was : For the motion Mayor Montgomery and Councillor Lalonde. Against the motion, Councillors Watt and Graham. Did not vote Councillors Fillmore and Neale. There being an equality of votes the question was decided in the negative, but it was decided to obtain legal advice on the point raised.

The Council accepted the offer of H. Dennis of $150.00 to purchase the vacant town house and lot 29, Block 2 in Plan 11, and also accepted the offer of F. Shaw of $25.00 for the property and lots 14, 15, Block 9, in Plan 04.

Dr. T. W. E. Henry was appointed Medical Officer of Health for the ensuing year, dating from the 1st, October 1922.

A motion was passed that the following until notice to struck and adopted for the year 1923:— General Purposes 20 mills on the dollar, Scholastic 10 mills on the dollar, School holds Town Hosts 16 mills on the dollar; School trust outside of Town Hosts 10 mills on the dollar. That ten per cent discount be allowed if taxes are paid on or before the 15th. October.

The Council made a grant of $60. to the Fort Saskatchewan Women's Institute to help pay expenses incurring for the cemetery. And a motion was also passed donating $5.99 to The 82n Inland Port Association.

The Council authorized the purchase of grass seed to seed the part of the Park that is broken up.

The following accounts were passed for payment:—Calgary Power Co., for lighting streets $117.60; Town Hall $4.75; Memorial Hall $6.60; Alberta Gov't Telephones $6.30; Jones, Graham & O'Brien for rolled July $5.00; J. T. Lalonde relief, July $2.50 and $20.00 for August; F. Ebbetts Sr; Fort Hardware $2.05; W. A. Graham $2.00; Provincial Secretary for License for 6 months for Memorial Hall $2.50.

TENDERS

Sealed tenders marked on envelope "Tenders for Coal for School," will be received by the undersigned up till noon of the 2nd. October, 1922, for 160 tons more or less, of Coal, double screen lump, or single screen lump, F. O. B. Fort Saskatchewan Town school. Tenders to be accompanied by accepted cheque for 10 per cent of contract price. State what mine the coal will come from. Lowest or any tender not necessarily accepted.

Jas. Ribble,
Secretary P.S.D., No. 91
Fort Saskatchewan.

Good Hope

Fort School Board Held Business Session

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Monday the 11th. September 1922 at 7.30 p.m.

Present Mr. F. Aitkinson, Chairman, and Dr. Calhoun, Dr. Grenort and Dr. Turner.

The minutes of the last meeting held were read and adopted on the motion of Dr. Turner.

Requisitions for supplies for the current school year from each teacher were submitted and considered. It was moved by Dr. Calhoun and adopted, That the requisitions be approved, and that supplies be purchased through Mr. F. W. Smith as secretary pro tempore.

The results of recent High School examinations, including the Departmental examinations, were submitted to the Board. Mr. Anderson, the Principal, was present, and gave explanations regarding same. After being discussed at length by the Board, it was moved by Dr. Turner, seconded by Dr. Calhoun and adopted, That all pupils in high school who have failed to obtain the requirements of the resolution passed by the Board on 5th. of August 1922, (viz: failing to pass at least 5 units in the 1922 examinations), be required to appear before the Board with parent or guardian, on Monday following the publication of the results of the Autumn supplementary examinations

It was moved by Dr. Turner and adopted, That the Secretary be instructed to advertise in the local paper for tenders for 100 tons or coal, ready or less, double screened or single screened. Tenders to be in the Secretary's hands not later than noon of the 2nd, of October.

A communication from The Canadian Red Cross Society was filed on the motion of Dr. Calhoun.

The following accounts were passed for payment:—G. A. Cranston coal $12.50; Fort Hardware $2.55; Jones, Graham & O'Brien $17.05; Beaver Lumber Co.

Meeting adjourned on motion of Dr. Turner.

Municipal District Held Regular Meeting

The Council of the Municipal District of Clover Bar, No. 917, held a meeting on Saturday, the 9th inst., with all members in attendance.

Mr. E. Keith was re-elected Deputy Reeve for the ensuing six months.

A grant of twenty dollars each was given to the Ardrossan School Fair Association and to the Clover Bar District Field Association. A grant of fifty dollars was given also to the Salvation Army.

A recommendation was made to the Director of Surveys that an exchantesian be issued to the Marcus Coals, Limited, Clover Bar, to construct a pipe line between Section 5-17-53-25-4, with the understanding that the Company would be responsible for the proper maintenance of the line and any damage that may result from construction of same. A further recommendation was also made to the Director of Surveys covering the lease of a portion of the road allowance North of Section 5-52-25-4 to W. Stephenson, Clover Bar.

Authority was given to engage the services of Mr. J. W. Dent, A.L.S., to re-locate the road diversion through Section 3-54-25-4 if it was found necessary to do so.

Considerable time was spent in discussing relief matters and indigents' hospital accounts.

With the passing of payments and accounts the meeting adjourned at six o'clock.

At a party held at Sohn Beach by the staff of the Merrick Drug Store on Sunday last, Miss Ruth Moore was awarded the prize for the most outstanding athlete among the girls.

Miss Moore is well known here.

Fort Saskatchewan to Have Fine Park

The project for a Park for the Town of Fort Saskatchewan is well advanced. From the Court House on Government Street a good road has been graded to the edge of the river bank. At this point the bank has been graded to the river's edge preparatory to the construction of a road good bob-sled run for the winter months. Following the bank of the river one notices the clearing that has been effected amongst the fine trees with which the bank is covered. A fine open space has been planed, cleared and harrowed, and will be levelled and seeded to grass in the future. At the east end of this clearing there is a concrete platform that at one time supported the boilers of the old Power house. Here can be constructed a shelter that will house a store for heating water, tables and benches for those wishing to picnic. More also is ample parking space for autos with a drive in and out. A fine grove of trees surrounds this picnic spot, affording shade to those enjoying the opportunities offered. Continuing, we reach the bottom of the hill from the town, known as the River Road. Here, improvements have been made. The road has been cleared of brush to its full width, and will be widened and graded in the future. The park will be fenced, and posts are already being placed. Incidentally these posts are being provided by the citizens in sympathy with the project. Twenty-five cents buys two posts. Any reader desirous of assisting in this way may leave his two bits at Bill's Service Station. Thanks. Donators names will be published in due course.)

There are two main motor entrances to the park and also two entrances for those on foot. All entrances will have orticing gates suitable for the purpose for which they will be used.

The park and bob-sled run are in the making. A little assistance by hand and our citizens of the town and surrounding district will have the commencement of a pleasant playground in summer, and a healthy amusement for the winter.

Last and not least. Don't forget that the home town merchants are offering $15.00 for the most suitable suggestion for a Park name. Read further particulars in your home town paper, "The Record".

Community Mourns Loss of Respected Citizen

RICHARD THOMAS O'GORMAN

The funeral of Richard Thomas O'Gorman of Ardrossan, who passed away at the family residence Monday, September 4, at the age of 49 years, was held Wednesday, September 6, at 2:00 p.m., from the family residence. The Rev. Mr. E. R. Lockyer officiated and interment took place in the Coppice Hill cemetery. The pallbearers were J. H. Broady, F. Jardine, E. Pearce, A. Irwin, H. Armstrong and W. E. Pearce. A large number of beautiful floral tributes were received from: Loving wife, daughters and sons, Mr. and Mrs. John O'Gorman and Fred O'Gorman, Sister Maggie and family, Lydia and Bill, Jot and Lou, Lydia and Laude, Mr. and Mrs. E. N. Bailey, Mr. and Mrs. R. L. Broady and family, Mrs. Davies, Arthur, Cecil, Rose, Fred, Bert, May, Clement, Winnifred, Jack and Ada, Mr. and Mrs. H. Ashton and family, Mr. and Mrs. Crummer and family, Mr. and Mrs. S. Jardine, Mr. and Mrs. J. Broady and Verna. He leaves to mourn his loss, his wife and four daughters, Alice, Irene, Margaret, and Edith, three sons, Clarence, Eddie and Harry, two sisters, Mrs. T. Well of Fort Saskatchewan, Mrs. W. Gordon of Penoka, four brothers, William of Green Court, George of Edmonton, Johnnie and Fred of Ardrossan. Foster & McGregor, Limited, funeral directors.

School Fair At Ardrossan

Six Schools Take Part in Fine Exhibition and Sports

The third annual school fair of the surrounding district, under the auspices of the Ardrossan School Fairs association, was held here Friday when the following schools took part. Partridge Hill, Yorkville, Agricola, Baker, Gardon and Tyron Valley.

The exhibits of school work, shown in the United church were judged by Mr. C. H. Robinson, inspector of schools.

Vegetables, grains, flowers and needlework exhibits were shown on the ground floor of the Orange hall, and were judged by Dr. G. H. Turner, assisted by Mr. B. Baiserte, both of Edmonton.

Cooking, knitting, sewing, carvings, canning, candy and school lunch boxes were shown on the second floor of the hall and were in charge of Judges Mrs. Archer and Mrs. Miller, both of Lamont.

Calves and poultry were shown in the lots adjoining the hall and were judged by Mr. N. Curtis of the Dominion Livestock branch, Edmonton.

At the conclusion of the judging of exhibits, the president, Mr. W. Joy, introduced the judges, who praised, advised and encouraged the children.

An excellent program of sports, including races was enjoyed; two ball games were played in the evening by the teams of boys and girls. The sports were in charge of a capable committee. A refreshment booth was under the direction of a women's committee.

Owing to slight frost and hail in the various districts, the garden exhibits were not quite as numerous as in former years, but were of a fine quality.

QUEENS HOTEL CHANGES MANAGEMENT

Mr. H. C. Pettet who recently disposed of the Strathcona Hotel has purchased the Queens Hotel from Mr. R. A. Brown, who is retaining an interest in the same for sometime. Mr. Pettet, will manage the hotel for the time being.

Insist on it

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about world matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem which now confronts Canada in disposing of its chief article of export.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world, followed by the United States, which had been the great exporter, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position where her production of wheat would not be more than sufficient to feed her own domestic requirements. In fact, it was confidently stated by persons in authority that in a few years the United States would be a wheat-importing rather than a wheat-exporting nation.

Canada, Australia and the Argentine found their markets in Great Britain and the principal countries of continental Europe, France, Germany, Italy, Spain, Holland, Belgium, all of which countries took large quantities of imported wheat either directly from the country of origin, or indirectly through the London and Liverpool markets. Then came the Great War. Wheat was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was forced to a point where the people of Canada, equally almost to entering in the army, to raise wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quite a production of wheat because of the prevailing high prices and unlimited market.

The war taught the nations of Europe the lesson of the importance of being able to feed their people in times of war or other emergency. Germany learned the lesson. Italy learned it. France learned it, and, while not directly involved in the war, Spain learned it through the high price she had to pay for wheat and other imported food commodities.

Put it this way: After the war, while the necessary work of reconstruction of their countrysides and industrial towns and cities was under way, the countries of Europe still offered a good market for imported wheat and at high prices. But the governments of these countries appealed to raise more wheat, meet their own requirements and thus safeguard themselves against starvation on the one hand, or the possibility of being required to pay enormously high prices on the other hand in the event of a further war or world emergency. They offered bonuses to their farmers to produce wheat, they fixed unreasonable high price for domestic grown wheat, they imposed prohibitive tariffs on imported wheat, they arbitrarily governed all import conditions, and fixed minimum quantities of imported wheat that might be used in millers and in the making of bread.

Premier Bennett outlined the effect of these things in his speech. The four great wheat exporting nations are Canada, Argentine, Australia and the United States, the effect of which is Canada, while the great wheat importing nations are generally listed as being Great Britain, France, Germany, Italy, Spain, Holland, Premier Bennett pointed out, whereas European countries in 1930 produced approximately 900,000,000 hundreds of wheat, in 1925, just three years later, they produced 1,230,000,000 bushels, an increase of 330,000,000 bushels.

Even more illuminating was Premier Bennett's statement that this year France will produce between 75,000,000 and 100,000,000 more bushels of wheat than Canada; Italy will produce 75,000,000 bushels more than Canada; Germany and Spain combined will produce 125,000,000 bushels more than Canada. These countries were the former buyers of our Canadian wheat; now they are producing more than Canada.

Mr. F. B. Murphy, who was the United States Government delegate to the wheat conference in London, gives the wheat production of these four European countries this year as 1,815,000,000 bushels, against Canada's production of 309,000,000 bushels, Argentine's 220,000,000 bushels, Australia's 174,000,000 bushels, and United States' 426,000,000 bushels. In other words, these four European countries will produce almost as much wheat this year as the four chief exporting nations. In addition, the Danubian countries, Hungary, Roumania, Jugo-Slavia and Russia will produce in the neighborhood of 527,000,000 bushels. Russia is steadily increasing her wheat production and, while unquestionably her people need it, the Soviet authorities nevertheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, as Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear,—fear of starvation in the event of another war which compelled each nation to look over Europe, and fear of ransom, or, in other words, of being again compelled to pay enormously high prices for imported wheat in order to feed themselves, the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations and a reduction in the acreage sown to wheat by the four largest exporters of wheat, and, on the other hand, for no further increase in production by European countries, except: Russia, for a limited period of years, of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes and to encourage the production in the tariffs now imposed on imported wheat when the price reaches a certain stipulated figure.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which enter into the calculation entirely beyond the control of man. However, the facts and figures here presented are undoubtedly of vital interest to the people of Western Canada and provide much food for serious thinking and pondering on their part.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be taken ill, in any case, with diarrhoea, dysentery, cholera morbus, cramps, colic, or stomach troubles.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry; a remedy that has received the endorsement of hundreds of Canadian mothers during the 60 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side.

Prototype Kilogram Valuable

Only About Thirty Standard Measures Now In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took the train to Paris and then to Sevres, the "British prototype kilogram."

This is Britain's official copy of the "international standard kilogram," on which all metric and avoirdupois measures of weight are based.

At Sevres, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made only once before since 1890.

The international and the British kilograms were weighed against each other on a balance sensitive to a hundredth part of a milligram There are 26,350 milligrams to an ounce.

The prototype is made of a platinum-iridium alloy—iridio-platinum. In spite of the high resistance of this metal to external influences the British authorities have found a metal whose weight by a few hundredths of a milligram or so. If minute changes occur they are reported to parliament

Fines for the journey were kept secret. The hundred-pound mission to steal the prototype A kilogram of iridio-platinum is worth several hundred pounds sterling. A metal about the size of a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 30 standard kilograms—one for each of the principal nations.

Progress In New Gold Fields

Large Amount Of Work Done On Labrador Claims

Remarkable progress has been made already in the Labrador gold-fields, according to Hon. W. J Walsh, provincial Minister of Labor, Agriculture and Mines, who has returned to St. Johns from the Lake Wikadu district.

He was accompanied on the expedition by Dr. O. E. Sanborne, geologist, and W. F. Ramsay, mining engineer. All three seemed enthusiastic about the future of Labrador.

They reported that of the 32 concessions granted by the Newfoundland government since the Labrador war opened to prospectors last fall, thirty-one could be said to be actively interrogated by field parties. The Lake Wikadu region, which is reached after a comfortable aeroplane trip from Seven Islands, Quebec, had a population of 30 when they left.

Mr. Walsh said his party spent a week in the interior. They said they were reasonably secure. Unsettled weather conditions had interfered somewhat with the work of the field parties but despite this a remarkable amount of work had been accomplished.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General E. C. Ashton, C.M.G., V.D., district officer commanding military district No. 2, Toronto, is leaving shortly for Victoria where he will take over military district No. 11, which includes the province of British Columbia and the Yukon territory.

Brig.-General T. V. Anderson, D.S.O., district officer commanding military district No. 10, with headquarters at Winnipeg, replaces Major-General Ashton at Toronto, and is succeeded Brigadier W. A. Bremner, D.S.O., whose appointment to command military district No. 11 became effective a short time Ago, will be transferred to succeed Brig.-General Anderson.

Freight Car Was Elusive

Ex-Sergeant Proved He Did Not Accompany His Pest

An ex-sergeant brought an almost-piece of comic relief into the military tribunal at Paris, which is still hearing appeals from war-time court-martial sentences when he successfully appealed against a sentence passed in 1918 of 15 days' imprisonment for twice abandoning his post.

Sergeant Nigun was ordered to escort a freight car containing 5,000 gas masks. When the convoy stopped for the night he went to sleep, and when he awoke up the box-car had disappeared.

The railway authorities assured him it would come back if turned up two days later.

He was then told the train would proceed again next morning but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without the loss of a single gas-mask.

In reply to questions he said he did not sleep in the box-car because it was rather too cold, and also on account of the weight by a few hundredths of a milligram or so. If minute changes occur they are reported to parliament

Fines for the journey were kept secret. The hundred-pound mission to steal the prototype A kilogram of iridio-platinum is worth several hundred pounds sterling. A metal about the size of a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 30 standard kilograms—one for each of the principal nations.

Bakers Paintings

Picture of minisitaves so small that 20 of them will fit on a postage stamp, Stanley A. Burchett, of London, formerly of the Grenadier Guards, claims, that they are the smallest pictures in the world. Two, about an eighth of a postage stamp in size, have been purchased by the Prince of Wales, a seascape showing a sailing vessel at dawn, and the other a still-life of marigolds in a blue vase. They appeared in pictures fully it is necessary to use a microscope. Many find it difficult to believe that the miniatures are real water-colors painted with a brush.

Dentistry In Olden Times

Even the ancient Egyptian had to be told to "open wide" and probably had trouble with his false teeth dropping out occasionally, according to Dr. J. E. Lowry, McGill University specialist in his branch of dental science. He told of dental work done by the Egyptians as early as 3400 B.C., in a talk before a local service club. He also described human fangs of dentistry among the Greeks, Etruscans and the Romans.

Japanese tax exported during 1930 showed an increase of 4,072,000 pounds over 1929.

More than 200,000 persons are now employed by the British post office department.

ASHAMED OF HER FIGURE

Husband Persuaded Her To Take Kruschen

By following her husband's advice, this woman made a tremendous improvement in her appearance also actually took off 32 lbs. of her excess fat. Telling of her experience, she writes:—

"A year ago I was troubled with rheumatism, nervousness and other complaints. And I got so fat that I was ashamed of my figure. I was persuaded by my husband to take Kruschen Salts. Before I weighed 161 lbs. After taking Kruschen over seven months, the improvement was quite painful, my nerves got stronger, and my step lighter. Then I knew that Kruschen was doing me good, so I persevered with it and got my weight down to 129 lbs., a reduction of 32 lbs. I cannot tell you how I am boasting when I say that I feel younger and more active, have a much better figure and am healthier than I have been for years."—(Mrs.) J. S.

Kruschen is a blend of six separate salts, each one of which aids elimination, to throw off each day those waste products that would otherwise accumulate in the form of fatty tissue

Chance Meeting Recalls Rescue During War

Ship Inspector Meets Sailor He Saved From Torpedoed Vessel

A thrilling rescue in the days when British ships carried on a hazardous trade along routes infested with mines and German "subs" was recalled at Montreal harbor when Captain H. Ellis, marine superintendent, boarded the steamer "Clan Alpin" in the course of an inspection.

Accosted by a member of the crew who asked if he remembered him, Captain Monks found himself unable to recall who the man was. The seaman then proceeded to identify himself as the man whose life the Montreal port official had saved during the World War when Captain Monks' ship had been torpedoed off the Irish coast. About to jump into the one remaining lifeboat the ship's master heard groans from some place on the deck. Returning he found a member of the ship's lady-wounded. Picking the man up, Captain Monks carried him to the lifeboat only a minute before a terrific explosion sent the ship to the bottom.

After two days on open sea they were picked up by an American destroyer which took them to port, where the wounded man was given treatment.

Founded Colonies Age

Viscount Of Bavarian City Dates Back 900 Years

Far 'Tis years of centenaries, tricentenaries and bicentenaries all over the world, the Bavarian borough of Weissenburg are inviting all and sundry to celebrate with them the 1,700th anniversary of their city's founding.

For in 231 A.D. Alexander, the barely local tribesmen first broke through the fortified military road built by the Romans and destroyed the citadel of Biriacis and built with its stones a castle called the Wiesburc. Frequently the city was sacked and burned by Huns, with 31 towers and a number of big gates, still remain. The Ellinger gate, in particular, is considered one of the most beautiful structures of its kind in all Germany.

Human Land Speaker

Official possessor of the toughest lungs in the United Kingdom, W. R. Anglis, town crier of Marlborough, Wiltshire, England, aged 63, won the championship from twelve rivals in the National Town-Criers annual contest at Lyme Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Science Steps In To Lend Assistance To Ship Navigation And Safeguard Life and Property

It is of vital importance to a steamer that its sheet lead, from time to time, the depth of water beneath his keel For centuries a line of lead, greased at its base, was attached to a rope nicely hove-out and so slowly hauled over some to the deck It was a long stride ahead when steel wire of the utmost strength, of the least possible bulk, displaced weak, heavy and messy rope And now steel wire is superseded by a method which employs only sound as its servant. On the keel of a steamship is fastened a resonant anvil, forcibly struck by a hammer every two seconds or so. Sound travels through water faster than through air, and four-land-a-half times faster. The anvil-sound will reach the sea-bottom they are echoed back to the ship with a record of the time occupied in their flight. This tells not only the sea-depth, but a great deal more. Listeners become expert in detecting whether it is a rocky surface, a sandy bowl, or a stretch of shale which returns a pre-

Chief among the hazards of navigation is fog Fortunately fog is penetrable by ultra-red waves of light and by radio waves familiar to every amateur In a fog an Amerman ship, through its radio apparatus, picked up the signals at least two of the one hundred radio beacon stations of the United States. With two messages from two stations before him the captain readily knows just where he is, and with little or no slackening of speed reaches port in safety.

Throughout the world today every ship, worthy of the name, has a radio receiver. When that receiver says "S.O.S., save our ship," the captain instantly moves, with utmost speed, to the ship in distress. It is, of course, hoped and expected that every ship should have a radio operator on board. Two operators would be better still. But even if there is no radio operator in charge, the "S.O.S." signal may be distinctly heard by a lightly manned ship, by a newly devised radio receiver of high sensitiveness and dependability.

For a great many years the weather forecasts of the United States and Canada have rendered an inestimable service by their advance notice of storms and tempests. Thanks, once more to radio, these warnings are received not only on land but at sea, by every ship in touch with the land.

Icebergs have dealt death to uncounted myriads of mariners and their passengers. It might be supposed that a thermometer, immersed outside a ship, would announce the approach of an iceberg A better idea is a simple apparatus which measures the electrical conductivity of the water surrounding a ship That conductivity, in 1928 when the crews of ships of salt in the water, so that the comparative freshness of that water gives an alarm for the vicinity of Bismuth and built with its stones a castle called the Wiesburc. Frequently the city was sacked and burned by Huns, with 31 towers and a number of big gates, still remain. The Ellinger gate, in particular, is considered one of the most beautiful structures of its kind in all Germany.

Human Land Speaker

Official possessor of the toughest lungs in the United Kingdom, W. R. Anglis, town crier of Marlborough, Wiltshire, England, aged 63, won the championship from twelve rivals in the National Town-Criers annual contest at Lyme Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Demand For Fertilizers

Use In Canada Is Showing An Appreciable Increase

The use of various chemical fertilizers in Canada is becoming widespread and in normal times reaches considerable proportions

There were 60 plants engaged in making mixed fertilizers and fertilizer materials in Canada in 1928, the output of which totalled 350,653 tons. Sales of fertilizers in the year under review amounted to 330,443 tons of which 179,963 tons were sold in Canada and 50,480 tons were exported.

Investigational work with fertilizers is carried on by the Canadian Government Experimental Farms System of its branch farms and stations situated in every province of the Dominion It has been found that for the majority of crops the use of complete fertilizer mixtures containing nitrogen, phosphoric acid and potash is best, especially in Eastern Canada and in British Columbia.

The increasing stress on given fertilizer formulations in the stock raising and dairying districts of Canada is creating an appreciable increase in demand for fertilizers.

Interested In Tree-Planting

Many Thousands Attend Lectures By Canadian Forestry Car

In a recent twelve-day period the tree-planting car of the Canadian Forestry Association on its educational tour of the prairie provinces visited over a score of places, giving 26 lectures to a total attendance of around 6,000 people. Adverse weather conditions along the lines visited have not affected the interest shown in the past few years, but interest in the work, and a belief in the benefits of tree planting, has not abated.

Since commencing its tour of 1932, the first three months of which were devoted to Saskatchewan, the car has visited 72 communities at which 146 lectures have been held, to a total attendance of 29,200 people, mostly school children.

The past four points, all over the trackless plains, have proved that trees can, and are being successfully grown.

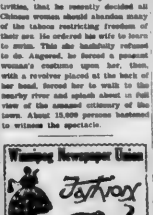
Dairy Awards

Manitoba Takes Silver Cup At Canadian National Exhibition

Award for the highest scoring commercial dairy exhibit in 1932 has been awarded to the Manitoba creamery, of Minnie. Man., by Canadian National Exhibition judges. The Manitoba creamery scored 97 7.

Although Manitoba butter took the majority of awards as usual, competition from Ontario was keen. The silver medal for the highest scoring 16-pound box of unsalted creamery went to Fowl Creamery, Brampton, Ont., with a score of 97.6. The Beaverbrook Canadian Company of Neepawa, Man., was a close second.

Medicine Hat, Alta., Ald., of St. Boniface, Man., walked off with first prize in the division for salted creamery butter in 56-pound tubs with 97 points. Saskatchewan Co-Operative Creamery of Regina second.



BY Ruth Rogers

DELIGHTFULLY RECORING TO THE LARGER FUTURE IS THE SIMPLE SMART DAY DRESS

It fails so gracefully in final lines which are very becoming. The pointed hip yoke is a particularly helpful feature.

One of the joys of the new season are the attractive striped materials. And how snappy they are.

Today's model—an exceptionally individual affair is brown and white, so smooth. It has self-trims.

Style No. 735 is designed for sizes 14, 16, 18, 20 years, 36 38, 40, 42, 44 and 46 inches bust.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Highway and Park Improvements Being Carried Forward As Unemployment Relief Measures

In addition to their primary functions of serving as places of rest and recreation for the people and as monuments for well nigh all the National Parks of Canada at present are engaging on important plans to the economic life of the country in providing work for a large number of the unemployed. This is strikingly brought out in a statement issued by Hon. Thomas G Murphy, Minister of the Interior, upon his return to Ottawa after a trip through the four western provinces in which he made a personal inspection of the work now being carried on in the National Parks. Mr. Murphy drew attention to the fact that during the fiscal year ending March 31, 1932, more than $600,000 was expended in the National Parks as a measure of unemployment relief, combining the Department of the Interior, under the jurisdiction of which this work falls, to utilize the services of a large number of unemployed men, and also to supply the means for their maintenance during such period of employment.

At the present time many projects throughout Western Canada are being carried out under the direction of the National Parks Service. Development work is being carried on in the new National Parks in Riding Mountain Park in Manitoba, Prince Albert National Park in Saskatchewan, and in Riding Mountain National Park in Manitoba. Work is being carried on on the Banff-Jasper Highway, which, when completed, will provide a direct connecting link between the headquarters of these two great mountain parks. Construction of that portion of the Golden-Revelstoke road, known locally as the "Big Bend" Highway, between Donald, B.C., and the Canoe River, is also being carried on in connection of the National Parks Service.

From a tourist point of view, the two last-named projects are of great commercial importance, for when completed, they undoubtedly will help to avoid the great tide of tourist travel to the Canadian Rockies. The "Big Bend" road now under construction, forms the last uncompleted link in the western half of the Trans-Canada highway, and will provide a direct route from Winnipeg to Vancouver, through one of the most beautiful scenic regions in North America. Construction of the eastern leg of 79 miles is under the direct supervision of the National Parks engineers, and more than 56 miles of this undertaking have been graded, of which almost 30 have been surfaced The western leg or section of the "Big Bend" road is going ahead under the supervision of the Department of National Defence, which has crews of unemployed men at work.

Initiated late in 1931, the Banff-Jasper Highway as planned will entail construction of approximately 140 miles of road, utilizing existing portions between Banff and Lake Louise to Sunset Park, and a section of the Edson Cowsel road in Jasper Park. The new highway will meet the latter road near the Athabaska Falls in Jasper Park. In addition to forming a valuable tourist link between these two parks this road will provide access to a great deal of hitherto practically unknown territory, including the great regions surrounding the Columbia ice-field — mother of glaciers in the Canadian Rockies. Latest reports indicate that more than 40 miles of grading on this project have been completed.

Completion of a road from the Athabaska Valley in Jasper Park to the noted Miette hot springs is also being carried out, while work on that section of the highway in Jasper Park from the town of Jasper to the western or British Columbia boundary has been undertaken

In Waterton Lakes Park work is proceeding on the Belly River road, which will connect up with the road being built in the United States Glacier National Park. This new road will provide a direct communication with Glacier Park via the Kennedy Creek cut-off, and will obviate the present circuitous route northward through Cardston, Alberta.

Elk Island National Park in Alberta, is being made more accessible from the south by the construction of a road from the park headquarters at Astotin Lake to the south gate where it will connect with Provincial Highway No. 15 below Edmonton and Vegreville. When completed, this road will provide a direct connecting link between the headquarters of these two great mountain parks. Construction of that portion of the Golden-Revelstoke road, known locally as the "Big Bend" Highway, between Donald, B.C., and the Canoe River, is also being carried on in connection of the National Parks Service.

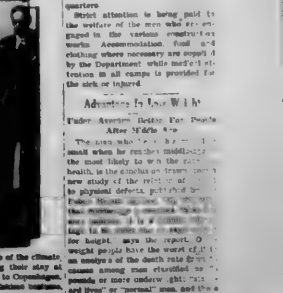
WHEN THE LINDBERGHS VISITED GREENLAND



Clad in warm garments as a protection against the rigors of the climate, Colonel and Mrs. Charles A. Lindbergh are pictured during their stay at Godthaab, Greenland, where they stopped on their long flight to Copenhagen, Denmark, on aerial route survey. Note the youngsters in Eskimo costumes, who greeted the famous couple.

Advertising Is Now With Us

Under Auspices Better For People After N'deb'ts

The man who "... a small when he reaches middle-age the most likely to win the race health, is the conclusion drawn from a new study of the relation of weight to physical defects, published by Public Health ... Service. The investigation ... 4,000 persons ... and ... 3,000 ... ages ... 25 ... 65. ... ... for height, says the report. O weight people have the worst effect on average of the death rate ... causes among men attributed to ... pounds or more underweight; ... and lives" or "normal" men, and those 20 pounds or more overweight.

WORLD HAPPENINGS BRIEFLY TOLD

First silver to be flown out from Great Bear Lake was valued at approximately $1,000. It was flown out to Edmonton by Pilot John Sythoff.

Ocean-borne traffic at the five ports of the Kwantung Leased Territory in Manchuria in the first seven months of this year was greater than in the same period of 1931 and 1932.

The whole village of Capelan, a small Portuguese fishing community near Ponta Delgada, was searched recently when 160 pounds of ambergris were found in the carcass of a whale which stranded on the beach

Dr Hugo Eckener has concluded an agreement with the Brazilian Government for all-year Zeppelin service between Europe and Brazil. Brazil agreed to erect suitable housing facilities for the airship.

William Cody Bradford, 60, a nephew of Colonel William F. (Buffalo Bill) Cody, died himself to death at his home in Casper, Wyoming. He was believed to have been despondent because of ill health.

The U.S. Government is considering asking the next session of congress for authority to negotiate commercial treaties embodying reciprocal tariff concessions, particularly with Canada and Latin-America countries.

Robert Scott-Paine will make a second and determined effort to wrest the Harmsworth speed-boat trophy from Gar Wood, American title-holder, in 1933. A definite statement to this effect came from the British pilot in Miami.

Khatisas Boys' Band, fresh from its world triumph at the Chicago World's Fair, was welcomed home to Vancouver by thousands of persons and massed bands gathered at the railway station Later they were officially welcomed at the Canada Pacific exhibition.

International Highway Practically Completed

Attractive Scenic Route From Peace River District To San Diego

A new international tourist highway connecting Canada and the United States is practically completed and will be known chiefly under the name of the Sunshine Highway This highway, the only international project of its size east of the Rocky Mountains, connects Alb.rta's extensive highway system with that of the States of Montana, Nevada and California, making an attractive scenic route along the eastern side of the Rockies from the Peace River District in Northern Alberta to San Diego, California, on the south, a distance of more than 2,000 miles.

Announcement of the completion of the new route was given at the Southern Trail Convention recently held in Lethbridge, Alberta. That stretch of the new highway running through Alberta from the United States-Canadian border southwest of Lethbridge to the Ponce River, a distance of 726 miles, has been completed for some time. Montana is now engaged in completing the last link of the highway in that State.

For the larger portion of the distance this highway is an all-weather route, being gravelled in Alberta to the south north of the city of Edmonton, about 600 miles. The route through Montana, which is Highway No. 91 of that state, is also gravelled and for most distance. From Salt Lake City north to Ponce River is a distance of over 1,000 miles.

The new highway gives many access to the Rocky Mountain resorts of Montana and Alberta by connecting all-weather roads.

Australia's New Currency

Under-Black Shows Head Of Prince of Wales

The head of the Prince of Wales, in profile, is one of the innovations introduced in the new currency notes recently to be put into circulation in Australia. The prince's head will replace the emu-and-kangaroo design on the water-mark. When held up to the light the features of the heir to the throne will be seen facing those of the King.

Another change is that the premier is no longer to have his signature on the notes.

Clock Made Many Trips

Timepiece Of Pacific Liner Now in Studio Home At Regina

A clock which made 302 trips across the Pacific Ocean to China on the old "Empress of Japan," and which for the past 11 years has been lying as an office in Vancouver now adorns the radio operating room of CKCK, Regina, Saskatchewan.

Some 13 years ago, Bert Hooper, engineer of CKCK, but then wireless operator on the staff of the Canadian Marconi Company, was placed on board the "Empress" by his company as operator in charge of the ship's wireless system.

Mr Hooper had then been with the Marconi Company some six years and was aboard the "Empress" for nearly two years.

When the "Empress" was sold and dismantled records and some of the equipment was taken ashore and placed in the Vancouver office of the Marconi Company.

Some weeks ago Mr. Hooper visited the coast and called upon his old chief, L. S. Hawkins, superintendent of the Pacific Coast Division of the Canadian Marconi Company

Before leaving he was presented with the timepiece which hung in the wireless operating room of the "Empress."

For *Five* Complete Sets of Poker Hands

You can obtain a pair of first quality Ladies' pure thread Silk Stockings, 45 gauge. Combined with excellent wearing qualities, these Stockings have the dull, sheer appearance which is so desirable, and they are obtainable in the latest shades. Sizes 8½, 9, 9½, 10.

There is genuine economy in rolling your own with Turret fine cut, as you can make more than 50 cigarettes from a 20c. package.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO

Recipes For This Week

(By Betty Barclay)

RIPE GRAPE JAM

4½ cups (3¾ lbs.) prepared fruit.
7 cups (3 lbs.) sugar.
½ bottle fruit pectin.

To prepare fruit, slip skins from about 3 pounds fully ripe grapes. Simmer pulp, covered, 5 minutes. Remove seeds by sieving. Chop or grind skins and add to pulp. Add ½ cup water and if desired, grated rind of 1 orange. Stir until mixture boils. Simmer, covered, 20 minutes. (Wild grapes, Malagas and other tight-skinned grapes may be stemmed, crushed whole, simmered with ½ cup water 30 minutes, sieved, and then measured. With tight-skinned grapes add juice of 1 lemon to water. Use 4 cups prepared fruit.)

Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Pour quickly. Paraffin hot jam at once. Makes about 11 glasses (6 fluid ounces each).

FRUIT BASKET SALAD
(Serves 6)

Lettuce.
4 oranges.
¼ cup seeded raisins

Arrange shredded lettuce on individual salad plates. Peel and slice oranges and arrange in rings on lettuce. Fill center of circle with raisins which have been steamed until plump. Moisten with sweet French dressing or with orange juice mixed with equal parts of honey or jelly.

Modern Wireless Station

Erected On Site Where Marconi Made Transatlantic Experiments

Signor Guglielmo Marconi is "extremely gratified" to know a modern wireless station has been erected on Signal Hill, site of his epoch experiments in trans-Atlantic wireless telegraphy.

Following the opening of the new Signal Hill Station, the inventor of the wireless telegraphed Premier F. C. Alderdice as follows: "I manifest my sincerest pleasure my associations with your country and the generous support given me by its government, which enabled me to make my first transAtlantic wireless communication, and am extremely gratified to know that on the very site where these tests were carried out, a modern station is now installed embodying latest developments."

Souvenirs For Amundsen

Private Henry Lee, believed to be the world's first Chinese telegraph subscriber, is long since dead, his name is listed in the new San Francisco telephone directory. It has appeared regularly for 55 years, and Chinese business officials said they would continue to have his name listed as a memorial of the pioneer.

SUNDAY SCHOOL LESSON

SEPTEMBER 17

SOLOMON

Golden Text: "Enter into His gates with thanksgiving And into His courts with praise."—Psalm 100:4.

Lesson: I Kings, Chapters 5-8

Devotional Reading: Psalm 100.

Explanations and Comments

The Great Preparation With The Ark And The Tabernacle, Chapter 8:1-5 It was during the Feast of Tabernacles, which began on the fifteenth of the seventh month and lasted seven days (Leviticus 23:34), that the elders of Israel and all the heads of the tribes brought up the ark of the covenant out of the city of David, which is Zion. "Both the House of Commons and the House of Lords were present, as we would put it, for the elders were the chosen representatives of the people, and 'the princes of the fathers' houses' were the hereditary leaders. In addition, there was a vast attendance of the rank and file."—R. C. Gillie. Two processions advanced from different directions One came from Gibeon and bore the sacred tabernacle with its goats'-hair covering and boards of acacia wood, and all its holy vessels—the brazen altar, the golden candlestick, the table of shewbread, and the brazen parpent. On Mount Zion this procession joined the other which bore the ark away from its temporary tent erected for it in Jerusalem by David. As the two processions proceeded to the temple, Solomon and a great congregation with him sacrificed a host of sheep and oxen. The road (such as the traditional picture presented by Josephus) was flooded with streams of blood. The air was darkened and accounted with the clouds of incense. The songs and dances were innumerable. Onward the procession moved up the slope of the hill. It entered the outer court of the temple. It reached the "Holy Place."—Binney. By this lavish slaughter Solomon was honoring God in the best way known in those days. It was a primitive method of saying that king and people set no limits to the honor they could show Jehovah.

The Contents Of The Ark, Chapter 8:6-9 "There was nothing in the Ark save the two tables of stone. Hebrews 9:4 speaks also of a golden pot holding manna, and Aaron's rod that budded, but the next verse adds, 'of which things we cannot now speak severally.' Hebrews is here incorrect, or else the pot and rod were once in the ark and were lost during Ita absence among the Philistines. Possibly the law in the Ark were a constant reminder that God's presence is to be with His people dependent on their keeping His laws.

"If a man love Me, he will keep My word," said Christ. "And my Father will love him, and We will come unto him and make our abode with him." The indwelling of the Spirit is our foremost comfort in trouble and our foremost joy.

Endless Words Gold Worth

Jon Dillon, full-blooded Sioux Indian, is camping south of Fort Smith, N.W.T., for the first time in his life. He is bound for San Francisco on board a canoe, using a big silver dollar for his paddle, and has kept on until he has got a set of gold teeth for himself and his squaw. Their teeth are all used, but what's the use of having teeth if you can't let the world know about it?" Jon said.

Some men boast that they can't be fooled twice in the same way, but there are lots of other ways.

Labrador Huskies Ready For Byrd Expedition

About Fifty Wolf-Dogs Have Been Carefully Selected

Labrador huskies will work hand in hand with aeroplanes during the next Byrd expedition to "Little Amer.ca," starting from Boston, October 1.

The expedition will last two years, with the S.S. Pacific Fir (8,000 tons) and the barquentine "Bear of Oakland," as the supply ships. Two or three aeroplanes are to be taken along, to augment those used in the last expedition by the United States explorer, as well as something like 50 magnificent specimens of Labrador and Quebec husky, or wolf-dog.

Some 45 of these malemutes have been sent to Wonalancet, New Hampshire, which is where rear Admiral Byrd selected his first batch of dogs for the Antarctic. Arthur Walden, veteran dog racing man, makes his home in the New England city, and it was Walden's leader, Baldy, who accompanied Byrd on all expeditions until the day when, getting old and feeble, he walked out into the icy cold, and was never seen again.

The canines were loaded at Quebec into a huge truck, each of them crated, and sent off to Wonalancet.

With plans for the expedition, which will be one of scientific research, under way for the last two years, or more, nothing is being left to chance, and the same careful selection was made of dogs as of members of the expedition.

According to plans, the expedition will get under way Oct. 1, after the S.S. Pacific Fir has been re-christened, and will steam out of Boston harbor, to make its way along the Panama Canal, through that waterway, and into the Pacific Ocean, then bending for New Zealand, which will be where they will leave civilization behind.

Geological and meteorological studies will be carried out, as well as oceanographical researches, which the expedition will also delve into the cosmic rays. They expect to return with priceless information.

Real Globe-Trotter

Eighty-Year-Old Woman Making Fortieth Trip Around World

Mrs. Jean Loe of Kansas City, eighty-year-old woman with snow-white hair, has just stopped in Paris again on her annual trip around the world. She has been making this trip for forty years, but she says she doesn't like to stay in one place.

Mrs. Loe knows the Yukon, has sailed to the Antarctic Circle and this year is doing a thorough job of the Balkans.

Advance In Television

Berlin's big radio show registers marked advances in television. New devices increase picture transmission from the old limit of 90 lines to 180 lines on a 15 by 15 centimeter surface, with almost perfect results. In transmitting 25 pictures per second 1,620,000 points are flashed off. It is this speed and clearness that give natural reproduction.

Coming Events

The first meeting of the season of the Fort Saskatchewan Women's Institute will be held on Sept. 14th, at 3 o'clock at the home of Mrs. A. M. Rogers.

This day will be particularly dedicated to the Grandmothers of this Town, and it is to be hoped that they will turn out in full force to enjoy a pleasant afternoon.

ooooo

St. Gorge's W. A. will hold a Tea and Sale of Home Baking on Saturday, Sept. 16th, from 2 till 6 o'clock, at the home of Mrs. Taylor. Cars will leave from the Fort Confectionery store during the afternoon.

ooooo

Keep in mind the St. George's Annual Thanksgiving Supper and Dance. Announcements will be made later.

ooooo

The United Church W. M. S. will hold its September meeting at the home of Mrs. L. O'Brien on Tuesday afternoon, September 19th, at 3 o'clock. This being a temperance meeting, under the heading of "Around The Table", each member is asked to contribute one item on this subject.

ooooo

Sunday, September 17th, will be Flower Sunday at the United Church. You are cordially invited to attend.

KRAUSE CHILDREN HOLD SCHOOL ATTENDANCE RECORDS

It is believed that the three children of Frank Krause, Ryley have broken all records for school attendance.

Signed statements by teachers and school officials in the districts of Mayerthorpe, Josephburg and Ryley have been submitted, showing that during one year at Ryley, the two eldest Krause children, Leora, age 12 and Billy, age 10, have not missed a day from school. Jean age 6, completed last spring her first year at school without losing a day, thus indicating a purpose to keep up the family record.

ooooo

"No, sir," said the clerk, "I can't give you a room. The best I can do for you is to give you half of a private dining room. There's a screen across it, and a lady has the other half, but I reckon she won't bother you".

Thirty minutes later the guest ran into the lobby, wild-eyed and pale.

"Say," he yelled to the clerk, "that woman is dead!"

ooooo

"Be not you that time," said Mrs. Hennigs Norman to the genial owner of the Bank of England, when they landed recently at Quebec from Canadian Pacific liner, Duchess of Atholl, on their way to Bar Harbor, Maine. The purpose of the visit is a mystery, but soon a holiday being admired by his distinguished visitor.

John Nelson, president of Rotary International, has invited recently by Empress of Britain on his way to Lausanne where the second European regional conference of the world-wide organization was held this month. It is stated that Rotary had 150,000 members in 500 clubs.

ooooo

"If from the conferences, speeches and exhibitions at the World's Grain Exhibition at Regina we can derive even one suggestion of importance to agriculturists, the show will be voted a success," said R. G. Selbery, farmer, United Grain Growers office in Calgary, in a recent address at the Pullman Hotel in that city.

CASTLE SCHOOL GRADE VIII RESULTS

Pupils	Subjects Written	Failed
Dorothy Unterbrunner	5	0
Allen Clink	5	0 R
Alma Foster	5	0
Linnie Morris	5	0
Victoria Chelowski	5	1
Myrtle Kelly	5	0
Bernard Fisher	5	2

Mrs. Clink, the teacher, was the recipient of a beautiful tea set, from her pupils, four of whom are confirming their studies in other schools this year.

Taken from the Files

19 Years Ago Today

Thursday, Sept. 10th, 1914

Threshing is in full swing around the Fort this week.

The committee of Fort citizens have started a Fort Saskatchewan War Fund and at a dance given in the Oddfellows hall for the purpose of boosting this fund, $140.00 was realized. Mr. Doran sang several patriotic songs and everybody had a very pleasant evening.

One of the workers of the reconstruction of bridges along the C.N.R. met with a serious accident, when a chain broke striking the worker and knocking him off the bridge and inflicting a nasty cut the length of his arm.

YPRES VALLEY

The sympathy of the community is extend to Mrs. O'Gorman and family over the loss of Mr. Richard O'Gorman.

ooooo

Miss Molly Pearce is attending school at the Fort.

ooooo

The school here made a good showing at the annual school fair held at Ardrossan last Friday the 9th. Over sixty prizes in school work and around fifty in other classes were taken. Full list will be given later.

ooooo

Rev. Mr. Kidd of Clover Bar preached here last Sunday.

ooooo

Mrs. Thomas and Miss Pegwin Thomas of Edmonton are visiting at the home of W. E. Pearce.

ooooo

Mrs. Drittich is still confined to her bed with sickness.

BORN

Born to Mr. and Mrs. E. A. Roupe of Fort Saskatchewan on Thursday, Sept. 7th. A son, Alfred, Charles.

St. GEORGE'S CHURCH

14th Sunday after Trinity
Holy Communion 8 a.m.
Choral Eucharist 11 a.m.
Evensong 7:30 p.m.

Sunday School 10:30 a.m.

The Harvest Festival will not be held till near the middle of October.

Security and Protection

Grain growers, the length and breadth of Alberta, should keep in mind that a fair measure of protection and security in the sale and handling of their grain can be obtained through the building up of a strong elevator system on a strictly grower-controlled, co-operative basis. Having this in mind the best course to follow is to

CUBANS MUST RESTORE ORDER SAYS ROOSEVELT

Washington.—President Roosevelt threw a protective squadron of warships around Cuba while his secretary of the navy hurried aboard the cruiser "Indianapolis," at Annapolis, for a quick journey to the capital of the island republic.

The president had a company of marines in readiness at Quantico, Va., but he was withholding intervention as the last resort to restore order in the island.

The battleship "Mississippi" steamed down the Atlantic coast to stand by off Key West, Fla., or eight other craft, including a cruiser, destroyers and submarines were within steaming distance of such ports as Guantanamo, Santiago and Havana.

Washington.—Amid fresh reports of Cuban disturbances President Roosevelt called for the speedy establishment of a government to maintain order in the island republic.

Mr. Roosevelt outlined the United States policy to the diplomatic representatives of south and central America who were called to the White House while American warships were concentrating about the troubled island.

To the spokesmen from the neighboring republics, he declared it was the desire of the United States to avoid intervention and that everything possible to make this unnecessary was being done. He said the key to the American policy toward Cuba in this crisis was that the Cuban people obtain as rapidly as possible a government of their own choosing and, equally important, a government that would maintain order.

New York Flyer Wrecked

Fourteen Passengers Killed And Many Injured In Collision

Binghampton, N.Y.—Fourteen persons were killed and 25 others injured, some of them so seriously they are expected to die, as a milk train travelling at a fast speed plowed into a Chicago to New York flyer of the Erie Railroad at the city's eastern outskirts. The flyer, en route to New York, had been stopped by a switch engine at work ahead.

All of the dead were taken from a wooden coach that sandwiched between cars of steel, and three cars from the end of the flyer telescoped like an accordion.

M. H. King, of Elmira, engineer of the milk train, running between Hornell and Hoboken, said: "I didn't see the signal light in time to stop. It happened too quickly. We were coming around a curve."

Vice-President B. E. Woodruff, of the Erie Railroad, said the engineer of the milk train was aware he did not have a clear track.

Fulfilling Pledges Of Economy

Nova Scotia's New Premier Gets Down To Business

Halifax, N.S.—Less than 12 hours after his inauguration as Nova Scotia's premier, Hon. Angus L. Macdonald announced his new cabinet's first order—a council had been a proclamation bringing into effect the provisions of the Nova Scotia Old Age Pensions Act, passed in 1931. He disclosed also the cabinet's initial moves towards fulfilling pre-election pledges of economy.

Estimated savings of $38,000 annually were effected through abolition of two deputy ministerial posts—those of agriculture and health—and reduction in the number of liquor commissioners from two to one.

In addition, the cabinet appointed three of its members on a committee to ascertain means of further reducing expenditures of government.

Heads Medical Council

Ottawa, Ont.—Dr. R. H. Arthur, of Bethany, Ont., was elected president of the Medical Council of Canada at its annual meeting here, succeeding Dr. W. A. Thomson of Regina. The council is the governing medical board for the Dominion and has the final say on the examinations which must be passed before a doctor may practice in Canada.

Backs Western Farmers

Higher Reward For Services Necessary States Hon. J. F. Bryant

Toronto, Ont.—"The farmers of western Canada are not a bunch of Reds although a few "Reds" are found in the ranks," Hon. James F. Bryant, Minister of Public Works and Acting Minister of Agriculture for Saskatchewan, told the directors luncheon of the Canadian National Exhibition. He said they are trying to bring about better conditions in rural life.

"They have seen the march of a new day, and in any matter which affects agriculture the voice of the western farmer will be heard," declared the minister. The farmer who endeavors to raise on his own farm the means of livelihood for himself and his family, and does not seek to gain wealth as a rule in a comfortable position deserves the present economic conditions.

"It is not production but distribution that is the chief difficulty. Falling prices have failed to check the constantly increasing supplies and there is a growing belief among our farmers that something is radically wrong with rural life," said Mr. Bryant. "Agriculture must receive a higher reward for services rendered."

Forest Fires In Manitoba

Settlers And Summer Campers Forced To Leave Homes

Winnipeg.—Man.—Fire-fighting resources of Manitoba have been taxed to the limit to check forest fires scattered across eastern and central Manitoba. Outbreaks were reported from 21 districts. Chief concern, however, was felt for the blaze which roared over a five-mile front between Rennie and Whitemouth, in the southeastern portion of the province.

Motorists returning to the city found driving between Rennie and Whitemouth difficult and precarious. Dense smoke from smouldering peat beds obscured the highway. Automobiles crawled along through the murky pall with windows closed to keep out choking fumes. More than 100 men patrolled the fire zone, the blaze being reported under control.

Families of settlers and summer campers were evacuated from the danger zone. Only the men remained behind to keep a watchful eye over a fire that destroyed valuable timber stands, razed the station and section house at Rennie, and threatened small settlements before rain came to the aid of forest rangers.

Accepts Important Post

Saskatchewan University Professor Goes To Carnegie Institute At Pittsburgh

Saskatoon, Sask.—Dr. Lloyd L. Dines, professor of mathematics at the University of Saskatchewan, for the past 18 years, and for the past two years administrative head of the junior college there, has accepted the position of head of the Department of Mathematics at the Carnegie Institute of Technology, at Pittsburgh, President W. C. Murray announces. The position carries a greatly increased salary.

Dr. Dines has long been known as one of the leading mathematicians in Canada and as honored as a fellow of the Royal Society of Canada in recognition of his successful research work. He was highly appreciated here as a teacher and administrator. He received his training at the University of Chicago.

Professor D. B. Delury will continue Dr. Dines' classes in mathematics during the coming year, Dr. Murray intimated.

Want Game Guardians

Calgary, Alta.—Appointment of a body of game guardians in Alberta, to handle protection of game now done by the Royal Canadian Mounted Police, was suggested to the provincial government by the Alberta Fish and Game Association in annual convention here. Steps to prohibit shooting of all migratory birds with rifles and modern high power pneumatic guns also was urged.

Nearly 60,000 Present

Nearly 60,000 people attended a religious festival at the Curlin Grotto in Scotland recently to observe the anniversary of the opening of the place.

SIDNEY T. SMITH

President of the Winnipeg Grain Exchange, who announces the buying of wheat futures for the first time in the history of the Exchange and said the pool would remain out of the market as stabilizer.

Project Has Been Success

Colonization Of Spiral Road Working Well In Quebec

Quebec, Que.—The Granger system of placing with farmers and their families (children from city homes where there are cases of tuberculosis was introduced last year by the Quebec Bureau of Health and according to Hon. Athanase David, provincial secretary, the experiment has been successful. The children have become attached to country life and have no wish to return to the cities, and in a number of cases the farmers have gone to the extent of legally adopting the children. This is a good kind of colonization, said Mr. David, who has been delving into the doings of the provincial bureau of health since his return to work after a few months abroad.

The Granger system gets its name from the fact Professor Granger now deceased, organized this system of family placement 30 years ago at a time when public attention in France was turned to the scourge of tuberculosis. The work still goes on in France but it is done under private initiative on the basis laid down by Professor Granger, and funds are also provided by private purses. Mr. David studied this system in France and launched the project in Quebec without waiting for private initiative to start the work.

Three Children Burned

Quyon, Que.—Three children, Kathleen, Olive and Felix Jean-Marie, were burned here when they dropped a match in a tin can filled with gunpowder. They suffered serious burns and were rushed to hospital at Ottawa. The can of gunpowder had been hidden away in the bottom of a cupboard 25 years ago.

British Farmers Favor National Milk Pool

Overwhelming Majority Shown When Vote Was Taken

London, England.—British farmers have voted overwhelmingly in favor of a national dairy pool. The result of the poll showed 96.43 per cent. in favor and 3.36 per cent. opposed. A two-thirds majority was necessary.

With its national and regional pools the scheme will be one of the biggest undertakings in the United Kingdom. Farmers will sell their milk through the pools which will divide the proceeds among participants according to the amount of milk each delivers.

The national board which will be in charge, will be responsible not only for marketing and supply contracts but will also have the task of utilizing surplus milk for cheese-making and the manufacture of dry milk on a large scale. The board assumes control October 1 for a trial period until the new year when the scheme itself becomes operative.

The scheme applies to England and Wales.

Indian Chief Well Known

Head Of Sioux Tribe Dies After Long Illness

Prince Albert.—Chief George Kinywahaw of Getwood, Man., head of the Sioux Indians in Canada for many years, passed away recently at the Round Plain Indian reserve and was buried September 3, according to word reaching here. The 74-year-old Indian chief was visiting Sioux friends in the reserve and he became ill on August 20 after having assisted in haying. He had been suffering for years from an internal ailment.

Chief Kinywahaw was one of the best known Indians in Canada. He was one of the central figures in the colorful Winnipeg Board of Trade celebration in 1920 held in honor of veteran Red River settlers and trail blazers of the Canadian northwest. He was a successful farmer at Griswold.

Subject To Penalty

Calgary, Alta.—Out of Calgary's 2,300 married jobless, 1,711 are subject to a penalty, which came into effect September 1, because they are behind 100 hours or more on their work cards which contain their record of employment on relief jobs. Many are appealing their cases before relief officials who have started a close check on men refusing to work in return for relief granted.

Threaten To Destroy Trees

Kelowna, B.C.—Threats of "smashing down the trees" of those who would not come into an agreement were heard at a meeting of Kelowna fruit growers who asked of the shipper a guarantee of a cent a pound minimum for all apples picked and shipped.

A SCENE FROM THE WHEAT INSTITUTE

Our picture was taken after one of the hectic sessions of the World Wheat Conference in which delegates from thirty-four nations sought an opportunity for an international agreement on wheat production. The main figure in the group coming out of Canada House is that of Right Hon. Stanley Bruce, chief delegate from Australia, who played a big part in the proceedings, which concluded harmoniously.

MACHINE AGE NOT TO BLAME FOR ECONOMIC ILLS

Leicester, England.—Applied science Sir Frederick Gowland Hopkins told the British Association for the Advancement of Science, "should take no blame" for the paradox of poverty amidst plenty and the replacement of human labor by machinery.

Sir Frederick, head of the conference, made the statement during his presidential address in which he outlined the attitude of science in becoming life in terms of chemistry.

"It is not within my capacity," he continued, "to say anything about the paradox and its cure, but I confess that I see more present danger in the case of 'money versus man' than the danger present or future in that of the 'machine versus man.'"

Concerning the replacement of human labor, he said:

"It is surely right that those in touch with science should insist that it will continue. It need not involve a revolutionary change if there is real planning for the future. No one can say what kind of equilibrium the distribution of leisure is fated to reach. In any case an optimistic view as to the probable effects of its increase may be justified."

Sir Frederick referred to words of Sir Alfred Ewing, which he said were still being echoed: "That the command of nature has been put into man's hand before he knows how to command himself."

"I confess," he declared, "that if civilization escapes its other perils I should fear little the final reign of the machine. We should not altogether forget the difference in ture which can be made of real and ample leisure compared with that possible for very brief leisure associated with fatigue, nor the difference between compulsory toil and spontaneous work."

High Quality Of Wheat

Samples Of New Crop Show High Protein Content

Winnipeg, Man.—Protein content of the first 100 samples of new crop western Canada wheat is on a par with the average for last year, laboratory tests announced recently, reveal. The content is slightly lower than the first-run last year in Manitoba, but higher in Saskatchewan, according to a report prepared by T. A. Aitken, head of the grain research laboratory of the board of grain commissioners.

Alberta wheat was not available in sufficient quantity to permit a test.

Maximum content of 112 samples of No. 1 hard from Manitoba and 66 from Saskatchewan is shown at 17.2 per cent., while the average content is 13.9 and 14.7 per cent. for the respective provinces.

The average of 344 samples of No. 1 northern from Manitoba was 13.6, while 319 samples from Saskatchewan averaged 14.5 per cent.

Loading At Churchill

S.S. Gardenia May Be Last Vessel To Take On Cargo This Season

Churchill, Man.—Elevator machinery hummed here with the arrival of the S.S. Gardenia to take on what may be the last cargo of grain to be shipped from Manitoba's northern port this season.

With her arrival in port, preparations for loading 220,000 bushels of grain were immediately under way and when the "Gardenia" steams out of the harbor the 2,000,000-bushel government elevator will have less than a ship's cargo in store. The leftover will total only 30,000 bushels of wheat like in the ninth vessel to take an overseas grain cargo from the Hudson Bay port this season.

Appreciate For Farmers

Winnipeg, Man.—Plans for an agricultural apprenticeship scheme to provide more permanent help for the farmer and employment for the young men who find it impossible to get jobs, is being considered by the joint committees of the agricultural and seasonal unemployment bureau of the Winnipeg Board of Trade.

A COMPLETE PRINTING SERVICE

The Fort Record

Energy For The Future

World Has Supply For Many Thousands of Years

A major energy for mankind's future use is contained in the sands in wind, tides and ocean heat. This is the conclusion of Dr Arthur B. Lamb, Professor of Chemistry at Harvard University and Director of the university's chemical laboratories.

Stock year the world used 17,500,000,000,000,000 kilogram calories or so much energy as is contained in 2,700,000,000 tons of coal; if our supply or natural resources were cut off. It would take the labor of 11,000,000,000 men 5 times the population of the world to furnish the same amount of energy. At present, only 17 per cent of this total in actual human energy while coal furnishes 80 per cent and the remainder comes largely from oil, wood, gas and the labor of human animals.

Even these present sources of energy represent but a small fraction of the available supply of coal, oil and gas. The untapped reserves of these fuels already enumerated amount to 5,- 200 times the world's annual consumption of all kinds of energy, that is, at the present rate of consumption, we can get along for a couple of thousands of years.

But this assurance pleasing as it may be is insignificant beside the tremendous stores of energy in sources as yet untilized. Annual rains energy in the earth totals almost 42 times the energy of all the world's energy r nerves in the forms of coal, oil and gas. Even common winds, if dly harnessed, could deliver in one year 75 per cent, as much energy as could all coal, oil and gas sources during the next 2,000 years.

Too Many Skyscrapers

New York Should Have Had Limited Building Height Years Ago

In a sense the American city has defeated itself, and New York is a striking example of that defeat. Every new high building on the island of Manhattan has risen at the expense of those below it. Twenty-story offices have cut off the light and air of those of ten stories, forty-story structures have done the same for twenty-story buildings, and a sixty-story skyscrapers have completed the havoc.

The failure of New York years ago properly to limit the height of its buildings has brought to pass that in considerable sections of Manhattan thousands of offices below the tenth floor are practically cellars. Streets have become impassable with automobiles, sidewalks are over-crowded with pedestrians, and it has been impossible to build subways fast enough to meet congestion.—New York Nation.

Shutting Out Fresh Air

Mercedes Glass Screens Declare Protection On Normal Lines

All the newer ships have spacious sport decks, and there are accurately measured promenades along the sides of the structures containing the staterooms. But the law of the ship is meant in as of to shield voyagers from the Atlantic breezes, these promenades are now being fitted at their forward ends with movable glass screens. In ships like the "Europa" and the "Bremen," one may go from end to end of the range of artistically decorated public rooms without meeting any rush of inhaling fresh air. In such super-luxurious surroundings the passenger may continue from the time he goes on board until he disembarks. It would appear that the physician who recommended a sea voyage as a cure will have to specify the steamer also.—Boston Transcript.

Business Men Preferred

"Now," said the bridegroom to the bride when they were alone from their honeymoon trip, "let us have a clear understanding before we settle down to married life. Are you the president or the vice-president of this society?"

"I want to be neither president nor vice-president," she answered. "I'll be content with a subordinate position."

"What position is that, my dear?"

"Treasurer."

PICTURESQUE SCOUTS AT JAMBOREE

A group of Polish Boy Scouts in national costume at the World's Scout Jamboree at Gedollo, Hungary Over 60,000 Scouts from all parts of the world attended the gathering.

Canning Outwits Dog

Cat When Cornered Uses Clever Tactics To Escape

The mastery of herself which a cat often shows having been caught in a position from which there is no escape, she calmly sits down to face out the threats of a dog, is a marvelous thing. Everybody has seen a kitten on the street deserted, attacked by a dog ten times her size, so apparently at the mercy of the enemy in her masterly way. If she turns tail and runs down the street she is lost; the dog will have a mere advantage of her. Even as it is, if he could get up courage enough to raise her on the spot, he would be able to make short work of her.

"You dare not touch me and you know it!" is what her position tells the dog, but she is intensely on her guard, in spite of the air of perfect control. Her legs, concealed under her fur, are ready for a spring. Her claws are unsheathed. Her eyes never move for an instant from the dog; so he bounds wildly from side to side, barking with rage. Suddenly there glitters in eyes of hers follow him with the keenest scrutiny. If he pluckts up his courage, she is ready; he will call her life dearly. She is watching her chance and she does not miss it. The dog trew Fabius into him and withdraws a few feet, settling down upon his forepaws.

Just then the sound of a dog's bark in the next street attracts his eyes and ears for a moment, and when he looks back the kitten is gone! He looks down the street and starts writing in that direction, and reaches a high board fence just as a cat's tail — a monstrous tail for such a little cat is vanishing over the top of it. He is beaten The cat showed not only more courage than he had, but a great deal more generalship.

Remarkable Plant Found

Belongs To Clover Group and Has Seven Leaves

Discovery of a giant clover with seven leaflets, described as new to the land instead of seven found in the United States in recent years, was just been reported by C. V. Morton, botanist of the Smithsonian Institution at Washington.

Hear each a large and conspicuous specimen was found growing on the highway a mile south of Wallace, by C. V. Thompson, of Seattle, a head collector, and was sent to the Smithsonian for identification.

The new plant obviously belonged to the clover group, which includes hundreds of species growing in temperate climates of the world, but it had a thick stem nearly two feet high and here heads of flowers close to two inches in diameter. It is described as a perennial herb.

A regrettable feature, for a clover, was that of the three leaves present at the end of a leaf stem nearly eight inches long. Most clover leaves are on short leaf stems, or petioles, close to the ground at the base of the plant. The leaves themselves were long and narrow, like tongues. Those on the giant clover found in Washington only a foot or so from the ends and nearly three inches long.

It is almost as bad to say mean things as it is to do them.

Dream Of The Future

H. G. Wells In New Book Forecasts Many Mind Conditions

H. G. Wells has had a "dream" of what is going to happen in the next couple of centuries.

In this he sees a terrible war and the destruction of the present economic system, to be followed by a new order of things in which there will be no rent, interest or profit, and a full and happy existence will be possible for everyone.

Wells recorded this in his new book, "The Shape of Things To Come," published recently.

He traces the history of the world from 1933 to 2116 and paints a picture of a horrible war in Europe in 1940, leading to world-wide death and plague from gas, germs and bombs and collapse of the world system as we know it.

From the ruins rises a reconstructed world, in which, as he puts it:

"There remains no way of becoming really wealthy by Gambling is ruthlessly eradicated. Usury ranks with forgery as a monetary offense. Money is given to people to get with they want and not as a basis for further acquisition. There are no speculators, shareholders, private usurers or rent lords."

Ingenuity Of Fire Fighters

Improvised An Aqueduct To Carry Water Two Miles

A hastily constructed aqueduct which carried water from a lake more than two miles away enabled Ontario forestry branch fire fighters to bring under control a dangerous bush fire which raged for several days in the north-east corner of Falconbridge township near Sudbury.

Owing to recent dry weather all streams within two miles were dried up. The dry bed of a creek, however, ran close by the fire. The forestry branch men hastily dammed the dry channel and pumped water from a lake through a mile of hose to a point on the creek two miles away from the water source. From the dam it was pumped a short distance further to the blaze.

Wait For Return Of Lake

Irish People Claim Waters Disappeared Every Hundred Years

Hundreds of people in the Gaeveagh area of County Sligo, Ireland, are watching and waiting for the return of a lake 45 acres in extent and 30 feet deep.

It is Lough Na Suil, 16 miles from the town of Sligo, and it vanished with its 52,000,000 cubic feet of water in a few hours before daybreak.

To Irish people it was known as the "Lake of the Evil Eye." According to an old legend the enchanted waters disappear once in every 100 years, to perpetuate the memory of Balor of the Evil Eye, who was slain in the district by the Ginet King Eochaille.

In their intense struggle an eye was knocked out of Balor's head, and — so says the legend — a lake was formed on the spot.

At night the lake was in its usual state, with a full supply of water, but when farmers went to their fields next day they were horrified to find it had vanished Heaps of dead fish lay stranded on the mast flats.

In the lake was found a huge cavity in the shape of an eye. It was 20 feet long and about 15 feet deep.

Lettuce Is Old Vegetable's

Used By Persian Kings 500 Years Before Christian Era

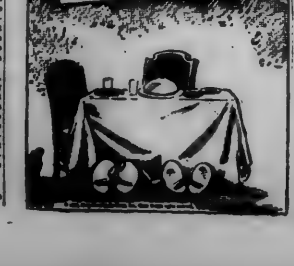
The following article about vegetables is from "In A Week-End Garden," by Maude Stewart Dekh

"Egyptians raised an altar to cabbage and the Romans and Greeks made it the first dish of the meal. Cato declared there had been no physicians to the Romans for six hundred years because of their health! Aside from the liberal use of cabbage.

"Cauliflower came from Cyprus, and the dynasties of Ptolemies worshipped the onion.

"Lettuce came to American from the far away Turkish island, birthplace of Ptolemy II. and Hippocrates, and was on the tables of Persian kings five hundred years before Christ. The philosopher, Aristomenes, caused his pupils to be sprinkled with wine while growing, to add a delicate touch to his favorite salad."

FANCIFUL FABLES



Boy Leads Marauding Band

Twelve-Year-Old Has Absolute Power Over Afghan Tribe

There is a stretch of No Man's Land between the admin strative borders of British India and Afghanistan This area is inhabited by the Mahsmai tribe, who are friendly to British rule in India

Into this country 4,000 Ir lish troops recently advanced to help the Mahsmai who were being attacked by a powerful body of Upper Mahsmais All this trouble centred about the figure of a 12-year-old boy, Ghulam Nabi.

This child is known to be the son of an old border raider, but the mysterious and dangerous leader known as the Mad Fakir who is actually leading these wild frontier bands, is passing him off as a great hereditary chief.

Surrounded by his 5,000 marauding followers, this boy is kept in a small white palace tent He is a slight, delicate child whose face is said to be exquisitely beautiful. In this dainty tent the boy stays always unless when leading his wild, white-clad followers.

Only four men, including the Mad Fakir, are ever allowed inside the sacred tent.

They salaam deeply before him and murmur some ritualistic jargon. The child then turns on them his huge black eyes, which, they say, have curious hypnotic powers

His influence over these wild men is absolute They believe him to be possessed of a few hairs from the beard of the prophet

In India the Mad Fakir is known as the Re-Ahi Lenanai, the first of the seven meaning "wrieve."

Beard tinged with red henna, eyes that alternately glisten with a piercing intensity and then cloud into an obscure observation of the beyond, great stature, arresting rhetoric with strange intervals of silence —such is the frontier ritualistic-maker

The Mad Fakir is undoubtedly mad — were he not so he would have been dead long before this. But no frontier Moslem would so much as touch one whose mind is deranged, and many are willing to see in the affliction the directing hand of Allah.

Consequently the Mad Fakir always has an audience.

Disliked Fast Trip

Speed Of Italian Liner Spoiled Voyage For Passengers

What it takes to establish transatlantic records is illustrated by that trip of the liner "Conte Savoia" The Italian Line flagship broke all standing marks for speed across the Atlantic, flew the blue championship pennant, and turned out in Naples and steamed grandly into New York to the accompaniment of columns of publicity.

But the passengers had a story to tell, too.

Food was good so fast, some passengers say, that the resultant vibration kept them from enjoying the trip, and the nervous hangover lingered well into dawn for several days after they landed.

A number of the usual comforts were done away with in the record quest. The Lido Deck, an open air swimming pool, one of the boat's features, was closed for the trip, captain not wanting the extra water weight burden.

Air-Minded At Ninety

Canada's Oldest Speed Skater Gets Pilot For Aviation

Canada's champion 90-year-old speed skater, Joseph Arsenault, is in the news again. Since he has a fair fortune, and his friends would not be surprised to see the vigorous old fellow attempt to get a pilot's license.

Recently an aeroplane from New York alighted on a field near his home. It brought relatives to see him, and from that time on he has been air-minded. First thing his people knew he was off for Shediac to see General Rino Ballbo's famous air parade.

More than 200 industries are putting air-conditioning to profitable use.

Canada has the largest flour mill in the British Empire.

Occasional Wife

Author of "HONEYMOON," "LOVE'S CROSS ROADS," etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Anson, fellow student in an art school She is the adopted daughter of a wealthy family, and he is a poor, struggling sculptor On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace A chance meeting, however, paves the way for another date This time they walk in the park Camilla tells Peter that she is not rich, or, at least, will not inherit the Hoyt fortune Peter in turn confesses he is practically penniless They fall into each other's arms.

(Now Go On With The Story.)

CHAPTER VIII.

When Camilla and Peter had gratified the weeks of their longing for love of each other with incoherent words and tumbled kisses, Peter held her off and exclaimed, "To think how near I came to losing you! And I should have, if you had not told me the truth!"

"That was why I dared to tell you, because I had to And at the same time, I was afraid that when I did it would be the end. There is no explaining the way things happen to them."

Peter was silent for a minute, then turned aside from her suddenly and exclaimed, "But, Camilla, don't you see, dear, your money may mean that it makes it all the more impossible for you to love me."

"What do you mean, Peter" alarmed.

"Because I have no money, either. I can't take care of you—oh, for years perhaps never. Mrs. Hoyt is right—you must find someone to love who has plenty of money to take care of you."

"But didn't I just tell you that I was preparing to take care of myself?"

"Oh—that! For awhile—yes. But you must think of your future."

"That is just what I am thinking of—what my future would be with-out you."

"Surely, there is someone you could care about, in spite of money and influences that will give you the happiness you deserve." He did not sound very convincing but he was trying to be generous.

"There is no one in the world who can make me happy, except you, Peter." He pressed her head close on his shoulder like a forlorn child seeking protection.

"Precious Camilla, you make me wild. If only I could make you happy!"

"You can if you love me enough," softly.

"Love you! I love you too much! But I can't take care of you for ever so long, and perhaps I never could give you what you have had."

"Will you stop saying that, Peter?" she demanded severely. "I don't want the things I have had—ever. I want you oh, Peter, darling, I love you so! Don't send me away from you." Her hands reached up and clasped around his neck . Her lips lifted to his. Peter took them, eagerly, lost to all practical reasoning.

They murmured together. "I won't, darling, I promise. We'll find a way."

Presently, it was Camilla who drew away suddenly and exclaimed, "Why, Peter, it is you who should marry a girl with a fortune, so you can be free to study and work without worrying about money. That would mean everything to you. I'm sorry I forgot my side of it, Peter dear, I'll go away and take care of myself and bid someone else." Now it was Camilla who tried to be cheerful and convincing and generous.

Peter drew her close with an indulgent laugh. "You precious little goose! What should I have to work for if I lost you? Having you would be my surest chance of success, Camilla. With you for my inspiration, the sky's the limit for me We shall dream and work together you and I. There are dreams in your eyes, that promise me so much, darling! How we shall live, together!"

"You are sweet" she told him, fondly scanning his face

"But I haven't told you all about me, dear I have no family here, except some older brothers and sisters who are married and involved in their own affairs I lost my mother and dad when I was only a kid, and I lived with my oldest sister until I could take care of myself I wasn't very old when I started on my own."

"Such a brave little fellow you must have been! Why should I be afraid that you can't take care of me years day, then—"

"Well, that's different. I got along somehow on very little. You are sure you don't mind that I came to Amerika in the steerage class and my mother wore a shawl over her head?"

"Why, Peter Anson! Why should I mind that? He did my mother came to America with a shawl over her head and suffer the bewilderment and fears of Ellis Island

"What's the difference ,anyway," she continued, "just a few generations! We all came from across the Atlantic, yet the Scot arrivals scorn the later ones. Because they beat us to it, I suppose. But as soon as the biggest high-hats have prospered with

"Do I Still Sound You Of An Iceberg?"

freedom add the democracy that they never practice, they go back where they came from, and go abroad to exploit their wealth to the poor relatives they left behind, to buy continental culture, to absorb the germs of great foreign movements and to bring the results home to Europeanize the land of the free."

"You are marvelous!" Peter, declared solemnly.

"So are you! Do you know what you reminded me of the first time I saw you?"

"Aye tank aye go home ?" he laughed.

Her finger tapped his cheek with gentle reproof. "Of course not! Will you stop being ridiculous? You always make me think of Viking ships and the adventurers in search of conquest and new lands. You are like your beautiful, brave country, Your hair is like the gold of the sunset, your eyes are like the sparkling blue ice of the stern winters."

He chuckled with joy at her delighted fancy. "Do I still remind you of an iceberg since I've kissed you?"

"No, I've changed my mind about your being as reliable to be. You must be the fire of the northern lights, the sun of Aurora Borealis," she bantered.

"Just for that, I'll burn you up," he warned her, kissing her again as

Old Fashioned "Cream Cooking" at the cost of milk!

That's what you get when you use St. Charles. It is not only economical and convenient but it is double rich in cream and gives a delicious cooked-in cream flavour to every dish you use it for. use.

ST. CHARLES MILK

there by doing anything I could — just as I've worked my way through National Perhaps a guide or interpreter I know French pretty well and Swedish and Scandinavian."

"I have Spanish and French and some Italian," Camilla added. "We might start a foreign language school."

"Or build a tower of Babel."

"We'll let the children do that," she reminded him, shyly.

"There you are! Now the children come into the picture And you say I needn't change my plans."

"Oh, but that's a long time from now—when you are rich and famous, when your figures decorate the cities of the world."

"Why, I'll be so old then—" they laughed together

Camilla said presently, "Forgetting all that now, you must promise me, Peter, to go right on with your work as you had planned before. If you don't, I shall go away and never see you again."

"You couldn't!"

"I shall if you let me hurt your work. I love you too much to hurt you like that."

So much that you could leave me if you believed it would be better?"

"You, Peter?"

"Oh, my dear!" his voice held awe. "But you are to remember that losing you would hurt me now more than anything else that could possibly happen to me. Shall we both go on with our plans as we had made them, for awhile, just seeing each other when we can, then?"

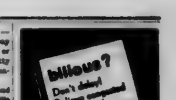
"Not going to the Majestic and the Maddox. Oh, Peter, that was terrible. You must let me pay you back the money you spent that night."

"Don't say that, dear. If I always have as much pleasure from my money I spend as that gave, I'll get enough from life. Please don't humiliate me again, Camilla."

"All right. But you must not spend your money on me again. We can walk and talk together in the park and have little picnics this summer when you are not too busy."

So they planned confidentially, as only lovers can, the details of the emptiness of life may dare; to them the future always beckons along a straight and shining road.

(To Be Continued.)



Little Helps For This Week

"O the depth of the riches both of the wisdom and knowledge of God; how unsearchable are His judgments, and His ways past finding out."—Romans 11 33

No star is ever lost we once have seen,
We always may be what we might have been.
Since good, though only thought, has life and breath,
God's life can always be redeemed from death.
And evil in its nature is decay.
And any hour can blot it all away;
The hopes that lost in some for distance seem
May be the truer life, and this the dream.

—A. A. Proctor.

St. Bernard has said: "Him if thou confess a noble and holy life, and unceasingly prayest to God for it, if thou continue constant in this thy desire, it will be granted to thee without fail. And if God has not given it to thee, then shall find it in Him in eternity, of this be assured." Therefore do not relinquish your desire though it be not fulfilled immediately, or though you may suppose from appearances that it is denied you. Persevere, for you shall find the fruit thereof; that is, to all eternity, it shall be better for you than if you had never had them.—J. Tissot.

Train Accidents

Seven Passengers Killed On Canadian Roads Last Year

Last year there were seven passengers killed and 280 injured in train accidents. The Dominion Bureau of Statistics says in a report issued recently. This was an average of one killed for every 3,000,000 carried And one injured for every 42,000.

Injuries to passengers ranged from scratches and bruises to more serious injuries. Two passengers were killed in collisions, two fell from trains, two were killed getting on or off trains, and one from other causes

There were 57 employees killed in train accidents and 997 injured, says the report, a low record for the last 22 years. There were 94 persons killed at highway crossings, of which 78 were motorists, and of this number 30 were killed at protected crossings

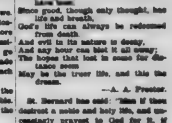
Waterspout Chases Ship

Steps Volume Of Water Follows Liner For Miles

A waterspout playing tag with an ocean liner was the adventure experienced by passengers on the "Duchess of Bedford" during a violent wind storm. The liner was on her way down the St. Lawrence from Montreal to New York on a cruise.

The giant spout, which measured 50 feet across the base and at times as much as 500 feet in height, chased the liner for almost five miles at a speed of approximately 17 miles per hour, passengers reported.

Paris plans to build many schools.



25 feet of white or colored paper for kitchen use—covering shelves, lining drawers, etc.

Quicksilver PAPER PRODUCTS

THE RHYMING OPTIMIST

By Alice Michaelis

HOW FRAIL IS BEAUTY

How frail a thing is beauty
To touch the heart-strings so!
The swirl of dancing shadows,
The willows bending low.
The jade and emerald water,
The far-flung breaking wave;
How frail a thing is beauty,
And yet a life can save!

O, beauty let me clasp you
And hold you close always,
Hold with me in the rainbour
Of morning's golden haze;
Reveal your still reflection
Upon the sleeping lake
And greet me with the twilight
When starry hosts awake!

A gleam, a hint a promise
A sunset's fleeting gold,
How frail a thing is beauty
That yet a life can shield!

A Strange Shadow

Telescope Convinced People Man They Saw Was Not Flagpole Sitter

A flag-pole sitter in Montreal seemed impossible but the office staff of one of the upper storeys of the Aldred Building were sure that they saw a person seated on a steel atop a flagpole on a nearby building.

For many minutes the amazed audience watched intently as this new spectacle Only after a powerful telescope was sent for did they discover their mistake. The telescope revealed a man sitting on a stool on the roof of a building beyond the one which supported the pole Strangely enough from all sides optical illusion caused the man to appear to be seated on the flag-pole. He sat still for more than 30 minutes and this added to the deception.

Give any man half a chance and he will say something that he will regret later.

Norway will boost government tobacco.

WEAK WOMEN

Take Lydia E. Pinkham's Vegetable Compound

When you see folk that you know are weak in de ermination, dear, you do not have the strength to do that would help them. Women are weak and nervous should take a tonic such as Lydia E. Pinkham's Vegetable Compound. Pinkham's Vegetable Compound is a tonic and medicine that are the result of a blend, rare combination of roots picked in their correct condition.

Of all of every 100 women who report to us say that they are benefited by this medicine. Buy a bottle from your druggist today — and benefit this evening.

THAT REPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile,

— Without Calomel

You are "feeling punk", simply because your liver is sluggish and not pouring enough bile into your bowels. Digestion and elimination are slow. Your food ferments and poisons the system. You feel sour, sick and miserable.

What you need is a live stimulant, those sluggish liver glands. Then bile flows freely, and you feel like working and playing again. Ask for Dr. Caldwell's Syrup Pepsin. It's a vegetable laxative that acts gently on the liver. Even the first dose helps. Get a bottle today. Use as directed. 30c and 60 all druggists.

Dr. Caldwell's Senna Laxative Pills, 30c and 60c, are also excellent for relieving constipation.

Win 15 Dollars!

The following merchants are donating a prize of Fifteen Dollars, ($15) to the person submitting a name for Fort Saskatchewan's new park, that shall be considered most suitable by three independent judges to be appointed from outside the Town. The conditions under which names may be submitted are very simple.

CONDITIONS!

For every Five Dollars worth of goods purchased from any one of these merchants during the months of September and October, you will obtain a combination blank. Fill this blank in with your suggested name for the park, and the merchant from whom you purchased it will sign it, date it, and time it. The portion of the blank with your own name on will be held by your merchant, whilst the portion containing your suggested name will be submitted to the judges.

Each portion bears a similar number.

In the case of two or more persons submitting the same name, the which should be chosen by the judges as the prize award, the name submitted bearing the earliest date of entry shall be judged to be the winner.

The judges' decision shall be final.

No proposed names will be considered in connection with a name for the park.

Coupons may be obtained from the following merchants. ——

Brewer Lumber (Northern) Ltd. — M. Bennett.
A. H. Cassedden Hardware — Fort Confectionery
Fort Hardware Co. — Bill Graham's Service Station
Jones, Graham & O'Brien. — H. Robertson Meat Market
Leiser's Bakery. — Smith's Drug Store
Simmons Lumber Company

There is a $15.00 prize awaiting someone. Purchases do not have to total five dollars at one time. Save your cash receipts, and when they show purchases amounting to five dollars made in September and October, you will receive your coupon. Pay your account at date, and get coupons to the amount of your purchases.

Fort Saskatchewan Record

VOL. 13 No. 7 — FORT SASKATCHEWAN, ALBERTA WEDNESDAY, SEPT. 20th, 1933 — $1.50 PER YEAR IN ADVANCE

A 90th Veteran

William G. Shore, one of our re-spected townsmen, returned from Winnipeg last Friday morning, where he attended the 50th anniversary of the 90th Winnipeg Rifles, and met many of his old comrades.

Mr. Shore, who is 81 years of age, served with the Regiment from 1885 to 1887. This regiment was known as the "Little Black Devils", a name given to it by the Indians at Fish Creek and Batoche during the Rebellion of 1885. It also distinguished itself during the South African war, and the late war. It is interesting to note that Lieut. Wallace and Cecil Ashton transferred to the 90th Regiment in France.

JUNIOR GRAIN CLUB COMPETITIONS

Results have been announced in the annual field plot competitions of the junior grain clubs of the province. The most plot championship goes again to Redbern Club west of Edmonton, which won last year. The championship in oats goes to the Wolf Creek Club, west of Edmonton, amongst the trees on the East of Government Street. The annual second gains unafraid as he approached the men running to the Park. The flowing river, the stately trees, with the graceful deer browsing in the meadow, made a delightful picture. One almost wished that the pretty creature could remain as a denizen of our future park.

Don't forget folks! That this New Park needs a name and the merchants in the Fort have donated $15. for a prize to the one submitting the winning name.

Brownie News

The Brownies will have their first meeting for the coming season, on Monday, Sept. 25th, at 4:15 p.m. in the usual hall. Uniforms must be worn by those who have them.

The past year has been a most successful one for the Brownies and Guides and I like to take this opportunity of thanking everyone for the kindly interest shown in them.

The Brownies spent a day at Elk Island Park, which was the last meeting before summer holidays.

They are looking forward to visits from the District Brown Owl, Pixy, Guide Commissioner and others, who may find it convenient to come.

A meeting of special interest was one attended by Dr. Turner when he spoke to the Brownies on some of Alberta's most common, wild flowers and showed them his beautifully mounted specimens, which has created such enthusiasm that they are collecting and mounting too, Dr. Turner has kindly promised to come again and speak to them on birds.

Can you beat this for "Park" interest. On three occasions last week a beautiful buck deer was seen wandering near the town in the East of Government Street. The animal seem-

Grandmothers of the District Guests of the Women's Institute

The first meeting of the season of the Fort Saskatchewan Women's Institute was held on Thursday, Sept 14th, at the home of Mrs. A. H Rogers with a large attendance.

During the business session the Convener of the Cemetery Committee reported that a grant of $50.00 from the Town Council had been asked for and received. Further, the sum of $7.00 for the sale of hay had been received. Mr. Montgomery had cut, raked and coiled the hay gratuitously and Mr. Neale had advertised it for sale, free of charge. The Secretary was asked to write a note of thanks for these favors. The Cemetery Fund, after paying all obligations showed a tidy balance with which to commence work next spring.

A small grant was given to each of the two junior rooms of the school, to be used at the discretion of the teachers in the purchase of necessary school supplies where the parents of the pupils are unable to provide them.

Arrangements were made for a Dance in the Memorial Hall on Friday, Sept. 22nd, and for the Remembrance Tea, Saturday, Sept. 30th.

The meeting was pleased to welcome the Grandmothers of the Community, sixteen of whom attended, while others sent regrets. A contest to discover the Champion Grandmother created interest and amusement, the score being based on such points as the oldest grandmother, the oldest resident in Alberta, the longest married, the most children, grandchildren, great-grandchildren, oldest grandchild and youngest grandchild. Mrs. E. T. Latimer was declared the Champion Grandmother and was presented with a pretty cup and saucer. Mrs. Higgins and Mrs. Peters were the runners-up in the Contest.

Mrs. Magee and Mrs. Walton were joint hostesses with Mrs. Rogers during the tea hour.

SALADA

The International Wheat Agreement

In this column last week reference was made to the speech delivered by Premier Bennett on his return to Canada from the World Economic Conference and International Conference of wheat exporting and importing nations important facts, figures and general information affecting the world wheat situation were presented, all of which had a bearing upon the case to be the entering into of an agreement by twenty-one nations mutually interested either as exporters or importers of wheat designed to advance the common interests of all.

Inasmuch as there is no one question of more vital importance to the people of Canada, and more particularly of Western Canada, than wheat, we propose to supplement last week's article by a further reference to the subject. Statistics compiled covering a long period of years go to establish the fact that when the wheat producers of the world are prosperous,—that is, when the price of wheat is high enough to return a fair profit to the farmers raising it,—industry generally throughout the world is likewise prosperous. In other words, wheat is shown to be the barometer of prosperity. Naturally so, because it is the standard food of the great bulk of the human race.

First, we recite the terms of the new international wheat agreement:

The chief wheat exporting nations, that is Canada, Australia, Argentina and the United States, agree to limit their combined exports of wheat in the crop year August 1, 1933, to July 31, 1934 so that the total world exports of old countries shall not exceed 560,000,000 bushels. Of this amount Canada's export allotment is 200,000,000 bushels.

These four countries further agree that during the following crop year August 1, 1934, to July 31, 1935, they will limit exports of wheat to maximum figures 15 per cent. less than the average yield and average acreage sown during the period 1921-1932 inclusive.

The minor wheat exporting countries, that is Bulgaria, Hungary, Rumania and Yugo-Slavia agree to limit their combined wheat exports in both the crop years 1933-34 and 1934-35 to 56,000,000 bushels.

While Russia entered into no definite agreement as to restrictions on either production or exports it did agree to enter into further negotiations governing exports.

On the other hand, the importing countries:

(1) Agreed not to encourage any increase in the area sown to wheat in their respective countries.

(2) Agreed not to take any governmental measures the effect of which would be to increase the domestic production of wheat.

(3) Agreed to adopt every possible measure to increase the consumption of wheat.

(4) Agreed to the removal of measures which tend to lower the quality of breadstuffs, and thereby decrease the normal consumption of wheat.

(5) Agreed to lower their customs tariffs on wheat when the world price reaches and maintains for a specified period an average fixed price.

Finally an International Wheat Advisory Committee was set up, representative of both exporting and importing countries, to watch over the working and application of this agreement.

Such is the new international agreement governing future wheat production and export. It is one concrete outcome of the World Economic Conference. Whether it will prove practical in operation and satisfactory to its parties time alone will disclose.

It involves the export of less wheat on the part of Canada than was hitherto the case in normal years. Consequently, it involves the raising of less wheat, and the putting of step to further increases in wheat acreage and production. For the year 1934-35 this reduction is set at 15 per cent. below the average for 1921-32.

Admittedly, the Dominion Government can restrict exports to any figure it may like. That is entirely within its control. But how can that Government limit production? In the United States it is being attempted by paying a bonus to farmers to reduce their wheat acreage, the said bonus to be paid out of a fund created by imposing a special tax on all wheat consumed in the United States. In other words, compensation is being offered the U.S. farmer. It is reported from Ottawa that this idea does not meet with favor nor find much support there.

It is futher reported from Ottawa that the Federal Government does not intend to resort any compulsion to bring about a reduction in the Canadian wheat acreage, but will rely on an educational campaign among farmers designed to encourage and bring about a voluntary reduction by them. Will the farmers respond to such a campaign? And if certain farmers are willing, and certain farmers are not, what will the result be? If one farmer reduces 10 per cent. and another increases 10 per cent. the country will be in exactly the same position. If one set of farmers decline to reduce 15 per cent., even if they do not increase their production, it means that another set of farmers would have to reduce 30 per cent. in order to bring about an average 15 per cent. reduction.

Then, it is to be noted, that the 15 per cent. reduction in 1934-35 is to be from the average yield and acreage sown in 1921-32 inclusive. But tens of thousands of settlers farmers and millions of acres of land produced little or nothing in them years. They must be allowed to produce as largely as possible in 1933-34 and 1934-35 in order to recoup their heavy losses in those disastrous years. If they are to do so, and at the same time the total production is to be reduced by 15 per cent., the country will be in exactly the same position. If one set of farmers decline to reduce 15 per cent., even if they do not increase their production, it means that another set of farmers would have to reduce 30 per cent. in order to bring about an average 15 per cent. reduction.

Then, it is to be noted, that the 15 per cent. reduction in 1934-35 is to be from the average yield and acreage sown in 1921-32 inclusive. But tens of thousands of settlers farmers and millions of acres of land produced little or nothing in them years. They must be allowed to produce as largely as possible in 1933-34 and 1934-35 in order to recoup their heavy losses in those disastrous years. If they are to do so, and at the same time the total production is to be reduced by 15 per cent., it seems inevitable that those farmers who had fair crops in the period 1921-32 must decrease their future production by very much more than 15 per cent.

And what, it will be asked, is to be done with the acreage taken out of wheat production? Can our farmers afford to work it and allow it to lie fallow? They cannot afford to let it run to weeds. Will the result not be to add decide it to other grains with the inevitable result of large surpluses of such grains over and above domestic and export demands?

Without attempting to speculate on the effect which weather conditions will inevitably have on the success or failure of the proposed plan of reduction,—and which of course are beyond all human control,—one fact in question arises: If production is not decreased while at the same time exports from Canada are restricted, and as a consequence surpluses pile up in the farms or large carry-overs are built up in the elevators, what will the effect of such surpluses have upon the world price? It is admitted that our present large carry-overs have depressed and continue to depress the price of wheat. What hope is there of a rise in international prices, and a consequent benefiting of both by importing countries, if available wheat supplies are not limited to demand?

Summer Complaint Plays Havoc With the Bowels

For people, young or adult of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

The sooner tell when it comes you how it is going to end. Let it run for a day or two and see how well and promptly it will leave you.

On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

Controversy Plants

Trap Insects With Lightning-Like Rapidity In Snapping Maws

New light was cast on mysterious workings of the snapping maws of carnivorous plants by Prof F. E. Lloyd, president for 1932-33 of the Royal Society of Canada, in his presidential address to the botanical section of the British Association for the Advancement of Science, recounted his observations of some 70 species of the bladderwort—a type of plant that catches its food from air or water.

The professor of botany at McGill University, Montreal, contributed a highly technical paper which he labelled a continuation of his review of carnivorous plants.

The address set out the details of the structure of the "door" which the bladder-wort's snapping maw of protoplasmic plant stems shut on such unfortunate "call insects as may come wandering within reach. Surprised-action pictures, Prof. Lloyd related, had disclosed the hungry bladderwort opened the fatal door in 1-100 second, and closed it in 1-40 second, completing the whole operation inside 1-16 second. Included in the 70 types in Prof. Lloyd's survey were many specific insectivorous kind growing in the vicinity of Montreal.

3 MONTHS ON BISCUITS AND MILK

Woman's Digestive Troubles

Everyone who is subject to any form of indigestion should know of Mrs. Currie's experience. Her home from one who has had much severe pain to advise worth having. She writes:—

"I suffered from indigestion, gastritis and constipation, and was so very ill I had (on medical advice) to live on soda biscuits and milk for three months. Well, a friend advised me to take Kruschen, and now I am pleased to say my trouble is ended. I can eat and enjoy a good meal without any painful after-effects; my skin is clearer—in fact, quite clear—and there is no sign of constipation. I would advise anyone suffering the same to take Kruschen."—(Mrs.) M.R.L.

The immediate effect of the salts in Kruschen is to promote a natural flow of the digestive and other vital juices of the body. Soon after you start on Kruschen you will find that you are able to enjoy your food without any distressing after-effects. And as you persevere with the "little daily dose," you will see that the original Kruschen brings a healthy

Old Newspaper Changes Hands

Selkirk Record Was Founded in Town Ago

The Selkirk Record, weekly publication founded 45 years ago by the late James Stewart and carried on by his son, Robert, has been sold by the daughter, Mrs. Margaret I. Colclough, to Charles A. Crozier, who has been a member of the Record staff for the past ten years, and W. H. G. Taylor. The management of the paper has been in the hands of Mrs. Colclough for an years, owing to her father's illness, part of the time, and his active engagement with another newspaper enterprise in the eastern part of the province. The new owners announce a policy of independence in politics.

Should Have Foremen Sleep

Expert Thinks Managers Of Banks Were "Extremely Blind"

Managers of central banks throughout the world were "extremely blind," not foreseeing the approaching depression some years ago, the royal commission on banking was told at Toronto. It did not follow that it was impossible to secure a Canadian of sufficient ability and vision to head such an institution in Canada.

This viewpoint was expressed by A. J. Cromwell, special lecturer in banking at the University of Toronto, in answer to questions by Sir Thomas White, a member of the commission.

Where Phonographs Are Banned

Phonograph hawk been barred from Venice, in accordance Article. The lawmakers have ruled that anyone having one of the sound producers will be dealt with severely. He also has to deed another boy imposing a ban on every town who shows his hand.

Up-Side-Down Flying

Italian Ace Executes Feeling In Three-Hour Trip

Sitting in a Chicago hotel, breakfasting on a mushmoom and coffee Lieut. Tito Falconi told of his experience in making a new world's record for up-side-down flight. His latest wrong-side-up flight was from St. Louis to Joliet, Ill. a trip that took three hours and seven minutes because of the slow speed rain that this type of flying requires.

"It's a swell feeling when you turn upright again," said Falconi. "It's like getting well after you've been sick.

Asked if a sensation of dizziness overtook him the swarthy little Italian ace replied, "Ah, no. This only sensation is one of pain because of the constant weight on one's shoulders. In this method of flying the pilot is held in the ship by straps which fasten around the shoulder, and the sensation felt is the same one gets from carrying say, a 150-pound weight in a basket hanging from the shoulders."

The most thrilling experience in Falconi's career, he said, was had on this trip when his right safety strap gave way about the middle of the way. He dropped half way out of the cockpit, his goggles were torn off by the terrific wind, and he was unable to see. An added peril was the fact that he did not wear a parachute, its weight being too great a handicap in the suspended position.

Egypt Buys British 'Planes

Said To Be Used in Fight Against Drug Traffic

A firm in Manchester has received an order from the Egyptian Government for ten aeroplanes of the Avrom 626 type. The type is a development of the "Tutor" type, an order for 200 of which was placed with the firm a year ago by the British air ministry, on the fulfillment of which the Venezuelan Heath Avros are still engaged.

The type is one on which pilots can be trained in every branch of military flying, including blind flying and bombing.

It is reported that the machines are to be used in the Egyptian government's fight against the drug traffic. The machines are admirably adapted for long-distance patrol work, and have machine-gun, wireless and photographic equipment, and each carries a pilot and a navigator.

Gas In The Stomach

Gas in the stomach, belching, sour water break, pain after eating, etc., can be overcome within three minutes if you will take a little Bisurated Magnesia in water after you eat. The original Bisurated Magnesia which you can get at any drug store will correct said stomach and stop acid indigestion immediately. Try it and see.

Ready For Distribution

Saskatchewan Salt From Simpson Well Placed On Market

The first shipment of Saskatchewan salt, taken from the Simpson salt well is ready for distribution. More than seven years ago a company drilled for oil and about two years ago secured a salt brine deposit. The brine is being vaporized into salt by the Simpson Oil Company.

A well is being drilled about one and a quarter miles east of the salt well, where it is hoped to tap gas, to be used at the salt well for vaporization. With the profits from the salt the company will continue its search for oil in a field that geologists have said has good possibilities for the discovery of oil.

Tax Resolution

Proposition Affected The Grower Results In Higher Prices

In April a restriction was placed on the exports from Cuyion, India, and Java, in order to raise prices to growers, who, for almost four years, have been suffering devastating losses. Higher prices have resulted, not only for the growers, but also have on our own markets, and many postage now already cost more than they did six months ago. Some of the finer quality brands are as yet unchanged, however, and are, consequently, even better value than at last April.

All's Well That Smokes Well

All's well with the pipe, all's well with the smoker when Ogden's Cut Plug is lit and drawing well.

Ogden's Cut Plug is a downright fine tobacco . . . cool, mellow and satisfying . . . made for the pipe, made to pack right, to light right and to smoke right. See what a difference it will make in your pipe!

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chancellor cigarette papers

Tobbing Record Place

The time-honored onion has finally lost its grip on Bermuda. Agricultural statistics for 1932 show that for the first time the Bermuda onion is playing second fiddle to other vegetables in number of crates shipped from the island, tomatoes leading by a score of 39,821 to 30,821. Carrots also passed onions this year with a grand score of 34,890 crates.

Saskatchewan is the world's greatest wheat growing province.

The Royal Scot has been equipped with a bell and searchlight to meet North American railway regulations.

WORLD HAPPENINGS BRIEFLY TOLD

Two military expeditions collided in the air at Kiakta, Poland, killing four occupants.

T. A. Love, Grand Forks, B.C., was elected president of the British Columbia Yukon Valley Synagogue Association.

Robert Von Ballegham demonstrated at Brussels, Germany, a minisbarm aeroplane which, he contends, is proof against fire and bomb.

Hazell's new "pure outlaw" law has become effective and hereafter stores can sell only coffee from the Yoncler. Tea dugs old in the land.

The world Jewish Conference closed its sessions by adopting a resolution calling for a boycott on German goods until the rights of Jews in Germany have been restored.

The radio station at Cameron Bay has been destroyed by fire. It was housed in a radio instrument room at Churchill. No details regarding the cause were given. The estate of the loss is not known.

Samuel Rotkin, 13-year-old chief executive of the "Rotskin" Republic of the Northern Hemisphere in his own room, has no service in Hollywood, his controversy being lost recently.

Discussion of plans for the Canadian Medical Association Convention in Calgary in June, 1934, has resulted in a decision to invite the Prince of Wales to attend as the patron of the day, June 23, occur during convention.

Calgary Fish and Game Association has decided to start an investigation of the disease which has killed thousands of ducks in southern Alberta this season, the bacteria had appeared at Sinbert Lake, about 40 miles east of Calgary.

Sir Gilbert Christopher Vyle, engineer and engineer who acted as industrial adviser to the United Kingdom delegation at the imperial economic conference held in Ottawa last year, is dead at his home in Birmingham, England. He was 63 years of age.

A Queer Voyage

Trip From England To The Black Sea In Hand Propelled Boat

Oddest of many queer voyages attempted in recent years is the trip which two Edmonton, Hazell, men have started with the Black Sea as their goal, ostensibly because made of a form of elements to operated by pedals and hand propellers. Four boats in the estimated speed of the boat, which weighs about a quarter of a ton. The itinerary is from Southampton, through the Bay of Biscay, Gibraltar and into the Mediterranean, then along the northern Africa coast and so on. Varna is the destination of the boat, but a call will be made at Constantinople, and the return will be by way of the European coast of the Mediterranean.

Scientific Are Puzzled

Have No Theory About Weird Noises Heard In Yellowstone Lake

Yellowstone Park rangers and scientists are still puzzling, after 22 months of inquiry, over the strange sounds heard over Yellowstone Lake every morning in the late summer. The weird thoughtwaves noises like the rumbling sounds of blocks in flight with whirring, flapping wings, rise quickly to crescendo and end on a prolonged note with distinct ripthank quality.

All theories so far offered for the phenomenon have been disproved by observations.

Preventing Stump Sprouts

In helping to prevent bushy sprouts, the division of horticulture, Dominion department of agriculture, has evolved a method by which an emulsion of fruitful untreated honey will indicate whether the honey may be expected to produce suits from fire application within one year.

Finland has voted that employers shall insure domestic servants against accident.

An average of 600 cubs are laid up for repairs in London at all times.

Duty On Rum Theory

Canadian Preventive Service Busy With Quiet Schooner On Norfolk Coast

Anybody attempting to outwit Albert Hindmor in his humble refuge on the Norfolk coast may get bullets from guns of his boat's gun: keeper. And if Commander Oliver Locker-Lampson himself is around, say Hindmor may have to face the revolver which the member of parliament is reputedly carrying while the colonel-of-motherhood is under his protection.

Professor Hindmor arrived from London Boxing reported Nazi threats against his life, and not afraid of the threats, he said.

Sitting in a small hut in a garden facing the North Sea, the professor looked smilingly confident as he puffed his pipe and spoke of the Nazi threats he had heard.

"All I want to poison, and others could I find a more peaceful retreat than in England?" he asked a visitor.

Gathering Data On Hoboes

Observers Will Check Progress Being Made By Province's Rehabilitation To Result

One hundred and twenty city observers, located at points all over the world, will check the progress of migrants during Canadian Byrd's south pole journey.

Byrd's chief astronomer, Prof. J. Poulter of Mount Pleasant, Ia., has made arrangements for these observation stations, which will form three progressive lines from the north to the south.

One string of stations will extend from Toronto, Canada, to the southern tip of South America. Another will be established in Africa by the International Association and will extend from Norway through Africa. The third will start at Tokio, Japan, and extend through Australia.

The observers will gather data on the speed and height of dust of the meteors. Professor Poulter will operate the southernmost station of Little America, he said.

Recipe For This Week

(By Betty Barclay)

CHEESE BISCUITS

1 cup sifted flour.
1 teaspoon combination baking powder.
¼ teaspoon salt.
1 tablespoon butter or other shortening.
½ cup grated cheese.
½ cup milk or water.
Melted butter.

Sift flour, measure, and add baking powder and salt, and sift again. Cut in shortening and cheese. Add liquid gradually until soft dough is formed. Roll ¼ inch thick on slightly floured board. Cut with small, floured biscuit cutter. Bake in hot oven (400 degrees Fahrenheit) 15 minutes. Makes 12 biscuits.

CALIFORNIA PRUNE PIE

2 cups cooked prunes.
1 orange.
½ cup brown sugar.
½ teaspoon salt.
2 tablespoons butter.
1 cup liquid from prunes.
3 teaspoons cornstarch.
Baked pastry shell.
Meringue, flavored with few drops of orange extract (use 2 egg whites)

Pit prunes and cut in half. Peel orange, removing white inner portion; measure and dice orange. Combine prunes, orange, sugar, salt, butter, prune liquid, and bring to a boil. Remove cornstarch in 2 tablespoons cold water, add to boiling mixture and cook until thick. Pour into baked pastry shell, cover with meringue and brown in a moderate oven (350 degrees Fahrenheit) for 15 minutes.

Hundred crops have caused an appreciable improvement in beds in Denmark.

It isn't the cost of getting men into office, but the upkeep that hurts.

Supreme Debt Settlement

Sir Henry Armstrong Also Has For Britain and United States

Sir Henry C. Armstrong, financial counsellor-General at New York, has written on the payment of the War debt problem and especially on the debt of Great Britain to the United States. His discourse what is reported by the United States what is possible for Britain to do, and it is he means certain suggestions as a compromise or at least as a practical suggestion for settlement.

The compromise cutting the amount to about one-fourth its present nominal amount, or $4,400,000,000 outstanding debt to $1000,000,000 to be paid in a single sum in sterling gold bonds bearing 3½ per cent interest, which would be probably sucked in Sheppy Great Britain through the bank-ing agency court and accepted about 10 cents on the dollar, which in usually considered a very good settlement. Britain is in accord however, that it takes Fully twice as much of British merchandise to pay a dollar today as when the debt was contracted. Trade secretaries and industrial investments have depreciated similarly such a payment is a very fair one and ought to fully justified in accepting. —Hamilton Herald.

SUNDAY SCHOOL LESSON

SEPTEMBER 10

REVIEW—SOME EARLY LEADERS OF ISRAEL

Golden Text "Be strong in the Lord, and in the strength of His might" Ephesians 6 10.

Devotional Reading Hebrews 11 32 to 12 2.

A Review By Means Of Allusions

"A man who has had the advantage of intellectual training cannot escape the penalty of his wickedness which he bestows his brains for a mess of pottage."

When governor nels bloom from unpolish thoughts.

The Lord is with us, though we know it not.—Lucy Larcom

Happy the heart that keeps its tutors.

And, in the depths of heavenly peace reclined.

Loves to commune with thoughts of tender pain.

Thoughts that ascend, like angels beautiful,

A shining Jacob's ladder of the mind.

—Paul H. Hayne

If I am only an instrument for gathering materials and another for building the house, I trust my joy will be none the less William Carey

Wherever we move, the dog is after us. He says in effect. "Where else good, I will go."

"There is waiting for you an inheritance some promised Heb-rew, some gift of God's infinite love in Christ It is for you to obtain. Give me this moment!"

"O, give me Samuel's ear.
The open ear, O Lord.
Alive and quick to hear
Each whisper of Thy Word!"

"Latest born of Jessie's race
Wonder lights thy boyhood face
While the prophet's gifted oil
Souls thee for a path of toil."

And his next son, for wealth, and wisdom famed,
The clouded sets of God, till then in books
Wandering, shall in a glorious temple enshrine Milton

Yon youth do much until you think it's God,
An act constituents, that holds the world
We want some more of Gideon's three hundred judges.
For proclamations ba'nt me great of reign Lowell

Uses Novel Method

King Boris Gradually Getting Better Hands For Bulgaria

King Boris of Bulgaria ardent motorist, wants good roads for his realm and has found a novel way of getting them.

Every time he drives his car over a bad and bumpy stretch, he notes its exact location, and next day invites his minister of highways and communications to inspect the road with him.

A royal invitation is equivalent to a command. Trembling, the minister obeys. After coffee and cigars, the king suggests a little ride into the country. The minister has to reply that he would be only too delighted and honored.

Once the bad patch of roadbed is reached, the monarch takes the wheel himself. Driving at first slowly, he gradually steps on the gas until he is hitting the seventies.

His ladies says to see the minister is in the back seat, over one wheel. He never looks back to observe the anguished ministerial features. Once his drive is concluded, he turns around blandly and says, "You see, Your Excellency, our roads are not so bad, after all?"

The next day sees a sizeable working gang mending the offending highway.

C.W.S.A. Officers

Elected President

Charles Clark, of High River, Alta., was chosen president of the Canadian Women's Newspaper Association at the concluding session of the association's convention at Vancouver. Delegates terminated their business with an 8 boat trip from Vancouver to Victoria, B.C., to make up the week.

Directors include: Saskatchewan, Donald Dunbar, Melrose; John Scott, Whitewood; S. J. Duncan, Abernethy; Alberta, Mrs. Bowbear, Cannington; Manitoba, Mrs. Bedford, Rose Wynn, Treherne.

If sleep is conducive of beauty some people must suffer from chronic insomnia.

Problem For British Banks

No Way To Stop Deposits From U.S. Finance

A large volume of "normal" United States money being deposited in banks of the United Kingdom constitutes a problem that so far has defied solution, two prominent Unit ted Kingdom delegates to the British Commonwealth Relations Conference said at Toronto.

"The bank rate in England is very low now," Viscount Cecil of Chelwood, chairman of the United Kingdom group said in an interview, "and many of our chief problems is the flood of unwanted money that is pouring into the banks These funds, deposited in the main by United States investors, are subject to withdrawal a' 24 hours notice and are of little or no value though it has not been driven yet how to get rid of them. Their deposit appears to be actuated by a desire on the part of the depositors to find the safest place possible to house their assets."

Viscount Cecil was considered England's best authority on the country's economic recovery He said a great deal of building was going on throughout the country Road construction was another large item of development promising.

Expedition To South Pole

Rear Admiral Byrd On Quest Of New Territory For U.S.

With a crew of 70 scientists and adventurers, Rear Admiral Richard E Byrd, is sailing on his second expedition to the Antarctic

The chief of the expedition is two fold To chart and claim for the United States any areas of ice recession about the South Pole, and to determine the extent of deposits of coal and other natural resources

The aviator and explorer announced his plans after arranging for the aerial details of the expedition

We all feel that the steady recession of ice should have left some fertile land," Admiral Byrd said aboard the South Pole, Byrd said—a trace of excitement in his voice as he talked of his new venture.

The bulk of this land, the explorer said, should be between the South Pole and Ross's America most of it adjoining Evelyn Byrd Land, named for his mother which was claimed for the United States on his expedition of three years ago.

Power Of Hypnotism

London Doctor Can Influence One Patient Over Telephone

How he hypnotizes a patient over the telephone was told by Dr. Hildred Carlill, of London, during a lecture in Westminster Hospital. "The patient" he said, 'has had to be hypnotised many times. The man has become saturated with my dominance and is easily ammendable to my suggestions that there is no need for him to be in the room. If he were in Paris and I telephoned him he would do exactly as I told him. If you are wise you will not lightly allow yourself to be the subjects of hypnotism. It is not worth it. It is a terrible business. Yet in certain conditions people can be cured in a day with the judicious help of hypnotism."

New Use For Radio

Installed As Means Of Communication On Russian Single Farms

State and collective farms have grown so large in the U.S.S.R. that something had to be done about communication between various sections. The Institute of Electrification of Agriculture reports that it has installed radio receivers and transmitters on the tractors of one farm near Leningrad and solved the problem. The boys and girls now plow merrily along and pass the time away chatting with one another "over a distance of many miles."

National Insecurity

Two men were traveling on a northbound train. Presently one, hoping to break the ice, asked his fellow traveller:

"Which your line of business?"

"It may sound strange," said the other, "but I'm a pepper traveller."

"The first man threw out his hand. "Shake!" he said. "I'm a salt seller."

Fourth Tour Of Canada

Englishman Claims To Be Champion Cyclist Of World

Calgary, Alberta.—John R. Crawford, policeman, soldier and sailor in his hectic career, who hails from Sunderland, England, claims to be the world's champion cyclist with 189,000 miles to his credit.

Crawford, touring on his bicycle since 1919, has visited almost all countries in the world. He is now touring Canada for the fourth time and rested here a few days before starting westward.

Ontario School Does Away With Homework

Oakville Collegiate Will Add Extra Hour To School Day

Oakville, Ont.—The virtual end of home work and detentions for high school students, will here work done in less actual studying time, will mark a new educational plan to be introduced into Oakville High School by Principal R. H. Archibald.

An hour will be added to the school day, but practically no home work will be called for from lower and middle classes, while upper school home work will be cut in half.

Hosts First Woman Member

Wellington, New Zealand.—The first woman member to be returned to the New Zealand parliament was elected in Lyttleton. She is Mrs. Elizabeth R. McCombs. She succeeds to the seat made vacant by the death of her husband, Mrs. McCombs ran as a Labor candidate and received 6,600 votes. F. W. Freeman, Coalition candidate, obtained 3,400 votes, and A. Hills, Independent Labor 363.

INITIAL POOL PAYMENT 45c. IN SASKATCHEWAN

Winnipeg, Man.—Substantial increase in initial payments on graded wheat this year were in store for farmers of western Canada today The Saskatchewan wheat pool has announced an initial payment for 1933-34 posted wheat of 45 cents a bushel, basis No. 1 Northern, Fort William. This is an increase of 10 cents per bushel above the payment made last year Alberta and Manitoba boards will meet in a few days, when a final decision respecting their initial payments will be made.

In view of the interest of the announcement wheat growers in Saskatchewan who delivered grain to country elevators after July 31 will benefit from the increased payment They have already received an advance of 25 cents, equivalent to last year's initial payment Alberta and Manitoba wheat pools have been accepting their wheat in accordance with the basis of a 35-cent initial payment.

Saskatchewan wheat pool's init al payment for 1933-34 pool deliveries will be 45 cents, basis No 1 Northern, Fort William.

This represents an increase of 10 cents over the initial payment made last year.

A prom statement from pool headquarters reads:

"The policy of the organization as established last year requires the grower to declare his intention of pooling at the time he delivers his first load The same policy is in effect for the present crop year. In view of the success of the announcement of the initial payment, however, the growers have grain in store at country elevators that was delivered after July 15 will have the opportunity of delivering their wheat to be marketed through the 1933-34 pool, provided they do so within three days after this announcement is received at their country elevator.

"Already a substantial quantity of grain has been delivered for marketing through the pool, on which an advance of 25 cents (One Northern basis) has been made This advance is equivalent to last year's initial payment Adjustments in order to bring this payment up to 45 cents will be mailed immediately to pool elevator agents for distribution.

"The first five grades are deliverable to the 1933-34 pool, from Canadian Pacific Railway stations."

Canada Has Better Surplus

Two Million Pounds More Than Needed For Domestic Use

Ottawa, Canada suddenly finds it self with 10 000,000 pounds more butter than will be needed for domestic consumption this winter W H Ferguer of Islington president of the National Dairy Council, and Allan C Fraser, manager and secretary, with other members of the council had conferences with Hon H H Stevens Minister of Trade and Commerce and Hon Robert Weir Minister of Agriculture, to see what can be done about it.

The impression seems to be that Canada made too much butter and not enough cheese Canadian cheese commands a premium on the British market and the butter has to take it discount as compared with the New Zealand product.

Storage figures on September 11 showed 41,490 441 pounds of butter on hand whereas last year the total for the corresponding date was 39,1 pounds.

Discussion Wednesday centered on ways and means to dispose of the surplus and ship this surplus butter to the United Kingdom, rather than glut the domestic market There is a move on foot to do the same with Ontario butter The conversations Wednesday were to decide the best means of going about the task and no definite decision was reached

Moved From Office

Premier Moffatt No Longer Vice-President Of Railway Trainmen

Cleveland, Ohio.—Premier Moffatt has removed from the office of Canadian vice-president of the Brotherhood of Railway Trainmen by the executive board of the organization.

The removal, to take effect Sept 15, came after President A F Whitney, of the brotherhood, had made nine charges against Murdock for failure to observe his duties properly. Six of these charges were sustained by the executive board, among them the allegation that Senator Murdock "failed in his duties as an officer" in handling the now pending wage dispute in the Dominion.

Whitney in a statement said

"Murdock's whole attitude in the wage situation in Canada was found by the board to be lukewarm. Any wages there now are 17½ per cent lower than they are in the United States."

Government To Contribute

Pay 75 Per Cent. Of Freight Charges On Relief Cattle In Winnipeg

Ottawa, Ont.—The Dominion policy of paying 75 per cent. of the freight charges on carloads of livestock from drought areas, with the exception of Ontario, to the Royal Winter Fair opening in Toronto on November 23, and Canada Northwest Exhibition at announcement to this effect was made by the Department of Agriculture.

The policy is applicable only in connection with transportation from assembling points to Toronto and also to assembling points on the return journey. Any charges incurred before the carloads are assembled, and after they reach the assembling points on the return journey, will not be considered as a charge against the Dominion government.

To be 75 per cent. contribution by the Dominion is to be paid on condition that the province, in each case, pays the remaining 25 per cent.

British Naval Officers Make Hazardous Voyage

Sailed Across Pacific In Fifty-Four-Foot Kotch

Victoria, B.C.—An adventurous 6,000-mile sailing voyage from Hong Kong ended Sept 12, when the 54-foot kotch "Tai-Mo-Shan" dropped anchor in Victoria Harbor. Five British naval officers, en route to England, were aboard.

The craft, which has no auxiliary power, sailed all the way across the Pacific The trip was made via Yokohama, Attu, in the Aleutian Islands, and Dutch Harbor, Alaska. The party is sailing to the United Kingdom for the adventure.

The ship was here-to for 30 hours when a typhoon passed near its eastern waters. But no damage was suffered

COL. R. S. McLAUGHLIN

Photo Underwood & Underwood, Toronto

Colonel R. S. McLaughlin, Oshawa, Ont., dustry leader who in a recent speech warned the government of the peril in over-taxing automobiles Col. McLaughlin stated there was danger of killing the goose that lays the golden eggs.

Favor Rejection Of Cut

Railroad Brotherhoods Are Solid Against Pay Reduction

Montreal, Que Trainmen, conductors, telegraphers, engineers and firemen in Montreal and vicin ty now voting on the general strike referendum being conducted by the railroad running trades, have filed an overwhelming number of ballots in favor of a strike as an alternative to taking another pay cut," The Montreal Star says.

"It was discovered that with the exception of the telegraphers the brotherhoods were casting their votes almost unanimously In favor of rejecting the cut. The telegraphers, it was found, are voting in the proportion of 65-35 for a strike if negotiations with the companies cannot be successfully completed," the paper says.

Plight Of The Farmer

Has Borne The Brunt Of Hard Times On The Prairies

Calgary, Alberta.—"Unless more consideration is given the farm population of the prairie provinces by the national economic policy a situation may arise which will have exceedingly serious consequences," according to L. D. Hendrix, publicity director of Alberta Wheat Pool, in an address here.

"No nation," he added, "has been more seriously affected by declining prices of agricultural products than has Canada and the prairie province have borne the brunt of it." He decried the trouble was due to lack of efficiency or skill on the part of the farmers.

Wins Fortune

Montreal Man Wins Large Sum In Sweepstake Ticket

Montreal Que Adrien Vanier, 39-year-old store manager reported to have won $54 000 on a sweepstake ticket in the St Leger classic stepped into court and threw out a counter-claim against his wife on a charge of participating in a lottery Mrs. Vanier is scheduled to appear in court this week.

Vanier took action against his wife under section 236 of the criminal code, which provides that money obtained through illegal sweepstakes "is liable to be forfeited to any person who sues for the same by action or information in any court of competent jurisdiction."

The winning ticket was held by Vanier's name but, it is presumed, in the name of his partner. Half it had been transferred to his wife. An information as to the amount of the winnings of the ticket.

Hon Lapalme and counsel appeared amid fortunes on a result of the running of the St Leger stakes at Doncaster England.

Adrien Vanier, 39-year-old Montreal a ticket on Felicitation, the second horse, is held by A. Lebeau Quebec City, who received $36,000.

William A. Hesse Calumet City, Ill., held a ticket on Scarlet Tiger, in third position. Hesse wins $18,000.

Choice Cattle For Churchill Shipment

Twenty Carloads To Go From Saskatchewan And Alberta

Calgary Alberta Several carloads of cattle from Calgary and other Alberta points and Saskatchewan will be the shipment to leave Churchill Manitoba's northern seaport, for the United Kingdom September 27.

Twenty carloads of cattle from Saskatchewan and Alberta will choice steers weighing 1,100 to 1,200 pounds receiving preference as the consignment will be well received in the Old Country.

RAMSAY MACDONALD ENJOYS LEISURE

After the strenuous Economic Conference sessions in London, Ramsay MacDonald went North to his native heath to enjoy a well earned rest. Here we see him (centre) at the Scottish dog trials held at Keith, Banffshire. He is watching one of the competitions in action passing sheep with other rivals around at the British Premier's first visiting their turn to perform.

MOTOR OWNERS PAY HUGE TAX TO OPERATE CARS

Ottawa, Ont Motor vehicles operated in Canada and their owners into a tax bill of $56,700,000 last year, according to an estimate released by the Dominion Bureau of Statistics. That meant over $80 for every registered motor vehicle to say nothing of the men.

The provinces collected $31,192,973 for registration fees on vehicles and operators, and another $27,083,816 in gasoline taxes The Dominion took in $4,500,671 on import duties and excise taxes in addition there was the sales tax on cars and, estimated at $2,500,000 and the import duty on gasoline estimated at $1,500,000.

"Motor vehicle registrations in Canada for 1932 amounted to 1,114,800, including 945,804 passenger automobiles, 1,230 motor buses, 147,286 trucks and other commercial vehicles and 9,410 motorcycles.

There was a decrease from the 1931 registrations of 86,404 motor vehicles, or 7.2 per cent The greatest decrease was in New Brunswick, where total registrations decreased 16.6 per cent and passenger cars by 17.8 per cent, and Saskatchewan followed with a decrease of 13.5 per cent in total registrations.

Canada, with one motor vehicle to every 9.4 persons, ranked fourth in density, the United States leading with a density of one motor vehicle to every 3.1 persons and Hawaii and New Zealand ranking second and third Ontario, with 6.5 persons per motor vehicle had the greatest density in Canada British Columbia, was second with 7.7 persons per motor vehicle.

Caring For Livestock

Alberta Announces Policy For Drier Out Areas In Province

Edmonton, Alta. announcement of the policy under which the feed shortage situation in the dried-out areas of the province will be relieved, was made by Hon. George Hoadley, arrangements having just been completed with the federal government and the railways in the matter.

The policy covers not only the shipment of feed for necessary farm livestock into the areas concerned but also the shipment of commercial cattle and sheep, and of farm work horses out of the areas to winter feeding quarters. Shipment of commercial cattle and sheep to winter feeding quarters will be undertaken on application from bona fide owners of such livestock, who shall certify that the stock are for winter feeding and that the ownership will be retained until such time as permission for sale is granted by the Department of Agriculture.

There will be no cost to the shipper for freight, the railways having granted 50 per cent. of the cost and the federal and provincial governments bearing equally between them the other 50 per cent.

Expect Large Wheat Yield

District In Southeastern Alberta Places Figure At 1,500,000 Bushels

Calgary, Alberta.—In the district between Stirling and Manyberries, in southeastern Alberta, farmers expect a larger yield of wheat than last year, placing the figure at 1,500,000 bushels. This area is the bright spot of drouth-stricken southern Alberta.

With prices about 50 per cent. above last year, the farmers of the Stirling and Manyberries district expect to emerge to some extent from debts which submerged them during lean years. They are in a better position than farmers in districts which usually produce good crops.

The average yield is expected to be 15 bushels per acre, with Etzikom district reporting a 30-bushel yield on one farm.

Canadian Poultry Fee

Ottawa, Ont The tariff which the United Kingdom imposed on dead fowl, ducks and geese from foreign countries after September 15 will be three pence a pound instead of 10 per cent. ad valorem. The Canadian product will continue to go into U.K. markets free.

Professor Drummond Sees No Chance Of Making Profit From Canada's Basic Industry

"Any person who looks for a profit from farming in 1930 should have his head examined." Prof. W. P. Drummond, of the University of Toronto, declared at the Liberal-Conservative summer school at Bermuda, Ont.

"There has been so much said about Ontario's fundamental importance as a prosperous agriculture in this country, of the absolute dependability of anybody in Canada longing to make money out of agriculture, of the permanent Canada's farming was prosperous that one would have thought the major bit-rest of achievement with any man-available as a vocation would have turned hers the determination of a policy calculated to guarantee the utmost in 1 to keep of a prosperous agriculture," he continued.

"The fact that such has not been the case leads us to the conclusion that most of the statements concerning the great importance of agriculture in our national life were never intended to be taken seriously."

The professor who would improve the farmer's lot by almost certain to throw up his hands in despair after reading of the task in hand, Professor Drummond said.

The very nature of farming prevented curtailment of production to meet a limited market, he declared. The farmer, in his bargaining capacity, was usually in the position of the man-eaten laborer seeking work with an employer of many thousands of men.

While price might drop, he said, costs usually remained at the same old level. A correspondingly large portion of the income has to go to the sowing of fixed costs, while all the same time failing prices stimulated the farmer to produce more in order to attempt to cover his costs.

The problem of the farmer, Prof. Drummond held, was an identical one the economy. Much of the farmer's trouble could be traced to his opinion held by many city dwellers that the man of the soil was not any too bright.

"We must see to it that the stigma be removed and that the farmer himself is equipped with a proper perspective of his work.

Unless we do we run the risk of the industry where we look about to intelligent and progressive agriculture population."

A Wonderful Record

Over At Woodstock, Ontario, Accident At An Unusual Hobbit.

At Woodstock, Ont., is a new record Holstein cow Canadian which is acclaimed as the greatest Holstein on record. That record is, indeed, awe inspiring. During her 365-day test she has produced 2,877 pounds of butter, approximately 330 cubic feet, bottled into conventional bottles that would make a line three-quarters of a mile long, or a wall five feet high and nearly 70 feet long. It is enough butter to spread on 691,200 pieces of bread, making the generous allowance of half a cubic inch to a piece. That many slices of bread would cover two entire football fields, including end zones, and there would be enough left over to cover hundreds of smaller lots. It would pave the 100-foot blocks of a street 20 feet wide. The task the cow would perform in a single year, if she were to make a speech of sentences with 5 words each day.

It is truly a wonderful cow.—International Press Press.

Wooing By Horse

She shut off the gramophone and turned excitedly to her father.

"Dad," she exclaimed, "that is the latest kind of jazz record. Did you ever hear anything so wonderful?"

Father, who had been trying to read his evening paper, growled.

"No," he replied sweetly. "I can't say I have, although I once heard a collision between a wagon load of empty milk cans and a farm-cart filled with dance."

Nearly twice as many hectares are being cropped from Scandinavian Prairie West Indies, as a year ago.

Good Business Opinion

Prince Of Wales Thinks Only By Banks In Home

England's 35-year-old Prince of Wales may be a poor business, but he has just revealed himself to be an excellent speaker of considerable skill.

Occupying in the Old Concordes' opera at the Welsh Canada annual sports at Windsor Barracks, the prince, who is colonel-in-chief of the regiment, was beaten only by London after starting from scratch in the 100 yards flat race, was seventh in mud-plugging race in the 100 yards final, and cup for officers, and second in the 50 yards handicap race for men and officers.

The rooms were not exactly up to Olympic standards, and most of the competitors ran in everyday long trousers and sweaters, but the events were conducted in great style, with the prince a leading figure.

Win 15 Dollars!

The following merchants are donating a prize of Fifteen Dollars, ($15) to the person submitting a name for Fort Saskatchewan's new park, that shall be considered most suitable by three independent judges to be appointed from outside the Town. The conditions under which names may be submitted are very simple.

CONDITIONS:

For every Five Dollars worth of goods purchased from any one of these merchants during the months of September and October, you will obtain a nomination blank. Fill this blank in with your suggested name for the park, and the merchant from whom you received it will sign it, date it, and time it. The portion of the blank with your own name on will be held by your merchant, whilst the portion containing your suggested name will be submitted to the judges.

Each portion bears a similar number.

In the case of two or more persons submitting the same name, the which should be chosen by the judges as the prize award, the name submitted bearing the earliest date of entry shall be judged to be the winner.

The judges' decision shall be final.

No personal names will be considered in connection with a name for the park.

Coupons may be obtained from the following merchants. ——

Fort Saskatchewan Record

VOL. 12 No. 24 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, SEPT 27th, 1933 $1.50 PER YEAR IN ADVANCE

Town Council Meeting Held Last Wednesday

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chambers on Wednesday the 20th. Instant.

Present Mayor Montgomery, Councillors Lalonde, Pillmore, Magor, Watt, Graham and Neale.

The minutes of the last meeting held on the 6th. Instant were read and adopted.

A letter was read from Mrs. A. H. Rogers, Convenor of the Women's Institute Cemetery Committee thanking the Council for its donation of $50.00 towards the Cemetery Fund.

The report of the Medical Health Officer, Dr. E. H. Mason, for the month of August was submitted and filed.

In answer to an enquiry by the Council, a communication was received from W. J. A. Mustard, K.C., Edmonton giving his opinion to the effect that the Council had no power or authority to arrange with G. A. Cranston whereby he could deliver gravel in payment of taxes due on the property, Lots 33 and 34, Block 8, Plan 64. After discussion the following committee was appointed to bring in a report on the whole situation:—Mayor Montgomery, Councillors Lalonde, Pillmore and Magor.

The Council approved the sale of the following lots:—Dr. C. H Grunert, Lots 21 and 22, Block 4, Plan 0, A. E. Fillmore, Lot 28, Block 11, Plan 0; S. Dennis, Lot 12, Block 6, Plan 0.

Wedding

One of the charming weddings of September was that of Miss Hazel Clark Shackleton, daughter of Mr. and Mrs. A. E. Shackleton, of Fort Saskatchewan, and Mr. James Ross Beahe, son of Mr. and Mrs. M.J.C. Beahe, of Edmonton, which took place at the home of the bride's uncle and aunt, Mr. and Mrs. Hector Clark, of Riverbend, on Saturday, when Rev. D. C. Ramsay, of Fort Saskatchewan officiated.

The bride, who was given away by her brother, Mr. Roy Shackleton, wore a lovely gown of midnight blue chiffon velvet, and hat of the same becoming shade. Her slippers were silver brocade, and she carried an armful of ophelia roses.

Miss Olive Lees, the bridesmaid, was frocked in powder blue georgette and lace. She wore a small hat of powder blue lace and carried a sheaf of gladioli in pastel shades.

Little Doreen Stutchbury, was a lovely flower girl in maize taffeta. She carried a basket filled with baby chrysanthemums. Mr. Clayton Greenlees was the best man.

At the reception, the bride's mother was very smart in brown crepe, a closely fitting brown hat and corsage of roses. Mrs. Beahe, the bringegroom's mother was in black chiffon and lace, a wide brimmed hat and corsage of red roses. Mr. and Mrs. Beahe are spending their honeymoon at Jasper Park. For travelling, Mrs. Beahe wore an oat grey fox fur.

Women's Institute Holds Successful Dance

The Women's Institute Annual Dance held in the Memorial Hall last Friday evening was a great success.

This being the first dance of the season a large number turned out.

The hall was decorated with Autumn leaves and the tables in the buffet room were decorated with vases of red flowers.

Dancing was indulged in until midnight, when luncheon was served in the buffet room, after which dancing was resumed until 2:30 a.m.

The local orchestra supplied the music for dancing.

Aeroplane Crashes Near Fort Saskatchewan

What might have been a serious accident occurred on the land ground near the provincial gaol when one of two Edmonton Aero Club Moth aeroplanes landing over a landing field crashed to the ground when trying to land. Neither the pilot nor the mechanic suffered any injury, but the plane was badly wrecked.

The cause of the mishap is unknown. It appears that these planes were looking for a suitable landing place from which they intended taking up passengers on Saturday.

Judges are Named For Name the New Park Contest

The main entrance to the Park on Government Street has been erected. It is 12 feet in height, 14 feet wide and tapers down on each side to two footpath entrances, each four feet in width. The entrance is constructed of Cedar posts, and when oiled and varnished will look very appropriate.

The following further subscriptions have been received by the Fence Fund Fund. We thank the donors for the interest that they have shown. As soon as the weather moderates, the post will be installed. They are on the ground, but—not all paid for.

Mrs. H. Onley, Mrs. S. Gillison, Mr. A. Worsley, Mrs. D. Harper, Miss Jean Gillison, Messrs O. D. McLellan, H. Carseadden, H. Onley, Chas. Magor, M. Carseadden, E. D Crump, C. Alden-W. Spenser, Dr. E. H. Mason, H. Watt, W. Gillison, Fred Budd, Les. Gagnon, Dr. Turner, W. Hill (Deputy Warden), G. Neale, Rev. Ramsay, E. Wilmoroth, Geo. Pappas.

The following gentlemen have kindly consented to act as judges in the "Name the Park Competition," Lionel Gibbs, Esq. M.L.A., Chairman of the Town Planning Commission, Frank Pike Esq., Manager of the Bank of Montreal, Edmonton, and A. W. Haddow, Esq., City Engineer, Edmonton.

Taken From the Files
19 Years Ago Today

Wednesday, Sept. 20th. 1914

A fire occurred on Wednesday morning when the cook and dining tents used by the men working on the provincial jail building were destroyed. The cause is unknown and between four and five hundred dollars worth of damage was done.

The two little daughters of Mr. and Mrs. J. E. Parkinson, living at Lamoureux were burned to death last Saturday. Mrs. Parkinson was badly injured, when the home was destroyed.

Roy Walton left for Alberta University Saturday to resume his studies, entering his sophomore year.

The Conservator received two of the largest carrots yet brought in this office, weighing 6 lbs. 1 oz. Tommy Boag brought them in.

The Fort Saskatchewan Quadrille Club held a meeting electing the following officers, Hon. President W. H. White, M.P., P. A. Wallser, M.L.A., Mayor Jones, and H. A. Driggs.

President J. Brown.

Threshing is in full swing around the Fort. Everyone is hoping for fine weather.

For the first time in ten years or its existence, a woman, Mrs. Pearl Forrester Moore, of Banff, charter member of the Trail Riders, has won the presidency of the Order. There would be no changes under her rule, she said. But added that "the job is a great honor and I shall do my best to live up to the high level of my predecessors."

Finland has ruled that employers must insure domestic servants against accident.

School Board Meets Parents

The progment meeting of the parents of the High School students, with the School Board which was referred to in the Record last week, was held in the Council Chamber on the evening of the 19th Instant at 7:30 o'clock, with Mr. F Atkinson, Chairman, and Trustees Dr Calhoun Jr. Grunert and Dr Turner present.

There was a large attendance. The Chairman explained the object of the meeting, and then called upon Dr Turner and Dr. Calhoun to make a few explanatory remarks as to what the Board had in mind when considering the motion which was passed a year ago. Dr Grunert also spoke

A general discussion followed, and helpful suggestions were made, and, altogether, it is felt that this get-together meeting will be of mutual benefit and result in better understanding.

Coming Events

Men Make The State

Picking up a copy of the Illinois Jaw Times the other day, the writer's attention was drawn to an article entitled "Men Make Cities" which opened by quoting the following inspirational lines of an unknown poet taken from the September issue of The Rotarian:

Cit es are what men make them,
What men demand they shall be;
Healthful, clever, and sleeping,
Progressive, beautiful, free,
If the hearts of the builders are noble,
In one with the day and the hour,
They will build into grandeur and greatness,
For so it was decreed.

These lines, it is stated, were inspired by the achievement of Atchison, Kansas, as told by Ed. W. Howe, editor of the Atchison Daily Globe Atchison is one of the smaller cities, but in twelve years it has evolved from a bankrupt, tax-broke city, "doleful, down and downcast," into one that is "progressive, beautiful, free," with its bonded debt cut 70 per cent. and even while this fine record was being made its tax rate was reduced by 18 per cent.

"How was it done? In 1930 a group of citizens, noting the seriousness of the situation, started a movement to move the city, a new idea took hold of the administration, expenses were cut, and plans formulated that enable the taxpayers to handle the bond and reduce the bonded debt and the overhead, and the creditable record was not interrupted through three years of the hardest times ever known, largely because last courage and confidence was restored

The Rotarian magazine tells the story in an editorial challenge to Rotarians in every city to be up and doing for the welfare of their home town, to study its problems and to act. The Moose Jaw Times applies it directly to its own city and declares the challenge comes at this time not only to Rotarians but to every member of every civic club of Moose Jaw.

The writer of this column in passing the story along would make bold to still further enlarge the field of its application from city or town to the citizenship of every community, large or small, because it is just as true that men, and women, make rural communities and little villages as it is that they make cities. It is also true that in these days our rural communities, hamlets and villages are confronted with problems, which, considering their population and resources, are just as heavy and serious as those of the largest cities,—perhaps even more so.

Furthermore, because of the very serious and extent of the world-wide depression which has developed, all communities, large and small, find themselves much in the same position. One cannot in their emergency turn to another because all are severely affected, and while the willingness to assist may be there the ability to do so is lacking. So communities are thrown back on their resources to a greater extent than formerly.

Again, this has resulted in much purely voluntary work by individuals and organizations being restricted, leading to both individuals and communities turning to and relying upon the State to take over and assume their responsibilities. The net result is a weakening of the morale of the individual, a loss of courage and confidence, the development of habits of shiftlessness, and a diminution of initiative and enterprise. Instead of men adhering to the truth that they make cities and nations, thousands are adopting the false theory that cities and nations make men, and that, instead of it being the duty and responsibility of men to order their lives and make their communities, it is the duty and responsibility of the State to order the lives and control the actions and destinies of the individual, thus reversing the order of the citizens controlling and directing the State.

Observant men and women are more and more coming to the view that the time has arrived to call a halt to this increasing reliance upon the State, and to respect belief in the truth that, like the citizens of Atchison, Kansas, they must save themselves and their city by action on their own part; that instead of allowing their difficulties and problems to sweep and overcome them, they must overcome their problems and surmount their difficulties. It can be done. It has been done times without number by individuals and communities in the past.

Indeed, if it is not done both the individual and the community, large or small, faces ultimate disaster. The individual will find himself submerged and his individuality largely gone, while the community will end up in complete bankruptcy and the loss of its local freedom and autonomy.

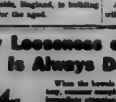
On the other hand, if the man,—and woman,—of a community, be it a small village or a large city, bestir themselves, face and study their problems, and proceed to grapple with them one by one, they will be surprised how much they can accomplish. It will mean the abandonment of the present policies of drifting with the adverse tides. It will mean the lopping off of this expenditure and that, it will mean the application of the most rigid economy in all public administration; it will involve a more active participation by the individual citizen in effecting community savings, it will necessitate community sacrifices for a time just as thousands of individuals have had to make individual sacrifices. But it will mean ultimate success both for the communities and the individuals who constitute and make the communities.

In a word, it means a return to the proper and sound conception,—that men make cities, not cities make men. And in using the term cities the application is to all organized communities whether rural or urban, large or small.

South Shields, England, is building 142 houses for the aged.

A solution of bicarbonate of soda will make an excellent white ink.

Any Looseness of the Bowels Is Always Dangerous



When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unusual discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 90 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store; put up only by The T. Milburn Co., Limited, Toronto, Ont.

British Railway Regulation

No-Smoking Order in Compartments To Be Enforced

In future all passenger coaches on the London, Midland and Scottish Railway will bear a distinctive label, "smoking" or non-smoking." About 12,000 vehicles, with a seating capacity of more than 1,000,000 will have to be dealt with. Probably a year will elapse before the change-over is complete.

"We have had many complaints," said an official, "about people smoking in non-smoking compartments. They take the view that as smoking is not definitely forbidden they may smoke if they wish to do so. When the new labels are affixed on one will be allowed to smoke in a non-smoking compartment, even if other passengers say they have no objection. Smoking is allowed in 75 per cent. of the coaches, and it is not proposed to alter that proportion."

Other railway lines in the United Kingdom have arrangements labelled in various ways, meant to indicate they are either for smokers or non-smokers.

CAST OFF UGLY FAT

Woman Loses 28 lbs. in 3 Months

"Three months ago," a woman writes, 'I was persuaded to try Kruschen Salts to reduce my weight, which was 222 lb. I had tried other things, but all to no avail. Now I know that Kruschen Salts are definite. In three months I lost 3 lbs., and I felt five pounds younger. I really must say I feel a different woman. I have now lost 28 lbs. to date." — Mrs. S.G.B.

If you are overweight take one half teaspoonful of Kruschen Salts in a glass of hot water before breakfast every morning. There will be no rapid or alarming loss of weight, but just a steady decrease of that fatty fat which is as unhealthy as it is unsightly. Kruschen is a scientific blend of six mineral salts found in the waters of those European spas that have been my generous aid to overstout people to reduce weight.

Rising Tide Of Fascism

Warning Is Sounded By Secretary Of Workers' League

Warning against the "rising tide of fascism" in the country, Sam Carr, the Miss Shirts of Canada, was sounded by J. C. Wilson, of Winnipeg, Nation al Secretary of the Workers' League, at an open meeting of returned soldiers at Winnear, Ont.

"I understand the slogan of the Miss Shirts is 'Join us and get a job,' but that does not amount to a bill of beans," Mr Wilson said. "In Winnipeg we formed the Civil Construction and had the same slogan. The only job offered us was police duty during the Winnipeg strike, and by 400 members of the Canadian Legion.

"There is no job for them except as an armed troops for a Fascist government. That is their role, the same role as Fascists in Vancouver, strong-arm squad of Winnipeg, and Steel Helmets of Montreal.

"The time has come when you, as your economic needs, as the only effective means of halting the drift of economic needs, unite and fight for your economic needs As the only effective weapon to combat the rising tide of fascism and possible war in six months."

Pains After Eating? Try This!

Pains after eating are generally due to an excess of acid in the stomach that forms gas and causes belching, heart burn, nausea, sour stomach and indigestion. Essurated Magnesia taken after meals will give such quick and pleasing relief you will be surprised. Any druggist will tell you ordinary Essurated Magnesia is fine for sour acid stomach conditions. It should be in every home. It works.

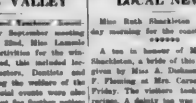
Tomb Of Viking Chieftain

Discover Grave Of Warrior Buried 1,000 Years Ago

The tomb of a Viking chieftain, buried more than 1,000 years ago, was recently found at Longyton in central Sweden. The find clearly showed the warrior was of high rank and furnished an interesting example of the burying customs of his day. He had been interred with full armor and with a fine sword, evidently made by the smith of Ringsbund.

The sword hilt was decorated with silver ornaments, on one of which some magic runes had been engraved.

Longest Lived Trees



Older than the pyramids or sphinx of Egypt —Older than the two huge seated figures of the Nile Tribes of Amenhotep III, which stand the earth 1 ... are known to exist that long life ... a ... ever standing which were large enough to cut for lumber when the exiled English ... William the Conqueror landed in the year 1066

Investigated Northern Lights

Scientists Blame Sport Fifteen Months At Fort Rae

Aurora borealis flash across the northern sky some 60 miles above the earth, according to calculations made by members of the British polar year expedition who arrived at Edmonton by aeroplane after 15 months spent at Fort Rae, North West Territories, studying weather conditions in the far north.

Five members of the party, A. Stephenson, who was formerly with the Wilkins expedition in Greenland, F. A. Shepard, R. Morgan, W. A. Grimstead and J. E Kennedy arrived in a MacKenzie Airways aeroplane piloted by Matt Berry. Dr. J. M. Stagg, leader of the expedition, returned by river boat with the valuable instruments used in investigations.

Results of their observations will not be revealed until the voluminous data on meteorology, terrestrial magnetism, aurora and atmospheric electricity so analyzed after their return to England, the scientists stated.

"We simply made the observations and collected the data," Mr. Grimstead explained "The results of our work will come out later."

In all, 4,000 double photographs of the northern lights were taken by means of cameras on either end of a telegraphic line placed 20 miles apart. Cameras and instruments were focussed on a star and the photographs taken instantaneously. Thus by means of triangulation the distance and action of the northern lights could be estimated.

CREAMED CELERY AND GREEN PEPPER

One and half cups celery (cut in one-inch pieces); 1 green pepper; 2 tablespoons butter; 3 tablespoons flour, ½ teaspoon salt; ½ teaspoon pepper, ¾ cup evaporated milk; ¾ cup water; 6 slices toast.

Cook celery until tender. Drain and mix with sliced green pepper. Melt butter in double boiler. Add flour and seasonings. Blend thoroughly. Add gradually evaporated milk and water, stirring constantly until mixture thickens. Cover and cook ten minutes longer in double boiler, stirring occasionally. Add celery and green pepper. Serve on toast if desired. Serves six.

A Profitable Proposition

One rural subscriber who was renewing his subscription the other day to the Picton, Nova Scotia Advocate, pointed out that he would receive one issue of The Advocate henceforth as a result of a recent superbrose. "Why," said he, "if I hadn't been getting your paper I'd have missed a sale the other day at which I made several dollars on the purchase of a cow. I made enough to pay for the paper for two or three years in the one deal."

Better Conditions Due To General Upswing

Improved Business In Canada Not Credited Wholly To N.R.A.

Figures issued by the Dominion Bureau of Statistics indicate business conditions in Canada have progressively improved since March of this year, before the National Recovery Act was passed in the United States.

Although officials of the Canadian Manufacturers' Association would not express an opinion as to whether the increase in Canada's export trade as reported from the Department of National Revenue at Ottawa, was due to influence of the N.R.A., Dominion statistics indicate it was not a major influence.

Physical volume of business, industrial production, manufacturing in the Dominion, along with export trade started on an upward trend in arch, improving steadily in following months. Canada's trade "low" was reached in January-February.

Although some credit is given the National Recovery Act by manufacturers at Toronto, for improved conditions, owing to the influence of conditions in America on Canadian trade, it is considered improvement is principally due to a general upswing in world conditions.

Dairy For Prince Albert

Believing Prince Albert is headed for better times, F. R. Glass, of Kerrobert, announced his plans to establish a dairy there for the retail distribution of pasteurized milk and cream. He has acquired 1,300 acres near the city and built a barn to house 40 Holstein cattle he intends to bring from Kerrobert, where he now operates a dairy.

Here and There

Indications point to a fairly early harvest in Western Canada, says a late July weekly crop report of the Canadian Pacific Railway agricultural department. A few points to the contrary, however, the report added, had already started cutting wheat and barley.

Trade jumped to lowest mean in Empire exports in Great Britain last May as compared with sixth place in 1933, behind Denmark, Holland and Poland. Total exports to Great Britain from Canada in May were $1,502,000 for, or at the rate of 18,000,000 lbs. per annum.

There were increased retail sales in Canada in May as compared with April and the index number of the Dominion Bureau of Statistics rose from 81.7 to 85.6. Hardware had the best showing, the increase being from 75.3 to 111.3

A spare blue-clad figure which to thousands of passengers through Vancouver in the past seven years represented a symbol of friendliness in a strange city will no more be seen around the wharves and terminals of the Canadian Pacific railway in the Coast city since Albert Charles Pearsall, terminal passenger agent for the company, died there recently.

With rising prices for wool and a vast Chinese market for wool caused partly by advantageous monetary exchange, Australia is rising steadily to a greatly improved economic position, declared Warwick Fairfax, managing director of the Sydney Morning Herald. Australia's oldest newspaper, a traveller recently on the Canadian Australasian liner Niagara.

Hearing at a time when the nations of the world were moved as much in need of close co-operation economically and politically, the 76th biennial conference of the Institute of Pacific Relations to be held at the Banff Springs Hotel, August 14-26, is regarded as a possible turning point in the affairs of all the nations bordering the Pacific.

Self-regulation of motion pictures by producers to conform with ordinary standards of decency will ultimately render boards of censors unnecessary, predicted Will H Hays, Czar of Hollywood, interviewed recently at Vancouver where he arrived from a short stay at Banff and Lake Louise. Clark Gable was another movie star visitor at these famous mountain resorts

All Ontario district brother officers of Norman M. McMillan, superintendent, Moose Mountain Canadian Pacific Railway, with H. C. Grout, general superintendent, as honored guest, met recently at a presentation to Mr. McMillan of a silver tea and coffee service, at the Royal York Hotel, Toronto, on the occasion of his promotion as assistant to R. J. Humphrey, general manager, eastern lines of the railway.

YPRES VALLEY

The Ypres Ladies' Residence Association held their September meeting on Friday the 22nd. Miss Lamoole presided. The activities for the winter were outlined, this included lectures from Doctors, Dentists and others concerning the welfare of the school child. Social events were also planned. Lunch out for further notice is the coming events.

This association, we understand is the only one of its kind in the Lamont Inspectorate.

*****

We are glad to hear that Mrs Dittrich is home from the hospital.

*****

At the Church here last Sunday, Rally Day was observed. Special singing ser. Solos were given by Mrs. Gallison, Miss T. Thomas, also choruses by the school children. Readings were given by Miss Lamoole, Edith O'Gorman, Billie Gunn and Frances Maynard. An inspiring blackboard talk on "Berries" by the pastor was enjoyed.

VEGETABLES FOR DROUGHT AREA

Co-operative arrangements for the supply of potatoes and other vegetables this winter to families in the drought-stricken areas in the south-eastern part of the province, have been completed between the provincial department of agriculture, the railways and the municipalities concerned.

Supplies of potatoes are being secured by the department at Edmonton, loaded on cars to be built direct from the fields. These supplies are being transported entirely free of freight rate by the railways to the required points in the dry areas, from where they will be distributed through the municipal secretaries to families who are working in the shipping points, at the same rate at which they were secured by the department at Edmonton.

The entire arrangement is a co-operative one made possible by the generosity of the railways and other agencies working with the department, and the department appeals for supplies to those farmers who are interested in disposing of surplus vegetables at a reasonable price direct from the fields.

Some 20 carloads of vegetables have already been arranged for and a number of these forwarded.

A surplus of 10,000,000 pounds of butter more than can be used at home was revealed in conference in Ottawa. Holders are being advised to take a loss and ship to the United Kingdom rather than to glut the market.

Miss Annie M. Smith of Edmonton was a guest of Mrs. J. Carscadden over the week-end.

******

A branch containing a cluster of Sweet Plums grown on the farm of John Galloway are on display in the window of Jones, Graham & O'Brien this week. The plums were of good size and real ripe.

FEEDING BEEF CATTLE

It is suggested that some 2,000 head of beef cattle will be fed this winter under the rancher-farmer contract system which is to be continued for its fourth year, under the supervision of the provincial department of agriculture.

John Wilson, who has been supervising the feeding arrangements in the Lethbridge district, has been re-engaged by the department for the work and his territory is being extended to as far north as Red Deer. Mr. Wilson is now working in the territory between Didsbury and Red Deer, where it is expected a considerable number of the cattle from the ranches will be fed this winter.

Marconi says he can eliminate static from radio. With some progress it wouldn't make much difference.

WEDNESDAY, SEPT. 27th, 1933

THE WEATHER

With several fine drying days like today the threshing operations in the district will be resumed. After nearly two weeks of intermittent showers and cold weather, it has cleared up and prospects point to continued good weather.

If the present weather conditions continue, threshing will be general about Saturday, although several rigs were intending to start Thursday.

School Guide Now Available.

Book On School Administration As Guide To Trustees And Teachers

Trustees, teachers and all persons concerned with education will be interested in a book entitled "School Administration" by A. H. Ball formerly Deputy Minister of Education for Saskatchewan and N. L. Reid, Assistant Deputy Minister, just published by W. J. Gage & Co. Ltd., Toronto. The book is the result of a need long recognized by those concerned with school administration As its name implies, it is designed as a guide for trustees, school officials and teachers. At the same time, anyone will find it a reliable source of information on all matters of school law. The author, by reason of their experience, is familiar not only with the school law and its interpretation but with all the problems of trustees, teachers and ratepayers and these are fully dealt with.

The book contains, in all, sixteen chapters on such matters as the year; by history and control of education in the North West Territories, the development of our present educational system, school organization, school elections, qualifications for trustee, duties of trustees and school officials, school support, the teacher's agreement, duties of the teacher, etc The book discusses, by means of question and answer, definite problems of trustees, parents and teachers. There are some hundreds of such questions relating to calculation of teacher's salary, expulsion of pupils, corporal punishment, matter of trustee, rights of ratepayers, parents and children. Every fifty of the important questions that have been adjudicated in the courts are described.

The appendix contains the educational provisions of The British North America Act, The North West Territories Act, The Saskatchewan Act and The Provincial Lands Act of 1931, as well as the development of the law relating to separate schools and religious instruction. A complete index makes it easy to look up any point. The book contains a chapter on the Aims and Objectives of the Curriculum by Dr. John S. Duff, Commissioner of Education. The volume should be found invaluable to those charged with the administration of schools. While it has been written as a Saskatchewan edition, much of its contents will apply in any school system.

You can find some of the people all of the time, and all of the people some of the time, and the rest of the time somebody else will fool them.

There is no mailing club in Surrey England, for bachelor girls only. Now and then a member finds some poor fish and has to resign.

Grasshoppers!

Fall Work Which May Be Done This Year Profitably To Next Year's Campaign

The emergency program for grasshopper control in Saskatchewan issued jointly by the Provincial and Dominion Departments of Agriculture includes the recommendation of times of action which should result in very materially reducing the number of young grasshoppers hatched next spring, and so reduce the amount of labour and the cost of next year's campaign. The program has been accepted with the fullest confidence and where the recommended program is fully carried through, not only will the grasshoppers be controlled, with splendid effectiveness but the cost of doing so will be only a fraction of that which the pest will cause if no control is attempted or only hopphazard methods used.

The cultural recommendations include:

1. **Seed Only on Summerfallow,** in so far as this can possibly be done. This is especially important in heavily infested areas. Since grasshoppers do not lay their eggs in fallow land (unless it is very weedy) crops seeded on fallow requires only to be protected from invasion from adjoining grasshopper infested stubble fields. Such protection can be given readily, cheaply, by properly using poisoned bait. The campaign with the summerfallow method is efficient and costly and more certain, in any district where crops are known to be in danger of a total loss.

2. **Complete All Seeding Early,** at least by June 20. Avoid late seeding of any kind, because during grasshopper outbreaks, late crops rarely give a worthwhile yield even of hay, and because late seeding encourages further increases of the pest.

3. **Cut and Burn Stubble,** as well as the fall and spring crops, may sometimes be needed to advantage before all of the wheat is in, rather than being left until the last.

4. **Plough Under Hay Stubble,** or past it to carefully prepared land. Even if moisture is plentiful enough, spring the precautions in this respect should not be relaxed in the slightest. Dry conditions favour the infestation in stubble is heavy and general, it is usually best to "stubble-in" the crop on poorly-tilled land. Experience has shown that not only is this practical if not impossible to save such crops, but that the number of young hoppers which develop there will devastate adjoining crops which could be saved. There is a strong probability that poisoned bait will be followed in many cases where crop has been carelessly stubbled in.

Particular attention is directed to what immediately follows, as it is here, largely, that the preparatory fall cultivation will apply.

If stubble land must be seeded then do it only after proper tillage to reduce the infestation. Such tillage effectively destroys, even in heavy stubble there is still considerable risk when spring arrives that, unless there are one or two applications of poisoned bait will save the greater part of the crop, considerably tilled land. Possible preparations for stubble land are:

(a) Thorough cultivation with deep ploughing either in the fall or the spring, preferably the former if conditions warrant or permit; fall ploughing being considered the most effective for grasshopper control. All seedbed preparation for this purpose should be done at least 3 inches deep, well turned, and using the skimmer if available, and harrowed; and the ploughing should not be packed, wherever feasible. Ploughing of this type will bury the eggs to sufficient depth that the majority of the newly-hatched hoppers will die before reaching the surface. Those that do survive are so delayed that they will be easily killed.

(b) On heavy clay or clay-loam land, where this type of ploughing alone can be done is neither effective for grasshopper control, nor good general practice, then extremely shallow fall ploughing will bury the eggs to sufficient depth that the majority of the newly-hatched hoppers will die before reaching the surface. Those that do survive are so delayed that the full destruction of eggs This should be followed by another very shallow working very early in the spring. The spike-tooth harrow is probably the best implement for this work in where it can be used, but the disc, the cultivator disc, or subsurface will serve if they are set as shallow-ly as is consistent with good work. It is very essential that any work of this sort be extremely shallow, as the eggs occur mostly in the top half inch of soil, and the purpose is to destroy the eggs or expose them to the surface.

While this practice cannot be depended upon to make heavily infested stubble land safe for crop, it does more to mould-board plow soil, it should prove reasonably satisfactory for moderately infested land, and even for heavy soil. This type of work should be found invaluable in those charged with the fall to dry and winter open.

Further information may be obtained From The New Summerfallow To Crops. In addition to cultivation to destroy the hoppers hatching in infested stubble that is to be followed by seeded grasses, it is also important to control crop. This can be accomplished by a combination of tillage and baiting.

Fight Them: Keep a guard-strip, 4 rods in width, around the outside of infested land to be ploughed either in mould-board or in disc plow land. This ploughing should be done this fall, however if the work is difficult and to save time in the spring. In any case the ploughing of the guard-strip must be completed well before the hoppers hatch, hence usually not later than the middle of June in southern areas. The guard-strip must be kept black until the crop matures.

Second: A trap-strip, 2 rods wide, consisting of land well harrowed, to the inside of the guard, should be left around the field just inside the guard-strip. This trap-strip should be left at intervals of 20 to 30 rods, running the length of the field.

The land between the trap-strips should be surface-worked frequently so as to completely destroy all green growth, and the tillage should start in the center of each land and proceed towards the trap-strip, thereby driving the hoppers ahead of the tillage to the weedy traps for feed. The first tillage should be done at any time until hatching is well advanced, but has not been completed at the time a second working may be needed to keep down new weed growth which will attract the hatched hoppers.

Third: Poison the trap-strips as soon as they have been completed, in the three-rod width, choosing the first morning suitable for effective baiting. Addit onal baitings will be necessary if the strips become heavily re-fouled. It is a mistake to delay baiting too long, as the hoppers may bolt to other fields if they become too crowded in the strips, particularly as they approach maturity.

When "strip-farming" is being done it is particularly important to use the above method to protect the crop on the fallow lands Where the lands are not strip-farmed, the guard-strip and around each stubble-land need only be about two-rods wide, and the other tillage may be done from the outside towards the middle of each land, leaving a single trap-strip down its centre.

It will be noted that in paragraph 4-1, it is recommended that where possible, tillage be continued around next year's stubble be plowed this fall. It should be possible for every farmer to decide what land he will summerfallow next summer and plough the guard strips this fall as recommended.

Other practices of material importance which may have a bearing on the fight this year are as follows, include:

Fall rye, if not seeded until about the middle of September, may be used with advantage to supply spring pasturage or to be cut for hay if desired. These purposes it may sown with considerable success in fall wheat stubble. Since the exposed grains of fall rye remain very greedily by grasshoppers, however, even when the crop is in the milk stage, it is not recommendable for grain during grasshopper outbreaks.

Land that is heavily attacked when it first comes up, but should be used, may be helped by tillage. It is well to remember that reducing the infestation along weedy road allowances and fence lines will usually be remunerative. It may again be stated that this practice is the surest means of escape from infested land safe for seeding (with the possible exception noted above), but it will aid in lessening chances of heavy loss. It is possible that even where feasible and if it will not destroy seeded fall and winter pasture. Sweet clover has been found very useful in the same connection.

Clean and thorough tillage have apparently followed consistently with the effects of grasshopper attacks at this time. In a typical instance, the Marquis apparently lost than Reward. This information may be utilized with profit this year.

This article is drawn up entirely from the facts given by the Dominion Entomologist during the balance of the crop season this year and is not the final word on this subject. Further information will be published from time to time, and it is the intention to endeavour to hold meetings in as many school districts as possible in the severely infested areas during the coming winter.

Farmers should consult with their municipal councils who will be kept advised of developments.

The fall "Emergency Program For Grasshopper Control in Saskatchewan" may be procured from K. M. King Esq., Entomologist in Charge Dominion Entomological Laboratory, University of Saskatchewan, Saskatoon, Saskatchewan, or R H Vigor Esq., Field Crops Commissioner, Department of Agriculture, Regina, Saskatchewan.

Civil Service Association

Fusion Of All Employees Connected With Service Is Urged

The Montreal Herald says "A fusion of all employees' associations connected with the civil service of Canada is now taking place and in time it is hoped to have one large central body that will look after interests of all the members.

"Among the associations that will form part of the new association are the Union of Postmen, Amalgamated Civil Service Association, and many others.

The new organization will take the name of the United Association of Civil Service employees and one of its principal objects in view is re-establishment of salaries that were in force before the depression.

"Organization of the central body and steps taken to get everybody lined up as members, are going ahead rapidly in Winnipeg, Vancouver, Regina, Ottawa, Quebec, Toronto and in Montreal as well as other centres.

Fighting Cancer Menace

Ultra-Violet Light Can Readily Detect Malignant Growth

Even the most minute growth of cancer can be detected readily by the yellow glow it emits under ultra-violet light, Dr. Alfred Sokal, of Chicago reported to the American Congress of Physical Therapy.

He voiced a hope that through the ultra-violet light cancer's dangerous menace may be minimized—first by cancer diagnosis in its early stages, then by treatment, especially surgical treatment by physicians, however, even when the crop is in the milk stage, it is not recommendable for grain during grasshopper outbreaks.

Cancer may be heavily attacked when it first comes up, but should be used, may be helped by tillage. It is well to remember that reducing the infestation along weedy road allowances and fence lines will usually be remunerative. It may again be stated that this practice is the surest means of escape from infested land safe for seeding (with the possible exception noted above), but it will aid in lessening chances of heavy loss. It is possible that even where feasible and if it will not destroy seeded fall and winter pasture. Sweet clover has been found very useful in the same connection.

OCTOBER 1

THE LIFE OF PAUL

Golden Text "Give diligence to present thyself approved unto God, a workman that needeth not to be ashamed, handling aright the word of truth."—2 Timothy 2:15.

Lesson Text: Acts 21 to 27, 28, 30, 6-7. Philippians 3:3-6.

Devotional Reading Psalm 119:7-16

Explanations and Comments

Paul's Training For Leadership.

The personality of his parents and his intercourse with the home were among the most potent educative factors in his early life Long after he had left the home, fundamental principles of domestic education remained stamped in his consciousness.

First and foremost of these principles was the duty and responsibility of parents Parents ruled by "divine right." Paul never lost this home The chief responsibility for the education of the children fell upon the father as the head of the household. On the other hand, the first duty of children was to honor and obey their parents absolutely.

Life in the Hebrew home was a series of object-lessons. Each symbol, ceremony, and festival in family observance started an educative influence The great reservoir of the child's consciousness was stirred at the turn of every event. The order of instruction followed the order of events Interest and attention was aroused by an appeal to the child's curiosity. The Sabbath, the unusual rites and utter change of food at Passover, the removal of the family to a tent during the Feast of Tabernacles, the kindling of the Feast of Dedication, the good cheer and boisterous merriment at Purim, all called forth innumerable questions. The parents, seizing this moment of curiosity, imparted that knowledge to the child which was so dear to themselves, the origin of each festival, the meaning of each symbol and ceremony, as the case might be, in the history and religion of the race.

The process of retailing these traditions in story, by word of mouth, accompanied by all the add d expressions of the parent's personality, stirred the child's imagination and established the prejudice that knowledge was made to glow with loyalty and pride in the traditions of their race

What a rich and varied influence the Hebrew home system exerted upon the sons of Israel! The ideal teacher then as now, had a high standard set for him. He must be pleasant, gracious, wise, learned, well read, thoughtful; he must have a good memory; he must know how to frame questions, and must be ready and correctly; he must be open-minded, humble, open-hearted, and practical.

Made End Goose

End goose was made by an insurance company when it refused a $15 policy to Mr. M. Cummins, of West Ealing, London, sixty years ago. He and his wife have just celebrated their golden wedding.

Scout Carries In Arctic

In the Arctic regions people can talk to one another quite well when they are as much as a mile apart the cold, dense air, and the smooth surface of the ice and snow help to help to the carrying of sound.

Whether ivy poisoning ever causes death is a question which doctors have not settled.

WIDER POWERS FOR DOLLFUSS ARE INDICATED

Vienna.—It was authoritatively announced that Chancellor Dollfuss was taking over complete executive control of Austrian affairs, including the army, the police and the gendarmerie with a new "cabinet of personalities."

It was explained the new Dollfuss cabinet will be formed on the basis of elimination of all political parties Cabinet members who belong to parties will be shelved, and parliament will lay down mandates.

It was not as yet definitely disclosed whether the Heimwehr (home guard) will remain a part of the political picture. A new cabinet list, however, was expected.

Shortly after the announcement a Christian-Social meeting under the chairmanship of Karl Vaugoin, minister of the army, and an ironic conference Starhemberg, leader of the Heimwehr leader, wound up by issuing a communique to the effect that the party solidly behind Dollfuss and "the Christian corporative authority state."

This was exactly the same phrase used by Dollfuss on September 11, when he set forth his conception of the new Austrian state, which was capitulated a wordy battle between Prince Starhemberg and Vice-Chancellor Winkler.

Northern Air Route

Winnipeg Expected To Be In Import- and Position In Trans-Atlantic Service

Ottawa, Ont. While it is too soon to predict the role that Winnipeg will play, it is learned here on official authority that negotiations for a trans-Atlantic air service are now rapidly reaching a final stage. The three countries that will co-operate in this venture are the United States, Canada and Great Britain and the route will be north across Labrador or Hudsons Bay to Greenland, thence to Iceland and to the British Isles.

The negotiations are now proceeding at London, where the Canadian government and, probably, the Canadian Pacific are represented. The United States participant is the Pan-American Airways, Limited, and the British negotiator is the British Air-ways.

An announcement of the plans for an early trans-Atlantic service is expected within six weeks.

It is not known here if the plans will call for a flight from Chicago to Winnipeg and thence northeast to tap the main line, but it is said that this possibility is being considered.

Kitchen Boys' Band

Have Accepted Invitation To Play At Crystal Palace, London

Vancouver, B.C.—Kitchen Boys' Band, which won honors across continent, has accepted an invitation to play next summer in the Crystal Palace, London, England, according to the band's manager, Jack Lee.

The youthful musicians took the Pacific northwest and British Columbia honors in 1931-32-33, the Canadian championship at the Canadian National exhibition in 1932 and the world's championship in their class at a Century of Progress Fair in Chicago recently.

Record Price For Beef

Springfield, Mass.—A new record price for beef steak on the hoof was paid at the baby beef auction at the Eastern States exposition, when the grand champion owned by Theron Grass, of Pine Plains, N.Y., brought $11.15 per pound at auction. This compares with a previous record of $9.20 paid at the East St. Louis Fair last year

Blame For Rotating Blaze

London, Eng. An international legal commission which has been holding an inquiry into the Berlin Reichstag fire last February, found that grave grounds existed for suspecting that the building was set afire by the Nazis rather than by the Communists whom the German Government has accused.

Favors Tariff Act

Controlled Inflation And Lower Tariffs Favored By L.S. Official

Chicago Secretary of Agriculture Henry Wallace told the United States Grain Dealers' Association that he still favors controlled inflation

Along with this he criticized high tariff psychology and warned that attempts to fix prices 'without control of production is doomed to failure."

"Most of the price fixers are absolutionists," he said. "If the purchasing power of farm products does not improve during the next three months, the price fixers and inflation ists will have great power in congress this winter and there will be passed legislation which will make the Agricultural Adjustment Act seem extra ordinarily conservative."

Secretary Wallace said he looked for decidedly higher agricultural prices within a few months, but that he felt the improvement might come to a end and if "we are not prepared to meet the peril promptly, we will be difficult to float foreign loans in their present temper

"There three forces mean that for the present the people are profoundly nationalistic, and that as long as they are operating on this basis, we should get all the benefit that can put our internal economy on a nationalistic basis, reducing our crop land acreage to 250,000,000 acres.

"If we persist in our high tariff policy or even in a half-way modification of it, and at the same time collect in full the money which is owed us abroad, and refuse to lend more abroad, we will take unsupportable action on the part of the agricultural adjustment administration year after year to keep down our crops to a point which will afford living price to American farmers."

Empire News

Clearing House For Empire News Is Suggestion Made

Toronto, Ont.—National press associations in Canada, Australia and New Zealand, the road would be prepared for the establishment in London of a clearing house for the empire news, in which the press of the United Kingdom would be invited to participate.

Would Provide Work

Big Reconstruction Project Advocated For Winnipeg Man.

Winnipeg, Man. A city home reconstruction project, which would provide employment for hundreds of Winnipeg building tradesmen, is advocated by the civic town planning and zoning board and the Winnipeg building trade council.

The project was discussed at a conference here, and under the plan the city council and other civic governments would be asked to finance a scheme for remodelling old, run-down houses and some of the poorer districts of Winnipeg.

American Section At Geneva

Geneva, Switzerland.—The American Minister to Switzerland, Hugh R. Wilson, practically living in Geneva, and with five members of the counselor staff headed by Prentiss B. Gilbert, directing themselves exclusively to the League of Nations end, the league decided to inaugurate a special American section.

Boy Takes Long Journey

Edmonton, Alberta.—Adopted by his aunt and uncle, Mr. and Mrs. A. Bleasch of Edmonton, eight-year-old Walter Houghton, travelled alone from Cape Town, South Africa, to the Alberta capital after his mother and father had died. The boy said he enjoyed the 12,000 mile trip and is eager to see his first snowfall.

Cotton mills in France are increasing working hours.

Bernt Balchen In Hospital

National Flyer Has Operation For Appendicitis

Cape Town, Union of South Africa Bernt Balchen, the noted flyer, well known in Canada, underwent an appendicitis operation described as completely successful

The mystery of his whereabouts which caused Sir Hubert Wilkins and his shipmates some hours of inquiry was cleared up by a statement that when he left the ship he met a friend and went at a hotel. It was explained he spent the evening in his friend's company and returned shortly before midnight, going to bed quite ignorant of the excitement crashed by his "disappearance"

Railway Fares

Scaling Down In Prices Soon, And Excursions May Be Permanent Fixture

Calgary, Alberta Rumored consideration of a scaling down of railway fares in United States is subject to close observation by Canadian railway executives, E. W. Beatty, president of the Canadian Pacific Railway, said here.

"The question of lower fares is a matter of development and depends on future traffic." Mr. Beatty stated "But I believe, judging by the manner in which they have been patronized in the past few months, excursions have come to stay."

Morphine Case

Victoria, B.C.—Sacks of dried poppy heads were stacked in the court room as material evidence as the trial of a Hindu named Bern on a charge of possessing morphine begun. Royal Canadian Mounted Police recently seized a truckload of poppy heads from city and Saanich lots and this was the first case arising out of the seizure. The case was adjourned.

NEW DEPUTY MINISTER

Dr R E Wodehouse Executive Secretary of the Canadian Tuberculosis Association, who has just been appointed Deputy Minister of Pensions and National Health for the Dominion

No More Free Gas

Say Joy Riders From Alberta Obtaining Free Gas From B.C.'

Victoria, B.C Joy riders from Alberta have been obtaining free gasoline in British Columbia, according to Hon W H Demmes British Columbia Minister of Labor, just returned from a trip to the Okanagan and Kootenay districts

Mr Demmes said families were driving across the inter-provincial line in old cars and asking for free meals and a supply of gas to move onward Most municipal officials found it cheaper to spend them on their way with gas instead of harboring them.

The minister and word apparently agreed to the prairies and increased the flow of ancient cars from Alberta into the southern section of the province

Mr Demmes issued orders no more free gas be supplied to prairie citizens

Growth Of Empire Trade

Exports For August Of Very Encouraging Nature

Ottawa, Ont. Exports to British Empire countries in August, exclusive of those to the Unit d Kingdom, totalled in value $4 074,000 This was an increase of $622,000 over August last year and the highest since November 1931, when the total was $4,273,097, according to the Dom nn n Bureau of Statistics.

The largest export last month was to Australia, valued at $2,000,000, an increase of $101,000. In which lumber from British Columbia played a conspicuous part.

Exports to the Irish Free State, Newfoundland, Bermuda, the Brit sh West Indies, the British countries of Africa, British Guiana, Hong Kong Palestine and British Oceania, all showed gains last month.

Find Free Gold

One Body Is Discovered In Steven-son Lake Area

The Pas, Man.—Predictions made last year that the next big gold finds would be recorded at Oxford Lake and vicinity have been borne out by a number of stakings in the Stevenson Lake area about midway between Oxford House and Island Lake, according to word received here

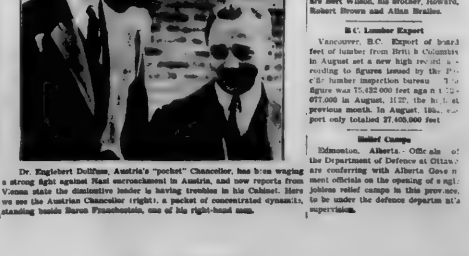
Among those in the field is James R. Cridermau, of the Cridermau mines Central Manitoba, and well known in Ontario and Quebec.

Free gold is spattered over a wide area. Assays run up to $10 per ton Claims extend three miles along Stevenson Lake shore.

Studying Tax Problem

Winnipeg, Man. J. A. Hyng, commissioner of income taxation for Saskatchewan, was in Winnipeg to consult with D. C. Stewart, Manitoba administrator of income taxation, regarding means of eliminating the overlapping taxation as respects individuals subject to taxation in both provinces.

CABINET TROUBLE MAY UPSET DOLLFUSS



Dr. Engelbert Dollfuss, Austria's "pocket" Chancellor, has been waging a strong fight against Nazi encroachment in Austria, and now reports from Vienna state the diminutive leader is having troubles in his Cabinet. Here we see the Austrian Chancellor (right), a packet of concentrated dynamite, standing beside Baron Franchomiere, one of his right-hand men.

FOUR NATIONS MAY AGREE ON ARMS CONTROL

London, Eng Broadly outlined, the aims of the British government on the disarmament question are understood to be the application of the principle of armament limitation to all nations and the avoidance of competition in armaments.

At a special meeting the cabinet reviewed the situation and heard the report of Captain Anthony Eden, under-secretary for Foreign Affairs. The net result of the cabinet's deliberations, the Canadian Press was authoritatively informed, was to leave the ministers firm in their contention that the adoption of a disarmament part was imperative.

Paris France A united disarmament front of Great Britain, United States, France and Italy, based on the French plan for international control, was believed by French officials to be near.

While British quarters were reticent pending the outcome of a cabinet meeting at London, French officials maintained the points of view of the four powers were close enough to enable an accord This, it was believed, would include the control scheme, reduction of armaments by avoiding a disarmament agreement, and limitations of armies and guns.

Study Cosmic Rays

U.S. Army Plane Carries Instruments Into Skies Ebeith

Riverside, California. Using army bombing planes to carry delicate scientific instruments nearly four an ten above the earth, Dr. Robert Millikan, noted Pasadena scientist, and his assistant, Dr. Victor Neher, have resumed their efforts to learn more about the cosmic ray.

An army pilot, garbed in 25 pounds of winter flying clothes and equipp d with oxygen breathing facilities which he is confined to use about 15,000 feet, flew the instruments to 19,000 feet recently

The plane r mained all last night at altitude an hour and 15 minutes and at 15,000 feet for a similar period. Dr. Neher said he plans several flights daily for two weeks.

Similar tests were conducted on behalf of Dr Millikan by Dr Kendrick Manitoba in 1932 On that occasion a Royal Canadian Air Force plane made altitude flights after being fitted out as an aerial laboratory.

Warning Is Given

Heavy Penalty For Melting Down Build Coins

Ottawa, Ont.—A warning to those who might be tempted to melt down silver coins in order to profit by a high price now prevailing for the raw material is contained in a statement issued by the Department of Finance.

Section 25 of the Currency Act provides that the penalty for illegally dealing with such gold coin shall be a fine not exceeding $500, or imprisonment for not more than 12 months or both fine and imprisonment.

Made Engineer's Try

Edmonton, Alberta Four Edmonton youths have completed the treacherous 300-mile journey down the Saskatchewan River and tributaries from Rocky Mountain House to this city The dangerous trip was made in their canoe once, the occupants narrowly escaping death. The canoeists are Bert Brown, Lawrence Howard, Robert Brown and Allan Brailes.

B.C. Lumber Export

Vancouver, B.C. Export of board feet of lumber from British Columbia in August set a new high record a cording to figures issued by the Pacific lumber inspection bureau The figure was 15,432 000 feet ag a nst 9,077,000 in August, 1932, the h gh previous month. In August, 1931, export only totaled 27,400,000 feet

Relief Camps

Edmonton, Alberta.—Officials of the Department of Defence at Ottawa are conferring with Alberta Government officials on the opening of a sufficient relief camps in the province, to be under the defence departm nt's supervision.

Unjustified Pessimism Is Chief Trouble Of Wheat Market, In Opinion Of Western Economist

Unjustified pessimism is the chief trouble facing the wheat market, according to Dr. W. W. Swanson, head of the Department of Economics in the University of Saskatchewan, who was in Winnipeg.

The importing countries of Europe have not yet reached their pre-war acreage in wheat, Dr. Swanson claimed, and have consistently reduced their growing of rye. The harvesting of imports in Europe was due to no increase in acreage, but to extraordinarily high yields this year and last year. This, he suggested could not be taken as a permanent factor.

Dr. Swanson drew attention to the statement of R. W. Shaw, American wheat statistician, that normal United States government estimates of wheat stocks in that country were about 150 million bushels in excess, and that there was actually no surplus wheat there in excess of domestic requirements and a small carry-over for safety.

As to the "bin cogs" campaign in the United States, Dr. Swanson declared that other than to say he had never seen any case where the people had misused the penalty of past extravagance by refusing to submit it existed.

He had been a witness before the royal commission on banking and currency at Saskatoon and consequently declined to comment on the commission. He did express surprise of admiration for the manner in which Canadian banks had met the world economic crisis and his opinion that the personnel of the royal commission was a complete guarantee its report would be constructive.

Problems Of Sharpness

West Southern Councils To Report Prior Approval Of Bakker

Working through the National Dairy Council, the three prairie provinces have made united efforts to induce manufacturers in eastern Canada to turn out a finer grade of butter. That effort started right after a Canadian butter surplus of 9,000,000 pounds was announced August 1. To this date the western provinces have received no indication that any butter would be shipped to the old country from the east, according to P. H. Reed, Saskatchewan Dairy Commissioner and Secretary of the Western Dairy Association.

Mr. Reed said Saskatchewan had shipped slightly more than 1,000,000 pounds to the east commercial trade, but business, he declared was done at a set loss, the loss being heavier in the shorter shipments than the later ones, the result of better handling of butter in England.

Model Of Tower Bridge

London's Famous Structure Reproduced By Pupils With Craft Tools

A model of London's famous Tower Bridge, eight feet long, two feet high and 14 inches wide, which was made from wooden boxes of the packing or cigar variety by R. O. Brandrith, Board of Lyndon, Saskatchewan.

It took two winters of evening applications of the tool and three-and-one-half weeks to paint it.

The bridge rests a small plane, pocket knife, razor blade, fret saw, paint brushes and sandpaper. Coarse twine was used for paint brushes.

Although he has never seen the structure he set to work and built it for his son. He has not seen the bridge, as it stands in London, either.

Canada's Sugar Refineries

Sugar refining is a considerable industry in Canada. Sugar refineries are in operation in the Dominion: One at Montreal, Three Rivers; one at Saint John, New Brunswick; two at Montreal; one at Chatham, and one at Wallaceburg, Ontario; one at Regina, Saskatchewan, and at Vancouver, British Columbia. The value of production from these eight refineries in 1930 was $41,652,000.

Aeroplanes are delivering supplies to ice-bound lighthouses near Newfoundland.

Tomato Bad To the Ladies

Northern Manitoba Farm Agent Issues Warning In Plenty

Red, even statement are safe from the tempting country Portland hog.

Tomato living on the third floor of a French apartment house got up to go to work one morning and found they couldn't go. There was no electricity. It had been removed in the night by burglars.

Telephones and windows had been left intact, however, and while none decided across the street to their intimate friends neighbors lately behooved the empirical police, who eventually rushed out the fire department. Thirty firemen arrived in two hackers for the next two weeks while new stairs were being installed.

Highway Mileage

Northern Roads Are Classed Secondary But Are Important Local Ones

The 31,333 miles in use in 1930. The northern highway mileage in Canada at the end of 1932 amounted to 31,313 miles, and a somewhat small to 207,000 making a total of 238,313. This includes all roads outside of incorporated cities, towns and villages under the jurisdiction of the provincial highway departments, one each of which has local jurisdiction as far as the mileage was concerned with by the provincial departments. It consists of the roads in the unorganized villages and hamlets which quite properly might be classified as roads. The figures were revised by the Dominion Bureau of Statistics.

General roads increased from 73,661 miles in 96,136. Cement concrete roads were located almost entirely in Ontario and Quebec, only three per cent. of the total being in the other provinces. The increase in this high class type of road was 420 miles, or from 1,134 to 1,617.

The total expenditure on road construction in 1932 was $43,597,681, including $3,000,000 paid by the Dominion government for relief work and for the elimination of rural level railway crossings.

Consumer Wants Good Money

Reminds Some Might Standard As In Other Foods

In the case of a food product the producer owes to the consumer standards of preparation of that product for the market to me, that it is wholesome, clean, attractively packed and equal to the standards under which it is advertised and labelled. The honey producer had many years ago his own way until a few years ago became dominated by a comparatively small supply and honey sold quite readily without too much fussing about grades. Conditions are somewhat different. More honey is being produced, competition has become keener and the consuming public has become more discriminating in its choice. The consumer has been educated to buy good grades and to demand and uniform standards and is demanding similar standards for honey and that demands cannot be ignored. The consumer is willing to pay for quality produce and he has his final say as to what he shall buy, his wants must be considered. The producer who fails to recognize this fact might just as well change his business first as last.—C. B. Good, Carman, Dominion Apiarist.

Makes Difficult Ascent

A. H. Marshall, of Vancouver, B.C., a member of the Seattle Mountaineers Club and John Rundle, instructor of mountaineering at the University of Cincinnati, recently reached the summit of soaring Crumbs peak near Red Ledge, Montana, after a day and a half of arduous climbing. Marshall and Rundle were the sixth and seventh persons ever to scale the peak.

Dogs are the most affectionate of animals—the only animals that prefer the company of man to that of their own kind. Cats can't be trained a second.

Traffic receipts of Hapland's four railways last year totalled 2,000,000.

Keeping Standard Measurements Is One Of The Most Difficult Problems Confronting Scientists

Preventive Medicine

Should Strength Is Just As Important As Physical Health

Preventive medicine is as concerned with mental as physical health, A. J. Glover, Provincial Director of Public Health and Preventive Medicine, McGill University, told the annual convention of the Alberta Medical Association at Calgary.

"There are more beds in our mental hospitals than in our general hospitals," he said. "The number of people who live unhappy lives because they are not mentally happy is large."

Dr. Flemming outlined programs in the field of preventive medicine under the development of the science of medicine. "If the medical profession is to take part it must be prepared to act as a group in addition to local organizations taking its part in public health. The profession must provincially and nationally define the field it would assume in the realm of preventive medicine."

Dr. Flemming referred to improvement of health of infants, to schools and industrial organizations in the importance of health and establishing their own medical departments. The private practitioner has had little part in this development, he said. Health supervision should be given by the family physician who should assume responsibility for smallpox vaccination and diphtheria immunization.

"Preventive medicine enters into this problem because it has obtained knowledge to justify a program of prevention of mental disease and promotion of mental health. The physician must study the mental field," he declared.

Radishes Value The Same

Prunes Most As Good As Fresh Research Council Declares

Prunes most to as good as fresh most, according to the research committee of the Royal Agricultural Society of England. The committee has reported having inquired of the department of scientific and industrial research regarding the relative merits of fresh most as compared with tinned, cooked or frozen most.

A reply had been received from the ministry of health stating that on the knowledge at present available there is no recognizable difference in relative value as between frozen or chilled and fresh most of similar quality. Further, there was no evidence that modern methods of canning affected the nutritive value to any greater extent than ordinary cooking.

Rescued By Sing

While Fog Report Train Was Speeding From Aberdeen to Bolister, Scotland, Recently, King George Presented the R.W.O. to William Johnston, traffic superintendent at the Montrose Bolister district, who is retiring after 52 years of railway service.

Caller: "Good morning, Mrs. Smith, is Johnny home and for a lacksmith?"

Mrs. Smith: "Yes, I come to say he lost the key of the tin of sardines."

Nearly accurate measurement is still one of the most ticklish problems of science, and of all measurements done in a factory, the small inch is in connection with the commemoration of the imperial standard yard and pound and the effect of time. This is a job that has to be done, by statute, every ten years at the National Physical Laboratory at Teddington. The scales, for comparing the pounds, have been specially designed and built by the Laboratory. They live in a nice cool room which was once the wine cellar of King William IV. The scales have five contacts, three of which are merely designed so as to meet the load, small as it is, taken up gradually to avoid the shock of jarring the beam. The controls are worked by knobs projecting through the door of the vault, so that there should be no chance of inaccuracies arising through the mere presence of a moving body, or disturbance, or any such Lay phenomena.

The pounds are cylindrical lumps of pure platinum, surprisingly small unless you fully appreciate that heavy stuff platinum is. They are about two inches high, and of the same diameter as a half-crown. The intrinsic value of the metal in each is worth about £200.

And the new pounds weight to an accuracy of one part in one hundred million.

The yards cannot be measured quite so accurately as the pounds can be weighed, but they are measured to within one ten-thousandth part of a millimetre.

The standard yard is a bronze rod of "Mr. Baily's" metal (the late Mr. Baily, who invented this particular bronze alloy). Holes are sunk at each end of the rod, and at the bottom of each hole is a small gold plug with three straight scratches across it. The distance between the centre scratches is one yard. That is the only and final and complete definition of a yard, and ultimately of all our units of length.

The most interesting scientific fact that has been established in these measurements is that plain metal is more stable, in size, than an alloy. An alloy, containing a large proportion of invar metal, has been used for one modern copy, and for the past thirty years this yard has been growing, so that it is now a whole thousandth of a millimetre longer than the standard yard.

Of course, it may be that the standard yard and its older copies are all shrinking. Well, that does not matter, for it is the old yard that is a yard, whatever happens.

An Economic Garden

Including Different Plants From All Parts Of World

An economic plant bed is being established in Boston's public garden.

It is composed of 24 different plan's from all parts of the world which provide men with needs from Panama to the Philippines.

Plants selected for the bed included:

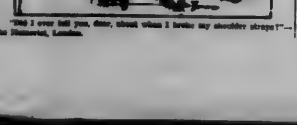
Black pepper, peanuts, pineapple, ginger plant, cocoa, silk cot, manila, cassia, flax, sugar cane, calabash tree, raspberry, American cocoa tree, fenugreek, licorice, cotton, hemp, jute, Malay cassia oil, alligator pear, Malay apple, aloe, bearing hemp, date palm, cinnamon tree, coffee, camphor tree, rubber tree, cotton plant, fan palm, and banana tree.

Egg Export Trade Better

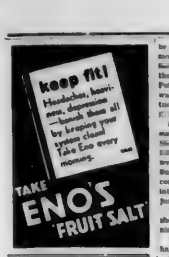
Longer Section Of Country Is Interested This Year

Steadily increasing activity in the export trade threatened practically the entire Canadian interest on the egg market, during a recent week, under the market report of the Dominion Department of Agriculture. Small orders, notably for Montreal, are already shipping regularly, while at a number of other cities export shipments are beginning to move. It is a long time since interest in the egg export trade was spread over such a large section of the country as is the case this year, the report added.

There are about 350 navigable streams in the United States.



"Did I ever tell you, dear, about when I broke my shoulder straps?"—The Humorist, London.



OCCASIONAL WIFE
By
ERNA ROSS WEBSTER
Author of "Jocetta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful, falls in love with Peter Ansen, fellow student in an art school. She is the adopted daughter of a wealthy family and he is a poor, struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time and then decides he must give her up because he cannot stand the financial pace. A chance meeting however paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich, or at least will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. Together, in the park, Peter and Camilla try to arrive at some plan for the future. Mrs. Hoyt, Camilla's foster mother, suspects from Camilla's actions that a romance is brewing. She is anxious to see Camilla well married.

(Now Go On With The Story)

CHAPTER X

It was not long after Camilla knew that "Pa" Lorens was her father that he had been killed in an accident at the foundry, thus taking him out of her life almost as soon as he had entered it. His unusual existence had saved the family's humble home and with three or four of the children working all the time and living at home, Mrs. Lorens managed a thrifty household.

She rather gloried in her newly acquired authority and independence, only partially assumed by young Henry, who had taken his father's place in the shop. He was a subforeman now, and more popular than his father had been. His chief assets were of his antagonism and resentment of inferiority. He was the readjusted young American. The Lorenzo Bred in a section built up of thrifty laboring home owners, where women who had toiled mercilessly in European fields now used electric washers and vacuum cleaners, and found time to chat over back fences and linger for delicious bits of gossip on the street to and from the market.

Their faces grew brighter and their accents less pronounced, as their hair grew more sheepskin and their clothes less shabby. Patches of ivies and clipped hedges added dignity to the rows of frame houses that had been built from one blue-print, while flowers and vegetables flourished in the back yards for beauty and economy. Pungent, spicy odors were wafted from open doors and windows, to the four winds, and children laughed and cried and played ball in the streets.

Such was the environment that Camilla learned was hers by right of birth; but however hard she might try, she knew that she never could adopt it for her own again. There must items when she wished decently that she had not been selected from that wilderness as a rare flower, to be transplanted in the sheltered atmosphere of the conservatory. But her absence of fictional had dispatched that notion, and her meeting with Peter had totally dismissed it. That was why her sudden change of attitude aroused Mrs Hoyt's curiosity as if She sensed

No opportunity to follow up her suspicions escaped her vigilant eye. She saved each Camilla came, and, like Elliot dresser, especially if Camilla were dressing to go out anywhere. Such circumstances inspire women's confidences. She displayed a growing interest in seeing that Camilla looked just right.

"I'm soon to be happier of late," she suggested pleasantly, one evening.

"Am I?" asked Camilla. "I'm, perhaps I am. Guess I'm out more."

"Are you so tired of studying?" hopefully.

"Oh, no. Just anxious for September and the beginning of real work." she replied coolly letting a cloud of rose-tinted suede lace fall over her head and shoulders into fluffy sensual little cascades.

For one thing, Camilla resented her foster mother's assumption of a false position as Camilla Hoyt that her mother provided her with beauty and full clothes but now when she wished to appear her loveliest in Peter's eyes. Of course, he would love her just the same if she wore rags—or a sheet—she told herself. Every woman believes in that supposition, but she knew to put it to the test. A misplaced look of hair, a shiny nose, an unbecoming gown— she knew in a continual dread of her lover's discovery of these scars to whatever beauty is hers.

"May I ask where you are going this evening?" Mrs. Hoyt continued casually.

"The art school classes are having a dance in the auditorium."

"Oh! Is someone taking you?"

"One of the students." Camilla replied coolly, but her heart beat furiously at the mere thought of Peter.

"Do I know him?" Family introductions and long acquaintance were of paramount importance to Mrs. Hoyt's social world.

"I don't think so. His name is Ansen—a Swedish—"

"Queer name, it sounds Swedish."

"Is it? I suppose it is. All I know is that he is one of the honor students."

"Is his family—or—prominent?" Camilla knew that was the next item on the questionnaire.

"You mean, has he money? I don't know. It makes no difference whether he has or not, at a school dance. Clothes don't pay the expenses." She knew what Amelia Hoyt wanted, but she maintained a guileless innocence.

Mrs. Hoyt changed her attack. "From the way you are dressing, I thought you were going somewhere important. That is a new frock."

"Yes, do you mind my wearing it?" sweetly.

"No, indeed. You look very lovely, my dear," she assured her hastily. "I should like to meet your friend when he calls for you."

Camilla thought, "She will have to meet him sometime. I can't see him all summer and prevent it. We

DRAPERIES MADE NEW

"When we renamed housekeeping a month ago I found my draperies had become creased from packing I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun spotted

I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and all over Diamond Dyes they look like Everything new. I have never seen Diamond Dyes give the most beautiful colors when used either for tinting or dyeing and never take the life out of cloth as other dyes do.

ERMA JEFT, Montreal.

might even like Peter. I don't see how she could help herself." Aloud, she replied, "If you wish."

Peter looked his best in evening clothes, as all handsome men do and all plain men in fact Camilla was delighted that Mrs. Hoyt seemed to be impressed favorably with him. Of course her attitude was quite different in their lives so far as Camilla was concerned. Mrs. Hoyt must be won over to do with Gale Peter. Her own plans had provided for that. Only her approval of Peter would make the marriage not difficult when she discovered that Camilla was not

"We're walking—it's only across the park."

going to be content to live in the old home, however independent she might try to be.

Camilla tells me you are one of the best students at National," Mrs. Hoyt began in the middle of a sentence which Camilla had learned was the first item in the long questionnaire of character, history, ancestry, social and financial rating.

Peter was modest. "That may be, but Miss Hoyt only tells nice things about me."

"Oh, have you known her for long?"

"Only since I went into Professor Drake's class as a critic."

"A critic?"

"I had taken his work two years ago. I wanted to find out if I had improved any," his smile was charming, and included Camilla.

She moved toward the hall entrance to escape the rest of the list of questions. "We are late, now, Mr. Ansen. I think we had better be going."

Mrs. Hoyt followed them to the door. "Your car where is it?" She spoke with alarm, as if she thought it must have been stolen, when she saw none waiting outside.

"We're walking. It's only across the park," said Camilla, "and Mr. Ansen lives near. I insisted that he shouldn't bring a car."

NERVOUS WOMEN
Take Lydia E. Pinkham's
Vegetable Compound

"I was so nervous that I could not sleep at night. I had a pain in my side and could not eat. I had been under the care of a doctor for some time but found no relief. I read about Lydia E. Pinkham's Vegetable Compound and what it had done for others and decided to try it. I am glad I did for it has done me more good than anything I have ever taken. I am now strong and well and can do my housework and sew. I recommend your medicine to my friends and tell them what it has done for me."—Mrs. Ethel Hall, 1 Ellis Ave., Dorchester, Mass.

Why don't you try it? Pinkham's Vegetable Compound is made from roots and herbs, and has helped many women who suffer from such conditions. If that is what you need, this medicine should help you. Also it is a fine stomachic tonic. Buy it at your druggist's today.

Write Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice.

Making Liners Cooler

Cunard Company Finds White Paint Reduces Temperature Many Degrees

The Cunard Line has announced that the Mauretania has found a well received an an all-white cruising liner that they have decided to paint the two funnels of their famous ship at the beginning of her world cruise next January.

H. F. Bowe, general passenger manager of the line, said that engineers of the Mauretania had reported to him on a series of scientific observations taken on the "Mauretania" during cruises to the West Indies. They took similar readings last year on identical cruises and have reported that the liner is from seven to nine degrees cooler in her white dress.

"I didn't believe it at first," Mr. Bowe said, "and thought it as just a stunt. But they produced the figures and scientific data to show that a white ship must be cooler than black one. So I capitulated."

The Mauretania," still one of the swiftest liners afloat despite her age of more than a quarter of a century, has proved popular in the cruise trade. On September 27 the ship will be sent to England for a month for reconditioning in November the liner will be back again for a series of cruises to last until April.

THE RHYMING OPTIMIST
By Alice Michaelis

THE FADED TAPESTRY

Her life is like a faded tapestry
Whose colors have grown paler with the years
Of every one-time vivid flower and tree
The shades only, dim and vague, appears
Day after day has shed its sage tears
And the caresses of these golden beams
A faint gray of sapphire, rose and pale blue wren;
The picture now so pale no remnant glimmers
A faded tapestry, which taken from time
An added beauty as the seasons go;
So softened, rendered mystic and sublime
With loveliness no crude, new thing can show
We see her life grown fairer at the core
Which glamour years, and years alone, can lend.

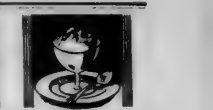
Changed Into Land Animals

Royal College Of Surgeons Experimented With Mountain Fish

Fish have been changed into land animals by members of the Royal College of Surgeons, in London, England.

The fish selected for the experiment were Mexican salamanders, which normally spend their lives in water

They were fed with thyroid gland and a month later the gills and tadpole had completely disappeared, eyelids developed—and the salamanders struggled from their tank on to the shore.



Use ST. CHARLES MILK and your pies, puddings and desserts will have a new delicious smile in your mouth for, like magic, it makes cooked and raw vegetables, in fact whatever a recipe calls for, milk. It makes all good cooking BETTER!

ST CHARLES MILK

Little Helps For This Week

"If we love one another God dwelleth in us, and his love is perfected in us."—1 John 4.12.

"And be that keepeth His commandments dwelleth in Him, and He in him. And hereby we know He abideth in us by the Spirit He hath given us."—1 John 3:24

Abide at me, o'ershadow by Thy love Each half-formed purpose and dark thought of sin,
Quench ere it rise each selfish, low desire
And keep my soul as Thine, calm and divine

The spirit of love must speak the words and work the works of love. It cannot exist and give no sign, or a limn sign. It cannot be a spirit of love, and, inside into irritable and selfish impatience. It cannot be a spirit of love, and at the same time make not the prominent object. It cannot rejoice to lord itself to the happiness of others and at the same time be making its cure. It cannot be generous, and envious. It cannot be sympathizing and unsympathetic, self-forgetful and vain-glorious. It cannot delight in the rectitude and purity of other hearts, and yet unnecessarily suspect them.—J. H. Thom.

Has Slim Chance Now

If Motor Cars Speeded Up Pedestrian Will Have Hard Time

The pedestrian has a hard enough time as it is. In most hop quickly with a car coming dead at him at 60 miles per hour. If the speed of the car were stepped up to 120 miles per hour he would have no chance whatever If he stood still he would be struck so hard that identification would be difficult; if he jumped with sufficient agility to escape he would have to strain his back and injure his arches for life The extent of the jump which he makes today would be a futile gesture. The leap which would deliver him from a car speeding at 60 miles per hour would be of no use whatever when pitted on a safety measure against one speeding 120 miles an hour

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED
Wake up your Liver Bile
—No Calomel necessary

Do you to bad healthy and happy, your liver is not working right. Your liver should pour into your bowels a pint of bile daily. If this bile is not flowing freely, your food does not digest. It just decays in the bowels. Then gas bloats up your stomach. You have a sick headache, dizziness, constipation, your skin is yellow, you feel "all down in the dumps."

Don't take a purgative. You only need to get your Liver Bile Flowing Freely. Then you will feel like a new person. Ask your druggist for Carter's Little Liver Pills. Purely vegetable. Safe and gentle. Take only as directed. 25c. Refuse substitutes.

VOL. 12, No. 37 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, OCT 3rd. 1923 $1.50 PER YEAR IN ADVANCE

Fort School Board Hold Business Session

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Monday the 2nd. of October, 1923, at 7:30 p.m.

Present Mr. F. Atkinson, Chairman. Trustees Mr. R. Brown and Dr. Calhoun.

The minutes of the last meeting held were read and adopted on the motion of Dr. Calhoun.

Five tenders for coal were opened and considered by the Board, and after being discussed at length it was moved by Mr. Brown and adopted: That the School Board accept the tenders of the Simmons Lumber Co., for fifty tons, more or less, of Black Diamond Coal at $5.75 per ton and of the Alberta Pacific Grain Co., Ltd., for 50 tons, more or less, of New Penn Coal at $5.00 per ton, Prices F.O.B. Fort Saskatchewan school bins.

The following accounts were passed for payment on the motion of Dr. Calhoun: G. A. Cranston for coal $12.70; F. W. Smith, school supplies $82.59; A. H. Carscadden $20.15; A. Jacobs $4.35; The Record $6.05 for attendance reports and advertising for coal tenders.

Mr. Anderson the Principal was present and discussed school matters with the Board.

The meeting adjourned on the motion of Mr. Brown.

BADMINTON CLUB HOLDS ANNUAL MEETING

At the annual meeting of the Fort Saskatchewan Badminton Club held in the Simmon's Hall last Monday evening, the following officers were elected:

President, Mr. H. Lesher.
1st. Vice-Pres. Mr. S. Hamsby.
2nd. Vice-Pres. Mrs. W. H. Walton.
Secretary, Miss M. Trotter.
Executive Committee: Mrs. F. Murray, Mrs. W. P. Colburn, Miss G. Hodgins, and Mr Mark. Holt.

The question of fees were discussed and it was finally decided to leave them as they were.

It was reported that prospects are good for several new members this year.

It was decided that the Badminton Club hold a dance on Friday, Nov 16, in the Recreation Hall. Further announcements will be made later.

Some twenty members were in attendance and a very good meeting was held.

NEW YORK GIANTS WIN TWO STRAIGHT GAMES

The New York Giants won the second game of the World's series at New York today, when they defeated the Washington Senators by a score of 6 to1. New York took the first game Monday by a score of 4 to0.

"KIMBOSHEE CITIZEN" RE-COMMENCES.

After suspending publication for one month, the "Kerrobert Citizen" last week made its appearance again, with Editor "Bill" Rae at the helm. The revived publication has been sponsored by the merchants of the town, who are cooperating with the "Citizen" by generous use of advertising space. An editorial calls for the closer tie-up of the interested parties—the town, the country and the paper.—Lloydminster Times.

OPEN SEASON ON SHIPPED GROUSE

Closed season on ruffed grouse has been ended for the time being, and shooting of these will be permitted between October 1 to 15, north of the Canadian line of the C. P. R. and north of the Red Deer River west of a point near Nevis.

OIL PRODUCTION

Oil production in Alberta for August totalled 97,122 barrels, of which 52,200 was Turner Valley Naphtha.

Aeroplanes Take Up Many Passengers Here Sunday

Residents of Fort Saskatchewan and district took advantage of the opportunity afforded them last Sunday afternoon, when two planes, owned by the DeLux Taxi Co., Edmonton took up passengers here.

Using the stubble field south of the elevators as a landing field, the planes, one an "Eagle Rock" and the other an "American Eagle" both three place machines took up a large number of passengers at the popular price of $5 per pound.

The "Eagle Rock" planes found difficulty in rising off the soft ground, therefore the bulk of the passengers were taken up by the other machine, with pilot Kubicek at the controls.

The aeroplane accident of last week here, didn't seem to dampen the public's enthusiasm to flying.

Two local young men, A. Simmons and F. Kerton, accompanied one of the machines back to Edmonton where it was refueled and returned to take up more passengers.

MEETING TO BE HELD

Revival of the Liberal party organization in the Clover Bar provincial constituency is the object of a meeting called to take place at Fort Saskatchewan at 2:30 p.m. on Tuesday, Oct. 16, in the Empress Theatre, according to an announcement by G. Y. Montgomery, convener of the gathering.

At the present time there is no Liberal organization in Clover Bar provincial constituency.

WINNER PARK PLUMS

Junior farm clubs in Alberta have reported their highest record this year, numbering 176 with over 2,500 members, a considerable increase over last year. Nine projects are listed, including wheat, oats, barley, alfalfa, potatoes, corn, beef and dairy calves, and swine. Over 60 fairs will be held by swine club members during the next few weeks.

Taken from the Files 19 Years Ago Today

Wednesday, Oct. 7th, 1914

Lights are being installed in the shooting rink where home defence volunteers will drill as soon as the grounds are in shape.

Wet weather has completely tied-up the threshing operations in this district.

About October 12th, telephonic communication will be established between Fort Saskatchewan and Pine Creek, Waugh and Waterton.

The road leading from Lamont to the beach at the lake in Elk Island Park is about half way completed. The work will be finished in the spring.

17,000 bushels of grain were taken in by the local elevators on October 1st. This is the largest quantity of grain ever handled in the Fort in a single day, an elevator man state.

HOMESTEADS FOR DRY AREA FARMERS

Through the provincial lands and mines department, a special area of homestead land in Northern Alberta, south-west of the Little Smoky River south of Peltier, along the Northern Alberta Railways, has been set aside for settlement by farmers from the drought areas in south-eastern Alberta. Special regulations have been prepared under which settlement of the new area will be carried out. The transfer of entries will be undertaken through the provincial department of agriculture.

Under the re-settlement policy, some 700 families have been, since public interest, removed from the dry area to various parts in Northern Alberta, and it is expected that the movement may total to 400 families.

Work To Start On New Park Again

During the excitement weather that we have been experiencing during the past week, work on the new Park has necessarily come to a standstill. Work on the River entrance however, is progressing and it is hoped to have up. Quite a number of people took advantage of the fine weather last Sunday, to take a walk through the park, and expressions as to its future usefulness were freely expressed.

The following further subscriptions to the fence post fund have been announced:

Mrs. D. Harper, Mrs. Hodgins (Lindyr Hodgins), Mr. G. T. Montgomery, Mrs. Ben Pollard, Sr., Messrs Albert Jacobs, P. Selinske, E. Wilmowski, Geo. Pepper, John Campbell, Mayor Montgomery, Rev. E. J. Hedgins, C. Elsner, Mrs. Alex Pocock, Ben Pollard, Sr.

We thank the subscribers. We still need a dollar or two more to complete the installation. Two bits left at Bill's Service station buys two posts.

EDMONTON POLICE COURT

Norman Goodman of Lodge was dismissed from a charge of [illegible] a meeting called to take place at Fort Saskatchewan at 2:30 p.m. on running a projection machine in a Fort Saskatchewan theatre where the movie projection room was not of regulation size. The crown withdrew the account, saying the room now conforms to law.

ANNUAL BUFFALO SLAUGTHER

The annual slaughter of buffalo at Wainwright Park will shortly be carried out, some 3,000 head to be killed. This is done as a measure of reducing the rapidly increasing herd, which has numbered 7,000 this summer.

Local News

A flock of about 15 wild turkeys has been observed in the hills 10 miles south of Rosbay. They were first seen four years ago, but no person has been able to get close enough to them for a shot.—Rosbay Record.

******

Unemployed harvesters were demanding $2.50 per day here Monday, consequently many farmers went to the city to fill their crews. The going wage seems to be $1.50 and $1.75 per day.

******

Additional Examination results in the Fort Saskatchewan High School. The following Fort students were successful in passing the number of units designated in the September Departmental Examinations:

Jewelle Butler	3	units.
John Devereux	1	"
Tve Henry	1	"
Jack Rogers	2	"
Ada Truby	1	"
Gladys Wilmowski	1	"

The name of Muriel Taylor was inadvertently omitted from the list of June examination results. We beg to remedy the confusion by stating that she passed 4 units out of 5 written.

Calgary Celebrates on Anniversary

Calgary celebrated during the past week a unique anniversary, that of the arrival of the first passenger train into the settlement 50 years ago, September 28, 1883.

THANKSGIVING DAY, OCT. 9

Public holidays are lengthening out some week-ends in 1923. Thanksgiving day is on Monday, October 8, Remembrance Day is on Saturday, November 11. Christmas Day is on Monday, December 25, and New Year's Day on Monday, January 1, 1924.

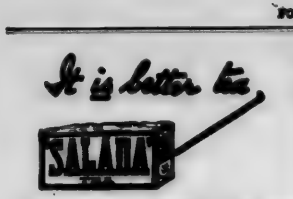
Jones, Graham & O'Brien's



Attacks On Hudson Bay Route

Some fairly strong language is indulged in by the Financial Post of Toronto in its opposition to the Hudson Bay Railway, and in support of a demand made by it that the route be abandoned. A recent attack by the Financial Post on this western outlet for western products may well be quoted. It says

"The colossal failure of that notorious contractor's racket, the Hudson Bay Railway, was timely demonstrated last year when the Government had to provide free storage in the Churchill elevator to induce any grain at all to move over the route.

"An equally forcible demonstration of the present uneconomic character of the route has been provided this year. The Government announced an intention of charging the regular tolls at the elevator, tolls which were the lowest of these imposed by Government order at any elevators throughout Canada. No grain was offered for shipment. Even the grain growing interests of Western Canada, who had for two generations advocated the opening of the Bay route in order to reduce their costs of shipping grain to Europe, refused to ship grain; they knew that the established routes via the Great Lakes and the Pacific Coast were more economical.

"Political pioneers were brought on the Government to repeat the antics of last year when a pretence of success of the route was made. It now finally decided to reduce storage rates at Port Churchill from the usual figure of almost one cent a month to the ridiculously low figure of one cent for the whole period from now to the end of August next. This had the effect of paying a cash bonus out of the Dominion treasury to those who would store grain at Churchill. Near the elevator has been filled up. On-to-the-Bay enthusiasts can declare that the route is a success. But the taxpayer is paying a heavy bill for this child's play. If Ottawa made the terms attractive enough there would be people willing to load grain in bags and canoes it down the Mackenzie River to the Arctic Ocean and then to fly it over the north pole to continental markets.

"The country would be infinitely better off and taxation could be reduced if the route were completely abandoned and the expensive attempts to lessen traffic to use it were abandoned.

"The Hudson Bay route is not a business enterprise but a hybrid of a white elephant and a political sacred cow. As such it has the 'protection' of political leaders of both parties, their eyes cocked to the western vote in the next election.

"But the huge losses and the charges for the booms to favored grain operators who have been paid to use the route are a big item in every tax payment made by every citizen."

The argument of the Financial Post is simply this,—that it would be better and cheaper to abandon the route, leave the elevator at Churchill empty, than to fill it up with grain on which only $30,000 in storage charges will be paid. How, it may be asked, is an empty elevator to cost the taxpayer less than a full one?

The Hudson Bay route is a new route. It is in its infancy, and it has been thrown open to traffic at a time of the greatest trade depression in the history of the world. It must, and will, be given a fair chance to prove itself.

How many scores of millions were poured out by the Government of Canada for years, and how many concessions were granted, to demonstrate to the shipping world the feasibility of an ocean port at Montreal, a thousand miles inland from the sea, and located on a river that is ice-bound half the year? How many more millions have been poured out to create a harbor at Toronto, and upon canals at Saults Ste. Marie, Welland, and along the St. Lawrence, in order that upper lakes shipping might get to Toronto and Montreal? The Financial Post does not object to these millions being spent to benefit the Eastern shipping route, but it yells like murder because a mere fraction of the same as expended is now spent on a purely Western route.

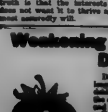
It was Government expenditure, for which Western people are taxed as well as the people of East, that made the port of Montreal and precisely business for Toronto. Had those expenditures not been made, and had the Government not turned down every route in their experimental stages, the development of today would have been realized.

Toronto's financial paper opposed the Hudson Bay route from its inception. The first line of attack was that necessary commercial arrangements for Hudson Bay and Straits was an impossibility. That theory was exploded, and the feasibility of the route established. Now, because of certain abnormal conditions which have resulted in a rate war on the Great Lakes, and the lowering of rates to such a point that it is cheaper, for the time being, to ship by that route than through Churchill, Toronto demands the abandonment of the Western route. Let it once be abandoned and the Great Lakes shipment will, with that competition removed, quickly advance their rates.

The last boat to leave Churchill, and it will be the tenth this season, will carry a cargo consisting of some hundreds of thousands of bushels of wheat, hundreds of head of Western cattle, 20 tons of Saskatchewan honey, four carloads containing 150,000 feet of Saskatchewan spruce lumber. This will be the first time Saskatchewan honey has been shipped to England by any route, and the first time either honey or cattle have gone east via Churchill. All of which goes to prove the statement that the route is only in its infancy.

The Financial Post has always professed to believe in Government protection for national industries. Let it be fair now and give this heroic Western infant a chance to live, and given that it will thrive and grow. Possibly the truth is that the interests which the Toronto financial paper represents does not want it to thrive and grow. Our prediction is, nevertheless, that it most assuredly will.

Weakening Diarrhoea Dangerous Dysentery



Diarrhoea and Dysentery do not need to run for any length of time, and the whole system is rendered weak and debilitated. For other diseases as fatally undermine the strength and bring about a condition of prostration and utter collapse.

Dr. Fowler's Extract of Wild Strawberry is not only prompt and effective in checking the looseness of the bowels, but at the same time it strengthens, cleanses and invigorates the system.

Never be without a bottle of Dr. Fowler's. Always be prepared in case of sickness.

Three-Year Search Rewarded

Mitts Of Cable Line Have Been Recovered From Ocean Floor

Its peg-leg iron crashed with rust and moss, a little grey ship steamed quietly into the mother of Halifax harbor and docked alongside the Western Union Cable Company pier. There was no open welcome for ship or crew, though they had just returned from a great victory over the elements and completed a task started three years ago.

But down in the deep hold of the cable ship "Lord Kelvin" was fathoms of mutilated and corroded cable that bore evidence of the long search for a disrupted communication line.

Month after month the "Lord Kelvin" had wallowed in the Atlantic as her crew grappled along the ocean bottom for the line, torn from its bed by the monstrous tidal waves that swept the southern coast of Newfoundland are the winter of 1929. The "Lord Kelvin" had completed the search, begun the previous spring.

"It was just another "job" for the crew and the master of the "Lord Kelvin," Capt. M. H. Bloomer—spelt—lightly of it. He was more anxious to talk of the scientific aspect of the search. The cable recovered more than three miles of the original course, was located only after 20 attempts over a distance of some 60 miles, from 10 miles of cable, however, was recovered.

Captain Bloomer said that during a recognize like the one that shook the Newfoundland coast, the earth tremors were very rapid, causing excessive disturbance in the cable, and frequent increased tension on a cable. Often, too, cables were buried during such eruptions and usual; but, as Captain Bloomer with other times the heavy line would be carried from its bed, sometimes for miles.

Much of the recovered line, he said, was useless, for it was badly torn and filled with small stones and grit that had severed the wires.

Inventor's Grave Marked

Mentioned In Cyclopedia Who Evolved Process Of Kerosene

An inconspicuous sunken grave in Camp Hill cemetery at Halifax, Nova Scotia, has been marked by one of the large oil companies to show the final resting place of Abraham Gesner, M.D., D.P.C.S., who gave to America kerosene for a lighting fuel. The grave of Dr. Gesner has been engraved by a tall black granite monument, "erected as a token of appreciation of his important contribution to the oil industry."

Briefly, the inscription on the stone tells of Dr. Gesner's work. It reads:

"Abraham Gesner, M.D., D.P.C.S. "Geologist.

"Born at Cornwallis, Nova Scotia, May 2, 1797.

"Died at Halifax, April 20, 1864.

"His treatise on the Geology and Mineralogy of Nova Scotia, 1836, was one of the earliest works dealing with those subjects in this province, and about 1853 he was American inventor of the process of kerosene."

Excursions Were Popular

English Schoolboys Travelled Far Afield During Summer

Excursions for public schoolboys of the United Kingdom to far-off places during the summer were very popular. These included a tour of 11 schoolboys to the Maritime Provinces of Canada, Newfoundland and the coast of Labrador, with J. Guise, a schoolmaster at Winchester, in charge, and an exploration party of 30 to the Arctic Circle, with Commander C. Murray Levick, R.N., a member of Scott's last Antarctic expedition, in charge. In the lonely wastes of Finnish Lapland these 30 schoolboys split up under three leaders and penetrated uncharted wastes with only the compass and the Arctic lights to guide them.

Survivor Of Lucknow

Oldest living survivor of the siege of Lucknow, Charles George Palmer of Duncan, B.C., was still hale and hearty on his 95th birthday, Sept. 24. Mr. Palmer was not quite 10 years old when the siege, the historic incident in the Indian mutiny, occurred in September, 1857. Only eight other survivors of the siege are alive.

Fresh vegetables kept in warm temperatures lose more of their provitamin than vegetables kept in a cool place.

Highway Motor Accidents

Everything Considered It Is Surprising There Are Not more

One is appalled by the neverending succession of motor accidents on the highways these week ends. But is it really surprising? From our observation of the traffic, the remarkable thing is that there are not more mishaps.

Take a drive along any public highway after dark and as you turn out to avoid a passing car you see the forms of pedestrians walking as far out of the dark pavement as they dare, as if to proclaim their right to a place on the pavement. An admirable precaution in a way but fearfully dangerous. Another equally fearful for the Suicide Club is the bicyclist riding along the busy highway in the dark. One has to be keen-visioned to avoid these gentry, of whom there are many. Then there are the cars with one light and the cars without all lights. Even worse still the bag goes without lights. They take big chances. Even should their occupants come through an accident with a whole skin, they would be legally responsible for the well-being of those they crash with.

It appears that there must be much preaching and teaching and public warning before people will take even a moderate degree of caution. Leading to the future, if we did even as if something should be done in the schools to train the approaching generation in the need of caution on the highways. Would it not be well for the Department to require school children to familiarize themselves with a code of rules for safety? The day-to-day accident list surely challenges the authorities to take every possible step to curb its fatal progress. St. Mary's Journal-Argus.

A Chinese Methuselah

Li Ching Yun Who Died Recently Claimed To Be 256 Years Old

Amazing longevity was attributed to a Chinese who has just died at Kiuh Shan, where he was born in 1677, two hundred and fifty-six years ago. The deceased Methuselah, who was called Li Ching Yen, had a number of wives the last of whom predeceased him a century ago, and seventy grandchildren. His youngest great grandson is now seventy years old. Chinese tradition seems to confirm the dead man's age as being 256. Li could only account for his longevity by the fact that on one of his youthful trips to the mountains to search for herbs he found and ate a rare plant which he believed gave him long life.

STOMACH ACID BURNS LIKE FIRE

Sometimes stomach acid makes your stomach feel like a lake of fire. You can stop this quickly and get immediate relief from burning pain, sour acid stomach and indigestion with a spoonful of Sheerwiet Magnesia in half a glass of water. Any drug store has Sheerwiet and just one spoonful will prove how quickly it works.

Reception Almost Too Perfect

Modern Radio Astonished Thief By Broadcasting His Description

A startling coincidence had amusing consequences. A man walked in to a Charlotte, North Carolina, radio store, carrying a radio which was fitted with a short wave adapter, under his arm. He seemed to call it. He put the set down and started to "tune it up" to give the radio dealer an idea of its splendid reception. The reception was perfect—so perfect, in fact, that the man caught his breath, dashed out to the street and has not been seen since. For the broadcast was a police description of the receiving set which had been stolen only a short time before. Within a few minutes the radio was returned to the owner.

Moose Seen Farther North

Strange phenomena observed by frontiersmen along the sub-Arctic and Yukon Valley in the ground-spreading north of moose herds. The animals have been seen far north in the caribou country. Within the past ten years the rabbits have practically disappeared from many regions south of the Yukon, and it is the belief that the moose have found the area more suitable to browsing since the rabbits disappeared.

The 19th roll is just as satisfying as the first, if you roll with Ogden's Fine Cut.

For Ogden's is always mild, cool, fragrant... the kind of tobacco that heads you straight down the fairway to real smoking enjoyment.

P.S.—Be sure to use "Chantecler" cigarette papers. There is no finer combination than Ogden's and Chantecler for any man who rolls his own.

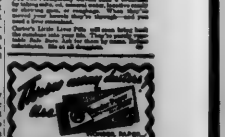
Stressed Safety First

English Town Staged Program At Warning Against Accidents

If dramatizing safety first has the effects hoped for, Reigate will be the safest town in England. Adopting as its slogan, "Make safety pay every day," the town staged an elaborate programme. A salient feature was the staging of mock accidents at the sharpest curves and steepest hills. Overturned and smashed-up cars, decorated with warning notices, acted as grim warnings. Every prominent building exhibited banners carrying a red triangle and cautionary notices. In a public square there was a demonstration of automatic signalling. One evening was devoted to first aid of "victims."

OFF COLOUR? HOW IS YOUR LIVER?
Wake up your Liver Bile —Without Calomel

Your Bowels a very small essay, but it can totally ruin your good disposition and digestion. Ninety per cent of your indigestion is caused by your liver not working properly. Your liver should pour out two pounds of liquid bile into your bowels. You don't consciously succeed such a condition by taking salts, oil, mineral water, laxative candy or chewing gum. Your bowels need a liver stimulant. Dr. Chase's Liver Pills will soon bring back the necessary bile flow. They're purely vegetable. Ask for them by name. Don't accept substitution. Use as all druggists.



FORT SASKATCHEWAN RECORD

G. Neale, Editor and Publisher
WEDNESDAY, SEPT. 9th, 1931

LOCAL NEWS

Alterations have been completed during the past week on the projection room of the Empress Theatre by Geo. Cranston. The room now is of regulation size.

The Women's Institute wish to thank those who by their generosity and thoughtfulness helped to make the Bazaar-Tea a success.

Kenneth McLean, and his son William McLean, will hang at dawn Friday, at the provincial gaol for the murder of Watson J. Parsitte, near Manyville, Alberta.

Telegrams have been sent to the minister of justice by the Edmonton ministerial association and Magistrate Emily Murphy on Tuesday, asking reconsideration of the cabinet decision and mercy for the boy, William.

Hangman Arthur Ellis, arrived in the Fort on Tuesday in preparation for the execution.

Mrs. W. Anderson and family left for Edmonton last week, where they will reside in future. Mr. Anderson will continue to stay here. He is the National Elevator agent at this point.

The teachers of the public school here will attend the eleventh annual teachers convention of the Lamont Inspectorate in the McDougall church, Edmonton, Thursday and Friday of this week.

One of the discussions of the Convention will be the annual school festival and there are very good reasons to believe that the festival will be held in Fort Saskatchewan if suitable arrangements can be made.

LETTER TO EDITOR

The Editor,
Fort Saskatchewan Record.
Dear Sir:

Would you please print this notice in your valuable paper. We believe some people in your district have a surplus of vegetables and perhaps might help by donating some to our hospital, if you will print this we will be very grateful.

The Hospital Aid are holding their Donation Day in Lamont United Church on Saturday, Oct. 7th. If any person cares to help the hospital by donating vegetables of any kind, fruit or canned goods (preserves, jellies or pickles) they will be very grateful received. If unable to bring the vegetables on Oct. 7th, a later date will do as well. Ladies of the Hospital will serve tea during Saturday afternoon.

Thanking you in anticipation, I am,
Yours Truly,
Mrs. McLeod.

A Complete Printing Service at Your Door

OUR PLANT is equipped to meet adequately the Job Printing requirements of the Community we seek to serve. When in need of anything in Job Printing--from a Calling Card to a Booklet--give us a call.

All orders receive our personal attention and will be filled in a manner that will give satisfaction.

The Fort Record

Husky and Happy—Oh Boy!

Forty-eight happy boys and 2 girls of the Royal York Husky, Toronto. They are the family winners of the Silver Tulip Contest sponsored by Crosse and Blackwell, well-known manufacturers of food products, and their reward was a holiday visit in the Canadian National Exhibition.

They all travelled Canadian Pacific and the Royal York Hotel was their home for two full days. There was much entertaining in the various rooms occupied by the youngsters. The contents of a large number of bottles of pop were consumed. Meals were swept over plate heads and the

boys were admitted before entries were made in the dining rooms, and there was much jolly chatter over meals. Thorough tours were made of the big exhibition and for a long time to come these boys and girls will have happy memories of the two exciting and hilarious days.

WORLD HAPPENINGS BRIEFLY TOLD

Report of Canadian cattle to the United Kingdom during the year 1933 until total 68,000 head compared with 97,358 head exported last year.

Alberta government received through the gasoline tax on beer $440,194 from Alberta Hotel Association in 1933, according to Charles Trumbower, president.

Advantages of University of Alberta farm radio programs will be extended to farm communities throughout central and southern Alberta this winter.

The Dominion Bureau of Statistics estimates that 568,000 Canadians have been reinstated in employment since April 1. In the months of August, 31,000 left the army of the unemployed for gainful occupation.

One of the world's largest diamonds, a stone of 969 grents or more than 2,000 carats, was reported recently to have been found in a diamond mine in Minas Gernes province. Its value was placed at $750,000.

The post office department of the British Government has a surplus of about $53,000,000—the largest in its history. A White Paper has been published. This huge figure and other financial details for the year 1933-34.

Successful tests with a new type of electrical rail car, running on rail bearings instead of wheels and capable of making 150 miles an hour, have been announced at Moscow. The trains run in a single shallow trough on the rail.

Business is 35 per cent. better in Western Canada, J. H. Lennon, Winnipeg cattle exporter and former member of the Manitoba legislature, declared on his arrival at Montreal to support of western cattle in Great Britain.

William Roy Greenslade, 16-year-old youth of Moss Lynn, about 140 miles northwest of Calgary, has been nominated by the Canadian government for training in the Royal Air Force school at Baldon, Buckinghamshire, England.

After seven years spent at the heart of the empire, Hugh H. Baker, Alberta representative in London, England, has returned to Edmonton, Baker was heralded on the closing of the Alberta office overseas. He will continue with the inside service of the department in Edmonton.

Waiting For Invitation

Lady Viking Keeping Ex-Kaiser Amply From Berlin

The ex-kaiser, now at Doorn, is ready to return to Berlin when his former residence and fur bills are made this statement to the Rev. L. Hugh Verne of an English church in London.

The Rev. Mr. Thomas is an old friend. He has returned from a short visit to Doorn, where he was the guest of the ex-kaiser and baker. He says that the ex-kaiser has no more use for the Jews. Before the war, he was kind to the bakers. Without them he was uniformly toward them. But during the war they behaved so badly that her husband has not a good word to say for them.

London's Third Penthouse

First penthouse in London is to be erected on top of a new apartment which will stand on fashionable Park Lane. The new penthouse, which will have two storeys, will be reserved for Lord and Lady Louis Mountbatten and their family.

Air Ambulances For England

Scheme Of British Red Cross Society Has Been Approved

A scheme for air ambulance detachments has been prepared by the British Red Cross Society and it having been approved by the air ministry arrangements have been made by the society for recruiting.

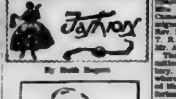
Detachments have already been formed by the Surrey and East Lancashire branches of the society both of which owns aeroplanes, and others are being enrolled. Every member will be trained to give first aid, and more particularly to load stretcher cases into and out of aeroplanes.

Work Remembering

Swedish Warned People Against Seeking Big Pay Assignments

What the great outline had post Ruskin once wrote about assessment is well worth remembering: "Never seek for assessment, but be always ready to be assured The least thing one plays in it, the slightest event will, when your hands are busy and your heart is free. But if you make the aim of your life assessment, the day will come when all the absurdities of a pantomime will not bring you an honest laugh."

Winnipeg Newspaper Union



By Ruth Bagnall

IT TAKES A WOMAN TO KNOW HOW FLATTERING AND CHIC A SIMPLE DRESS CAN BE

With all the rachet of an expensive model is this adorable dress, yet it's quite within your means.

For the master dress, cola spots, bright red on light navy blue was used for the sleeves and the neck line. The dress itself was light navy blue crinkly crepe silk.

The clever cut of the bodice and the tie ends at the waistline are flattering. The skirt is slimming too with its panel effect.

Style No. 780 is designed in sizes 16, 18, 20 years, 34, 36, 38, 40, 42 and 44 inches bust.

Any silk or wool fabric or even material is equally lovely as to crepe, satin or in a crepe silk print.

Size 16 requires 3¼ yards of 39-inch material with 1¼ yards of 35-inch contrasting and ½ yard of 39-inch lining.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

SAVED IMPORTED DRESS

"After a little wearing, a lovely green voile—an imported dress—lost color so completely that it was not wearable. A friend who had admired it, asked me why I wasn't wearing it any more. On hearing the reason she advised dyeing it and recommended Diamond Dyes. To make a long story short it turned out beautifully. I have a lovely new dress really good for the price of one package of Diamond Dyes."

"I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a fail ure with Diamond Dyes. They never to be made as they say to on models and results. They have spot streak or run, and friends never know the things I dye with Diamond Dyes are redyed at all."

Mrs. R.F. Quebec

Saskatchewan Relief

Voluntary Relief Committee Organized And For Present Season

The Saskatchewan Voluntary Rural Relief Committee is organized in operation in a very active way and expect to receive large contributions of fruits, vegetables, grain checks clothing and money to distribute to the unfortunate citizens in the dried out areas.

The personnel of the Committee which is non-denominational and non-political, is the same as last year and consists of the following: W. W. Hamilton, Regina; Mrs. H. Hamilton; J. R. Fawcett; Mrs. W. Robertson; Mrs. J. Maitland; Mgr. Seipinger Jansson; Rev. W. H. Adcock; Rev. Dr. Bryce; Rev. D. Pritz; Mr. T. R. Moffett; Mr. W. F. Marshall; Mr. Arthur Wood.

The first week in October was set aside as "Contribution Week." As high as that within the light by next Thanksgiving Day, it was hoped that the response to the appeals for voluntary contributions would be so great that a carload would result in a real Thanksgiving for the unfortunate in our Province.

Local committees in addition to large contributions of vegetables, grain checks, clothing, seed, etc., from any province the Committee was fortunate in securing, have been formed from British Columbia and Ontario and requests for aid have been received throughout province from friends or kindred organizations in charge of the two provinces mentioned, from whom contributions might be expected. Similarly, the names of the Committee so that they may be communicated with immediately.

The cash contributions received have been used for the purpose of buying wool and flannel and these materials were made into garments by women in organized districts in the order areas and distributed by the Committee among the needy residents.

The transportation companies are to be commended on the very important part they are taking in their generous response to appeals among the citizens in the relief areas as they have again granted free freight privileges, that is for transportation on all canned, dried and fresh fruits and vegetables in Ontario and for all used clothing in less than carload lots from Saskatchewan to Saskatchewan in the relief area. The company concerned, Canadian Pacific, Canadian Northern, Canadian Pacific Steamships, Ltd., and Canadian Pacific Express Company, have also generously extended the privilege to bedding or material of any point.

West Prince Presbytery

Investigation Of Charges Made In Presbyterian Church

"A thorough investigation and report by an independent and responsible committee of all our pastoral and missionary institutions, including the Council for Social Service of the Church of England in Canada.

The resolution, moved by Right Rev. J. A. Richardson, Bishop of Ottawa, was in the order of all such institutions "whether Dominion, provincial or local, and of the entire system of dealing with delinquents and criminals.

Youth (to fair companion)—"Have you ever tried listening to a play with your eyes shut?"

Youth (from rear behind)—"Have you tried listening to one with your mouth shut?"

SUNDAY SCHOOL LESSON

OCTOBER 7

SAUL IN DAMASCUS

Golden Text "Wherefore if any man be in Christ, he is a new creature: the old things are passed away, behold all things are become new." 2 Corinthians 5:17

Lesson Acts 9:1-31
Devotional Reading: 2 Corinthians 5:14-21

Explanations and Comments

Saul's Purpose In Going To Damascus. verses 1, 2. Saul went to the high priest ("a Pharisee makes request of a Sadducee") and asked letters to the synagogue at Damascus authorizing him to bring back to Jerusalem all followers of Christ (of the Way) whether men or women. Whom he found there The Roman Emperors, Julius Caesar and Augustus had granted the high priest judicial rule over Jews in foreign cities There were many Jews in Damascus 10 000 were butchered by Nero Christ and to them persecuted followers of Christ had fled for refuge. "The Way," "those of the Way" may have originated among the Jews who saw in the followers of Jesus those who adopted a special way or mode of life or a special form of their own national belief, but if so, the Christians would call it "manner" [name] in order to in Christ they had found the Way the Truth, the Life" Henry Alford points the situation in a striking way: "In the pride of his Pharisaic heart Paul strikes out the idea to remove the maxim of the Christian Leader of the hated sect, and go into all the world and suppress the gospel by every means."

What Happened To Saul On The Way. verses 3-9.—Armed with the commission Paul started for Damascus. Paul's conscience was vivid and he felt to the ground. David Smith recalls in this connection the terrific thunder storm which overtook Martin Luther in the Thuringian Forest and Luther's dedicating himself to God's purpose at the moment when a bolt of lightning killed his friend beside him. In 1 Corinthians 9:1, Paul says that within the light he saw Jesus Himself, in His risen, glorified body. To him the Risen Christ could say he came to the eleven apostles during the forty days after the resurrection: this was the ground on which he claimed equal authority with the other apostles. see 1 Corinthians 15: 8; 2 Corinthians 12:6; Galatians 2:8, 9; Acts 22:21.

What sort of vision was it? "The answer to the question has no existence for faith. Faith knows that what appeared, happened in any case as Came God chose to work it thereby. Saul knew Paul really Jesus in the light; or whether it was merely a visionary sight."

Voice and answer followed. "Saul, Saul, why persecutest thou Me?" "Who art Thou, Lord?" "I am Jesus whom thou persecutest."

A Powerful Influence

Canadian Institute Of International Affairs Issues Good Work

"We can render no more excellent service than to promote these two great institutions—the League of Commonwealth and the League of Nations," said Hon. Newton W. Rowell in closing the first British Commonwealth Relations Conference at Toronto.

Mr. Rowell rushed the personal influence formed and the frank statements made on their various points of view as among the gatherings most valuable results. It was wise, he thought, that such a conference be unofficial.

"We have no constitution and we do not want one," said Sir Herbert Samuel in moving a vote of thanks to those responsible for the conduct of the conference. He had a special word of commendation for the Canadian Affairs, which he said was rapidly becoming a powerful influence.

A Fair Exchange

Brown leaned over the garden fence. "I say, old fellow," he said to his neighbor. "I understand that you have Thompson's new ruler."

The neighbor nodded.

"Good," said Brown. "If you'll let me borrow that occasionally, I'll let you use Jones' roller whenever you need it."

Having many unique features, a clock built by Daniel Quare, inventor of the repeating watch, was sold recently in London, England, for $1,350.

CRAWLING ABOUT WITH LUMBAGO

Here is some useful information for anyone troubled with that unconfortable complaint, lumbago—A reader writes

For years I suffered from lumbago During one winter I could only turn in bed with great effort and pain. I was so stiff and ached so much That years ago I had both lumbago and sciatica and crawled about for a fortnight, feeling very sorry for myself and looking 100 instead of 33 (how one said. Try Kruschen Salts,' so I ate some Kruschen every morning with my tea and from that I hardly ever got a bout of lumbago these days.—Mrs. H. (P.C.

Why is that Kruschen is so effective in keeping lumbago at bay? Simply because it gives right down to the root of the trouble and removes the cause which is an impure blood stream The six salts in Kruschen keep the bloodstream pure and vigorous by promoting a clockwork regularity of all the organs of elimination.

May Solve Egyptian Mystery

Young English Explorer Seeking For Origin Of Nubian Kings

A young explorer has left Britain for Egypt on a quest which, if it fails, will leave one of the great mysteries of history unsolved for years to come.

Walter Emery, of Kimberley Drive, Great Crosby, near Liverpool, is the explorer and his task takes him by the mighty tombs of a mystery race of warrior kings who dominated the Nubian Valley in the days of Alexander the Great.

The most famous archaeologists in the world have had the same task in mind, but Emery, who is acting for the Egyptian Government, has only three months in which to solve the problem.

At the end of that time the tombs will be submerged for ever at the bottom of a gigantic reservoir which forms part of the completed Assouan Dam scheme.

Mr Emery said to a London newspaper representative:

"The most baffling thing is that no writings relating to these kings have yet been found.

"I could find some writings in the tombs I am going to open it would give a real clue as to the origin of these people."

Appeals To Canadian People

Governor-General Asks Co-Operation To Solve Economic Problems

An appeal to private philanthropy to sustain the efficiency of Canadians social services in the period, 13 months to come, was issued by the Earl of Bessborough, Governor-General of Canada.

"When war, shipwreck, fire, earthquake—when such overwhelming disasters of nature threaten man, then their very evidence calls forth courage and daring," his excellency declared. "But the insidious creeping force of economic insecurity has a fatal tendency to undermine those very qualities, so necessary to the strength of a great nation.

"Men become, as the Prince of Wales himself has said, 'sick at heart' from prolonged idleness; and the only remedy, he has reminded us, is that each and all of us should 'get together wherever the burden lies heaviest, face the most urgent local need, and see if the community on the spot cannot make its own self-directed contribution' to a problem so vast, and so urgent. That, on its solution, the very future of Canada may be said to depend."

Sounds Like Good Idea

Punishment For Careless Drivers Suggested By Small Editor

Jim Currie, editor of the Sault Daily Star, proposes a new brand of "red" law. His suggestion is to compel every motorist who is convicted of careless driving to display a red card for 30 days on his car, thus informing the public that he is a bad driver and open to the scorn of everyone. "This," says the Toronto Labor Leader, "is a dandy suggestion and would be a fitting punishment to the guilty one. 'Jim' does not state how big the badge should be. We will help out by suggesting that it be at least one foot square. Lethbridge Herald.

Because of cheap wages hand labor is again taking the place of machinery on farms in Guatemala.

DOLLFUSS IS APPLAUDED AT LEAGUE MEETING

Geneva, Switzerland Highlight of the 94th meeting of the League of Nations assembly came when the short, brisk figure of Engelbert Dollfuss, Austria's pocket-size chancellor who has been waging a heroic battle against Nazidom, stepped quietly to the rostrum and appealed for support to be greeted with deafening applause from the international assemblage.

Earlier, Chancellor brought Hon. R. J. Manion, Minister of Railways and Canals, pleaded for leadership towards disarmament and world peace, and coupled this with a declaration that the private manufacture of armaments for profit should be abolished. Sir John Simon, British Foreign Secretary, also addressed the assembly, declaring a disarmament convention was the greatest need of the world today.

But keenest interest was aroused when Dollfuss appeared. In the tyrant, the German delegates seated in the front row remained stonily silent

Chancellor Dollfuss, who has had to fight for his life against Nazi attempts to take his independence.

"After the Austrian struggle for her existence," Dollfuss insisted, "Austria today asserts more than ever before her freedom and independence not as much in the virtue of formal treaties as essentially through the free will of her people."

Austria is counted on the friendly cooperation of other powers, the chancellor said. She appealed to the League to co-operate with her in every direction by its high moral authority

Here some cheers broke out as he concluded his speech.

Except for the Austrian interlude all thought turned to disarmament. The need for positive action rang through the speech of Sir John Simon, who opened general debate. Dr. Manion, speaking for the application of the Kellogg peace pact and the outlawry of war. The disarmament convention that have been proceeding for some time are continued by meetings between the Italians and the French and British, as the statesmen seek common agreement promising results when the disarmament conference reassembles next month. The league council will meet but the assembly will not sit.

Sir John Simon said a prompt disarmament agreement was a vital necessity for world political and economic recovery.

"A disarmament convention based on concession and co-operation is the greatest need of the world," he declared, adding he detected certain signs of a beginning in economic recovery, but such a recovery could not make strides without political amelioration.

Organized Canadian Nurses' Association

"Mother Of Nursing In Canada" Dies In Toronto Hospital

Toronto, Ont.—"The Mother of Nursing in Canada," Mary Agnes Snively, first superintendent of the Toronto General Hospital and of the Nurses' Training school there, died in the private pavilion of the hospital which she loved.

She left home for New York in 1862 and entered the Bellevue Hospital Training school, pioneer school on this continent, established in 1873. She organized the Canadian National Association of Trained Nurse-, now known as the Canadian Nurses' Association.

Supplies For North

Edmonton, Alberta.—Col. H. G. Reid, superintendent, Hudson's Bay company transport department, Winnipeg, is in the city following a voyage to Aklavik to supervise on foreign dispatch of duplicate consignment of supplies to the company's posts in the western Arctic.

School For Stolen Fruit

Sudbury, Ont. A state-craft school was advocated by Mr. Justice Maclean A. Macdonald, of the British Columbia court of appeal, in an address to a service club here recently.

B.C. Election Campaign

Premier Tolmie Makes Appeal To Get Aside Party Politics

Victoria, B.C.—Premier S. F. Tolmie of British Columbia launched his government's election campaign at Saanichton in an address in which he reiterated his appeal to men and women of character and ability who will set aside party politics to unite to solve the problems of the day.

A united government is necessitated in his opinion, would organize the system and propose that service shall be rendered for relief granted and co-ordination with labor and industry conduct a survey to find and develop every means of creating em- Efficient utilization of work and business. Relief of labor is among the questions considered.

He would ask federal co-operation to obtain legislative order by marketing of primary products such co-operation was necessary because provincial laws in British Columbia to that end had been declared ultra vires He would urge the Dominion to appoint a royal commission to inquire into the question of trade between British Columbia than those under which the provinces entered Confederation. Necessary laws are also the as those given other provinces

Canadians Appointed

Will Act On Five Main Committees Of League Assembly

Geneva, Switzerland.—Canadians were appointed to five of the main committees as the League of Nations assembly meeting, just opened completed its organization work.

Dr. W. A. Riddell permanent Canadian representative at Geneva, was appointed chairman of the budget committee and vice-president of the social committee Hon. Philippe Roy Canadian minister to Paris, is a member of the budgetary and agenda committees. Hon. Dr. R. J. Manion, Minister of Railways and Canals and head of the Canadian delegation to the assembly, was appointed to the legal and political committee

Returns With Full Cargo

S.S. Brandon Making Second Trip From Churchill To England

Churchill, Man.—After riding out a storm, which forced her back to sea, when she was within 35 miles of Churchill, the S.S. Brandon docked on her second journey of the season to this northern port. She steamed out of the government pier at 6:30 p.m. on Sept. 26.

The Brandon returned to the Bay Saturday night with a cargo of 330,000 bushels of wheat; 300 head of cattle, the first shipment of livestock from Churchill, a shipment of lumber, and a number of Manitoba honey for overseas buyers.

Increase In Acreage

Reported To Be Worry To Ranchers In Southern Alberta

Lethbridge, Alberta. Ranchers in southeastern Alberta and the adjoining country are worried over the marked increase in the number of antelope reported to be roaming between the Cowtia branch of the Canadian Pacific Railway and the Cypress Hills.

Reports say as far as the graceful little animals are reported on single ranches. It is only a few years since the Dominion Government established a game park at Waterton Lakes, fearing the antelope, like the buffalo, were in danger of being wiped out entirely.

Protest Smoke Nuisance

Victoria, B.C.—The ruling as announced from Ottawa that United States tourists with radio receiving sets in their cars must pay the usual $2 fee unless licenses was protested here at a meeting of the Victoria Chamber of Commerce. Victoria and Vancouver island publicity bureaus and other bodies.

Manitoba Session In Summary

Winnipeg, Man.—The next session of the Manitoba legislature will be held toward the end of January, it was learned following a caucus of government members here.

Germany has cancelled that part of its recent decree providing that an employer who hired additional workers would be entitled to pay lower wages and salaries.

Praises H.B. Route

Col. James Arrives In France After Trip Described As Safe Way To Europe

Winnipeg, Man. Enthusiastic support of the Hudson Bay route for the exporting of western Canada's products to the markets of Europe is expressed by Col. F. J. James, of Regina, vice-president for Saskatchewan of the On-to-the-Bay Association, who has arrived at Marseilles, France, aboard the grain carrier S.S. Pennyworth.

In a communication by General R. W. Paterson, president of the On-to-the-Bay Association, Col James said:

"Had a wonderful trip, especially through the Bay and Hudson Straits the safe way to Europe. Wheat in splendid shape."

Nineteen days out of Churchill, with a cargo of prairie wheat, the "Pennyworth" reached the French port Sept. 14, and later went to Genoa, Italy, where the grain was also loaded. The ship now is returning to Newcastle, England, her home port.

Declare Sunday Work

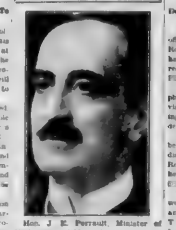
Alberta Lord's Day Alliance To Make Protest

Edmonton, Alberta.—Sunday operation of grain elevators, claimed to be an unnecessary form of Sunday labor, will be protested by the Lord's Day Alliance of Alberta stated by Rev. G. G. Webber, western secretary of that organization, who is now in the city. The Alliance is pointed out, does not take exception to emergency harvesting operations on Sunday when necessitated by weather conditions, and no fact more there have been but few complaints this season; but the operation of elevators on Sunday is not considered as coming under that head.

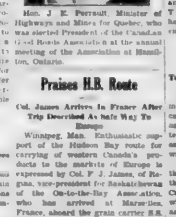
"There has been no marked indication of Sunday threshing this year," says Mr Webber.

Canadian-Produced Radium

Toronto, Ont. The second shipment of Canadian-produced radium, consisting of 25 needles, each two milligrams, was delivered to the Ontario government for use in provincial hospitals.



Hon. J. E. Perrault, Minister of Highways and Mines for Quebec, who was elected President of the Canadian Good Roads Association at the annual meeting of the Association at Hamilton, Ontario.



Dr. F. G. Banting (left), Canadian Professor of Medical Research at the University of Toronto, who leaves Canada shortly to attend the Cancer Congress to be held in Madrid. Dr. J. G. Fitzgerald (right), Dean of the Faculty of Medicine, University of Toronto, who leaves Toronto on October 15 to attend the meetings of the International Health Board in Geneva.

READS GOOD BOOKS

PROMINENT MEDICAL LEADERS ATTEND CONFERENCES

To Discuss War Debts

Delegation From Britain Safe For United States

Southampton, Eng.—Three British officials including Sir Frederick Leith-Ross, government economic adviser, have sailed for the United States, ready to discuss war debts with President Roosevelt.

Sir Frederick, while saying his plans were indefinite, declared he was visiting America "to observe the feeling toward the question of the war debts."

And I expect," he added, "I shall be presented with an opportunity of discussing the position with President Roosevelt Although for the moment he is busy personally engaged with international questions."

The other members of the party were Sir Ronald Lindsay, British ambassador to the United States, and T. K Bewley treasury official who has been attached to the Washington embassy.

Prefer Marriage

Test in Britain Would Show That Chevvied Women Are Married

London, Eng. The brainiest women prefer marriage is the only logical conclusion to be drawn from this announcement that of 12 women entering the examination for the highest class in the civil service, not one was successful.

This examination is the stiffest in the civil service, but it is no harder than the Oxford final schools or the Cambridge trigos examinations, where women prove proportionately as successful as men.

But here's the sticker. Candidates for the civil service examination must be either unmarried or widows, and they are required to resign any appointment on marriage. Apparently these stipulations halted the women cleverest at examinations.

British Aviators Killed

Two Burned To Death When "Puma" Were Wrecked

London, Eng.—Two Royal Air Force "pumas" crashed as they were returning from the manoeuvres of the home fleet off Scotland and two men were burned to death. A third plane was missing and six others were forced down by thick weather

The two men killed crashed at Birtley, Northumberland, in the bomber. Crew of the second "puma, which was wrecked at Sunderland, escaped. None of the ships forced down was damaged.

Death of the two men almost the first fatalities in the air force this year.

Leaving Dried-Out Areas

Settlers In Alberta Take Advantage Of Free Movement Scheme

Edmonton, Alberta. Settlers are continuing to move from the dried-out areas, and new applicant ons are being received in large numbers at the government relief offices. To date somewhat over 300 families have actually been moved, and it is believed that before the original estimate of 300 families during the season will be reached nearly exceeded. By the end of October, when the free-movement scheme will terminate, the total may have reached, it is thought, the figure of 500.

NEW RULING IS MADE REGARDING U. S. HOOK-UPS

Montreal, Quebec.—Canadian radio stations are forbidden to establish a permanent hook up with United States broadcasting systems as an announcement of policy made here by Hector Charlesworth, chairman of the Canadian radio broadcasting commission.

Mr Charlesworth said this was the policy of the commission "now and in the future."

Reports were that a Montreal station had been negotiating an agreement by which the programs of one American chain would be carried to the exclusion of all other material, but Mr Charlesworth made no specific reference to this case.

French language programs would be made more frequent in the province of Quebec, he said, without the Dominion, the chairman said.

We are not originating any commercial programs ourselves yet," Mr. Charlesworth replied to a question. "Proposals, however, are now being discussed which will lead to a new policy altogether, though it is premature to discuss them yet.

"It is desirous to see a national broadcasting restored on terms reasonable to the advertisers, which will be beneficial also to the newspapers. Arrangements have been made to have broadcasts from New York of the New York Philharmonic Orchestra including the whole of the December 16 season in. These will start very shortly.

Hundreds Are Made Homeless In Earthquake

Nineteen Killed And Many Injured In Italian Disaster

Rome, Italy. Latest reports showed 19 persons killed, approximately 1,000 left and hundreds made homeless in the earthquake which rocked the Abruzzi mountain region.

Two thousand, still terrified at night, slept in open fields, budding about huge bonfires to protect themselves from the chilly autumn temperature.

Soldiers and Fascist militiamen erected villages of tents. The hospitals in the area were overtaxed with the injured.

Despatches from the Ligurian coastal town of Savonna said a tidal wave swept the city destroying a slight quake in the inland region.

Age Limit For Architects

Any Over 35 Years Are Too Old To Compete

London, Eng. The government has decided architects more than 35 years old are too old to compete in designing the great $10,000,000 office block to be built in Whitehall, centre of the United Kingdom administration.

This rules out such world-famous architects as Sir Edwin Lutyens Raymond Unwin, Herbert Baker, Reginald Blomfield and Banister Fletcher.

The reason given for the age limit is that building of the new block will occupy several years, and, according to the government, experience shows that elderly architects suggest on a big undertaking often die before the work is completed.

U.S. Naval Program

Britain Is Informed That United States Cannot Postpone Work

Washington The United States has informed the British government it cannot postpone any part of the naval building program agreed on Monday as was suggested in London.

The British government was reported as feeling that carrying out the whole $238,000,000 naval construction programme might have a bad effect on moves to limit armaments. The source through which the American position was made known in reply was not disclosed at the state department.

Scientific Evidence Indicates Better Moisture Conditions For Western Wheat Growing Areas

Scientific evidence indicating that western Canada is at present in a period of rising weather values as far as crop-growing conditions are concerned has been presented and is published in the 1932 Canada Year Book.

The evidence, though "by no means perfect," suggests the probability that the conditions of the present cycle of crop conditions is ascending.

This is the cautious conclusion reached by A. J. Connor, Dominion Climatologist, in an article in the Year Book on the results of weather research on the problem.

The research work, pointing the way to accurate forecasting of crop-growing conditions, of which a report in preparation and completion of weather statistics covering the years from the early 1880's to the present.

The rise and fall of favorable crop weather in western Canada was subjected to statistical analysis, in this way the failure of climate (not in years or less cosmical knowledge on the prairies, to such matters as moisture, etc.) has been subjected to the impartial scrutiny of science in an attempt to uncover its underlying principles.

The basic principle of the findings is that the western weather cycle is irregular, says the Regina Leader-Post. Several cycles of favorable or of a specified year to not possible with present data. But the rising and falling of crop yield best, with factors in the growing of crops has been reduced to a set of statistics and charts, and related to the sun spot intervals, being recognized by scientists as having an important influence on the life of the planet, meteorology and man's occupations.

Here is the story, as told by Mr. Connor in the Canada Year Book:

"The scarcity of rainfall in western Canada in recent years has been the reason for frequent requests that the Meteorological Service should supply the figures of normal rainfall and deficiency for a long period of years. Some of our correspondents have suggested that there was some law of periodicity governing the precipitation of western Canada.

"It has also been urged by our correspondents that the success of wheat-growing crops was not totally dependent upon the weather of the current year but also upon the weather of the immediately preceding years. Although several suggestions of this nature have been propounded, they may be briefly summed up by saying that one or two dry years in succession have a more detrimental effect upon the crop of the second year than a single comparatively dry season and that a good third year does not compensate for the two previous dry years."

Further representative evidence in western Canada, available over many long periods, were submitted to statistical analysis.

These stations were Edmonton, Calgary, Medicine Hat, Swift Current, Battleford, Prince Albert, Qu'Appelle, Edmonton, and Winnipeg.

"Reference to the table shows that the individual annual values are subject to very large fluctuations and much shorter intervals than the usual period. These shorter fluctuations are of such violence that they have a very large immediate effect upon the crops of the corresponding year.

"Turning now to the group of three stations in Saskatchewan we find Battleford, 1884, 1904, 1924, 1929 and 1931. These give intervals of 8, 20, 5, 2 and 17 years. It must be admitted, however, that major maximums are more difficult to recognize than in Alberta. From 1886 to 1929 is approximately three ten-year periods and from 1892 to 1931 is very close to the ten-spot interval. Looking at the maximum we find those in 1892, 1901, 1916, 1921 and 1927. All these stations do not come to a major maximum in the same year, as these irregular intervals however, ready explanation doubtful. On the whole, the [illegible] Saskatchewan [illegible] is rather weak.

"The last group of seven consists of Qu'Appelle in southern Saskatchewan and two stations in Manitoba. At these three stations the annual

Problem Of Keen Competition With Low Wage Countries By Reason Of Cheap Production

Improved Radio Code

Broadcast Shipping Section For Merchant Shipping And Air Services

The new international code of signals for shipping, coming into force on January 1, 1934, strikes an unexpectedly human note. Sick and injured seamen will be able to get treatment prescribed by radio.

Volume 2 of the new code provides for the first time an official international wireless telegraphy code issued especially for the use of the merchant shipping and air services. This embodies a medical section with a complete coin-stalking system for cases of illness or injury and a list of stand-and quarantine messages.

The new code involves numerous alterations of wireless hook. A complete change is made in the method of allocating visual signal letters to ships. All ships fitted with wireless will in future have the same sign call for visual and radio signalling. Ships not fitted with radio will use signal letters taken from the Radio Sign Call series.

The result of the changes generally will be greater simplicity in signalling at sea. Already signallers have been practising with the new code for some time. When the changes become, the men responsible for sending and receiving messages will be thoroughly familiar with the new system and there will be no confusion.

Iowa Farmer Made Thresher

Constructed Efficient Machine Entirely From Cabs And Ends

Working in his spare time over a period of two years, William Sperling, farmer near Clinton, Iowa, has constructed an efficient threshing machine entirely from odds and ends.

The device, with which he recently threshed three acres of oats, is propelled by a 2½ horse-power engine. It includes parts of corn grinders, hay rakes, an old Crosley engine, a Ford, a Waukeo engine and a buggy, but no parts of a regular threshing machine.

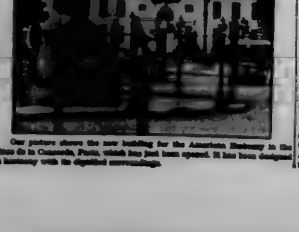
An improvement on Sperling's home-made thresher is that the blower is not connected with the chute. Whereas an ordinary blower pipe shoots chaff and waste oats on to the straw pile, Sperling's blower it into a separate pile.

For this reason, he said, his three acres yielded 70 bushels of oats. With ordinary threshers, he estimated, not have been more than 70, he said.

It operating too slowly, however, for large oat or wheat crops, he added.

More than 27,000 French people have visited London, England, on one-day excursions this year.

Colombia has just passed a tax of 20 per cent. on all goods drawn in favor of residents abroad.



NEW AMERICAN EMBASSY BUILDING IN PARIS

One picture above the new building for the American Embassy in the Place de la Concorde, Paris, which has just been opened. It has been designed in a modern way to appear monumental.

Canada, the United States and Britain are particularly affected by one of the greatest problems the world has yet had to face says Herbert Bailey in a special United News Cable. It is the problem of competition between countries accustomed to a high standard of living and countries which by reason of cheap production costs and low wages can outbid them, not only in the markets of the world but in home markets as well.

Canada, as Prime Minister Bennett has revealed, has already discovered what Russian timber competition means in the British market because of Russian state production. Russian countries are now building textile against neighbors who have a cheaper standard of living.

Meanwhile, Britain's greatest country is Japanese competition. The Japanese frankly admit that owing to cheap production costs, part of which they claim is due to the modernity of their machinery but mostly in consequence of living among the workers, they can now defeat Britain in the markets of the world on competitive standards. In the case of Japan has already dealt several blows to Lancashire cotton products in Indian markets, having in the consequence of their goods and also to their ability to supply what customers want. Japan is now attacking the British silk industry and there is no difference Britain with cheap silk goods at prices with which no British firm can compete.

Austria and South Africa are likewise complaining of unfair Japanese competition, and also taking drastic measures which, however, are not likely to prove effective.

British merchants assume Japanese traders with issuing propaganda designed to disrupt the empire.

A responsible South African newspaper has published a facsimile of a trade circular distributed by a Japanese firm throughout India in which the firm says: "It is one of our missions to emancipate 300,000,000 Indian people who groan under British tyranny and to free them of justice lead our hands on behalf of their independence."

The situation on the eve of negotiations between Japanese, British and Indian business men at Simla to discuss conditions for the division of markets. Japanese commercial authorities declare they favor unrestricted trade circulars. Nevertheless, the report is given credence in London.

Ben Tillett, one of the foremost leaders of British labor, writing in the Daily Herald, says: "The Labor Party must attach more importance to world factors than it does. Chinese, Indian and Japanese industrial conditions are convincing the world with revolutionary changes in industry and social life. We must study time to be a counter and the magnet of wealth and production."

It is this aspect of the fight between the high standard of living in the West against the low standard of living in the East, which is now engaging attention as one of the world's gravest problems.

Valuable Library Addition

Royal Ontario Museum At Toronto Receives Collection

The Royal Ontario Museum at Toronto was announced recently that the gift would of many men, one in Toronto, two in China and one in Japan, has been added to enquire the total "Ming Library" of 2,500 works and about 40,000 volumes. Illustrations of the books, the museum said, will give it the third largest Chinese library in North America.

Four donors of the library are Sigmund Samuel, of Toronto; Bishop White, of Hamoe, and Dr. Ferguson, noted Chinese scholar, and Sir Robert Mond of England.

VOL. [illegible] FORT SASKATCHEWAN, ALBERTA WEDNESDAY, OCT 11th, 1933 $1.50 PER YEAR IN ADVANCE

Town Council Meeting Held Last Wednesday

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chambers on Wednesday the 4th. October at 7:30 p.m.

Present Mayor G. T. Montgomery, Councillors Lalonde, Fillmore, Magar, Graham and Neale.

The minutes of the last meeting held were read and adopted.

The report of Dr. Mason, Health Officer, for the month of September was submitted and filed. A letter of instructions from the Department of Municipal Affairs regarding relief, and advising that Towns now granting relief are to make the 1st of November a cut-off date. Letter from Secretary of the Elk Island National Park Association thanking the Council for its grant of $5.00.

The Council approved the application of J. E. Graham for purchase of Lots 21 and 22 in Block 7, and also the application of T. Todd for purchase of lots 21 and 22 in Block 10, and lots 18 and 19 in Block 4.

A resolution was passed by the Council That the motion passed on the 2nd of August 1932 allowing G. A. Cranston to draw gravel to clear arrears on taxes on property, Lots 33 and 34 Block 8, Plan 04, be rescinded, and that the agreement between the Town and G. A. Cranston, prepared by the special committee, which has just been presented to the Council, be approved.

The Secretary was instructed to advertise for tenders for 50 tons of coal, more or less. Tenders to be in the hands of the Secretary by noon of the 18th. Instant.

The following accounts were passed for payment:—T. Ryan for work at Memorial Hall $14.69; Jones, Graham & O'Brien, cutter grease, Fort Hardware Co., $6.79; Workmen's Compensation Board $2.76.

NEW YORK GIANTS WIN WORLD'S SERIES

The New York "Giants" are now the world's baseball champions, having defeated their American league opponents the Washington "Senators" in four out of five games to win the pennant.

The teams were very evenly matched, although the Giants seemed to get the "breaks" and the necessary push when it was most needed.

Now that baseball is done for another year, the next thing will be hockey.

Entries Must Be In For Park Name By Nov. 15th

The final entry date for suggested name entries for Fort Saskatchewan's new park has been extended until Nov. 15th, This will allow customers who pay their accounts early in November to have advantage of entering their suggested names.

Remember goods bought in Nov. will not be good for an entry blank.

So get your tickets in early.

During the past week a number of Subscriptions have been received by the Fence Post Fund. We thank the following:—

Mrs. A. S. O'Brien, Mrs. von Iffland, Misses Norma Flintoff, Jean Ritchie, Geraldine Wootton.

Messrs A. H. Gibson, H. Holt, T. Todd, Allan Murray, A. E. Shanklan, Cecil Shaw, A. S. O'Brien, Charles, Art Simmons, E. Anderson, H. Kingsley, J. E. Graham, J. Westover, Jack Walls, and last but not least, Mr. Ronnie Mann blew in and chipped in his "two bits."

With continued good weather, we trust to let you have further news of the park's improvements in next week issue.

Thanksgiving Dance Very Successful

The St. George's W. A. Thanksgiving supper and dance held in the Memorial Hall last Friday evening was very successful.

A large number attended the supper served in the Buffet room, where tables were filled with roast chicken with all the trimmings.

At the dance, a good crowd enjoyed dancing till eleven, lately when refreshments were served in the Buffet room, after which dancing was resumed until one a.m.

The lucky number on the wool rug put up for raffle by the W. A. was drawn during the dance with Mrs. Chas. Magar holding the number.

A young lad, Frank Blonde of Edmonton gave an exhibition of acrobatics during an intermission.

The music for dancing was supplied by the local orchestra.

TENDERS

TENDERS FOR COAL

Sealed tenders, marked on envelope "Tenders for Coal Town Hall", will be received by the undersigned up till noon of 18th. October, for Fifty Tons, more or less, lump coal, single or double screened or mine run. To be delivered, as required, at the Town Hall via the Town scales, All tenders to be accompanied by accepted bank cheque for ten per cent of contract price, and state what mine the coal comes from.

Lowest or any tender not necessarily accepted.

Jos. Ritchie, Sec-Treas.
Town of Fort Saskatchewan.

ALBERTA SHEEP TO BRITAIN

Beef cattle exports from Alberta to the British market have totalled 6,000 head this year to date.

UPWARD TREND NOW UNDER WAY

Hon. R. B. Bennett's Figures Encourage Business

The Prime Minister's confident and encouraging statement introducing the new Dominion Loan has created a very positive and favorable reaction throughout the Country. Its clear-cut expression of his conviction that recovery is under way, together with the evidence he cited, have stimulated a growing sense of optimism in business circles which is reflected in the subscriptions to the New Loan. There has also been widespread endorsement of his view that, although the road may be long and progress slow, the events of the past six months appear to demonstrate with increasing clarity that the downward trend has come to a definite stop and that the upward trend is in progress.

Some examples of the comment from prominent Canadians follow Honourable R. H. Rhodes, Minister of Finance: "As Canadians we must all share in the sense of encouragement that the Prime Minister has inspired by his statement regarding the improvement in business conditions throughout this country. It has called our attention to indications of recovery that have become increasingly definite with each succeeding month, and which have been so sustained and consistent that one can no longer doubt their significance.

H. W. Wilson, Vice-President and General Manager of The Royal Bank of Canada: "The Prime Minister has quoted statistics to show that there are definite signs of trade recovery in Canada, but, in my opinion, these statistics do not fully reflect the improvement which has occurred. While there are still a number of clouds on the business horizon, notably the low price of wheat and the partial crop failure, business throughout Canada has shown a definite and, in a number of industries, a marked improvement, and my confidence in a continued upward trend is strengthened by the background of what seems to be a definite world-wide recovery. It would be foolish to minimize the seriousness and extent of the problems still facing us, but the evidence of improvement will enable us to tackle these with greater heart and spirit. We are now offered an opportunity to show our confidence in ourselves and Canada in supporting the Government in its essential financial operations. Dominion of Canada Bonds are the premier securities available to investors."

LIBERALS HOLD ORGANIZATION MEETING IN TOWN

An organization meeting of the Clover Bar Liberal constituency association was held in the Empress Theatre here on Tuesday afternoon.

W. R. Howson, M.L.A. leader of the Liberal party in this province addressed the meeting.

The meeting gave instructions to the new executive to arrange for an early convention to select a liberal candidate for Clover Bar riding.

Election of officers resulted in Otto Monk, of Bruderheim, being elected president, with E. McLeod, of Hay Lake, vice-president, and Fred Schlender, of New Sarepta, secretary-treasurer.

Brief addresses also were given by H. J. Montgomery, M.L.A., Wetaskiwin, A. F. Mitchell, M.L.A., Leduc, Stanley Tobin, ex-M.P., Wetaskiwin, and J. Boyd McBride, secretary of the Alberta Liberal association, who dealt with organization work.

Tax Consolidation Appeals

More than 3,500 appellations for tax consolidation under the Act authorizing same passed at the last session of the legislature, have been received, according to Robert English, Deputy Minister of Municipal Affairs.

Political Schools

Hon. Vincent Massey, president of the Liberal Federation of Canada, started something when he adopted an idea which has been in operation in Great Britain for a number of years and inaugurated the Liberal Summer Conference held at Port Hope, Ontario, in September. Ontario Conservatives quickly grasped the same idea and followed with a Conservative Summer School at Newmarket. Neither of these gatherings were of a partizan character, one town they held under the authority of the official party organizations. They were round table conferences for the study and frank discussion of political, economic and social problems. No decisions were formally recorded, nor were resolutions adopted.

Inasmuch as the Liberal Conference was a Dominion-wide gathering, while the Conservative School was an Ontario gathering, and further as the Liberal Conference had been promoted some considerable time in advance of its meeting, Mr. Massey was successful in securing the attendance not only of leaders in the political and economic life of Canada, but men of standing and influence in Great Britain and the United States, including Sir Herbert Samuel, leader of the British Liberal party, and Mr. Morley, the chief of the Roosevelt "brain trust." The Liberal Conference, therefore may be regarded as an indication of the character of these gatherings.

That conference was attended by many Conservatives and by supporters of the C.C.F. as well as by Liberals. Conservative views and Socialist views were just as freely expressed as Liberal views. As a matter of fact, the Liberal Conference and the Conservative School exchanged speakers, while men of Socialist views and leanings addressed both Conference and School. In a word, it was a coming together of men and women keenly interested in the current problems of the day as they affect Canada, and the world of which Canada constitutes a part. They came together to study these problems, to obtain expert opinion in regard thereto, to examine and criticize suggested remedies and policies, and to frankly and freely exchange views thereon.

It was a school of citizenship in the highest and truest sense designed to engage some of the best thought of the country in a searching analysis of existing conditions and of suggested remedies designed to overcome the weaknesses and evils existing in our economic life and social order, and the part which governments must take in removing such evils and promoting the continued onward march of civilization and a progressive betterment in our whole standard of life and living.

So successful indeed did these gatherings prove to be, that nothing but praise has been voiced by the press of Canada regardless of personal affiliations. These conferences or schools are to be continued next year, and the probability is that such gatherings will be organized to be held in different sections of the Dominion in order that an opportunity may be afforded to a much larger number of earnest citizens to attend and participate in them.

Equally important,—perhaps even more important,—is another development arising out of these initial gatherings, and that is the formation in many centres across Canada of Discussion Clubs in which men and women deeply interested in public questions and matters affecting the public welfare are meeting and giving earnest heed and study to such matters.

Nothing but good can result from such study even if not quite apart from the partizan controversies and excitements of election campaigns. Speakers before such Discussion Clubs know that every word they utter will be fully weighed; that the facts they submit will be open to investigation; that the suggestions they advance will be minutely examined to determine their soundness, practicability and worth. Special pleading will be at a discount; sensationalism will not convince; but in the freedom of round table discussion, and in what might be termed the clash of intellects and authoritative opinion, knowledge will be advanced.

The inevitable result of such Schools and Discussion Clubs must be to raise the tone of public discussion in Canada. Political platforms of the future will have to be drafted to be something more than mere vote-catching devices; if they are not they will fail to impress and attract the voters. Members of Parliament and of the Legislatures will find it increasingly necessary to keep themselves well informed, alert and convincing in debate, rather than merely concerned in gaining some party advantage. There will be a more general recognition of the fact that politics, after all, is not a game, thing ignoble and to be shunned, but rather that politics is, in fact and reality, the science of government.

It is to be hoped that this movement for a better educated, more enlightened citizenship will spread far and wide throughout Canada; that it will be encouraged and promoted by all political parties and groups, and that people of every variety and shade of political opinion and conviction will gather together in earnest study and frank but friendly discussion of what, in the final analysis, are the common concern of all, in which the interests of all are inextricably bound together.

Horse Coming Back

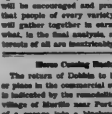
The return of Dobbin to his former place in the commercial structure is indicated by the remodelling in the village of Morrille near Perth Arthur of a garage into a blacksmith shop in the same having formerly been turned from a blacksmith shop into a garage.

The Height Of Silliness

A very wealthy woman has lived in a well-known woman's head in New York for many years. Every morning she comes downstairs, takes off a paper bag and a chair in the same way day after day. And that's all she ever does.

Sales of automobiles in Bolivia have been increasing recently.

Bowel Complaints of Children During the Summer Months



Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized, all any time, with diarrhoea, dysentery, summer complaint, or other forms of bowel trouble.

There is a safe remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has received the endorsement of hundreds of Canadian mothers during the 80 years it has been on the market. Don't experiment. Get "Dr. Fowler's" and be on the safe side.

Manufactured only by The T. Milburn Co., Ltd., Toronto, Ont.

Source Much Data

Scientists Return From Long Sojourn In The North

"Aurora borealis flashing 4 rently overhead at Fort Rae never came lower to the earth's surface than 55 miles distance during their observations," Dr. J. M. Stagg, leader of the party of British scientists who have spent the latter 18 months at Fort Rae, North West Territories, studying northern weather conditions, recalls this statement.

Dr. Stagg flew from McMurray after coming out by river boat to superintend the transportation of some six tons of valuable instruments used by the scientists in their investigations. The latter 18 months at Fort Rae, came out some time ago.

Until the large volume of data gathered during the 15-month stay in the north had been studied it was impossible to state the result of their observations, Dr. Stagg said. Some 18 months would be required before the data could be placed in publishable form.

Royal Flattery

The Prince of Wales is credited with one of the neatest and prettiest compliments heard recently. One of the most charming women in society, a peeress, remarked to H.R.H.: "I wish I could go two seasons. I should like to do everything twice." "My living in them, Lady——!" cried the Prince.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again!

A woman sends the following account of the consequences of an auto accident in which she was involved:—

"A year ago I had a very bad automobile accident, which left me sore or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 14 lbs., and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen Salts, and I must say they have done me a lot of good in every way—but chiefly in keeping my weight down. In three months I lost 6 lbs. Then I left off taking the Kruschen, and I soon went up to 143 lbs. again. So at once I got more Kruschen, and am again steadily reducing. My weight last month was 136 lbs."—(Mrs.) W.H.M.

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

STEWED CUCUMBERS

Four large cucumbers; 1 teaspoon salt; ½ teaspoon pepper; 1 tablespoon butter; ½ cup sweetened condensed milk; 1 tablespoon flour; ¼ teaspoon prepared mustard; juice of ½ lemon.

Pare cucumbers and cut in slices ¼ inch thick. Remove seeds from each slice. Place in boiling water and cook 15 minutes or until tender. Drain. Add salt, pepper and butter. Return to fire. Cover and cook for five minutes. Blend together sweetened condensed milk, flour, mustard and lemon juice. Add to cucumbers. Cook until mixture thickens, stirring constantly. Serve hot. Serves six.

For the first 33 weeks of 1935, ending August 17, the number of bags ginned in Canada was 1,660,000.

The horse in his attitude to man differs from all other classes of stock in that he produces energy not food.

Advocates More Production

Sir Herbert Samuel Out Of Sympathy With Present Policy

Increased world consumption of commodities, not decreased production, should be the aim, Rt. Hon. Sir Herbert Samuel told a Canadian Club luncheon audience at Ottawa. With the policy of decreased production he had no sympathy.

"Surely this is a mad policy," he said. "Statesmanship today is on the wrong lines." He indicated the path, which, he felt, would lead toward prosperity. Production should be encouraged, consumption stimulated, trade channels should be opened, currency stabilized and peace and tranquility developed.

New Source Of Revenue

Undersides Left On English Railway Trains Leased To Passengers

The joke about the borrowed umbrella is a very ancient one, but the Southern Railway in England, is turning it to serious account. Thousands of umbrellas left by careless travellers come to a railway company in the course of a year. Arrangements are in hand whereby passengers on rainy days will be able to borrow these forgotten gamps at certain suburban stations on production of their season ticket and a payment of twopence.

Electricity Output Higher

An increase of 21.5 per cent. in electrical energy produced in Canada in August as compared with July was shown in returns collected by the Dominion Bureau of Statistics. On the other hand, the export figures were lower indicating a greater use of electricity in Canada.

Shawki Bey, former post laureate of Egypt, has died at Cairo.

Sailor Has Two Mascots

Norwegian Sailing Round World With Dog And Cat As Crew

With about 12,000 miles of lone sailing behind him and [illegible] thousands of miles more in front of him if he carries out his plan to cross the Pacific, Capt. Al. Hansen, Forvik, Norway, landed at Toronto recently in his 36-foot Norwegian pilot boat after sailing from Bergen 18 months ago.

Capt. Hansen, after clearing Bermuda, touched some English and European ports and then sailed to the Canary Islands. From there his longest run was to Miami, Fla., which he made in 43 days, averaging nearly 100 miles a day.

His dog, Mate, and cat, Sailor II., comprise the crew. Capt. Hansen left for Halifax and later hopes to make for Africa.

Longest Lived Animal

Time elephants have lived for over a century—wild elephants probably five 150 years or more. Mystery shrouds the end of these great animals, who seem to disappear without leaving a single clue to the treasure hunters who seek their valuable ivory.

Local News

Flour mixers were reported active on the upper stretches of the Peace River and tributary streams.

RELIEF PROGRAMME

Considerable progress is reported to date in the carrying out of the relief programme for the dry areas in the south. Some 65 carloads of feed have already been shipped south, all of this going into the area south and east of Hanna, except ten carloads for the Pincher Creek district. In these shipments are included about 70,000 bushels of threshed oats, and barley, the balance being feed and hay.

Under the arrangement for supply of vegetables at cost to the residents of the dry areas, some 94 carloads have already been shipped south and more than 20 additional carloads are on order and will be shipped shortly.

Efforts are being made to find winter feeding quarters for commercial live stock and work horses of farmers in the dry areas.

Under the policy for removal of settlers to new locations, some 200 families have already been removed to various districts in central and northern Alberta, and arrangements are being completed for further removals.

PROVINCIAL LIVE STOCK ELEC [illegible]

The annual provincial live stock club contests to decide upon the junior club teams to represent the province in the nation-wide judging contests at Toronto royal fair this fall, will be held at Edmonton, on November 1st. Teams will compete from Lethbridge on the south to as far north as Spirit River in the Peace River District.

Here and There

Five names and two bear cubs taken by a party of six Paterson, N.J., hunters in the Kispiox district opened. The season ranged from fifty to fifty-eight inch bears. The party accounted for a good season in the district north of Hazelton.

October 10-13 are the dates set for the International Cover Dog grinle to be held at Pensrville, New Brunswick. Many letters have been received from dog fanciers, both in the United States and Canada, inquiring as to the trials and a large entry list is anticipated.

First shipment of cattle from Fort Fitton, Ontario, to Skye Island, aboard the Duchess of Richmond recently, has been subsequently lauded by letters from the Old Country, stating that the cattle arrived in excellent condition and were of exceptional quality and type.

Among the recent visitors to Grand Pré Memorial Park, in the Evangeline country of Nova Scotia was Mrs. A. J. Lefranen, of Lacombe, N.B., whose husband is a direct descendant of Francois Lefranen, an Acadian officer who aided at the time of the expulsion of the Acadians.

Tom Wilson, trail-blazer, trapper, hunter, Indian guide and veteran explorer, world-known for his discovery of Lake Louise and Emerald Lake in the Rockies, and last of the Canadian Pacific Railway's pioneer builders, passed over the Great Divide recently. He was in his 75th year.

A government supply of British cattle purchased by Hon. Robert Forke, the Herbert Samuel, leader of the Liberal parliamentary party in the British House of Commons, and a large audience assembled at the Canadian Club of the Royal York Hotel, Toronto, recently.

The world's largest map of Canada, 30 feet high and 350 feet long, painted by Montreal artists, has been hung in the Hall of Nations, Chicago World Fair, as a prize display of the Dominion Government, the Canadian Pacific and the Canadian National Railways. Guarded by three red-coated members of the Royal Canadian Mounted Police, it is one of the most popular exhibits of the great fair.

Sir William Stanton, Carlton Club, Pall Mall London, who was a delegate to the meeting of the trustees of Pacific Scientific held at the Banff Springs Hotel, in August, recently concluded a salmon fishing trip in the upper waters of the St. John River near Perth, Sir William stated that the St. John River salmon could not be termed as salmon could not be termed as mild scrraps ales.

Mr. and Mrs. R. W. Shaw announce the marriage of their daughter Margaret to Mr. H. S. Wallace, early this month. The Shaw family are well known in this district.

As he stood looking down at the sleeping infant, she saw in his face a mixture of emotions—rapture, doubt, admiration, despair, ecstacy, incredibility. Touched and wondering alike at this unusual parental attitude and the conflicting emotions, "A penny for your thoughts," his wife said.

Startled into consciousness, he blurted out: "For the life of me, I can't see how anybody can make a orth like that for three forty-nine!"

"What do you think of the Tuscumbia?" asked one shelter of another during a contest.

"What do I think of them?" was the reply. "Well, when I look at them, I'm thankful only one of them can get in."

GOVERNMENT OF THE
DOMINION OF CANADA
1935 REFUNDING LOAN

The Dominion of Canada offers for public subscription

Two-year 3½% Bonds, due 15th October, 1937
Issue Price: 99.50 and accrued interest,
yielding 3.75% to maturity.

Six-year 4% Bonds, due 15th October, 1939
Issue Price: 98.00 and accrued interest,
yielding 4.18% to maturity.

Twelve-year 4½ Bonds, due 15th October, 1945
Issue Price: 98.50 and accrued interest,
yielding 4.58% to maturity.

Prospectus, without charge, in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa, or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary or Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations
Two-year Bonds, $1,000
Six-year Bonds, $200 and $1,000
Twelve-year Bonds, $100, $500 and $1,000

Cash Subscriptions

Cash subscriptions will be received only for the Six-year 4% Bonds and for the Twelve-year 4½% Bonds, and will be allotted in full. Cash subscriptions will be subject to allotment. The date of allotment, delivery of interim certificates against payment in full for the bonds allotted will be announced.

Refunding Subscriptions

Holders of Victory Loan 5½% Bonds due 1st November, 1937, after detaching and retaining the coupon due 1st November next, may, for the period during which the subscription lists are open, exchange their bonds in lots of $1,000 or any multiple thereof for a like amount of the new issue and receive allotment in full with prompt delivery. The surrender value of the Victory 5½% Bonds will be as follows:

100% of their par value on subscriptions for the Two-year 3½% Bonds and the Six-year 4% Bonds.

100¼% of their par value on subscriptions for the Twelve-year 4½ Bonds if allotted on or before 15th October, and 100% of their par value after that date.

No accrued interest on the new bonds will be charged on refunding subscriptions if allotted on or before 15th October, but if allotted after that date accrued interest will be charged.

Holders will receive in cash the difference between the surrender value of their Victory Bonds and the cost of the bonds of the new issue.

The amount of this Loan is limited to $265,000,000.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The proceeds of this Loan will retire $169,871,850 Dominion of Canada 5½% Bonds maturing 1st November, 1937, and $40,000,000 short-term Treasury Bills. The balance will be used for the general purposes of the Government.

Subscriptions will be received and receipts issued by any branch in Canada of any Chartered Bank and by Recognized Dealers, from whom may be obtained application forms and copies of the official prospectus containing complete details of the Loan. Applications will not be valid on forms other than those printed by the King's Printer.

The subscription lists will open on 10th October, 1935, and will close on or before 24th October, 1935, with or without notice, at the discretion of the Minister of Finance.

Department of Finance,
Ottawa, 2nd October, 1935.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Alexander Glegg, who introduced aluminum cooking utensils in Canada, is dead at the age of 68.

Argentina, Australia and Denmark have been elected to seats on the League of Nations' Council.

A flood of counterfeit currency appearing in Port of Spain has alarmed authorities. Perfect workmanship of the notes baffled offhand detection, even on the part of experts.

Co-operative arrangements have been completed between Alberta Government, railways and municipalities to distribute vegetables to needy families in the drouth-stricken areas of the province this winter.

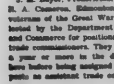
Edmonton St. John Ambulance Organization has secured a mobile ambulance station which can be hitched to a car and rushed to the accident scene, protecting victims from cold and giving treatment on the spot.

Charges that war medals are being sold by returned soldiers to second-hand dealers, who re-sell them to would-be heroes, were made in Windsor, Ont., at a meeting of the Pensioners' Protective Association which decided to investigate.

Before the League of Nations committee on social questions the Canadian delegate, Jean Dery, counselor of the Canadian legation in Paris, urged limitation of the production of opium. Canada, he added, would gladly support every effort of the League in this direction.

J. M. Bayer, Fredericton, N.B., and R. A. Cameron, Edmonton, Alberta, veterans of the Great War, were selected by the Department of Trade and Commerce for positions as junior trade commissioners. They will serve a year or more in the department here before being assigned to foreign posts as assistant trade commissioners.

For Remedy For
Acid Stomach
Four out of five people have acid stomach whether they know it or not. Pains after eating, heartburn, gas, and bloating are all signs of too much acid. A spoonful of Bisurated Magnesia after meals will overcome this condition three minutes. Any druggist will tell you that. Try it and see.
Purished For Cruelty
Has Barred From Keeping Dogs And Serves Jail Term
In some instances judgment has been passed on a deeply erring motorist that during his lifetime he shall not again hold a driving license. It is more unusual to hear of a case in which a person is disqualified for life for holding a dog license or keeping dogs. Such an instance occurred in Bridgeport, ind Kingston, when, for cruelty, unnecessary suffering to four dogs, a man had had sentence passed on him in addition to three months' hard labor.

How are Your Nerves?


Mrs. F. Wadham of Kingston, N.B., and Mrs. Ford of Sussex, N.B., are proud to praise of Dr. Miles Nervine. Both had suffered from nervousness, sleeplessness and irritability, and both found relief by the Nervine system. Mrs. Wadham writes: "I was completely run down and irritable, could not sleep and had no appetite. Dr. Miles Nervine helped me from the first dose." Mrs. Ford writes: "I was nervous, irritable and could not sleep. Dr. Miles Nervine helped me and I am now well and strong." Get this medicine today at your druggist's.

Study Of Ice Birds

McGill University Professor Follows Gulls In Flight Across The Ocean

Completing his fourth and last round trip across the Atlantic this summer V. C. Wynne-Edwards, Assistant Professor of Ornithology at McGill University arrived back in Montreal recently in the Canard liner "Aquitania," from Southampton and Havre These voyages were undertaken solely for the purpose of the study of sea-birds and their habits.

In a statement to the press Mr. Wynne-Edwards said: "I have just completed a haul of two thousand miles in the Atlantic in summer time, and I have spent many hours, short spells, but sparing afternoons and holidays searching for observations on birds here, of every district, and gradually he finds out the habits of their ways, their breeding and geology, until at last he can begin to put together his observations. The ultimate aim is a complete picture of the local bird-life. In this way only can we hope to add the sense for common birds in any part of the world, which underlies the whole study in our knowledge. A certain number of people interested in birds have, of course, made single voyages in all parts of the world, and recorded their results. But in this way knowledge accumulates very slowly, and it has been my aim to apply the homely method of bird-watching week by week to the ocean, regarding it just as I should do in my own district ashore, in order to hurry up and co-ordinate the observations in this particularly interesting, but rather inaccessible field of ornithology

"Certainly a great deal of what I have learnt is rather intangible It is not easy to express it in a few words. One of the most important additions to knowledge, however, seems to be the migration of these oceanic birds, and also of some others which, though not truly oceanic and unable to live entirely at sea, use the ocean as a highway in their migrations between Arctic breeding-grounds and winter quarters in other parts of the world. Tern, for instance, a bird allied to the gulls but smaller and with more graceful outline and flight, sometimes called a sea-swallow, breeds on the Canadian coast, migrates to the West Indies and elsewhere within the Arctic circle. They spend the winter so far away as Patagonia and Antarctic seas. This migration is made with almost certainty up and down the high seas, and although terns have wonderful feet, they are not swimming birds at all, or alight on the water on migration. What is more, they actively ever dislike to feed. Practically nothing was known about their habits in mid-ocean at this time.

"There is also the pressing and mysterious problem of how these movements find their way across the unobstructed wastes of the ocean. At times of birds actually en route, of course, they fly another stretch of land in a big-ang course, whether fast or leisurely. But of how, how they are affected by wind and weather, all these sorts of great facts are still unknown. They are of supreme importance to help us to solve one of the most fascinating problems of biology today."

Origin Of Wedding Cake

Horned Rock Hermits Of Texas Use Animal Glue

The origin of wedding cake goes back hundreds of years. In ancient Roman marriages was effected by the simple process of the bride and bridegroom breaking a cake of bread over eating it together. This, in time, developed into the bride cake. The bride had it broken over her head and the woman to prepare food for the man. Everybody knows the superstition about throwing wedding cake, given in this age of cynicism, took forward to the weddings of their friends, no doubt may get a piece of wedding cake, which, if placed under the pillow, has the power to produce in dreams the vision of a prospective husband.

Must Be Queer

Glass bathing suits may be seen on British beaches next summer—but not unless experiments can find a way to dye them so they will not be transparent. Even glass has developed until it can be made into a practicable, non-shatterable bathing suit made in one of five colors.

NEIGHBORS TALK

"I am employed in a theatre and it is a pleasure to make up people. I have to support my mother and sisters. I like to dress well but haven't very much time to spend on clothes. To get the appearance of variety in my standard wardrobe I change the color of a dress or stockings as soon as the things become faded. I always use Diamond Dyes for the work using them as does a woman who sells ready-to-wear clothings. I have always gotten perfect results that our bright lady has the great number of "queer" things I have

"I learned about Diamond Dyes from our wardrobe mistress She says she has tried all the dyes on the market but none do such splendid work and are so easy to use as Diamond Dyes. I understand they are the world's most popular dyes—and they deserve to be."

L.P., Montreal.

Used Money Order

Odd Situation Created By Mayor Of French Town

Trusting innocence leads to odd situations sometimes. The Forgery Investigation Department of the Paris Police located a gang of forgers in a small town in Central France. They Canadian money orders, each for 600-franc notes, red-handed. Ten notes were given to the local mayor, who was instructed to cash them at Paris by the quickest and safest means available. As two days elapsed without the arrival of a parcel of notes her from the Mayor the head of the Paris office telephoned to him and asked what he had done with the cash. The Mayor replied he had sent them at once and when called here, said he had sent the 10,000 francs by money orders.

Found In Tea Measure

Pale Silver In Ontario Quit After Month Shift

P. J. Villeneuve of Renfrew, Ontario, who discovered a lot of silver ore in a pale-sitting record on this continent, came down from his perch after having been there for a month or not in one month. There was too much monotony about it for the young man, though he had made, himself comfortable bed, an elevator and other conveniences. To cut a new record would have required a stay of about four months.

The "nest" at the top of the 50-foot pole was a familiar sight on Renfrew streets for a month and was viewed with interest by a large number of tourists.

Britain is decreasing its imports of German toys.

DOSED ON THE WORLD!—THAT'S LIVER
Wake up your Liver like
CARTER'S LITTLE LIVER PILLS
Take one at night and you'll feel fine next morning. Don't stay bilious, headachy, constipated. Don't poison your system. Carter's Little Liver Pills will put you right. Purely vegetable. Act gently but surely on the liver. Ask for Carter's Little Liver Pills by name. Refuse substitutes. Small pill. Small dose. Small price.

SUNDAY SCHOOL LESSON

OCTOBER 15

Golden Text: "For I am not ashamed of the Gospel: for it is the power of God unto salvation to every one that believeth: to the Jew first, and also to the Greek."—Romans 1:16.

Lesson: Acts 11 19-30; 12 25.

Devotional Reading: Colossians 3 12-17.

PAUL IN ANTIOCH

Explanations and Comments

The Result Of Persecution, 11 19-21 "The storms of persecution are only winds which fan the fire of faith and carry the sparks of truth to a distance." Luke returns to the narrative in the time immediately following the death of Stephen recorded in Chapter 7. "The persecution that succeeded drove the followers of Christ as far as Phoenicia and the island of Cyprus and Antioch in Syria, and as they sought asylum in these places and elsewhere they explained the reason for their coming and told the story of the Gospel but to Jews only "The persecution turns out to be a missionary society unconsciously organized by the Jews of the new faith" Lyne Harold Hough

In Antioch, however, there was a new departure. Men from Cyprus and Cyrene came to Antioch and, being themselves Grecian Jews, they had fewer scruples about mixing with Gentiles than had the Jews of Palestine. These converts when they came to Antioch preached the good news about Jesus to the Greeks as well as to the Jews, with the result that "a great number believed and turned unto the Lord. It was a tremendous innovation, this preaching to Gentiles at Antioch, but the reason of its influence upon later events, Antioch has been called the second birthplace of Christianity

"These people were added to the Lord" Luke, they were added to the church. If they were always true, as they were sometimes, they would be "added to our churches"—A. T. Robertson.

Barnabas Chosen Paul An Co-Worker At Antioch, 11 22-26 Through the efforts of Barnabas, the church at Jerusalem had acquainted Paul as a brother after his conversion, but Paul had been forced to flee from Jerusalem and find a refuge in Tarsus, his home town. Ten or twenty years have passed since then, and now Barnabas needs help in the work at Antioch. "He knows just the right man for the place, one who has the necessary breadth of mind and sympathy of heart, a Hellenistic Jew like himself, familiar with the Greek language and culture and thought. He seeks Paul of Tarsus and brings him back with him to Antioch. That it came to pass that the man who had driven from Jerusalem the disciples who founded the church at Antioch, should be help them in their work.

"One mark of a real generosity of soul is the absence of jealousy. It makes way so generous that he had no room for envy in his heart. When he went to Tarsus for Paul and brought him back to Antioch he knew quite well what he was doing. He did not forgotten the old days when Paul carried everything before him. He knew Paul was much the abler and stronger man. He knew if Paul came to Antioch he must inevitably take the first place. But Barnabas never heard of that. All he cared for was the progress of the work, and perhaps that is the ultimate evidence of Barnabas' greatness. Because very here he had it good needs none."—J. D. Jones.

If shorter hours mean more time for other-doors' speakers the advantages gained will be offset of the outdoor.

Hungary is increasing its tax on high-class motor cars.

Cheap Labor For Japan

Goods Flooding World Markets And Prices Is Low

Let there be no mistake about this Japan intends to drive all her white competitors from the Far East, and the destruction of their trade is to be the first lever employed for that purpose. So long as she lashed unlimited raw materials, the prospect appeared to be a hopeless one, but the possession of Manchuria has altered all that The disadvantages from which Japan was suffering as an industrial nation are gradually vanishing while the advantages remain And among these advantages we must reckon cheap labor. The average wage of a female operative in a silk fixture is sinepence a day In many fields a Japanese manufacturer is today producing a better article than his white competitor, and that at far less cost. Can we then wonder that Japanese goods are flooding the markets of the world? And be it noted that, while she multiplies her own exports, Japan offers less and less as a market for the goods of others. W. Watkin Davies in the Fortnightly (London).

Overcame His Handicap

Englishman Showed What He Could Do Despite One Arm

When W. H. Sykes, of Bradford, England, lost his arm many years ago he determined that one arm should do the work of two. At a birthday celebration recently he demonstrated some of the things he do- button his shirt cuff, put on his collar and tie, take a match from a box and strike it, sharpen a lead pencil, in addition he can take care of a garden. He was formerly a member of the city council.

"Modern girls, in spite of their apparent waywardness, are just as ready to marry as their grandmothers," declares a feminist champion. It's a somewhat ambiguous way of putting it.

DOLLFUSS HAS NARROW ESCAPE FROM ASSASSIN

Vienna. The step-grandson of an eminent dentist, wielding a dainty pearl-handled revolver came within an ace of killing Chancellor Engelbert Dollfuss and plunging Austrian and European politics into new and more dangerous confusion.

As it was, however, the two bullets from the gun of Rudolf Dertil, a former corporal in the Austrian army, only grazed the chancellor's left breast and wounded him slightly in the left arm. Dollfuss, after receiving treatment at a hospital, went home within an hour.

Socialist newspapers headlined the accusation that Dertil was a Hitlerite, while on the other hand the pro-Dollfuss newspaper Westhalt identified him as a member of the Schutzband, the dissolved Socialist military organization

Whatever Dertil's political camp however, his two bullets were wider on a duck's back as far as the chancellor Dollfuss was concerned.

A few hours after the attempt, the Nazis chancellor lost part, 11 inches tall - was standing in his pyjamas at home delivering a nation-wide address assuring the Austrians he was still up and fighting.

Dollfuss thanked God for the fortunate outcome of the attempt on his life, coupling the with an expression of firm determination to proceed with his patriotic mission. He explained that he took the occasion to make the speech so as to shout off any exaggerated reports of his injury which might circulate.

"That was a close one," was the comment of the chancellor as he left the hospital to return to his home

The attack was staged at the entrance to the parliament building. As Dollfuss approached, Dertil moved up, apparently with the intention of handing him a manuscript. Police intervened, however, and seized the document instead. As Dertil was led away stepped back a few paces, drew his gun and fired.

The chancellor was rushed to the hospital.

The officers began rounding up political suspects immediately. Word of the attempt reached Berlin and Munich almost as soon as it was known in Vienna. Dertil, it was reported, is a native of Carinthia, the province which Japan was said to have designs on.

Lake Carriers Want Coastal Laws Amended

Claim Higher Rates And More Wheat Shipments Needed

Ottawa, Ont. The lake carriers are making a vigorous effort to persuade the Federal Government to proclaim the amendment to the coastal laws enacted at the last session of parliament.

It is being urged that unless higher rates can be obtained in the inland Lakes and a larger volume of wheat shipments for Canadian owned ships there will not be a natural company left in the business this fall

Hitherto movement the transshipment of wheat at Buffalo would be stopped unless carried through here as transient business.

The lake carriers have met a favorable reception at Ottawa They desire the amendment to be proclaimed now in order that they will reap the maximum advantage on the autumn wheat trade. Apparently most of the cabinet ministers are favorably disposed, but the final decision, it is believed rests with Premier R. B. Bennett He is said to have requested memorandum giving both sides of the case, but has not yet indicated what will be done

Paris Papers Criticize French Foreign Minister

Making Too Many Concessions To Germany, Say Editors

Geneva, Switzerland — Criticism appearing in Paris newspapers to the effect that Joseph Paul-Boncour the French foreign minister was making too many concessions to the Germans, especially regarding the size of the army, was said to be the reason he decided him to go to Paris and consult with the cabinet.

Revelation that a French statesman had conferred with the secretary of Germany's ministry of propaganda, Dr. Joseph Goebbels, also said to have excited some of the French.

M. Paul-Boncour told the assembly of the League of Nations that the four-power European peace pact, of Great Britain, France, Italy and Germany strengthens the Locarno pact.

A Strange Phenomenon

Lake Superior Village Inundated By Action Of Waves

Rosport, Ont.—A wall of water, believed to have been thrown up by heavy seas during the recent storm, flooded storehouses and carried away fishing docks at this fishing hamlet. Hay sixteen records more than 100 tons, were moved to the docks suspended in the air. On the backwash, buildings along the lake shoreline were flooded and considerable damage done. The unusual phenomenon occurred several times.

Another section of the water left the lake bottom fully exposed and docks and boats high and dry. Each time it rolled back with great force, breaking inland for some considerable distance. No lives were lost.

Rosport is situated 100 miles north of Port Arthur.

British Steel Plants Busy

News From Sheffield Regarding Business Is Cheering

London, Eng.—Cheering business news came from the United Kingdom's heavy industries, particularly from Sheffield, centre of the steel trade.

C. J. Walsh, just installed in the historic office of master cutler at Sheffield, reported plants in that city are producing more steel than in previous days and that the monthly output is 27,000 tons more than a year ago. Of the increase share of this improvement, Walsh said, was a direct result of the tariff on imported steel. He added Sheffield's newest products such as magnets, razor blades and stainless steel had made great strides during the last year.

Prices On Bullet In B.C.

Victoria, B.C.—Finance of provincial government expended was increased by $3,167 from the end of March to the end of August, they rose from 122,550 to 25,491. The decrease in August figures from those of July was 5,491, from 30,675 to 25,184.

Will Balance Budget

Conditions In Britain Show Good Improvement

London, said Neville Chamberlain, Chancellor of the Exchequer, told a group of bankers Britain's budget would be balanced this year and that undoubtedly the situation in the United Kingdom offered a more favorable prospect than it did a year ago.

"There is no sign of an approaching doom," said Mr. Chamberlain, "but on the other hand in almost every direction we see indications of definite progress and a growing sense of the confidence that this is no mere flash in the pan, but the beginning of a permanent advance."

The Chancellor said it seemed likely Great Britain ultimately would return to the gold standard.

"But," he continued, "we in this country cannot consent to fish our currency to gold until we are convinced that the conditions prevailing are such as will permit the gold standard to function efficiently."

U.S. Unions Backing Canadian Rail Workers

Full Support Pledged In Dispute Over Wage Cut

Cleveland, Ohio. A. F. Whitney, chairman of the Railway Labor Executives' Association, and the organization's full support had been pledged to Canadian railroad workers in their campaign against a second 10 per cent wage reduction.

Representatives of the Canadian railroads conferred with railway officials in his office on June 1. Mr Whitney said, and at that time a resolution was adopted pledging all the support of the Canadian antiwage reduction campaign would be paid by the railway labor unions and all other needed support would be given.

The resolution, Mr Whitney said, provided the association should "go as far as possible" in aiding the workers of the Dominion. many of whom, he said, were receiving wages approximately 17½ per cent lower than rail workers in the same occupations in the United States.

The rail unions have approximately 14,000 members in Canada, Mr. Whitney said.

Dismissed By Nazis

Grandson Of Mendelssohn Loses Position In German University

Hamburg, Germany. Professor Albrecht Mendelssohn Bartholdy, grandson of the composer Mendelssohn, has been dismissed from the University of Hamburg and the Institute of Foreign Affairs, of which he was head.

Famous in international law, Bartholdy was dismissed because of his Jewish nationality He was a pioneer in agitating against the claim of Germany's sole war guilt. His grandfather's music is no longer played in Germany.

Gerber Esser, a noted Jewish professor of civil law decorated in the war, also was dismissed.

ONTARIO'S ATTITUDE

Hon. W. H. Manie, Minister of Mines Northern Ontario, who stated that there is still a lot of room for private adopting in the near future any policy of stabilization for mineral detention

Obligation Rests With Four Western Provinces

Dominion Government Has No Control Over Refunding Timber Dues

Ottawa, Ont.—The obligation to refund timber dues rests with the four western provinces of Manitoba, Saskatchewan, Alberta and British Columbia and not with the Dominion, under the terms of a judgment handed down by the supreme court of Canada.

In its judgment the court dealt with a reference made to it by the Dominion Government. The reference developed from a statement before the Dominion and the western provinces concerning dues paid by homesteaders for the privilege of cutting timber on their lands for commercial purposes.

U.S. Veterans Parade

Col. LaRoche Witnesses Imposing Spectacle In Chicago

Chicago.—Like a moving human spectrum, dazzling in color, awe-inspiring in magnitude, the American Legion marched 100,000 strong down broad Michigan boulevard.

Then the grand parade of American "Buddies" who did their part in the Great War, along with their women's auxiliaries swung into the 5-1-der Field amphitheatre to be reviewed by an assemblage of distinguished persons, Col. L. R. LaRoche, Canada's deputy minister of defence, among them.

The march past, which lasted for 10 unbroken hours, was the lone legion activity on the 15th annual convention program.

Keeping Within Bolshevik

Toronto, Ont.—Hon. E. A. Dunlop, Ontario provincial treasurer, has announced the government's plan to cut down controllable ordinary expenditures by $4,000,000 had been carried to a successful conclusion and the ordinary expenditure for 1933 would be well within the estimate of $34,- 900,000.

CANADA NOW ON THE ROAD TO RECOVERY

Ottawa, Ont.—Reasons for the opinion Canada is now on the road to recovery are set forth in a statement with which Prime Minister R. B. Bennett will launch the campaign in connection with the refunding loan when it will be offered to the public this week.

"With due precaution against unwarranted optimism I think I may say that in Canada we are now on the road to recovery," the Prime Minister declares.

"The events of the past six months appear to demonstrate with increasing clarity that the downward trend has come to a definite stop and that an upward trend is now in progress."

Mr Bennett turns to the latest statistical reports on industry and trade. These records, he believes, show that Canada's general economic condition reached its lowest point during the month of February last, and that "today we are definitely above that level following a recovery which has been gradual but persistent and unmistakable."

Available records of industry made April show that 134,000 have been added to the payrolls while estimates based on these partial reports place the entire increase in employment for the year at 240,000 or 246,666.

External trade figures are also offered as proof of the upswing Both exports and imports have increased and Canada's surplus of exports over imports during the 11months ended with August of this year totalled $114,000,000.

"All these facts and figures I think may be quite safely taken as signposts on the road to recovery," the Prime Minister declares.

Farmed In Peace River

Former Westerner May Be Scottish National Labor Candidate

Kilmarnock, Scotland. — Kenneth Lindsay, former farmer in the Peace River district of Alberta 10 years ago while studying emigration, may be the first Labor candidate in the Kilmarnock by-election. Lindsay has also lectured in Canada and he was the first Labor president of the Oxford union.

The by-election is due to his appointment as Craigie Aitchison, Labor judge-elect. The only Nationalist Labourite elected in Scotland in the last general elections. He had a majority of 7,000 in a straight fight with Labor.

Movies In Churches

Bishop Of London Has Approved Showing Religious Pictures

London, Eng.—With the approval of the Bishop of London, "talkie" films are to be shown in churches and mission halls throughout his diocese.

The films will include scenes from the life of Christ, the last days of Livingstone, the martyrdom of Huss, and incidents of missionary life. A travelling projector will be used with the movies, and in due time it is hoped to elaborate this scheme by the introduction of a series of "talkies."

Supervised Farming

President Beatty Of C.P.R. Favors Plan Idea

Winnipeg, Man.—Supervision of farming in western Canada is essential to the improvement of farm practice generally and is a necessary incident to any federal immigration scheme in the opinion of E. W. Beatty K.C., president of the Canadian Pacific Railway "Farm management, for many years to come, will I think, be an important factor in the success of farming operations in Manitoba, Saskatchewan and Alberta," Mr Beatty said.

Think Port's Future Assured

Churchill, Man. With the restoration of immunity rates the future of Churchill is assured, grain men of the northern Manitoba port believe. Despite a temporary setback sometimes when lower freight rates were put into effect, sailings equal to last season's record number, carried a greater quantity of grain to overseas ports.

Fascist Party Being Developed In England

Young People Studying Movement Under Hon. Herbert Greenfield

Calgary, Alberta.—Within three or four years after the present rate of development, England would have a Fascist party that would be a power to be reckoned with, Hon. Herbert Greenfield told the young men's section of the board of trade. Mr. Greenfield was formerly agent-general for Alberta in London, England.

Unemployment and economic pressure is driving England's youth into the ranks of the communist and the Fascist, Mr. Greenfield declared. The younger generation is giving profound study to communism and politics and new movements are springing up.

British War Debts

Reported That U.S. Government Plans To Make Reductions

New York.—The Washington correspondent of the Herald Tribune announces that the United States government will make a move to reduce the British war debt when it goes to Geneva for the disarmament conference. Mr. Hoover has been urged by Democratic leaders to take the initiative in this matter, and it is believed that there will be a definite announcement of the plan before the conference opens.

Amazing Record

Here we see Miss. Suzanne Lenglen, famous French lawn tennis star, demonstrating a stroke in lawn tennis to some young enthusiasts in London. She is seen wearing an unusual creation which consists of a floral wrist which knickers are combined.

Bird Banding In Canada Provides Valuable Information In Tracing Movements Of Wild Life

The economic importance of wild birds and their relation to man's existence is being more widely realized, and by the banding the fullest knowledge of their movements and habits is gradually being extended, in order to bring proper methods of conservation, by the enactment of good game laws, properly limited bird associations, and other means, it is essential that as much exact scientific information as possible be available concerning all species of native wild birds.

Scientific bird banding as a means of studying and saving the many and varied species inhabiting the migration, range, breeding grounds, and general life histories of wild birds is conducted in full co-operation between the National Parks Service of the Department of the Interior, Canada, and the National Bureau of Biological Survey at Washington, D.C. Head of the banding work in Canada, by telegraphic instruction from the two governments of Canada and the United States.

The general public is urged to aid in this work by watching for bands on the legs of any birds that may come into their possession and to report at once the number on the band, the date on which the bird was taken, as well as the locality, and whether the bird was killed, found dead, or captured alive.

All official bands are of aluminum or copper and are inscribed with a serial number and with a letter designation. There is reason to believe that such year, many bird bands are destroyed, but few various persons not reported to the Department. Recently, official bird bands recovered from wild birds have been found among an entire strong together as necklaces and as toys by children, and, in many cases pieces in wilderness and the surrounding country.

Bird banding may be carried on only under Dominion permit and these bird official bands may be placed on wild birds. Full information as to the manner in which bird banding is being conducted will be gladly furnished persons who are interested, upon application to the Commissioner, National Parks Service, Department of the Interior, Ottawa.

Radio Stations Guide Ships

Thousands Of Shoreless Calls Are Answered Every Year

An instance of the work done by Canadian government wireless stations in guiding North Atlantic shipping is provided by the Chebucto island direction-finding station at the entrance to Halifax harbor. A yearly average of 4,000 to 5,000 calls from ships off the coasts are answered by this station. Since its establishment in 1917 the number of vessels along this section of the coast has greatly increased.

Located nine miles from Halifax, the Chebucto Head Station was erected by the Department of Marine for the purpose of giving bearings to ships and masters of vessels in distress. A staff of five operators is maintained.

Three stations are located at Sable Island, St. Paul Island, Triangle, and Read Hill, St. Paul Island, Nfld., and Primrose Cove, Cape Breton, are transferred at one or two year intervals.

He Came For Pemmican

Canadian Bound To Improve Ill Canadian Northern Constitution

There is a present danger that there may be new wave of pemmican among over the people, and possibly in the West, because conditions in the farming community have not improved up to expectations. There is absolutely no reason for any such movement. In one way Canadians can make the Doctor anti-antitoxic, and that is by the promotion of confidence, which is a species of "antitoxine" to which there is nothing but good.—Regina Star.

Food has changed since early days in Appenbury remarks.

W. N. U. 2035

Canada's Bright Years

But Only Commercial Men Know Anything About Them

The annual issue, the third of which is the national statistics of Canada, is not only a monthly fine ornamental but also has a very practical purpose. It shows the country's progress in various export from its value to business, for the production of mining, the growth of the lumber engine in Canada from 1,382,215 pulpmen of spruce valued at $1,000,000, and 8,733,153 pounds of paper with a value of $600,714, and other resources through hands unskilled by business.

So Canadians have visitors born in parts of Central Australia that they have destroyed the native heritage, causing large areas to become practically valueless.

A fairly established export trade in furs, the report shows. During the fiscal years 1926-27 exports from the Dominion amounted to 7,992,000 skins, valued at $2,330,000 and 7,625,000 pounds of skins worth $5,000,000.

Rabbits and horse were introduced into Australia from England in 1859. By the end of the nineties they had overrun every section of the Commonwealth.

The Weekly Newspaper

Is Taken Home And Read By The Whole Family

An Alberta weekly newspaper-man that there are 14 country people in the province go to the post-office for their mail they litter their floors within by a lot of mud material, but never with the newspaper they receive. It notes that circulars and other matter are immediately and ultimately consigned to the floor, but that newspaper are accorded individual attention. They may be consigned to waste-paper rate later, but never until after they are taken home and read by the whole family, including hired men.

This is true, as it is also usually supplemented. The newspaper merits much of interest and value. It advances the great world without. It is not only a welcome visitor, but a verit-able member in the home.—Portland Regina Leader-Post.

Wives, liquors and cigarettes said after dark in Brantford, Ontario-Riverside, are now subject to a special tax for the benefit of the unemployed.

Annual Loss In Money

Estimated By Authorities In Australia, Reaches $500,000

Pointing out that Australia is now contributing its annual campaign to the Empire Exhibition, Vice-Consul H. H. Hunt calls attention to the losses wrought in the Commonwealth by rats, mice and pests.

It is estimated, he points out, that the destruction caused by the rabbit amounts to between 30 and 40 millions pounds sterling annually, a sum almost equal to the country's national debt.

Not only is the loss computed on the basis of loss to crops, but to the reduced carrying capacity of the land, the loss of stock in drought years through the rabbits eating out the native herbage and bush which normally would be a covering for stock, and the loss of water in dams and other reservoirs through hands unskilled by business.

So Canadians have visitors born in parts of Central Australia that they have destroyed the native herbage, causing large areas to become practically valueless.

A fairly established export trade in furs, the report shows. During the fiscal years 1926-27 exports from the Dominion amounted to 7,992,000 skins, valued at $2,330,000 and 7,625,000 pounds of skins worth $5,000,000.

Western Provinces Account For More Than Half Of Acreage In Canada Devoted To Oats

The cultivation of oats is of more recent date than that of wheat and barley. While the origin of the cultivation of wheat can be traced in all probability to a warm climate and that of rye to a cold climate, oats were found occupying an intermediate position. It is not possible to find any record of their use by the ancient peoples of Egypt, Palestine, Greece, Rome, India or China. Probably oats were cultivated at an early date by peoples who inhabited east-central Europe, and some historians point more definitely to Turkey in Western Asia as the probable home of their first cultivation. Oats were less important than wheat, barley or rye in the early development of southern Europe, but became much greater use with the civilization and expansion of the central and northern countries of that part of the continent. The crop, being particularly suited to the cool, moist climate, became a leading crop.

Having many other uses besides that of food for man, the oats crop has consistently expanded in natural sequence of crop cultivation. At first only such crops were grown as would serve for human food and natural weakness provided sufficient forage for domestic animals. With increasing population came more and more ground to be devoted to the production of cereals for human consumption. The value of hand reaps and natural pastures were broken up. Other crops were grown as food for livestock, and then the use of fodder crops, like oats, has become an increasingly important part of husbandry, especially in temperate regions.

In the banks of acreage and tonnage produced, oats rank second only to wheat. In 1922 the acreage of wheat in North America was 82,646,000 acres and yielded 1,184,000,000 bushels, while in Europe, excluding Russia, 86,500,000 acres produced 1,-665,000,000 bushels. Oats sown in Europe on 54,800,000 acres yielded 1,625,000,000 bushels and in North America from 43,200,000 acres 1,-060,000 bushels were produced. The same year 2,640,000,000 bushels of wheat, 1,625,000,000 bushels of oats and 600 bushels of oats from 96,500,000 acres. In Canada oats weigh thirty-three pounds to the bushel and wheat sixty pounds. The United States bushel of oats is thirty-two pounds.

While the area given to oats is considerably less than the area sown to wheat in North America and Europe, production of oats, in bushels, exceeds that of wheat by about 800,000,000 bushels due to higher yields per acre. On a tonnage basis, of course, the production of wheat exceeds that of oats by a considerable margin.

Oats are produced over a wide area but heaviest production is found in the middle western areas of the United States, Canada, the United Kingdom, Germany, France and Russia. These six countries produce about seventy-five per cent. of world production of oats.

The nature of the disposition of the world production of oats is indicated by the fact that although world production amounts to about 4,500,000,-000 bushels, world trade in oats amounts to only about 150,000,000 bushels, or slightly over two per cent of production. Therefore, the great bulk of world production of oats is consumed at or near areas of production.

The chief use of oats is as a food for horses. Here are the standard feed grain for horses and, alone or in combination with other grains, are used in the meantime Canada dropped peers. Peter had last seen her with The Maison, he remembered, whom he has befriended.

Now On With The Story

CHAPTER XIII.

When Peter first had admitted to Gus that he was serious about Camilla Hoyt, the latter had reserved his friend with jeering scorn. "Sure, if you want to land in the gutter just go ahead and fall for all the evil dames that cherish your handsome mug. Be a gigolo. Let some dowager pay your tailor and your barber and your hotel bills and lend you an ear and by a gold leash and collar. Go on, you're built just for that. Let ve be men who are not so good to look at, do the work of the world and take the honors."

"That'll do for you," Peter warned, half angry. "Whether or not I love Camilla and whether or not she has money, will not affect my work in the least."

"Oh, no? Well, I've seen that workout. And it's a weak-end, always. Forget the love-stuff, kid, and be a man."

"When you find love, you are a man," Peter said soberly. "If you weren't one before, you have to be then."

"Say, what kinda true confession magazines have you been readin'? I thought I was wrinchin' your habits better'n that!" he jeered.

To escape such tirades without an exhibition of anger, Peter had decided that if Gus knew Camilla, he would understand how serious he was about her. So he arranged for them to meet. The three had dined together one evening, in an obscure little restaurant on a side street where a bombastic sign in the window had promised, "All You Can Eat for 60c." Camilla had insisted upon going there when Peter suggested the dinner.

He had demurred.

"Where," she demanded, "would you and Gus have dinner, if you were alone? Tell me the truth."

He met her eyes with an amused gleam. "Well, the best kind of place to take Gus is one where they advertise a flat rate. He's a snobbish man that I am but his capacity for food is on the down and down."

"That is where we shall go then—to a flat-rate restaurant. You find one—or I shan't go anywhere with you."

That was that, and settled the matter. The walls of the restaurant which they selected were of green, the decorated with a black frieze, instead of painted murals and tapestries. The music was of clattering

OCCASIONAL WIFE

By
EDNA BOND WEBSTER
Author of "Jeanette," "Lipstick Girl" Etc.

BY McNAUGHT

Camilla Hoyt, young and beautiful, falls in love with Peter Adams, fellow student in an art school. She is the adopted daughter of a wealthy family, and he is a poor struggling sculptor. On their first date Peter spends most of his money to show Camilla a good time, and then decides he must give her up because he cannot stand the financial pace. A chance meeting, however, paves the way for another date. This time they walk in the park. Camilla tells Peter that she is not rich; or, at least, will not inherit the Hoyt fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. Together in the park, Peter and Camilla try to arrive at some plan for the future. Mrs. Hoyt, Camilla's foster mother, suspects from Camilla's actions that a romance is brewing. She is anxious to see Camilla wed wealth Mrs. Hoyt immediately begins to question the girl about the interest Peter is showing her. She manages to be present on one occasion when Peter calls for Camilla, but the latter's clever stage management thwarts her plan. At a school party, Avis Worth, another wealthy art student, who is attracted to Peter, claims a dance with him, and in the meantime Camilla disappears. Peter had last seen her with The Maison, he remembered, whom he has befriended.

Now On With The Story

CHAPTER XIII.

When Peter first had admitted to Gus that he was serious about Camilla Hoyt, the latter had reserved his friend with jeering scorn. "Sure, if you want to land in the gutter just go ahead and fall for all the evil dames that cherish your handsome mug. Be a gigolo. Let some dowager pay your tailor and your barber and your hotel bills and lend you an ear and by a gold leash and collar. Go on, you're built just for that. The Gillett Lye Household Institute has now in readiness a booklet telling this powerful cleaner and disinfectant of many household uses. Send for your copy today. Address: E. W. Gillett Company of Canada Limited, Toronto, Ontario.

EATS DIRT

"I'll Not Listen To Another Word."

national-silver on vitrolite tables and soprano voices of waitresses calling their orders to the cook.

"But what are you gonna do with her, kid? You can't breed a wife like that any more than you can own a Rolls-Royce or a yacht. The upkeep is about the same. Or do the car and the yacht go with her?"

"Not much She goes with me."

"Yeah? Whither thou goest, I will go'—that kind of honey? Say kid," he pushed his hands away with a gesture of disdain, "That's what they all say until they get you. Then when they've slipped the collar and chain on, they make you do the

"I'll Not Listen To Another Word."

follows'n' and take all the fancy steps they do, besides. Good-bye career, for you."

Peter did not enlighten Gus concerning Camilla's situation. That was her secret, and her private affair, anyway. So he ignored Gus's ridicule and dire prophecies, and avoided further references to Camilla as much as possible. The two had met subsequently in the course of classes, and Gus had been affable in his attentions to Camilla at tonight's reception.

The second time he danced with her, he remarked in a confidential tone, "You're pretty keen about Peter, I guess."

"Everyone likes Peter," she agreed.

"Sure, swell guy. But I mean seriously, Miss Hoyt, you and Peter have things settled pretty well, I believe."

"Did Peter tell you?" surprised.

"No, but I have two eyes, two ears and a brain that works every other impulse or so," he grinned indulgently.

Camilla laughed. "Well?"

He relented. "I didn't ask you that just to be inquisitive. I had a reason, and a good one. I know some things about Peter that I think it's my duty to tell you. For his good and your own."

Camilla looked up accusingly, with a little puzzled frown. "I shouldn't want to know anything about Peter that he didn't tell me himself."

"Why not?" he demanded

"Why that wouldn't be fair to him, it seems to me."

"You're a queer one," he said. "There's more a woman can be his own help in a man, when he knows things about him he tries to keep from her How about that first night when he took you out and almost broke the bank tryin' to treat you into thinkin' he was in your class?"

That was sufficient argument for Camilla. She never had overcome her chagrin over that episode. "Well, of course, anything like that," she admitted.

"Exactly what I mean," he declared.

"Why, if there is anything I can do to help Peter instead of hurting his chances, I'd like to know about it," she agreed.

"How about walkin' outside for the rest of this dance, while I tell you something, then, for your own good as well as his?" Gus invited.

Camilla consented readily.

They strolled toward the blue hedge, which was no longer Fragrant with patches of bloom, but the night was sweet and warm with the promise of summer. There were some benches around here, somewhere," he said. "We could sit down and rest a little we talk."

Camilla knew well where the benches were, and located one easily.

"Where I" exclaimed Gus, "Society's not in my line. A little of that goes a long way with me. Of course," he amended in a lower voice, "it's different dancin' with a sweet girl like you."

"Let's talk about Peter," she suggested quickly. "What do you think I should know about him, Mr. Mattson?"

"So she doesn't want to hear about me, at all," he soliloquized. "I don't blame her. She wants to hear about Peter. Aw' right, me' right, baby, get a load of this." He announced tiredly in reply to her question. "That he's a dead and a double-crosser!"

Camilla gasped, astonished to silence for a moment. "Why, how dare you say that about Peter?" she finally demanded.

"I dare to tell you because I'm too crazy about you myself to see you fooled by a slicker like him!"

Camilla stood up angrily. "I'm not listen to another word you have to say."

"Wait a minute," Gus pleaded in a kinder tone, "you'll be sorry as long as you live if you don't listen to me."

She hesitated. "Whether I listen to you or not, I shall not believe a word you say against Peter. So we'd better go back to the party."

"I'll take you back—when you've heard what I've gotten to say. Sit down, please Miss Hoyt." Her loyalty to Peter befriended him, but he managed to appear calm and disinterested as-cept in her welfare.

Camilla obeyed reluctantly, sitting rigidly on the edge of the bench, away from Gus and facing him, in an attitude of defiance. She knew that Gus was not a gentleman. He was the kind of man whom no amount of culture could refine, no amount of training could develop even his talent. He scoffed at refinement and knew all there was to know, told the world, too, in no uncertain terms. She had tolerated him only for Peter's sake, who pitied him and believed that what he needed and desired most was a helping hand. Peter was so kind-hearted and gullible, and this was the way he was being repaid for his charity.

Little Helps For This Week

"Whoso putteth his trust in the Lord shall be safe."—Proverbs 29:25.

"I will cry unto God most high, unto God that performeth all things for me."—Psalm 57:2

May all our restless hearts keep still, And wait in cheerful hope; content To take whate'er His gracious will, And all-discerning love hath sent. Nor doubt our inmost wants are known To Him who chose us for His own.

G. Macdonald.

God has brought us to this time.

If we are not fit to cope with that which he has prepared for us, we should have been utterly unfit for any conditions we imagine for ourselves. In this time we are to live and grow, in, and no other. Let us humbly look at it, and see clearly what that time can could go back with it. If many times have deserted it in that time many make us more in earnest; that they may teach us not to depend on ourselves, but on God; that they may teach us to be prepared.—F. D. Maurice.

Carscaddon's Hardware

A Reminder!

A few years ago thousands of Alberta farmers petitioned and worked for the building of Alberta Pool Elevators. As a result the Pool system across the Province is a close success.

The same reasons which inspired grain growers to ask for the service and protection of this co-operative system of elevators suggests that patronage should continue to be extended to them on a generous scale.

VOL. 12, No. 39 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, OCT. 12th, 1932 $1.50 PER YEAR IN ADVANCE

Dominion Refunding Loan Over-subscribed

Objective of $325,000,000 is Far Oversubscribed, is Reported

With a last rush of subscriptions Saturday, Canada's $325,000,000 refunding loan closed at noon Saturday oversubscribed by a substantial margin.

The amount of oversubscription will not be known until returns by assistant receivers-general are completed Monday night. Last-minute subscribers have until 6:00 o'clock Monday night to validate their applications by deposit of maturing Victory bonds.

It was stated again Saturday by finance department officials that whatever the amount of oversubscription, the total of the loan will be strictly limited to $325,000,000. The adjustment will be made by allotment of cash subscriptions.

Institute News

Mrs. W. C. Short of Edmonton, President of the Edmonton Women's Institute and Provincial Convener of the Committee on Canadian Industries was the speaker at a well attended meeting of the Fort Saskatchewan branch of the Alberta Women's Institute. The mass of authentic information and the wealth of detail given on the scope and importance of Canadian industries showed the exhaustive study which Mrs. Short has given to the subject. The volume of exports of Canadian manufactured goods is surprisingly large for a country of such limited population. Mrs. Short pointed out that by buying Canadian manufactured goods employment was given our own people. Mrs. Grenset thanked Mrs. Short for her instructive address.

Mrs. Short was accompanied by Mrs. John Short, Mrs. Abraham, and Mrs. Jarvis.

Afternoon tea was served by Mrs. Ashton, Mrs. Ardley, Mrs. Barnett and Mrs. Grenset.

MAYOR MONTGOMERY FALLS OFF WAGON; HURTS SELF

We are sorry to hear that Mayor Montgomery suffered a nasty accident last Saturday afternoon by falling off a wagon. He has since been confined to his house, and at time of publishing is progressing favorably.

A.Y.P.A. HOLDS MEETING

A meeting of the A.Y.P.A. was held last Thursday evening at the home of Mrs. Ed. Graham. During the business meeting it was decided that the A.Y.P.A. should put on a play Dec. 22, and a dance on Feb. 9th.

After the business meeting the members amused themselves at singing and playing parlor games.

An enjoyable buffet lunch was served, after which the members played a few more games, then departed for home. All voted at having a pleasant evening.

******

Threshing is practically finished up in this district.

******

Mr. and Mrs. Albert Mohr and daughter spent Sunday with relatives at Colinton, and Clyde, Alberta.

Taken from the Files

19 Years Ago Today

Wednesday, Oct. 21st. 1914

A. Greenlees has taken over the blacksmith business of R. Andrews.

At the annual meeting for the election of officers in the W.C.T.U. the following were elected:

Mrs. A. H. Rogers, President; Mrs. C. H. Johnson, vice-president; Mrs. C. O. Bates, Treasurer and Miss Annie Libbey, secretary.

The new constable club held a very enjoyable dance. forty people being present.

Mr. Roderick Clarke, had the misfortune in nearly losing his right eye.

Local News

Mr. David Gunn just received word of the death of his mother on Oct. 12 at New West Minster.

Two brothers, Pete and Bill Gunn reside in Ypres Valley district.

******

At the convention of the Teacher's association of the Lamont Inspectorate held lately in Edmonton, Miss Weyrebe of Andrew was elected president for the association for the current year.

******

It is reported that Henry Wiesner of Fort Saskatchewan has resigned his farm for a restaurant.

******

On October 5th, Mr. C. Ashton of the Alberta Wheat Pool elevator, shipped car No. 326416 loaded with grain from the Fort, and was very much surprised on October 14th, in getting the same car back again, only empty.

To have cars returned within such a short period is quite a coincidence.

******

Mr. L. Langlois of Lamoureux reports having threshed 62 bushels of Garnet wheat to the acre, on a 35 acre field of summerfallowing.

The grain was in excellent shape and before threshing it was thought it might go around 60 bushels to the acre. As a matter of fact the wheat graded the highest grade allowed for Garnet wheat viz: No. 2.

******

A new "Neon" sign graces the front of the hotel here. This is the first of its kind in Fort Saskatchewan. It will be noticed that the name has been changed from the "Queens" to the "Fort" hotel. Mr. Pettet having made this change since taken over the property a few weeks ago.

******

The treasurer of the Canadian National Railways acknowledges the receipt of [illegible] more paid into the office.

Weekly Editors To Hold Convention in Edmonton

Alberta division of the Canadian Weekly Newspapers association will hold its annual convention in Edmonton, in the Macdonald Friday and Saturday. D. O. Wright, editor of the Cardston News, president, will preside.

It is expected that 50 members will register during the forenoon. There will be one session Friday and two Saturday. On Friday evening city newspapers are tendering a joint dinner to the visiting newspapermen.

As the Editor is a member of this association, he expects to attend the convention. therefore The Record office will be closed on Friday and Saturday of this week. We hope this will not inconvenience our customers in anyway

LOCAL MAN CONSTRUCTS BATTERY CHARGER

Those who are using batteries on the farm will be interested to know that home-made Wind Driven Battery Chargers are being made right here in the Fort.

The charging of storage batteries is the greatest bugbear of the battery radio set owner, and a wind driven charger has been constructed to take care of not only one battery, but several.

As the propeller and generator are the most important parts in the construction of this machine, Mr. Arthur J. Hopper, Radio Technicist and Motor Mechanic of Fort Saskatchewan has been experimenting along these lines for the past year. After making several different propellers, he has finally built a charger that works efficient.

Mr. Hopper has tried out two types of propellers, one the direct-drive, and the other a geared-up style, both having different sizes and shapes of propellers. While the direct-driven is much simpler and can be constructed with less cost, it will give good satisfaction and would take care of the ordinary radio batteries with ease.

The geared-up type with a large propeller will work much more efficient and will take care of the charging load at an even rate. Both types do excellent work.

Most of the parts outside of the wood propeller are used car parts.

With a properly constructed wind driven charger of either type, it is either surprising the results obtained.

The direct-drive or the geared-up type, should start charging at a 10 to 12 mile per hour wind, and it is very seldom nowdays that there isn't any wind.

Anyone handy with tools would be able to construct this simpler charger at home.

Mr. Hopper uses his latest model to light several rooms in his home, by using car bulbs with reflectors. He will be pleased to show anyone interested in constructing a charger, the fine points or will build one to suit the purchaser.

CARD OF THANKS

The St. George's W. A. wishes to take this opportunity of thanking all those who helped make their thanksgiving supper and dance a successful affair.

******

THE SWASTIKA NOT "PURE ARYAN"

Not the least of the inconsistencies of the fervid Nazi super-nationalism that would cast out of Germany all that is not "pure Germanic" in origin is the "Swastika" emblem, adopted as the symbol of Teutonic purity and superiority. For the Swastika—the cross with the left-turn arms—is probably the oldest symbol of which there is historic record.

Long before the time of Christ it was used by the Chinese, the Greeks, the Hindus and the Arabs of northern Africa. It also was used in pottery designs by North American Indians.

The word "swastika" is ancient Sanscrit, and means "So well" or "Good Luck."

In Canada the badge has been used for many years by the Boy Scouts as the emblem of a "Thanks Badge," for presenting to by those entitled to wear it, but that those who have rendered Scouts signal important service.

Following disturbances in Toronto resulting from the carrying of the Nazi emblem by demonstrators, the question was raised as to whether five-point stars representing the 10 the wearing of the Scout Swastika Scout Laws.

In Canada the badge has been used should be continued. Dominion Scout headquarters takes the position that the badge should not be taken down

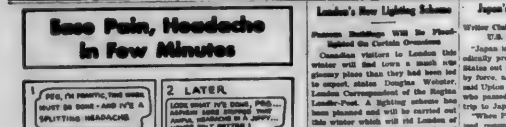
Ease Pain, Headache in Few Minutes

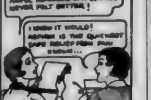


For Quick Relief Say ASPIRIN—*When You Buy*

Many common annoyingly painful colds start headaches, rheumatism, neuritis, neuralgia ... *the fastest safe relief, is what we feel you deserve.*

Those results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture! And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And that is ready for it to start almost instantly.*



When you buy, DEMAND, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

A Time For Thought

Winter approaches and the year progresses steadily to its close. The major activities of the great western agricultural land are rapidly being completed for another season. The hours of daylight are becoming fewer, the days shorter, and the evening and hours of darkness longer. As Nature thus works out its annual changes, man, too, alters the routine of his life. As his activities on the land become lighter, he rises later in the morning and retires to rest later in the evening. And he employs evening hours in ways not possible to him when physically tired out from a long day's labor in the fields.

In the late Fall and Winter months thousands of people in Western Canada devote themselves to reading, to study, to forms of recreation, to community gatherings, which are not possible during the strenuous months of plowing, seeding, harvesting and threshing. They have time to think of the time for self-improvement, for checking up of oneself, for planning for the future.

Possibly, because of the very nature of the times through which the world is now passing, with a multitude of, as yet, unsolved problems; because of difficulties to be overcome which are taxing the resourcefulness and testing the courage of everybody; because of the danger of buildings of superior surrounding neighborhood faith,—because of all these world conditions it is probable that people will do even more thinking and study than in times past.

Unquestionably people are thinking, perhaps as they never thought before. Admittedly, there is much loose thinking, reckless thinking, by some. There are others who, perhaps, imagine they are doing some real thinking but who, in reality, are allowing others to think for them and are merely adopting the thinking of others. But many others, probably the vast majority of people, are thinking for themselves, thinking seriously, and earnestly endeavoring to find a solution to do so in even more earnest, serious fashion during the next few months.

For investments, says one writer, are as sure and profitable as the effort to equip oneself to the best fundamental accomplishments:

1. Learn to think accurately and comprehensively.
2. How to express thought in talking and writing.
3. How to work skilfully with the hands.
4. How to take one's place among men.

The next four or five months will provide a golden opportunity for many of us to make such investments. As we read a newspaper, magazine or book, and entertainment is provided, let us endeavor to analyze it, and to think out for ourselves the wisdom or foolishness of the thought expressed or ideas advanced by the writer for the time being engaging our attention. It is an opportunity to test the accuracy and comprehensiveness of our own thinking.

Or, as we listen to some speaker over the radio, to an address of some man, a well known in public life, an acknowledged leader in the business or industrial world, a great scientist, inventor, traveller, author, or social worker, and as we glean information, and hear definite opinions advanced, let us, of course, advance our knowledge and our views. But we will have missed a real opportunity for self-advancement if, at the same time, we fail to ponder over and analyze what we hear, and bring our own thinking apparatus into full play, and apply the test of our own nature, constituted thought, to the views expressed and the ideas advanced.

It is well to be a good listener, a consistent reader, but it is better to be a student. Let us absorb from others; in that way information is gained and knowledge advanced. But let us be something better than a sponge which merely absorbs. Let us train ourselves to sift the true from the false; the good from the evil; that which is strong from that which is weak; selecting that which is constructive from that which is purely destructive.

There is much to criticize these days, and destructive criticism is about the easiest thing in which any person can indulge. But there is also much to commend and applaud. War with all its horrors and sufferings is to be condemned. condemned as the peoples of the world have not yet seen fit to condemn it.—but even in the days of war there was sometimes developed attributes of character of the finest and noblest type. The present commercial depression is a world tragedy. Its evils must be mitigated, and a repetition of it prevented as far as it is humanly possible to prevent such evils, over which man alone has not complete control. But out of the depression there is slowly but surely arising a greater conception of man's relations, duties and responsibilities toward his fellow men.

There is a better way of life for every individual, for every community and nation, for the world. It will be brought about, not by any one man, nation or state, not by some tremendous upheaval, not by a rapid overthrow of what now is, and the equally rapid substitution of something else, but by the efforts of any one man, or party, or nation, but by the individual efforts of all contributing to one great common end. The man or woman who does his or her own thinking, deep, serious thinking, and who applies their own God-given powers and energies in the particular task which confronts them, will be the real creators of, and leaders in, the new era that is dawning.

Here is the time for every person to fit himself or herself for the great work now at hand and ahead.

London's New Lighting Scheme

Famous Buildings Will Be Floodlighted On Certain Occasions

Canadian visitors to London this winter will find town a much more gloomy place than they had been led to expect, states Douglas Webster, London Correspondent of the Regina Leader-Post. A lighting scheme has been planned and will be carried out this winter which will rid London of its reputation of a city of dank and gloomy pitmen.

Famous buildings such as the clock tower of the Houses of Parliament, the National Gallery, Westminster Abbey and St. Paul's Cathedral, are to be wired for floodlighting and illuminated at certain times.

The London society has the plans in hand. Its intention is to flood-light certain buildings frequently and especially on such days as have national significance. The cost will be borne privately.

The project was first mooted by the Incorporated Association of Architects and Surveyors some three years ago. Nothing came of it. Sir Lionel Faber, Bart., M.P., has the matter well in hand and it is hoped that the first display of floodlighting under the auspices of the society will be with the British Industries Fair which takes place early in 1934.

Although this floodlighting is designed to help the Industries Fair the scheme will not stop there. The Royal Society intends to make it a permanent feature of the London cen-tre.

Japan's Activities In Pacific

Writer Claims Japan Intends To Put U.S. Out Of The Picture

"Japan is now definitely and methodically preparing to put the United States out of the west Pacific picture by force, as she did Russia in 1904," said Upton Close, author and lecturer, who passed through Victoria after a trip to Japan and Hawaii.

"When President Roosevelt authorized resumption of building of the United States navy the Japanese gave up hope of bluffing and persuading the people of the U.S. to withdraw from the Pacific," he said. "Japan now means business."

The author said he was banned from Manchukuo because of his criticism of Japans activities in that state.

"The Japanese people have been propagandized to the point where they will now not permit any ruling clique to abandon the campaign for domination of China and the Pacific," he asserted. It was high time the people of North America ceased to be deluded by Japanese Government officials who declared war with the U.S. was "unthinkable."

Famous Maritime Town Moored In Atlantic

Forerunner Of Many Others Likely To Rise In North Sea

A vast uncharted island, forerunner of many others which will give to the world a new race of inland dwellers, is said by a Berlin correspondent living to rise shortly in the North Sea. A time in the near future has been visualized when there will be maritime towns moored in the middle of the Atlantic and complete with factory hotels and landing grounds for aircraft. Fast airplane services will be begun from the mainland and in between the inland communities, aerodromes, with powerful wireless stations, will be built. Then will come the hotels, theatres and shops that will discover this new world on their doorsteps. The islands will have their trees, flowers and parks. The sea will be harnessed to provide electricity, and the wants of the communities will be supplied by aircraft carrying aircraft from the mainland.

More Work Under R.B.A.

Expect One Million Or More Here Soon Re-Employed

Possibility that there would now be big plotted in the United States by the N.R.A. may show re-employment of 1,000,000 or more people in the course of present estimates is being held out by statisticians to Hugh S. Johnson, the administrator.

They have calculated that the actual count of means by direct solicitation will reach tens of thousands of employers who do not report regularly through ordinary channels and may show that between 4,000,000 and 5,000,000 persons will be found when since the low mark of last winter. The present accepted figures, based on reports made to the labor department by industry and upon trade union estimates, run to approximately 3,500,000.

An Unusual Concert

Glee Club In England Composed Entirely Of Grandfathers

Grandfathers formed a Glee Club and gave a concert in Lambeth, England, recently. Miss grandfathers sang, one grandfather played the accompaniments and the "call boy" was a grandchildren aged 74. A number of members of the audience and grandmothers helped with choruses of such songs of by-gone days as "Daisy Bell," "Running Up and Down Station" and "The Girl in the Finsbury Dress."

Sweet scented gladiolus blossoms are a new triumph for flower growers.

DEPRESSED BY ACUTE ACIDITY

There one surely be no more effective remedy for acidity that can give such prompt relief as in the case of Mrs. Swanson's.

"I suffered for many years from acidity in various forms," she writes. "At last it became so acute that every morning I woke with a gnawing pain and a great depression of spirits. I tried Kruschen Salts, and the effect was magical. The pain ceased and the depression lifted like a cloud. I have taken Kruschen ever since and am well as ever since. That was about five years ago, and the Kruschen does not seem to affect." (Miss) E.M.H.

Kruschen is so effective with sufferers from acid conditions such, Lakes all the torment out of it, and gently expels it from the system. And by stimulating your organs of elimination to healthy regular action, Kruschen will prevent this harmful acid from ever becoming again. After that you'll experience no more misery after meals.

Good Way To Stop Acid Stomach

Any druggist will tell you the best way to stop acid stomach and indigestion is to take a little Bisurated Magnesia after meals and at bedtime. This will stop your indigestion and sweeten the stomach, get rid of gas and belching in no time. Ask any druggist.

Doctor In Blackout Misery

Doctor has been prescribing the vast lists of treatment of life in Great Britain as well as elsewhere and now has entered the realm of natural history. A number of them, the first of their species caught in England, have been encamped by the museum and will form a natural history museum for a while.

Salary cuts in salaries of employees of West Sussex County, England, made in 1931, have just been restored.

Put Where the Test Begins

Yes, sir, there in the pipe bowl is where tobacco does its stuff. And right there is where Ogden's Cut Plug shows itself to be downright good pipe tobacco. For Ogden's packs right, lights right and burns right ...Cool, sweet and fragrant from beginning to end.

See if you don't agree that Ogden's is the tobacco for your pipe. Load the bowl and let the test begin.

OGDEN'S
CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticler cigarette papers

Pictures Made Of Cloth

Work Of Finnish Artist Shown Here For Gift Bazaar

Pictures made of pieces of cloth chosen for their colors and stuck to a flat surface are on exhibit in Montreal, the work of a Finnish artist, Tyra Meri-Kallio. There are landscapes, flower pictures and even a few figure subjects, in which scraps of woven stuff have been used to produce the effect of flesh painting. Silk, woollens and all kinds of textiles are used and a great deal of patience and skill must have been required in working them into pictures to gain their striking effects. The artist works surprisingly like many of the novice types of oil painting.

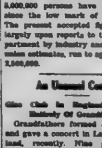
Reproduces Natural Colors

Dr. Charles A. Tostor, of Massachusetts Institute Of Technology, has evolved a special process of reproducing natural colors of photographed objects on instern slides. He has a set of slides illustrating geology, zoology, botany and anthropology taken in all parts of the world.

Farmers of the island of Jersey are jayed over prospects of the biggest potato crop in 13 years.

Some folks don't even like to get up to see the dawn of a new era.

Summer Complaint Plays Havoc With the Bowels



Few people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months.

You cannot tell when it comes you how it is going to last. Let it run for a day or two and see how weak and prostrate it will leave you.

On the first sign of an attack of any looseness of the bowels take a few drops of Dr. Fowler's Extract of Wild Strawberry and see how quickly it will give relief.

SOLID OPPOSITION TO RE-ARMING FOR GERMANY

Geneva, Switzerland — Chancellor Adolf Hitler of Germany, confronted with staunch opposition to re-armament from the United Kingdom, the United States and France, was forced into a position of doing whatever he may accept transformation of the reichswehr without immediate possession of war materials.

In a swift moving climax of the day's disarmament developments, the United States joined Great Britain and France in a united position against an increase of German arms.

It was revealed in French circles that the United States representative, Norman H Davis told Foreign Minister Paul-Boncour that American opposition to re-armament had been made clear at Washington.

Indications were that slow but steady progress was being made toward a solution of disarmament problems despite difficulties still existing on practically all points between France, Great Britain and the United States.

M Paul-Boncour was immensely pleased at the American attitude. France has always been opposed to any German re-armament proposal At a three-power parley, Great Britain through its foreign secretary, Sir John Simon, took a decisive stand in the same direction.

Indication continued that adjustments will be made in a spirit of conciliation which will satisfy Germany, ensure the British Government is known to oppose allocation of military aeroplanes.

It appeared that the British position against re-armament had become even more right than that of the French.

Rail Workers Warned

Must Not Work Machinery Of Independent Stamps Act

Montreal, Que. Warning that railway employees should take no action to wreck the machinery of the Independent Stamps Act was given to members of the Brotherhood of Railroad and Steamship Clerks by Lynn B. Spencer, K.C., chairman of a board of conciliation appointed to hear a dispute between the brotherhood and the Canadian Pacific Railway.

The chairman's warning came after he had granted the request of Frank Hall, vice-president of the brotherhood, for postponement of the hearing. Negotiations between the running trades and the two Canadian roads made the postponement necessary, argued Mr. Hall.

Bad Times Changed

Geneva, Switzerland. — Germany from a victory on the Jewish question in forcing the League of Nations Assembly to reject a clause in a resolution German delegation felt was aimed directly at their government's treatment of Jews. As adopted, the measure expressed the hope all countries regardless of whether they signed treaties relating to minority groups, should extend treaty benefits to their minorities.

Landslide Buries Nineteen

Tegucigalpa, Honduras. — Official reports from a village 30 miles east of here said 19 persons were buried alive in a landslide which struck the village of Apolopa. The reports said a portion of a hill de-tended upon the village. Many houses were destroyed. In the area affected are the Yoloma river and flooded houses and plantations, drowning some people and numerous cattle.

Accident Damages

Calgary, Alberta. Lettie Cameron, of Lethbridge, was awarded $1,000 damages from the City of Calgary by Mr. Justice J. R. Boyle, for injuries received when she slipped and fell at the intersection of two of Calgary's busiest streets last January.

Cancer Cause Cured

Chicago. — Surgeons reported 12,746 cases of cancer have been cured in the last three years. Thirty-one specialists reported this progress in a symposium entitled "Cancer in Curable," sponsored by the American College of Surgeons.

Better Understanding

U.S. Minister To Canada Speaks At Ottawa

Ottawa, Ont. — "I want no green table cloth on our council tables and no bickering for party advantage," Hon. W. D. Robbins United States minister to Canada, told the eighth annual convention of the Canadian Chamber of Commerce at the annual banquet of that body here Mr. Robbins was one of the guest speakers together with Hon. H. H. Stevens, Minister of Trade and Commerce.

The United States envoy assured his hearers he would do everything in his power to bring about complete and cordial relations between Canada and the United States.

J. H. Woods of Calgary a past president of the chamber voiced the appreciation of the gathering for the addresses.

The convention devoted seven hours to an open discussion of ways and means by which government expenditures might be curtailed.

Three suggestions emerged from the discussion One was that the national council should appointed last year at Halifax be allowed to continue its campaign of education for government economy

Another was designed to establish a committee which would work with these various administrations for the purpose of eliminating duplication in their respective spheres while a third was a straight resolution looking to the appointment of a small committee whose duty would be to prosecute a campaign for the lowering of government expenditures

Railway Wage Dispute

Believed Press Commend Not In Interests Of Either Side

Montreal, Que The interest of both sides would best be served if negotiations continued in camera and if no publicity were made by the press to gauge the tenor of the meetings, it was stated at the conclusion of recent negotiations between the Canadian Pacific and Canadian National Railways and the railroad running trades.

As far as could be learned the position is stationary, both the men and their employers persisting in their respective opinions. The men claim an additional 10 per cent. wage cut is unjustified; the companies that it is made necessary by adverse economic conditions affecting the roads.

While these negotiations were proceeding, the Brotherhood of Railway and Steamship Clerks made their submission to a board of conciliation in the case submitted some time ago by the Canadian Pacific Railway.

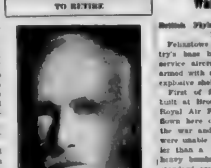
"Royal Scot" Leaves Chicago

Starts On Tour Which Will Terminate In Montreal November 23

Chicago. — The "Royal Scot," England's crack train has headed for the west coast after having been viewed by more than 2,000,000 visitors at a Canadian National railways exhibit.

It steamed out of the fair-grounds under its own power and was scheduled to depart from the Union Station for a tour that will take it to California and the Pacific northwest and back to Montreal, where it will be handed on to a ship for its return voyage November 23.

TO RETIRE



Sir Frank T. Shutt Chemist and Associate Director of the Dominion Experimental Farm at Ottawa who retires this month after more than forty-five years' association with the Experimental Farm

Huge Air Liner Wrecked

Caught Fire From Explosion And Seven Burned To Death

Chesterton, Ind The scattered parts of a giant twin-motor transport plane one of the massive wrecks being suspended from a tree was all that remained of a New York to Chicago sh p of the United Air Lines that carried its seven occupants to a flaming death

Just what happened when the all-metal ship with a top speed of more than three miles a minute crashed to earth in flames almost five miles southeast of here, probably never w ll be known, but witnesses said they heard a terrific explosion.

Five of the bodies were recovered, but none was taken out alive as the flames kept back farmers who flocked to the scene

Due to the complete break-up of the plane and the wide area over which the wreckage was strewn any attempt to discover the cause of the tragedy probably will be difficult, but officials of United Air Lines said they were launching an immediate and thorough investigation.

U.S. Recovery Plan

Sir Josiah Stamp, British Economist, Says It Is A Long Process

London, Eng Sir Josiah Stamp, the economist, claims that American production had fallen off deep in order to fine N R A., especially in the construction field

He asserted some industries were showing no signs of improvement and that creation of public employment was a definite failure He expressed the opinion that the N.R.A. was increasing costs but not purchasing power He added:

"Americans might succeed in spite of herself because of her youth and vigor"

Only Three Needed

Washington Repeal of prohibition in the United States swept into its final stage with every indication that the 18th amendment will be voted out of the constitution on Nov 7 On that date 36 states will ballot on repeal. Approval by only three is needed to cancel the prohibition amendment.

War In The Air

British Flying Boat Armed With Guns

Felixstowe Eng The air ministry's base here harbored the Air service aircraft in the world to be armed with a heavy gun firing high explosive shells.

First of four flying boats being built at Brough Yorkshire for the Royal Air Force, the machine was flown here on its maiden flight In the war and later years aeroplanes were unable to carry anything heavier than a machine-gun, although heavy bombs, of course, have been standard equipment on bombers for many years.

The new machine's armament includes a gun capable of firing 1½-pound shells and three machine-guns the whole installed on what is virtually a 17-ton flying gun platform travelling at 132 miles an hour.

The long-standing problem surmounted by the builders of the new aircraft was that of providing for the recoil upon an aeroplane of the heavy gun Intensive trials will now be given on the craft, after which, with the other of the quartette, it is expected to form a squadron to be stationed at Malta.

Time Cut By Forty Hours

Kingsford-Smith Made Fast Trip From England To Australia

Wyndham, Australia Wing Commander Sir Charles Kingsford-Smith clipped more than 40 hours from the England-Australia flying record when he landed here to the cheers of a mighty throng of welcomers.

The famous airman, hero of a Pacific crossing and numerous other flying feats, left England with the intention that he was not out to set a new mark.

London Eng The breaking of the England-Australia flight record by Sir Charles Kingsford-Smith was such important news in London that it dwarfed such matters as war debts and disarmament.

News of the Australian's success was wired to Sandringham for the information of the king. He, too, has taken a keen interest in the flight.

Visible Wheat Supply

Heavy Increase Shown Over This Date Last Year

Ottawa. Ont Canadian elevators today with 235,170,472 bushels of wheat on October 6, it was reported by the Dominion Bureau of Statistics This was an increase of 7,655,939 bushels from the previous week. A year ago, the visible supply was 210,-932 669 bushels.

Canadian wheat stored in United States consisted of 6,841,114 bushels, compared with 11,098,623 bushels a year ago. Wheat in transit in the Great Lakes consisted of 5,390,618 bushels, compared with 6,063,630 bushels last year.

United States wheat in Canada was shown as 2,991,186 bushels, compared with 8,318 962 bushels last year.

More Cold Storage Foods

Ottawa. Ont With the exception of eggs, pork, fish and apples, all food commodities in cold storage on Oct. 1 showed an increase over the corresponding period last year, the Dominion Bureau of Statistics announces.

DEFINITE SIGNS OF ECONOMIC RECOVERY NOTED

Ottawa, Ont - Reduced taxation and sound financial policies are the only means of lightening Canada's present burden and of bringing about an era of balanced budgets, J MacLeod Clarke, secretary of the Canadian Chamber of Commerce, told the eighth annual convention of that organization His report noted with satisfaction that federal and provincial budgets had been reduced in the current fiscal year by some $50 000,000.

The secretary reiterated the Chamber's willingness to assist the government in the selection of a personnel for a national committee along the lines of the May committee in the United Kingdom to bring about necessary reductions in governmental expenditure

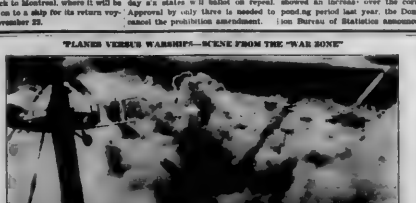
With regard to unemployment insurance, the recommendation was that the Chamber take no further action in the matter other than to watch carefully any legislation which may be proposed to this end, with a view to assisting in the drafting of laws which will be most acceptable.

Fire losses were reduced in 1932 from 1931 and a helpful sign was that in the last year the cost of fire losses were covered by insurance, an increase of eight per cent. over the preceding year.

Thirty-five boards or chambers took part last year in the contests to prevent fire losses held by the Canadian Fire Underwriters. Five cities over 50,000, Toronto won the silver shield Kenora Ont., was winner for cities under 10,000, with Prince Albert Sask., second.

Increasing interest was also shown in the report submitted by the convention for the health and safety contest. Winnipeg won the class one for cities of over 50,000 population and Vancouver second

News of the Australian's success was wired to Sandringham for the information of the king. He, too, has taken a keen interest in the flight.



"PLANES VERSUS WARSHIPS—SCENE FROM THE "WAR ZONE"

This impressive photograph was taken from an aeroplane above the clouds, looking down on an incident in the British aerial-naval manoeuvres that took place recently off the Firth of Forth. The Royal Air Force attacked the British Navy and following "battles" resulted. Looking through the clouds a warship can be seen, while hidden from it by clouds hovers a bombing aeroplane.

Wheat To Settle

Calgary, Alberta. Acting Life Insurance Company, Hartford, Conn., holders of $100,000 of city of Calgary bonds on which Calgary refused to pay New York exchange upon maturity last January, has made overtures for settlement at current lower exchange rates, it was disclosed by Mayor Andrew Davison.

British Delegate At Geneva Stands Firm On Principle Of Protection To All Minorities

With a smashing indictment of the new German conception of racial homogeneity, Great Britain outspokenly opposed, at Geneva, the German delegation's bid for abandonment of the Jews does not come under the provisions of the rights of minorities.

W. G. A. Ormsby-Gore, nominal minister of works and British delegate to the political commission of the League, was applauded by the commission as he wagged his finger at Dr. Friedrich von Keller, the German delegate, and declared:

"Wherever Jews have been to the success of the countries, they have been the most loyal and industrious of the citizens. There is among the Jews a sense of historical community throughout their dispersion. And they do there. A racial minority which deserves the same fair treatment as is extended to other loyal citizens is all the nations to which they are attached."

The German spokesman at the Jews in Germany are neither a racial nor linguistic minority and therefore the minorities' treaties are not applicable. Dr. Von Keller answered the British attack by insisting the league had no competence in the matter; and it was a unique position for a governmental treatment. The Germans also have attacked the whole previous conception of nationalities by the new latter idea that a nation is an ethnic whole regardless of whether its members are within or without its frontiers.

The British delegate bluntly rejected this idea and did not mince his words. "If we accept it," he said, "I hesitate to think of the responsibility of any government for all those in the United States who claim descent from the original Pilgrims in the Mayflower." There are about 3,000,000.

Great Britain herself consisted of three main races, the English, the Scottish and the Welsh, and there should be established into many more, he said

Playing what he called the German theory that a state has the right to concern itself with the citizens of its race living in other countries he grew increasingly emphatic as he hrumbled into one of the warmest defenses of the parliamentary system delivered in an international gathering since the advent of Fascism and Hitlerism.

"Great Britain believes firmly in a parliamentary system in which the minorities can carry their votes to the government and all sides must be heard before laws can be enacted. Liberals Great Britain believes in the freedom of the press."

We have always set self-government even above good government," he also declared. "Great Britain will never abandon parliamentarism. The quality of freedom is the only thing that holds Great Britain—it is the free association of free peoples bound together by real guarantees that peoples all minorities all over the world.

"One of the cardinal principles of the British Empire is that no person should be deprived of the right to hold any post under the crown because of color, race or creed."

Minorities in German delegate told the economic commission of the assembly that some Jews had left Germany because of "their bad conscience."

The commission was discussing a Danish resolution asking creation of a special organization to find homes for Jewish refugees, a proposal supported by the French, Spanish, Danish, and Czechoslovakian delegates.

The German said he opposed any discussion of the Jewish question from a political standpoint. President Canut de Wart, of Belgium, began selection of a sub-committee to study the idea, commenting "I suppose that in view of the German attitude Germany prefers not to be represented."

"You are right," the German replied.

Ancient Bird Cold Job

Owing to intense cold, the animal photographing Hensel Everest not only had to have their cameras oxygen-back, valves and climbing electricity heated, but even the glue in their puppies was kept warm by hot irons running through it.

Sodium Sulphide Plant

Building Planed To Be Started Month Of Maple Creek

Immediate erection of a sodium sulphate reducing plant to cost $150,000 at Big Gravel Lake, 60 miles north of Maple Creek, will be undertaken by the Mechanics and Manufacturers, Limited, of Toronto, it is announced.

The first unit will be in operation within the next two months and will employ approximately 30 men. Ultimately this will be increased by 50 to 60.

The initial construction work which includes the unit, the roasting plant and the power line to the plant, having 66.6 per cent. pass motion.

Fairway In Palestine

Higher Than Visible Obtained In The Holy Land

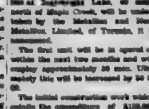
In Palestine, recovered in ancient times as a country of farmers and shepherds, the native types of cattle are being superseded by pedigree stock, from which steadily improving milk yields are being obtained, says the Dominion dairy and seed storage news letter. Ten years ago 500 cows of good strain AYRS lbs. of milk per cow. Today there are 8,500 cows of improved breed with an average yield of 6,815 pounds per cow, while the total production of milk among various including native cows, amounts to 57,942,000 lbs. Some settlements, notably Richard Lawrence, showed an average milk yield of as much as 9,000 litres (12,508 lbs.) per cow.

Japanese Are Pulsatile

Sick And Poor Contribute Toward Flood Relief Funds

Military funds in Japan have been greatly expanded by patriotic contributions since the Manchurian trouble began and a large share of the money has come from school children and factory workers. Rich and poor alike have been invited to add to the league funds for the purchase of guns, tanks, airplanes and other weapons for the army. Mostly it was small sums by the sort a ceremonial presentation of an airplane by the management and employees of a factory, or of a machine gun mortar by the teachers, staff and children of some school or a college. Recently every citizen and man in the army given a month's pay toward national defense.

"Smile that way again," she blushed and simpled.
"Just as I thought you look like a chipmunk."



COLLARS THAT WILL MAKE YOU LOOK FRESHER AND GLAMOROUS

Flour Milling Industry

Holds First Of Third Leading Industry In Dominion

The flour milling industry in Canada is now the third leading industry with pulp and paper holding first place and lumber by slaughtering and meat packing.

Canadian flour mills now have a capacity far beyond the requirements of the domestic markets. The home market uses only 41,750,000 barrels of flour for the domestic flour requirements while the requirements of the Canadian flour mills averaged the total of 120,000,000 barrels for the past five years.

The development of Canadian flour mills is largely attributed to the abundance of readily available waterpower. Five of the big milling plants are now operated upon steam since water-driven electrical equipment has largely supplanted that means of operation.

Four milling in the oldest of all Canadian manufacturing industries and dates back to 1685 when the first flour mill was erected on the Island of Orleans by the French at Fort Royal, near Annapolis, Nova Scotia.

The Canadian flour mill business in wheat and flour from Canada had its inception during the time of the Napoleonic wars in Europe.

The Prosperity Of Dominion Depends Upon Prosperity Of Farmers Of Western Canada

Explodes Popular Belief

Sir Leonard Hill Studies Draughts On Mud Island Yen

Many popular beliefs regarding fresh air and health were exploded by Sir Leonard Hill in his presidential address to the Sanitary Inspectors' Association, Conference of Health, Eastbourne, England.

"Most people still think," said Sir Leonard, endorsing to ventilation, "that they are tired and made uncomfortable by want of oxygen and excess of carbonic acid in crowded rooms and that the smell of such a room betokens the presence of vitiating gases.

"The discomfort in crowded rooms arises not from chemical vitiation of the air but from interference with the loss of body heat by the composition of the nose and moist external reflexly produced in sensitive people when they smell, those acting on the skin.

"Moist is obtained by fanning the air and so cooling the skin and this without making any change in the chemical purity of the air.

"The Black Hole of Calcutta meaning eighteen square feet, had two small windows. In this, in 1756, were crowded 146 people. Nine hours later twenty-three individuals staggered out, the rest were dead.

"We know now that all these people died not from suffocation through want of oxygen, but from heat stroke.

"We have real necessity of some forty-three greyhounds traveling in a furniture van and twenty-four dog, and of three valuable leopards flying in their usual travelling boxes when exposed to the sun in hot weather.

"In place of prosecuting such cases the R.S.P.C.A. might be much better employed in teaching the public to know about the danger of heat stroke. The death of these animals was due to over-heating and not to suffocation, as was supposed at the inquiry."

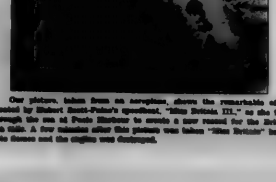
Sir Leonard said we now know that the chill felt before the heat of fever, was not the cause of the fever but the shivering stage which ushered in infection.

And yet to this day children were mistakenly kept indoors in air polluted with microbes for fear of catching cold outside."

Founder Of Silk Industry

Preparations were made at Canton, China, for the consecration of Lu Cho, the famous imperial concubine of Hiang Ti emperor of China. Traditionally accepted as the founder of the silk industry, history records that she discovered over 4,000 years ago the art of rearing cocoons. Under the auspices of the Bureau for the betterment of Sericulture, the temple in her honor was held on the seventh day of the Seventh Moon, which fell this year on August 27.—Chien Weekly Review.

SCOTT-PAINE'S SPEEDBOAT'S EFFORT RESEMBLES A COMET



Our picture, taken from an aeroplane, shows the remarkable effect created by Hubert Scott-Paine's speedboat, "Miss British III," as she tore through the sea at Poole Harbour to create a new record for the British mile. A few moments after the picture was taken "Miss British" broke into flames and the engine was destroyed.

The development of the west centered based "on the assumption that for all time Canada would produce and would be able to sell enormous quantities of wheat every year." This policy had resulted "in large carryovers during the past few years, with the result that of a substantial amount on hand at the end of the present crop year, notwithstanding a relatively light crop, says H. W. Beatty, president of the Canadian Pacific Railway

"It is a debatable question, therefore," he continued, "whether we will not have to revise our plans for the west and not place much complete reliance on our ability to export our wheat, even though it is the finest wheat in the world and produced under present conditions at costs which are moderate.

"One thing stands out above all others and that is the weather and is being observed and that is that their prosperity depends upon the prosperity of the farmer, and this means in it that farmers have to look out upon this prosperity depends the prosperity of Canada. I have never known a time in my whole history when we were not prosperous if agricultural conditions and prices were satisfactory."

"It is usual for those who visit western Canada to return with a greater appreciation than ever of the optimism and courage of the people of that part of the country and my recent visit has only confirmed what others have so often commended," continued the railway president. "Notwithstanding drouth, frost and serious damage in some districts, done by grasshoppers, the farmers of Saskatchewan and Alberta still retain their buoyant view and the rallying of lands for there more favorably situated, has not reached very large proportions. The real effect is in some portions of the country will again, unfortunately, be seriously felt by railroads unless the rates, if efficiently administered, will be chargefully given by the taxpayers of the Dominion."

A Common Occurrence

Suicides From New York's Tall Buildings Are Frequent

High buildings exert a fatal fascination on people whose minds are turned for the time of self-destruction. Suicides from tall structures are so common in New York as to be commonplace. On the occasion of the visit of Lu Che, the famous imperial concubine of Hiang Ti emperor of China. Traditionally accepted as the founder of the silk industry, history records that she discovered over 4,000 years ago the art of rearing cocoons. Under the auspices of the Bureau for the betterment of Sericulture, the temple in her honor was held on the seventh day of the Seventh Moon, which fell this year on August 27.—Chien Weekly Review.

Creamery Butter

Figures Showing Percentage Of Production For Each Province

With respect to the total output of creamery butter in Canada in 1931 and 1932, the percentage of each province is shown in the following figures for the long pieced within brackets: Ontario, 38 (34) per cent.; Quebec, 30 (31) per cent.; Alberta, 19 (19) per cent.; Saskatchewan, 9(8) per cent.; Manitoba, 9 (9) per cent.; Nova Scotia, 3 (3) per cent.; British Columbia, 3 (3) per cent.; and New Brunswick and Prince Edward Island each 1 (1) per cent.

Looking For Prosperous

Air-Commodore S'r Charles Kingford Smith has announced in Wellington, N.Z., that he will fly his famous plane, "Southern Cross," from New Zealand to England next fall if he can secure eight passengers. Two New Zealanders have booked seats with him at £6,000 each.

OCCASIONAL WIFE
by
EMMA BOSS WEBSTER
Author of "Javetta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Boyt, young and beautiful commercial artist, and Peter Anne, a struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to tie Peter down when he has so much promise as a sculptor. At an art school dance, Gus Matsan, Peter's roommate, who is jealous of Peters success, takes Camilla out on the dance floor, "scorching she should know about Peter."

(Now Go On With The Story)

CHAPTER XIII

"Well," began Gus, exhaling the smoke of his cigarette, noisily, and turning toward Camilla. "You sure do get to know a guy when you live with him. And I'm tellin' you now that Peter is not good enough for a sweet little kid like you. He has a queer attitude after him all the time, like the moths around that light over there. Why? Because he kids 'em along and makes each one think she's the berries for him. D'you know how he's payin' his way through school? On the money he gets from rich dames like you! Has he touched you for a payment yet?"

"You are despicable," Camilla told him in a deadly calm voice. "I don't believe a word you are saying and I refuse to listen any longer!"

"Oh, yeah?" his laugh was ugly. "I'll bet you are beautiful to look at when you're mad like that. I told you I'm sorry about you and I meant it. If Peter is good enough for you, so am I—" and before Camilla was aware of what was happening, his arms were holding her like a vise and his mouth was seeking hers while she struggled violently to free herself.

From behind them, a doubled hand struck out swiftly against the s'de of Gus' head and sent him sprawling upon the ground. At the same time, another arm grasped Camilla's shoulders and prevented her falling from the force of the blow that separated them.

"Did he hurt you, dear?" Peter was breathing hard, with anger and exertion.

"No, but I hope you have hurt him." She was trembling, too with anger, and because it was for her sake. "I'm glad you did, for what he was saying about you."

"I heard enough." Peter said curtly, "which doesn't matter." But I'm sorry I am responsible for introducing you to such a bum."

He walked around the bench and stood above Gus, who rolled over then sat up his head tentatively to his bruised jaw. Peter assured himself that his victim was only stunned, stood up and adjusted his own tie and clothes, and took Camilla's arm.

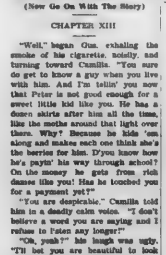
"Shall we go back to the party and forget this unfortunate affair? Glad I came out here to look for you. I missed you and had already lost one dance with you, so I suspected something was wrong." He was trying to dismiss the incident and sound casual, but his voice still shook uncertainly. "I knew you wouldn't voluntarily cut the dances you had promised me."

"But, Peter, he said those terrible things about you!" She was still trembling with her own resentment, and Peter's calmness could dismiss the thing so calmly.

"But you don't believe them, darling?" he asked quietly.

"Of course not!"

"Then, that's all that matters. You know, the world has so many people in it that think the worst of the best that they can—ungrateful and jealous and malicious. But time is too precious to waste even thinking about them. From now on, we'll just forget Gus. People like that just hang themselves with their own rope. He can shift for himself, but he did before I took pity on him. At least, that's one load off my mind!"



Peter Was Breathing Hard From Anger And Emotion.

"Do you mean," Camilla was incredulous, "that you have been keeping Gus—?"

"Most of the time, he shrugged unconvincingly.

"And he could say that!" she exclaimed with dismay. "Well, this world surprises me a little more every day—the people, I mean."

"Sure, the world is fine. It's the people—regular hedge-podge. Interesting though," he added thoughtfully. "Every good or bad surprise I have over human nature makes me feel a little bit wiser and more able to cope with it in general. As Tramp said, 'I am a part of all that I have met.'"

"Oh, Peter, you're as fine yourself," she told him with loving admiration, "that you can find some good in everything."

His pressed her hand that was tucked into his arm, as they walked slowly back to the auditorium. "That's because you think so, honey," he told her with characteristic modesty.

* * * * *

The last balloon had escaped collingward, many of them were deflated and had dropped to the floor whilst was strewn with confetti, serpentine dangled limpy in mid-air, and the orchestra had crossed goodnight.

Again, they were making through the park, arm in arm. It was that witching hour when the young moon rides high and gloriously, when the

"You don't wish that more than I do, Peter!"

"Precious! But that's not the worst of it. Lord knows how many more years I'll have to wait for my dear little one," forlornly.

"Not years, darling!"

"It will be, unless things happen a lot faster than I have any right to expect."

"But why do things have to happen—before we can have each other?"

"So I'll be able to take care of you, of course! Sometimes I feel so heavily, 'I'm afraid that never will be."

"Why, you dear, foolish thing, you

talk as if I were going to be a burden on you!"

"Never that!" he protested. "But, you know—"

"I know nothing about letting you take care of me, Peter, this is the day of women's freedom, you know—freedom from the bane of idleness that makes them burdens to men. You'll have to take care of me just because you love me."

"And that is just why I do want to take care of you. That is the best of a man's love, whether or not he wants to shelter and protect a woman. It's all right for women to be free and independent—free to escape from the guardianship of men if they wish. But when a woman falls in love, she goes right back to the beginning of things again—nervous and submission and dependence. She can't escape it. And the man who loves her in the right way, wants to take care of her, to endow her with the worldly goods it is part of his vanity."

"Of course, but all of that is to our future, dear, and for people whose situation is different from ours. I'm talking about us, now. Why should Gus grieve and worry over me? I'm able to provide for me, when you should be giving the best of yourself to your work. It's not fair—"

"But what else can I do?" How that I've found you, I can't forget you, not for a minute. Oh, Camilla, I need you so."

He stopped abruptly to kiss her. "How can we go on like this—for years?" his voice yearned.

"We can't," she whispered, "and we'll not."

"What do you mean?" he demanded.

(To Be Continued.)

Little Helps For This Week

"As we have therefore opportunity, let us do good unto all men."—Galatians 6:10.

I ask Thee for a thoughtful love, Through constant watching wise, To meet the glad with joyful smiles, And to wipe the weeping eyes. And a heart at leisure from itself, To soothe and sympathize.

—A. L. Waring.

Surely none are so full of cares or so poor in gifts that to them also, waiting patiently and trustfully on God for His daily commandments, He will not give direct ministry for him, increasing according to their strength and desire. There is no much to be set right in the world, there are so many to be led and helped and comforted, that we must continually cease to connect with such in our daily life. Let us only take care that by the glance being turned inward or strained outward we do not miss our turn of service, and pass by those to whom we might have been sent on an errand straight from God.—H. Charles.

Look up and not down, look forward and not back, look out and not in, and lend a hand.—Edward E. Hale.

One Of Quesnel Trades

Professional Writer Of Speeches Has Office In London's Famous Strand

Entitled to a height place on the membership list of the club of queer trades is surely the professional writer of speeches who occupies a sky-lighted office in London's famous Strand. His enterprise and originality are such as all events brought him success, for since his idea was first put into practice, a few years ago, he has written hundreds of speeches on the most diverse subjects. Titled and professional folks of all sorts apply to him. For the most part, however, his clients' requirements are of a more ordinary nature, and consist of demands for after-dinner speeches, and addresses for bazaars, presentations and similar functions. Then the writing of political speeches at times also forms a considerable part of the minis ble speech-writer's activities; and on many occasions he has been called upon to 'write both "for" and "against" the same party and subject.

Pigeon Sought First Aid

When lost in a fog a pigeon took refuge on a ship in the Bay of Biscay in an exhausted condition. The crew lost hope of recovering it, but a few days later it came back with a message tied to it which told him that it had been fed and cared for.

VOL. 11 [illegible], 20 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, [illegible] $1.50 PER YEAR IN ADVANCE

Judges Inspect Fort's New Portable

Last Saturday afternoon, Messrs. Isaac Gibbs, M.L.A., Frank Pike, and A. W. Hashew, visited the Park. These gentlemen are acting as judges in the "Name the Park" competition, and in spite of the raw cold day, made the trip from Edmonton to inspect the Park. They were very favorably impressed, and expressed the opinion that Fort Saskatchewan had a splendid portsite that only needed developing. They pointed out that so many city dwellers appreciated being able to motor on good roads to an attractive spot where a picnic, games, etc. might be indulged in, and suggested that we had the means at our disposal to create such a resort.

The Committee expresses their regret that these gentlemen had not been able to make us an earlier visit, when the wonderful fall coloring of the trees, together with the sunlight, made the Parkette most attractive. However our visitors declared their intention of coming again in the summer. They also agreed that the sleigh run should prove a big attraction this winter.

LORD BOONEY WINS CUPS

At a meeting of the Northern Alberta Fish and Game Protective league held in the Corona Hotel on Monday evening, winners of the Bait and Fly-casting competition held in Elk Island Park last August were presented with cups.

In the Fly-casting for Accuracy event, Lord Booney took first and in the Fly-casting for Distance event took second prize. He was the only winner in this district.

The cups were donated by L.E. Wise and the league.

Large Crowd Attends Tennis Club Dance

One of the largest crowds in years attended the annual dance and presentation of trophies of the Fort Community Tennis Club last Friday evening.

The dance was held in the Simmons Hall, which was suitably decorated for the occasion.

During the dance, the presentation of trophies was made, Dr. W. P. Colborne, past president of the Club, gave a short word of welcome. Mr. J. D. McLean in his usual amusing manner, presented the cups to the winners, Mrs. T. W. S. Henry, winner of the ladies single event; Mr. H. Oxley, winner of the men's single event; and Two Henry and H. Oxley winners of the men's doubles event. The recipients in turn replyed suitably.

The Club wishes to thank Mr. A. Carscadden for the splendid cup donated to the Club, which was put up for the men's doubles event.

At midnight tasty refreshments were served by members of the club to the large gathering.

Many novelty numbers were included in the dance program. The music was supplied by the Poppy Pals Orchestra and dancing was enjoyed until the small hours.

THE WEATHER

During the past four days snow fell to the depth of two inches and considerably more in some places. On Tuesday with a 15-mile-an-hour north easterly wind roads were reported to be drifting, although still passable. The weather forecast is "colder" with possibly more snow. In the north snow fell to the depth of 12 inches in the report.

Due to the sudden change of temperature, a change to winter apparel was noticed.

As it is early for winter to cut in earnest, we can expect some nice weather to come, although the snow might stay with us until spring. Old timers have seen winters, where it snowed in October and then had fine weather until Christmas.

Good Hope

Miss Alethea Stewart and brother Donald were Thanksgiving visitors at the Moyer home.

Miss Janet Webber spent Thanksgiving at her home in Winterburn.

Miss Mamie Whitson has returned home from the hospital, and is progressing favorably.

Threshing is about done in the Good Hope district.

Mr. and Mrs. J. Sheldon and family were visitors at the home of Mr. and Mrs. Robert Johnston.

Mrs. T. Magee and nephew Ralph, are visiting at the home of Mrs. Davidson of Moosiede.

Mr. Chas. Thomas is a patient in the Lamont hospital.

Rev. Jamison was a visitor in Good Hope last week.

Mrs. Geo. Young from Indiana, U.S.A., was a visitor at the home of Mr. and Mrs. Gordon Moyer.

Winter appears to be approaching very quickly. O'hara, what a nice long winter!

Get Your Entries In At Once for Park Name

This is the last week that "Name the Park" coupons are available. Remember that there is a prize of Fifteen Dollars for the person suggesting the most acceptable name. All October accounts paid by November 10th, will entitle the payee to receive one coupon for every five dollars that he has expended. His November purchases will count. Why not make an effort? Just a suggested name for the new Park, and you may have Fifteen dollars more to spend at Christmas.

GRADS TO PLAY CHICAGO THURSDAY NIGHT

The Commercial Grads and the Chicago Red Devils will battle for the best three out of five games for the Underwood Silverware, starting the first game Thursday evening in the arena.

This year the Grads will have two new recruits, in the persons of Miss Neal MacDonald and Miss Mable Menton, both of the Gradston team last year.

With the Grads out to gain some of their lost prestige, this series should provide some real exciting games.

S. S. DUNCAN HEADS WEEKLY HISTORS

S. S. Duncan, publisher of Crag and Canyon, Banff, was elected president of the Alberta division, of the Weekly Newspaper association, succeeding D. O. Wright, Carleton News, at the annual two-day convention that closed in the Macdonald Saturday afternoon with election of officers.

Others elected were: First vice-president, H. G. Thomsett, Gleichen News; second vice-president, A. A. Moore, Strathmore Standard; executive, R. A. Hackell, Innisfail Province; D. O. Wright, Carleton News; H. T. Baldwell, Coleman Journal; H. W. Betts, Raymondson Record; G. C. Dunning, Drumheller Mail. Advertising committee, H. G. McCrea, Nanton Herald; Charles Clark, High River Times; Fred Turnbull, Red Deer Advocate.

Pete Knight, of Crossfield, Alta., won the bronk-riding title with medals and $1000 in gold, at the Chicago World Fair, maintaining his supremacy in the dangerous sport. The bareback riding crown went to George Holcomb, of High River, Alta., who also captured the wild horse race title.

Hot grown develop at approximately the same rate as cockerels.

Brownlee Asks Relief Works

Suggests Scientific Study to Determine Suitable Progress

Problem Serious

A strong appeal for a national wheat board, relief works to meet the unemployed situation, cheaper money and short term agricultural credits, were among the chief points made by Premier Brownlee in tendering greetings Friday afternoon to members of the Alberta division of the Canadian Weekly Newspapers' Association at their annual convention in Edmonton.

Premier Brownlee also devoted much of his address lasting nearly an hour, to need of a better understanding between the east and west. He showed that a valuable service could be performed by the press in this regard.

He suggested that two or three men might work with the federal department of labor in making a scientific study of useful works that could be undertaken.

I believe the turning point has been passed. Assistance will give an impetus to public works," he said.

With regard to the outlook, the premier declared they were favorable in many respects, but no one should be unduly optimistic.

Wheat Problem Most Acute

Canada's first and most acute problems, and it looked more so every day, was the wheat problem, he said.

"When I prophesied that there would be a carry over of 171,000,000 bushels last July, I was taken to task severely by the Winnipeg grain exchange and by others from who I received letters," he said.

As it turned out, there was an actual carry over of 219,000,000 bushels.

"Fortunately, there was a poor crop. If there had a been a fair crop, I don't know where prices would be today," he said.

For the present year once it was estimated that there would be 400,000,000 bushels to handle. After making care of domestic requirements, there would be 270,000,000 bushels to dispose of, while Europe had 300,000,000 bushels more than a normal year and England itself had a 50,000,000 bushel domestic production.

Immense Carry Over

If Canada sold her quota of 300,000,000 bushels, as arranged at the world conference in London, there still would be a carry over of 100,000,000 bushels.

"If there is a turn in the crop cycle and next year is a bumper crop year, what are we going to do?" he asked.

Between last April and July, there had been a tremendous increase in prices and wheat had touched $1 at Winnipeg. On Friday, it was down to 69 cents.

The Dominion Government was again in the picture and stabilizing prices. If the government had not done that, it was hard to say where prices might be now.

The premier went on to point out that terminals and elevators were necessary evils, like coal. Equally able feature of the situation being that farmers were holding back their grain.

The spectacular advances in wheat prices from April to July had stopped the exporting of wheat, he said.

Must Curtail Production

"Curtailment of production is essential," said the premier, who went on to point out that in such cases the pressure of economic laws could be more than governments.

Reduction in acreage was impossible while another possible solution was the arranging of export and domestic quotas.

"I am advocating most strongly a change from the present system of supplying the wheat markets," he said.

"There is need, as I have said before, for a National Wheat Board in Canada.

"After all, can we go on with the dominion paying the market price, at present 69 cents a bushel. With a national wheat board, there could be an advance to the farmers, better control of sales and sales could be pressed when necessary, and prices would be kept down to an equality with other competing countries and with the quota."

Not only had the wheat surplus to be reduced but there also had to be better distribution of that surplus.

Premier Brownlee told the editors that they were living in times of great interest to newspaper men and to the public generally. They were in times of a clash of ideas between the old world and the new.

As to the depressing side of things as gathered on his trip across the dominion as a member of the board, Mr. Brownlee said it was found to the realization of problems in Canada today. There was the difference in outlook and viewpoint of different regions of Canada.

West "Poor Relation"

"The first one is the conception in the east that the west is a poor relation; that the east pays out the money to keep the west alive and that the west depends upon the east

Shall There Be Peace?

The sudden and startling announcement by Germany on October 14 of her withdrawal from the disarmament conference and of her intention to resign her membership in the League of Nations, coupled with the immediate dissolution of the Reichstag and the call-ing of a general election to record the approval of the German people to these far-reaching and momentous decisions, threw a new note of alarm and disquietude into a world already distressed with a multiplicity of problems. For months past the leading statesmen of the world have been striving to avert another war, and to bring the nations into agreement in regard to disarmament in order, not only to ease the financial burden which such armaments have placed to provide assurance of future peace. Germany's precipitate action endangers the success of these efforts which, in many ways, were not too promising in any event.

What can Canada do to help avert such a disaster as another world war? As a matter of fact, can the people of this Dominion do anything? Nothing spectacular perhaps; nothing possible of a direct nature. Nevertheless, neither Canada nor other nations small or less important in the world scene than Canada, are altogether powerless. Each and all have their influence to throw in the scale for or against war. Our own attitude towards other nations is one way in which we will exercise our influence one stand for war or peace If we favor extreme nationalistic policies, then in the eyes of other nations we will be regarded in an unfriendly light, and our influence will then be thrown in the scale of war If, on the other hand, we act sensibly and consistently, and in every possible way, display goodwill towards other nations, and prove by our acts that we desire the largest and freest intercourse and co-operation with them, that we recognize their problems and are willing to help in their solution: that we are not taking a purely selfish position in our international relationships, then, Canada will make friends, will extend existing friendships, will increase her influence with other nations, and will be in a position to do much to maintain peace and banish war.

Following the announcement of Germany's intentions, Hon. Arthur Henderson, British chairman of the world disarmament conference to what a Press correspondent at Geneva described as swift and dramatic events, has issued a new call for disarmament. Mr Henderson's words are addressed to all peoples and nations Canada included. Giving head to them in one way in which Canada may at this time help prevent a recurrence of war. It is important that these words should reach as many people as possible; thus we add to the good work by passing them on to the readers of this column.

"My appeal to you," Mr. Henderson told a great gathering, "is to insist that disarmament must go on and the League covenant must not be treated as a scrap of paper. It cost ten million dead and twenty million wounded to bring the League into being. We will not break faith with the dead who fell that there should be no more war. We will not suffer the hope that peace will be hailed. We will not let the world plunge into barbarism through another world war.

"To you who represent public opinion, I would say, nail your flag to the mast of the League. Make the will to peace stronger and more steadfast than the will to war. Every task or organization cannot spare to further efforts Every delay or defeat must call forth fresh reserves, stalwarts and volunteers energy.

"We are faced with a situation that makes it necessary to go down to fundamentals. We must think things out afresh. We must search our own hearts and consciences. We must take our stand and tell the world where we stand. The withdrawal of Germany makes it necessary to ask ourselves what it is we are trying to do in Geneva.

"What is the enterprise to which the civilized world has been committed since humanity emerged from the greatest and most terrible war in history? The answer is we are endeavoring to organize peace."

The enterprise was not confined to members of the League, he went on, but the League was the core and the basis of a collective peace system. "So long as each nation is the judge of its own rights to free access and uses the arms as it sees fit, war is inevitable. However just its cause or good its intentions, no government can be trusted to remain loyal to the cause of peace if it feels the necessary peace system to which the world is now pledged. A country which rejects that system, whatever its intentions is inevitably encouraging its citizens to regard war as legitimate and inevitable."

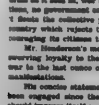
Mr. Henderson's message calls for a re-affirmation by Canada of its unswerving loyalty to the League of Nations, of its determination to pursue ever to the last ounce of its strength, and to promote peace in all its many manifestations.

His concise statement of the enterprise in which the civilized world has been engaged since the end of the Great War, namely, to organize peace, should impress itself on the minds of every Canadian. The need of an assured peace is what the world needs more than anything else. It is more important than banking reform, more important than the abolition of tariffs, more important than starting changes in our political, economic and social order,—and it is more important because it is the absence of an assurance of peace, and the fear of war at any moment, that is the cause of the existing world depression. It is that fear of war which is the stumbling block to overcoming the depression. And until that fear is removed the depression will continue regardless of what may be in vogue.

However the horse didn't leave the road and roll over three times when into St. Louis, Britain West Indies, a bee got in the buggy says the Brandon Sun.

Day-old chicks are being imported from Florida via the Pan-American Airways.

Any Looseness of the Bowels is Always Dangerous



When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unnatural disorders there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 70 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief.

Get it at your drug or general store put up only by The T. Milburn Co., Limited, Toronto, Ont.

Home Fruit Thermometers

Scientist Studies Winter Not As Cold As North As Reported

Winter in the north country is warmer than many people believe. Tall stories of record low temperatures are due, in many cases, to faulty thermometers in the opinion of Dr. J. M. Stagg, leader of the British polar year scientists who spend 12 months at Port Rae, North West Territories, studying weather condi-tions.

Dr. Stagg says that the cold ba-rometers were surprised the ground temperature was as high in winter time as they expected it. He believed inaccurate instruments used in the north made the temperature appear much lower than it was actually. Lowest temperature recorded by them at Port Rae was 66 below zero.

A Rare Painting

Portrait Of King Henry Eighth Found In Old Chrysler

Circumstances

Removal of four coats of paint from a portrait of King Henry VIII. has revealed what is claimed to be a masterpiece from the brush of the famous Hans Holbein, the "Merry Monarch's" court painter. The portrait, apparently dated 1543, shows the corpulent autocratic gayer than any picture extant.

The painting belongs to Geoffrey Howard, of Castle Howard, near York, and is a last-length portrait of the oft-married king who ruled England from 1509 to 1547

"PERSONS NOT FAT LIVE LONGEST"

Eminent Physician Declares

In a recent lecture before the American Academy of Medicine, the prominent physician stated that persons who aren't fat live longer, pre-mening on account of the risk. Fat persons are sometimes badly organized sows you down and puts unnecessary strain on the heart. Fat also predisposes ments (even rheumatism, acidity, disease of breath) and insomnia are often associated with fat.

So get rid of this dangerous, unhealthy fat. There's no reason why you shouldn't, when science has given us this safe, effective treatment — a half teaspoonful of Kruschen Salts in a glass of hot water first thing every morning.

This healthful little daily dose of Kruschen keeps the system free from harmful toxins, it helps to re-tain that normal and proper body function-ing—it keeps you feeling fine and fit with that Energetic activity known as the glow of sluggish indolence all fat people long to be rid of, that gradually and safely disappears.

Contract Mills Prices

A drive of Fraser Valley milk producers for a minimum price for their product was climaxed at a meeting of representatives from all over the valley. The following resolution was passed: "That this meeting proceed to form a 'One Big Union' for the purpose of controlling the price of fluid milk and establishing it at 55 cents per quart better fat in Vancouver, New Westminster and other centres of the T.B. free area."

Program Has Been Slow

Television Has Lagged Behind Development Of Sound Transmission

Chevalier Guglielmo Marconi, built in New York, revealed that his new microwaves are expected to give a substantial impetus to television. At the same time he stated that he was more interested in the conveyance of sound.

Some great scientific minds have been working on the problems of television, but very little progress has been made. Television has lagged behind compared with the rapid development of sound transmission which can hardly be improved on. Radio uses any sound has reached perfection. At the same time radio listeners are really anxious to become radio lookers. Marvellous as radio is, the public wants a new thrill.

It will come some day. But will the public like it when they get it? It would be great to see the world sur-base, but so far as having to see the crooners and croakers of radio as well as listening to them—well, that might be just too bad!—St. Thomas Times-Journal.

Gas in The Stomach

Gas in the stomach, belching, sour water brash, pain after eating, etc., can be overcome within three minutes if you will take a little Bisurated Magnesia in water after you eat. The ordinary Bisurated Magnesia which you can get at any drug store will correct acid stomach and stop acid indigestion immediately. Try it and see.

Egg Grading Change

New Plan Simplifies Grading Of Eggs and Changes Old System

In future graded eggs will consist of "A 1," "A," "B," and "C," according to an announcement by the department of Agriculture. This simplifies the grading of eggs and changes the old system of "Specials," "Firsts," "Firsts," and "Seconds."

The words "new laid" will be used only in conjunction with grade "A 1," and the word "fresh" may be applied only to grades "A 1" and "A."

All eggs possessing the quality of grade "A" may be sold in that grade irrespective of size. However, eggs of the largest size will be packed separately with the size indicated on the container.

Storage eggs will not be permitted to be sold in a higher grade than grade "B."

Gentleman (who is visiting, to little boy of the house): "And why won't you let me take you on the river in a nice boat?"

Little Boy: "Oh, please, Mr. Tubbs, because I heard pa say that you can barely keep your head above water, and—and—I won't swim."

League Issues Warning

Countries Must Abandon System Of Economic Nationalism

"There seem to be real signs the depression is gradually lifting," reads a cheering report presented to the League of Nations committee on economic and financial questions.

"In industrial countries," said the report, "production is increasing and unemployment is diminishing, while in the aggregate the exports of countries whose economy is mainly devoted to agriculture and mining are gradually improved.

"At the same time visible stocks of the great majority of raw materials and foodstuffs about which information is available would appear to be declining."

But the report adds warningly, "The point has again been made within the League of Nations that there can be no lasting improvement of the economic situation unless the different countries are prepared to abandon the system of closed national economies which are tending today to become general, and which threaten to stifle international trade."

The report was presented by Auguste Schmidt, Esthonian Minister to Rome.

An answer editor is asked whether baggpipes can be tuned. They sound, we suppose, but it is cruel to stop on a cat.

OLD PEOPLE FEEL YOUNG

Just because more years than you like to count have rolled by on your life's calendar is no reason for feeling old. Age, after all, isn't a matter of years. It is a matter of health. Stay vigorous and you stay young. But keep you well. Do it the way thousands of people of advancing years do. Take Wincarnis regularly. Wincarnis is a blend of wine and the extract of fresh meat. Its tonic properties are unrivalled. Its flavour is delightful. Wincarnis is the world's most popular tonic wine. Obtainable everywhere.

Wincarnis contains in Wincarnis give your ageing system exactly the tonic it needs. Wincarnis is prescribed by many doctors. They realise how nerves, muscles and blood are toned and enriched by this well-known wine. Wincarnis is a real friend to the elderly.

More than 20,000 medical men have recently endorsed Wincarnis. It is a great favourite. It will make you feel young again by creating for you new stores of strength and energy. Get Wincarnis from your nearest chemist or wine merchant. Sole Agents: Harold F. Ritchie & Co. Ltd., Toronto.

MORE ABOUT
Relief Works

for its financial existence.

In this connection, he drew attention to some interesting evidence that had been submitted to the commission while it was in the west by the Canadian Bankers' association. This had outlined developments in taking care of financial requirements.

West Self Sustaining

Leaving aside certain capital investments which would have to be written down in any event and certain other investments, the deposits in western banks about took care of the loans, so the west was practically self sustaining.

Going from the west into the east was like going from one country to another, he said, in speaking of the attitude on financial problems.

Evidence submitted to the commission when in the east showed more of a disposition to answer radical viewpoints in the west rather than to grapple with questions with which the commission had to deal.

"The east sees the west as radical; the west sees the east as too conservative," he said.

Need Better Understanding

The premier said he had been impressed with the need of some way by which a better understanding could be reached.

Speaking of the outlook, the premier said the governments in Canada were in a stronger position than at any time since the depression started to face the winter problems. There was the cheaper money situation and the refunding of short-term obligations in the form of long-term ones. As a result, the governments were in a more liquid position to deal with unemployment and other problems.

Bank Pressure Relieved

The banks did not have to carry the tremendous cash reserves of the past few years, said, through their chief executive officer, because the volume of money was not issue. It enabled a freer loaning policy, which would mean more business.

Still, there were problems of serious seriousness to be found by the people of the province and other of the dominion. Prices of farm commodities were extremely low. Basic oil 60 cents Fort William was little higher than a year ago.

"From that position, we should have had a tremendous increase in the price of wheat," he said.

Under the present conditions, tax collection would be difficult, said Crerar were not being paid. When people were using their cash to come to pay off old debts, and not buying new goods, they could not be when was essential to recovery.

Unemployment Serious

Dealing with unemployment, he said this was serious, with large numbers still on relief. He warned of conditions making for more tension and strained dispositions, unless problems more difficult than since the depression started.

There was no doubt of a serious unemployment problem this winter, more difficult in the outcome.

Telephone Problem Grave

The telephone problem involving a public utility in which $20,000,000 was invested, would tax the best intellect of the province in finding a solution, he said. In the city of Calgary, telephones were being taken out daily and long-distance business had stopped.

Then there was the irrigation problem, due to the fact that the people could not pay rates, owing to present conditions. This would demand sympathetic study on the part of the people.

The coal industry was suffering from low consumption and this also had to be dealt with. All in all, the great problem was how to increase economic values.

Discussing the issue of agricultural short-term credits, similar to the federal farm loans of agricultural long-term credits, the premier declared there must be a policy of cheaper money in Canada. Canada had not kept pace with England in lowering down the interest rates on deposits.

Need More Investors

It would be a good thing for the country to have a team change from being a bond exporter to an investor, he said. This would encourage the revival of a normal form of industrial activity.

To enable the country to dispose of its commodities and expedite recovery, he had been advocating a policy by which Canadian money would be in better line with the money of competing countries.

Every principal industry in Canada had suffered because the value of the Canadian dollar had been kept too high. Past policy was not the fault of the government, but was regulated by outside opinion.

"We can't go on with depressed farmers and depressed industry and hope for a revival of trade," he declared.

DON'TS FOR HALLOWE'EN

In order to assist us in maintaining law and order during Hallowe'en, the co-operation of all parents is earnestly solicited by warning their children against committing any of the following offences.

Damaging fences on either town or private property.

Breaking or interfering with electric lights.

Removing gates.

Placing obstacles of any kind on streets or sidewalks.

Placing obstacles of any kind on railway tracks.

Damaging or removing plank sidewalks.

Interfering in any way with motor vehicles, trucks, wagons, etc.

Doing damages of any kind to private or public property.

SCOUT SANTA CLAUS ALREADY BUSY

Notwithstanding improving conditions that promise an easier Christmas for old Santa Claus, his boy Scout assistants across Canada are preparing to help him as in previous years. A number of toy shops already are in operation, making new toys or repairing discarded play things. Last year a trans-Canada chain of 157 Scout and Girl Guide toy shops supplied gifts for well over [illegible] children.

TO OUR SUBSCRIBERS

In common with other weekly newspapers. The Record has refrained from unduly pressing overdue subscriptions during the past few months. Our special exchange on these is still good.

In order to carry on and render any useful service to the community in which we live, we will be grateful for any small deposit on account. A dollar sometimes does a lot of good, doing this it will put them in good standing until next April.

It may surprise our readers to know, that in these times of depression, the Record has gained new readers and so far have not lost any.

We feel sure that if over-due subscribers would come to the Record office, a suitable agreement could be reached.

EDITOR'S NOTE

We have taken this opportunity of publishing Hon Bowster's address which was given to the Weekly Editors at the Convention last week. Although this address has since appeared in the daily papers we thought, there might be a number who didn't read it. This is the first public address given by the Premier since his return after spending several weeks acting on the Macmillan commission. It was thought at the convention among the importance of the address and being a non-political one, it might interest our readers and give them some idea of the conditions that the commission were up against.

When a plumber makes a mistake, he charges double for it When a lawyer makes a mistake, it is just what he wanted, because he has a chance to try the case all over again. When the doctor makes a mistake he buries it. When a judge makes a mistake, it becomes the law of the land. And when the preacher makes a mistake, nobody knows the difference. But when a printer makes a mistake . . . good night!

Pleased With Canada

The magnificent scenery of Canada so enthralled Lord Bicomillan chairman of the Royal Commission on banking, that queen of Scotsman though he be, he confessed, just prior to sailing for England on the Empress of Britain, that it dwarfed the scenery of Scotland, and that the only thing needed was for some author to blend it with the romantic history of Canada, as Sir Walter Scott had blended the scenery of Scotland with the romantic history of the land of Bonnie Prince Charlie. A lake he visited in the Gatineau Valley he admitted was more magnificent than Loch Lomond while his description of Lake Louise was that it seemed to him almost a celestial vision. The Butchard Gardens in Victoria he asserted to be the most beautiful sight that the eye could rest on — In fact throughout the whole of the Dominion the eminent Privy Councillor found beauty everywhere he went, and declared that he would carry back with him memories that he would cherish.

WORLD HAPPENINGS BRIEFLY TOLD

The German government has confiscated the property of the Jewish banker, Hugo Stinnes, who is abroad.

The Graf Zeppelin started from Friedrichshafen, Germany, on October 16 on a south American trip with Hugo Eckener in command.

Hon. Iyenaga Tokugawa, Japanese minister to Canada is studying how trade between Japan and Canada, as well as other parts of the British Empire, can be expanded.

Sir Samuel Instone, director of the Imperial Airways, announces that Imperial Airways is actively investigating a projected trans-Atlantic air-mail route connecting with the air-mail systems of North America.

Fleeing of groups of families from the United Kingdom to various districts in Canada was advocated by Hon. Rodolphe Boudreau, commissioner of emigration of the League of Canadian Is an address at Winnipeg.

Dodgie Fairbanks, the American screen star, told interviewers that he had no intention of divorcing Mary Pickford, his Toronto-born actress-wife. He said say reported divorce was pure invention.

In September 100 families were moved from the drought-stricken farming areas of southern Alberta to fertile northern areas, bring-ing the number moved so far this year to 600, the railway systems reported recently.

"The penal system of Canada as it is now administered is a disgrace to our national life and should be swept away," declared William F. Nickle, K.C., of Kingston, Ont., former attorney-general for Toronto speaking before the Young Men's Canadian Club.

The cure for cancer, in the opinion of Dr W. Bro-lith Whittemore, eminent English surgeon, will likely be preventative "We shall probably find some chemical or animal substance to strengthen our natural resistance to cancer and, in that way prevent it," he said.

Girl to Woman

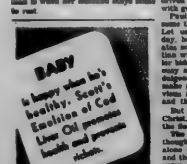
Miss H. F. Peard, of Cambridge (Eng.) University, who was a good deal in the public eye when she was the only woman undergraduate at Oxford or Cambridge, has been appointed principal of Westfield college, London, in succession to Miss Dorothea Gladys Chalmers Hubback, K. B. E., who has resigned.

Believe Pet Turnip

Brimmed plans to raffle himself as a husband has gone awry for a youth in Budapest, Hungary. He proposed to sell 10,000 tickets to young women in search of a husband and promised to marry the winner regardless of her age, looks, status or social standing. The police stopped the adventure.

There are 82 miles of fire exhibits at Chicago's Century of Progress Exposition.

The busiest day of any married woman is when her husband stays home to rest.



More Turret Fine Cut for the same money —and Poker Hands, too!

WORLD'S TEMPERANCE SUNDAY

Golden Text: "Love worketh no ill to his fellowman: love therefore is the fulfilment of the law."—Romans 13:10.

Lesson: Romans 12:19-13:3.

Devotional Reading: Psalm 68:1-6.

Explanations and Comments

The Conduct of a Christian, 12:19-14. The night is far spent, the day is at hand, Paul writes. Many interpretations of this metaphor may be given. The "night" is the Lord's absence, the "day" is to be ushered in by his appearance. The "night" might be the obscurity in contrast to the eternal day, says another. That agrees well with what Christ's, which, both as the seat of local government and because of its critical position on a strait between the two seas, must have been garrisoned by a strong military force. The image which always rises before my mind when I read the passage in this 1 Fancy Paul, after a day spent in hard work, partly in tent-making and partly in preaching and in examining applicants for service, writing far through the night to the Christians in Rome, and just at daybreak, when the sentinels are changing guard, and the morning light glances on their armor, while at the same time the last sounds of debauched revellers in the street fall upon his ears, arguing to himself in the new familiar words, "The night is far spent, the day is at hand." John S. Hewson.

Let us therefore cast off the works of darkness some of which are condemned in the next verse), and let us put on the armor of light. Be strong in the Lord and in the strength of his might, put on the whole armor of God, Ephesians 6:10-13. The description of the armor is given in Ephesians 6:13-18. See Also 2 Corinthians 6:7, 10-6; 1 Thessalonians 5:8.

You can obey the command to put off the works of darkness when you have obeyed the command to put on the armor of light. Evil thoughts are driven out at first sitting by good thoughts. Paul speaks of conduct as "a walk" some thirty-three times in his letters. Let us walk honestly as in the day, he urged, and then he recommends none of the evils which a Christian will not commit. Dr James Stalker has no notice that strife and jealousy are classed with the coarser indulgences of the animal nature and made as glorious the contentious elements now ranks with the drunkard and the debauchee.

But put ye on the Lord Jesus Christ, and make not provision for the flesh, to fulfil the lust thereof.

The Great Realities, 14:7-9. "The thought of our accountability to God alone (vers. 6) brings life and death and the judgment day before Paul. In verses 7-13 he so portrays these great and inspiring realities as to make all acrimonious controversy over days and diet seem trivial and wicked."—R. J. Drummond.

For none of us liveth to himself, and none dieth to himself. "Man's whole life belongs, not to himself, but to his Lord. It does not mean, every man's conduct affects others for better or worse, whether he will or not; it means, we Christian in his own and in life; what is always present to his mind, as the rule of his conduct, is the will and the interest of his Lord." The same holds of his dying. He does not choose either the time or the mode of it, like a Roman Stoic, to please himself. He dies when the Lord wills, as the Lord wills, and even by his death glorifies God."—Dr. We must live like soldiers of Christ, for we are His alike in life and in death for by dying and living again Christ became the Lord of the dead and the living.

Transparent Only One Way

How Glass Cannot Be Seen Through From Outside

At last people may live in glass houses without pulling the shades down.

A patent has just been granted to Frederic A. Dubose, head of the local park and planning commission of Washington for a glass which is transparent only one way.

Persons looking through the glass from the inside of his house and see on clearly as through ordinary window glass. People on the outside, however, cannot see through to the inside. This is caused by a diffusion of light rays by means of arranging glass materials on one surface at angles.

Among other patents granted recently are a self brushing tooth-brush, a calculating machine advising farmers how much grain he should feed to his cows to get the maximum output of milk, a device which would keep the hole in the doughnut, a revolutionized seat cushion, and a collapsible gravestone.

The power driven tooth brush is hitched to the bathroom faucet and revolves through the force of water power.

Young Jane Bride—Oh, dear, I don't know what to use to raise my bread, I've tried everything.

Husband (to understand)—A duck or a couple of ducks ought to do it.

Precarious Travel Is Mocking Railway Sale

Japan Not Anxious To Buy Line

"What with bandits tearing up the tracks, firing on trains and carrying away passengers for ransom, the Russians are having quite a time trying to sell the Chinese Eastern Railway to Japan. Negotiations have been going on for months. Bids and counter-bids have been offered. The great stumbling block is the present state of travel on the line.

In five days the truck was torn up five times, trains were fired on three times, railway stations were set afire, railway buildings were attacked 18 times, and 150 railway employees were kidnapped.

Armed gangs attack the trains and crimes of violence are frequent. There were 70 attacks by armed desperadoes in 1930, 119 in 1931, 704 in 1932, and this year there have been 347 attacks to date.

With all these goings on, the Japanese wonder what kind of a railway they are bickering for anyway. If the gangs and bandits keep up their activities there will not be much left. It is an indication of the lawless state in Manchuria and a condition with which the Japanese have been trying to cope.—Border Cities Star.

A whale captured recently off the New Zealand coast had in its head a harpoon which the whalers had fired off 15 years ago.

Both employment and profits are rising in Australia.

Works Without Chestnut Tree

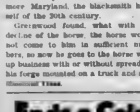
Baltimore Beauty Travels Country With Forge On Truck

Under the spreading chestnut tree The village smithy stands . . ."

So the poet, Henry Wadsworth Longfellow in the 19th century, but not so Harry C. Greenwood, of Baltimore Maryland, the blacksmith himself of the 20th century.

Greenwood found, what with the decline of the horse the horse would not come to him in sufficient numbers, so now he goes to the horse with up business with or without spreading his forge mounted on a truck and se's thereon Time.

Ends a Cold SOONER



Strict About Apple Shipments

As a safeguard against the export to Great Britain of apples infected with apple maggot, steamship lines refuse to load cargoes of apples from infested areas unless certified free of apple maggot by the inspectors of the Dominion Entomological Branch.

Some people are born great, some achieve greatness and others just grate on you.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

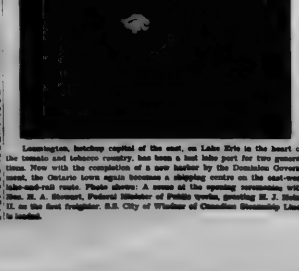
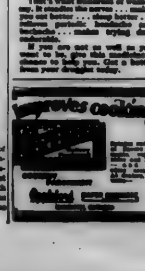
Lydia E. Pinkham's Vegetable Compound



BEAVER'S FAITHFUL BUILDERS A CLOSE PACT

Leamington, hotchup capital of the east, on Lake Erie in the heart of the tomato and tobacco country, has been a busy place for two generations. Now with the completion of a new harbor by the Dominion Government, the Ontario town again becomes a shipping centre on the east-west lake-and-rail route. Photo shows: A scene at the opening ceremonies with Hon. R. A. Hoey, Federal Minister of Public Works, presiding, H. J. Symons, K.C., M.P., and Hon. H. C. Nixon, Provincial Minister of Public Works, looking on.



W. N. U. 2027

MUSSOLINI FOR UNITED FRONT ON DISARMAMENT

Ottawa, Switzerland Premier Mussolini of Italy was credited with indefatigable efforts to unite four European powers, including Germany, in a discussion of disarmament at Stresa, Italy.

At the same time information from Berne, the Swiss capital, indicated a determination to safeguard Swiss neutrality in the event the peace of Europe was threatened.

The report reached here that the Italian leader had asked other powers regarding the feasibility of further conversations on disarming.

Poland was said to have been advised whether she would approve such a project and to have replied that she wants all the problems considered at Geneva.

London, Eng. The full cabinet of 20 ministers deliberated for two hours over the situation arising from Germany's precipitate abandonment of the world disarmament conference.

It was understood the ministers reached no decision on the subject of future policy and the stand to be taken when the arms conference resumes at Geneva. The necessary conversations with other powers are still in progress.

It was learned however, the cabinet was in full agreement with the stand taken by Sir John Simon, secretary for foreign affairs, in the interview with Baron Konstantin von Neurath, the German foreign minister, who called for John Simon's protested Germany's arms demands to the United States.

Motor Car Of Future

Radical Departure From Conventional Lines Is Predicted

Toronto, Ont. The motor car of the future will have three wheels, two at the front and one at the rear The motor will also be at the rear, according to Harold B. Spring, of Detroit, in discussing transportation at the future before the Canadian section, Society of Automotive Engineers here

It was not possible to design a perfectly streamlined car with the wheels he said. Another revolution in design would be the placing of the two front wheels outside the body proper. Cutting down wind resistance depended upon reducing the frontal area of a car and this could not be done if the wheels had to be included in the front width of the body design.

He predicted engineers would soon have a car that could take off and fly.

Edmonton-Jasper Highway

Proposal Made To Complete All-Weather Road

Edmonton, Alberta.—A proposal which will mean completion of an all-weather highway from Edmonton to Jasper has been made to the Dominion by the provincial government.

The announcement was made recently by Hon. O. L. McPherson, Minister of Public Works.

The offer is that the province is prepared to supply equipment for federal gravel camps along the highway this winter if the Dominion will give assurance that it will place the 37 miles of grade east of the park boundary in shape to receive gravel as soon as weather conditions permit next year.

Rail Conference Continues

Montreal, Que. From an authoritative source came a denial that formal conferences between the managements of the railway companies and vice-presidents of the running trades employees had come to an end. The negotiations would continue as official of one of the railway companies stated.

Veteran Mountie Dead

Charlottetown.—Sergt. Malcolm Martin MacIntosh, 88, one of the original 12 men in the Royal North West Mounted Police, now Royal Canadian Mounted Police, is dead here. He enlisted at Toronto in 1873 and was promoted in 1886.

W. N. U. 2027

Central Manitoba Mines President Dies Suddenly

Suffers Heart Attack On Train En Route To Toronto

Winnipeg Man. En route to his home in Toronto, D. Miles president of Central Manitoba Mines Limited and a former managing director of the International Nickel Company, died aboard a Canadian Pacific Railway train October 17

Stricken with a heart attack Mr Miles was dead when medical aid was obtained at Whitemouth Man. He had appeared in excellent health when he left here early in the evening associates said

For many years Mr Miles had been associated with mining and industrial enterprises in eastern Canada

Mrs. Miles, living in Toronto survives

He was born in Allenton, Pa. educated in New York City and at New York and Yale Universities At first taking his B Ph degree at Yale he became instructor in chemistry geology and mineralogy there

In 1905 Mr Miles resigned to take up industrial work to engage in mining activities He was a former president of the Ontario Mining Association

Enforcing Blue Eagle Laws

President Roosevelt Issues Order Covering Compliance With Regulations

Washington A two-edged executive order designed to force compliance with the blue eagle provisions of the presidential agreement was issued by President Roosevelt

The order called for a fine of $500 and six months' imprisonment for any person falsely representing himself to be operating under the agreement or displaying the blue eagle insignia while not complying with its provisions

The president's order, issued under specific authority of the industrial recovery act, also empowers Hugh S Johnson, the recovery administrator, to prescribe further rules amplifying those laid down by the chief executive

Compromise In Wage Cut

Report In Railway Circles That Agreement Has Been Effected

London, Ont. Reports were current in railway circles here that a settlement had been effected in the running trades' dispute with Canada's two major railways involving a second 10 per cent. cut in the basic wage

Rumors were in circulation that the second 10 per cent. cut would be rescinded on November 1, and the first on May 1 next year. It was said also part of the money lost by members of the running trades through the second cut would be refunded to them and that the rest would be applied to their pension fund.

Labor Party Gains In Norway

Record Elections Give Them Twenty-Two New Seats

Oslo, Norway.—A platform of unemployment relief and opposition disharmony had carried the Labor Party to big gains in the Norwegian parliamentary picture.

Labor emerged from the elections in which 15 parties competed for votes with 23 new seats in parliament and a total of 69.

Conservatives, who lost 10 seats retained 31; the Liberals, losing nine, 24, and the Agrarians, losing three, 27

Seize Reciprocity

Victoria, B.C. The best thing Premier Bennett could do for British Columbia would be a reciprocity treaty with the United States affecting lumber, fish and copper, stated T. D. Pattullo, provincial Liberal leader, in an address. "This," he said, "would bring back 65 per cent. of our lumber market, put more money in our fishermen's pockets and revive the copper mining industry."

Tent Class Again Dissolved

Windsor, Ont.—Archie G. Gagnon, Sandwich West township solicitor, was acquitted for the second time on a charge of unlawful establishment and operation of a radio set in his home. The case is regarded as a test of Dominion Government legislation imposing a tax on radio receiving sets.

HEARS COMMERCE S.

W. Sanford Evans, K.C., a Regina, who has been elected President of the Canadian Chamber of Commerce He succeeds John W. Ross of Montreal

St. Lawrence Waterway

Reported Roosevelt Will Press For Ratification Of Treaty

Washington Plans of the St. Lawrence waterway project into the section of Colonel Lemuel M. Markham as chief of United States army engineers a decision by President Roosevelt to press for ratification of the St Lawrence treaty with Canada at the next session of congress.

January 5 is set as the congress reconvening date.

Markham was elevated to major-general over several ranking officers, this coming after a study by high government officials of the engineer's reports to the state department on the Great Lakes-Atlantic seaway as a member of the Canadian-American joint engineering board

Conscience Money

Federal Arbitrator Returns $35 To Dominion Treasury

Toronto, Ont.—In a special despatch from its Ottawa correspondent the Mail and Empire tells of a former federal arbitrator from Winnipeg who returned $35 to the Dominion treasury, explaining the money was the received some years ago for acting on an arbitration board.

According to the newspaper, the man declared he had taken no fee off from his job when he acted as arbitrator and therefore he now considered to return the fee as his acceptance of it did not harmonize with the teachings of the Oxford group which he had just joined.

Canadian Legion Convention

Ottawa, Ont. A Dominion convention of the Canadian Legion, to be held "as soon as convenient" and during the next session of parliament, has been decided on by the executives of that organization who have been in session in Ottawa during the past few days. Probabilities are that the convention will take place in Ottawa in January or February.

"Royal Scot" Had Engine Trouble

Alkali Water Clogging Flues Was Reason For Delay

Pueblo, Colo. The "Royal Scot" visited, it took it

Britain's most famous train was towed into Pueblo five hours late. Known abroad as the train that is never late, the "Royal Scot's" engine developed trouble near Rhda, Colo. The gradual rise toward the continental divide begins near Rhda.

Those in charge of the train said alkali water placed in the locomotive in Kansas and the kind of coal which was used had been the cause of the locomotive's trouble They said the front end of the engine became stopped up, the firebox was clogged with clinkers and the flue sprang leaks.

The train left under its own power from Denver, where it will be put on exhibition. A giant mountain type of engine was following to give it a boost if any more trouble developed

The delay, the crew said, was the first in the train's 70 years of operation.

Gasoline Sales Higher

Regarded At Ottawa As Sign Of General Activity

Ottawa, Ont. Sales of gasoline in Canada in July this year exceeded June and were also higher than in July of last year, reports issued by the Dominion Bureau of Statistics revealed. The amount of gasoline consumed is generally regarded as an indication of general activity.

Sales of gasoline in Canada during July last increased to 36,490,000 gallons from the preceding month's total of 49,295,000 gallons and the July, 1932, sales of 31,581,000 gallons.

Imports of natural casinghead gasoline into Canada during July amounted to 2,619,547 gallons valued at $350,749 as compared with 3,574,713 gallons worth $151,464 imported in June Gasoline lighter than .8230 specific gravity at 60 degrees temperature imported in July totalled 857,-640 gallons appraised at $92,495

Germany Demands Equality

Chancellor Hitler Says His Country Will Not Be Treated As Second Class Nation

Berlin, Germany. Chancellor Hitler proclaimed that Germany will participate in no conference or agree to no convention "so long as she is not treated equally."

As if to still reports abroad that Germany may return to the disarmament conference and the League of Nations, the chancellor in a speech to his followers maintained:

"Germany is determined in the future to attend no conference, enter no league, agree to no convention, and sign nothing so long as she is not treated equally."

He hid for the co-agreed on of his country at home and issued a warning for the rochstag election campaign the sentence. "We simply refuse to be treated as a second class nation!"

A SCENE FROM THE SENSATIONAL REICHSTAG TRIAL

One of the most sensational trials of modern times, that of the five men accused of being concerned in the burning down of the Reichstag at Leipzig, Germany. The central figure, Marinus Van der Lubbe, the young Dutchman who caused a sensation by his loose laughter, bungee strike and "confession" is shown in the picture standing with his wrists manacled while being questioned by the court.

PLAN TO PUT LIMIT ON HIGH SALARIES IN U.S.

Washington. Action to limit high salaries of big business leaders in the United States was probably forecast in official circles after the federal trade commission announced it was noting 2,000 companies to furnish data on the salaries of their executives and directors.

Following President Roosevelt's inquisitive glance at movie salaries, the commission's inquiry was despatched in informed circles as a prelude to more definite action.

The senate resolution instigating the inquiry ordered the federal reserve board to obtain salary data from all member banks in the reserve system, directed the Reconstruction Finance Corporation to report salaries paid by banks borrowing from it and instructed the federal power commission to learn about the compensation of public utility officials.

While no instigation has yet been formulated, some officials expressed the belief that continuous publication of salaries probably would have the effect of keeping them down.

A ruling by the Reconstruction Finance Corporation that no public money would be loaned to railroads whose executives were receiving $100,000 and over a year when they end, their pay must be cut the compensation of three men all well known in the railroad field down to the maximum of $60,000.

Strikingly large salaries are now being paid to life insurance heads according to Alfred M. Best, life insurance reporters, who estimate that the average president's salary of the large companies is $135,000 per year

Support Stand Of Simon

Says Foreign Secretary Spoke For British Government

Liverpool, Eng. Viscount Hailsham, secretary of war said the government fully supports Sir John Simon in the stand the secretary for foreign affairs took on disarmament last week in Geneva.

"There is one thing I ought to say because the foreign secretary is hardly able to say it for himself," Viscount Hailsham said in a speech here.

"The foreign secretary, in what he did at Geneva, was not speaking personally, or individually, but as a representative of His British Government with the assent of his colleagues."

Sir John and Foreign Minister Von Neurath of Germany, have questioned each other's statements as to developments at Geneva last week. Baron von Neurath maintained Sir John misrepresented the German arms viewpoint to the United States and the Britain has offered to publish documents to disprove the accusation.

End Strike

One Stratford Firm Reported To Have Signed Agreement

Stratford, Ont.—First signs of cleavage of the deadlock which has existed between 800 striking Stratford furniture workers and their employers appeared when it was officially announced the workers at the Preston-Nostting Company one of the largest affected by the strike and their employees had reached an amicable settlement.

The announcement in the form of a formal statement, was handed out by James Preston, president of the firm, after he had been in conference with the shop committee.

(1914) Against War

Washington. President Roosevelt sent an address to the nation that on the call to world peace came from the United States for "we are overwhelmingly against war" and as a nation "we are seeking no additional territory at the expense of our neighbors"

A Statutory Holiday

Ottawa, Ont. Remembrance Day, November 11, is a statutory holiday. Announcement to this effect was made by the state department in response to many inquiries as to whether Remembrance Day was a compulsory holiday.

Hallowe'en Dance Gay Affair

The Hallowe'en dance held in the Memorial Hall under the auspices of the Girls' A.A.A. Club on Tuesday evening was an enjoyable affair.

The hall was very artistically decorated in orange and black streamers, with corn sheaves and pumpkins in the corner, and a large harvest moon shinning through the spruce trees. When lights were low, it tended to give the hall a bewitching appearance, which showed to advantage the results of considerable work on the part of the Girls' Club.

At midnight refreshments were served in the buffet room, this also was decorated with hallowe'en novelties.

Several novelty numbers were included on the dance program which were highly enjoyed by the large crowd of dancers.

The music was supplied by the Poppy Puls Orchestra.

YPRES VALLEY

The big Hallowe'en dance on last Friday evening was well attended in spite of the weather. As added attraction was Madam Fontaine of Edmonton telling fortunes and Miss Fontaine reading the tea-cups.

Mr. and Mrs. Bill Pearce, Mrs. Clark and Mr. Jot Irwin were visitors in Edmonton Friday, where they attended the wedding of Mr. Harry Hughes, formerly of Bathgate, Scotland, to Mrs. Gladys Birtoff of San Anseel.

Miss Ethel Burnett and Mr. Harold Armstrong were the winners of the boxes of candy which were raffled off in connection with the school Children's Club. Miss Pamela Jenkins and Master Billy Gunn won the prizes for selling the highest number of tickets.

The ladies aid met at the home of Mrs. Fred Davis on Hal. 12th, At this meeting they removed the date of Nov. 24th for a special affair. Please watch for further announcements.

A regular meeting of the Ypres Valley Parent-Teacher Association will be held at the school on Tuesday, Nov. 7th, at 8 p.m.

Mr. H. E. Smith, Ph. D., School of Education, University of Alberta, will give an address on "Child Physiology as Parent Control." Inspector C. H. Robinson of Lamont will also give a brief address.

A cordial invitation is extended to all parents of the Partridge Hill and Brookville school districts. No admission.

The sympathy of the Country is extended to Mr. and Mrs. Hagvald in their sudden and bereavement.

The infant son, Thomas, Wilson of Mr. and Mrs. John Hagvald of Ypres Valley died Tuesday, Oct. 24th, nine days old. He was buried at Pakan Cemetery, Thursday, Oct. 26. Rev. R. J. Hodgins officiated.

Mrs. Betsy Gunn, wife of the late David Gunn of Lardeau, B.C., died on October 17th, aged 88. She is survived by five sons and three daughters, David, Pete, and Bill of Ypres Valley, and George and Robert of Lardeau, B. C., and Mrs. H. Flinthoper, of Seattle, and Mrs. J. Young of Capreliton, North Vancouver, Mrs. R. Mack of Bonnyville, New Westminster.

OIL PRODUCTION

Alberta's total oil production for the month of September was 53,000 barrels, of which 19,000 was Turner Valley naphtha.

Customer: "I'd like to see some good round hell cure." "Salesman: "Do would I."

The Canada have redeemed themselves once again by defeating the challengers, Chicago Red Devils in three out of five games to retain the Underwood Silverware. How for the Durant team!

WESTERN HIGHWAY PROGRAM

Last winter the provincial public works department harvested its winter road clearing program to include 225 miles of main highway, which meant that this much mileage was kept open throughout the winter. This is a greater mileage than in any other year Ontario. This coming winter, the department plans to keep the same mileage open, with possibly a small variation in the program.

WEDDING

Pearce-Hams

A quiet but pretty wedding was solemnized in Lamont, Saturday, Oct. 21st, when Miss Lenora Hams of Lamont, was united in marriage to Mr. Jas. Pearce, son of Mr. and Mrs. Pearce of Fort Saskatchewan. The wedding took place at the Manse, Rev. N. D. MacLeod officiating.

Acting as bridesmaid and groomsmen were Miss Florence Buchanan and Emanuel Hams, brother of the bride.

The happy young couple will make their home on the farm near Fort Saskatchewan, managed jointly by the groom and his father.

NO INCOME TAX

A prairie farmer questioned by an Income Tax Inspector regarding his income over a period of years, wrote as follows:—"You asked about my crops for the last five years; well I'll tell you. In 1926 I was dried out. In 1925 I was hailed out; in 1924 I was frozen out; in 1927 I was blown out, and in 1928 I just walked out and I'm still out." This man appears to have retained his sense of humor despite his misfortunes.

Weekly Editors Hear Dr. Wallace

During the Convention of the Alberta weekties at Edmonton Oct. 20 and 21st, the delegates in attendance were privileged to hear three eminent speakers in forceful addresses which placed clearly before the audiences the causes and effects of present-day problems, and the important part which rural editors could play in bringing people to a truer and more permanent outlook upon these problems.

Having given our readers highlights of Premier Brownlee's address, we are giving a short space on the addresses of Dr. R. C. Wallace, and Mr. John Imrie.

Stevenson Weeklies' Opportunity

Dr. R. C. Wallace, of the University, who, though he is averse to public speaking, has himself become so popular a speaker as to be constantly in demand, made his appeal to the newspaper men, particularly the weekly men, to play their part in enabling before the reading public a true presentation of every-day events, particularly in connection with world affairs. He believed the opportunity which millions of commercially machine had of commercializing in a dispassionate and concise manner, from week to week, these events, thus giving to the public a clearer conception of what was going on than perhaps the dailies were able to do. He dwelt strongly upon the lack of understanding between nations, and the great need today for calm and reasoned consideration of every problem, national and international. People today showed a greater tendency to deal with facts, to see things from all angles. Consequences talk, rather than oratory, held sway today. While sentiment played a great part in affairs, the brain, the mind, should be the guide. He appealed to the newspaper men to continue a presentation without prejudice of the facts of affairs, leaving people to draw their conclusions from such presentations. If democracy was to succeed, and it is difficult today, then each must have to lead in his own way, not to be led by a so-called leader who might sway them with oratory or with prejudice. Pulpits were greater than individuals, he said, because politics were the outcome of communal thinking.

John Imrie spoke in a very lucid and illuminating manner of the revelations which had been made at the Pacific Relations Conference at Banff this summer of the dangers of the situation in the East. He spoke in a most interesting fashion of the gulf which lay between the mediaeval and the oriental races, and the immense difficulties which were in the way of bringing about a better understanding and relationship between the two, something which must happen if tragedy is to be averted. He emphasized truism. It was rather depressing, he said, to have the veil drawn aside for instal possessed not so much a lower a measure at the conference, to reveal standard of living than we of the the terrible possibilities of a clash western world, but rather a difference between the races, and to realize the utmost hopeless task which lay before those who were striving, as were the which the Chinese and Japanese races, delegates from all the nations at the particularly the latter, were developing industrially and otherwise, using and to bring about a better understanding.

Initiative

Initiative, or the lack of it, the development or the denial of it, appears to be quite common subjects of discussion in these days of the Great Depression. On the one hand, people are heard to say that adoption of the programme of the Socialists would result in the destruction of individual initiative, while, on the other hand, exponents of Socialism are not slow to point to people these days, and what initiative has an unemployed man initiating on Government relief?

Both are wrong. Socialism could not destroy individual initiative even if it would, because initiative is an attribute of the human individual, and it is not born, and cannot be developed under any conceivable kind of government, or system, or set of circumstances. Initiative is God-given and cannot be destroyed, although its expression in definite action may be hindered, even for a time prevented.

Nor is it correct to say that present day conditions are destructive of initiative, and that there is no room for its exercise by many people at the time. Rather, the reverse is true. Necessity is said to be the mother of invention, and invention is only possible where initiative is first displayed. The necessities of the present are, therefore, an urge to greater rather than less initiative

Not, only so, but evidence is not lacking, rather it is available on every hand, demonstrating the fact that greater initiative is being manifested by thousands of hard pressed individuals than they ever thought of exercising in the days of prosperity.

After all, what is initiative? A simple dictionary definition says it is an introductory act or step; the first active procedure in any enterprise; power of leading the land or of originating. That is, a baby shows initiative when it begins to creep, and more initiative when it takes its first toddling steps, and from that time onward through life. It cannot be developed.

But it can be encouraged, or discouraged; its development can be assisted or retarded, Parents and teachers have a very great responsibility in this respect. Employers, too, have an obligation in much the same way towards their employees, and if they are far-seeing they will realize that it is to their own advantage, as well as promoting the advancement of the employee, to encourage and assist their workers to display initiative in the tasks allotted to them. While it may be true, as sometimes charged, that Capitalism suppresses in some ways to insure initiative, it is also true that in quite as many other ways Capitalism has promoted initiative.

Governments, too, under whatever system may be in vogue in a country, may develop the initiative, not only of individual citizens, but of a whole people and country. Too much paternalism in a home is a deadly influence upon the development of the initiative of a child, weakening its self-reliance, when it begins to creep, and more initiative when it takes its first toddling steps, and from that time onward through life. It cannot be developed.

But it can be encouraged, or discouraged; its development can be assisted or retarded.

Rapid Advances In Rail Engineering May Revolutionize Present Transportation Systems

It will make some folk feel and to know the day is coming fast when the present crack railroad trains of the country will look old-fashioned. The engineers who plan ways to carry humanity across the land at bird-like speed with less expense and more comfort have spoiled the dean of the plant breeders and honey eats of our day. It is only a number of weeks before passengers on the Union Pacific may be relaxing along in trains that look somewhat like long silver cats. Models of the "rail-plane" and other modern forms of transportation have attracted crowds at the Chicago World's Fair, where a host of experts is now assembled for the October Review of Reviews says that one of the most typical will be known as the bi-rail road before the year is out.

Speed alone has not been the one goal sought by railroad science. The ad problem of saving substantially enough the distance for less energy to overcome the friction of the air is also the problem of the engineers of the "rail-plane" and their "flying machine" rather pointed by a 600-horse-power engine in a tandem arrangement. Economy make the difference between profit and loss in passenger service. It is a splendid achievement, this plane car of an train, as well as a long jump to many advances.

Passengers in plane through the rail, three cars of the rail-plane, including the "power plant," in the middle, travel slightly less, or at most less than a Pullman car. The train stands eleven feet from the ground. The "pilot locomotive," the car ahead of the engine, is the only one made nearly safe as here as the ordinary running speed and will restore horsepower to the locomotive, modestly compared with trains of present design.

Another rapid rail vehicle is the subway, which has been used abroad and has 10,000 miles of railroad operated by electricity for fast and inexpensive travel. Built on the rail, run by a motor-driven car gasoline engine, it was designed to serve passengers in units of one car or more. Its often lines and round power give it power to override wind resistance at high speeds.—Nine York Sun.

Trimached Over Bible.

Wife Whose Prayers Missing Organist Praises Blood Stock Sale.

Although three fingers are missing from his right hand, Reginald Silby writes with pride of having the successful candidate at the last examinations for the associateship of the Royal College of Organists. His success is a story of triumph over physical difficulties.

His right hand was shattered at Ypres, where he was an artillery officer, and it was feared his ambition as an organist was entirely frustrated. However, after several operations in a hospital he "came back," and passed his examination without any concessions.

He had studied her for a while but needs was his natural bent. His musical is a triumph of will power. As well as musicianship, the examination for the associateship of the Royal College of Organists having been abused a fantastic objective at first, and now Reginald Silby is entitled the diploma of the world's leading school of the organ.

Prediction Came True

The Hotel of Durham's prediction in 1850 that rail-of-provincial would come to a united Canada in which both races, British and French, would do their part, long ago proved true. The first was making his fervent proclamation to the people of Canada without making his report on the underground conditions that caused the Rebellion of 1837. He appealed to Canadians to have faith in British principles of freedom.

Gauged According Its Gift

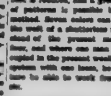
Gifts to the state are being calculated from the citizens of Austin, for inheritance tax assessment purposes. Five cents to the hereof can be assessed. Gifts of $5 will earn the title of "Patriot"; of $7.50, "Active Patriot"; of $10, "Good Patriot"; and $50, "Super-Patriot."

W. N. U. 2018

Trains Made By Sun Beams Obeden

Machine Which Diagrams With Its Own Reversal

The weaver's shuttle is one of man's devices, and now it seems likely to become obsolete. For thirty years experts have been trying to invent a weaving machine that would operate as fast as the loom, and at last modern materials made on a shuttleless loom are on the market. Silk and cotton will undoubtedly follow. A shuttle travels from side to side across and through the warp, carrying the weft yarn with it. The new method is for light rods of aluminum alloy to take its place. Each rod is fitted at the end with a gripper which carries the weft half way across the warp, and transfers it to the gripper of a rod which has come halfway across from the other side. The rods and rod drawn the thread across and the process is complete. No blunt shuttle is required, and a greater variety of patterns is possible by the new method. Seven colors can be used in the weft of a shuttleless machine instead of the present maximum of four, and there can also be a fancy selection in the present woolen weaving system with one loom, he will in future be able to work from three to six.



By Ruth Regan

DISCOVERING REALLY JAUNTY FOR SCHOOL GIRL AND IT'S SO EASY TO MAKE IT

Here's one of the smartest ideas of the season for the little school girl. It's effectively carried out in light navy blue polka-dotted silk with contrasting crepe contrast.

The youthful arrangement at the front makes it so distinctive.

Style No. 809 is designed to size 6, 8, 10, 12 and 14 years. Size 6 requires 1¼ yards of 54-inch material with ¼ yard of 35-inch contrast.

It's a model that offers endless color and fabric schemes.

It is particularly nice for wool jersey and would be darling in linen or broom with vivid red contrast.

Price of pattern 10 cents in stamps or coin (coin is preferred). Wrap coin carefully.

United Provinces Does Not Guarantee Prosperity

Confidently Expected Industrialists An Unsure Improver World Beneath Canada

Canada is far from being an overcrowded country. There is plenty of room for new population, new business and increased production. Intelligently directed and carefully selected immigration should not add to unemployment, and might indeed aid in its solution. The industrial machinery of the country is capable of providing for the needs of the more people than it has within new within our borders.

There is a danger that the depression may give birth to economic views that would be disastrous to the country. Some of these are already appearing before suggestion. While the present is not an opportune time to inaugurate new industries immediate inflows on a wide scale [illegible] sound means at hand. Premier Bennett said recently on the subject when he declared that Canada's [illegible] and still resources required a great population for development. Development is essential to a full realization of the prosperity that is inherent in the country. The mineral resources of Northern Canada have been an important factor in helping to weather the depression. There is in this statement an illustration of the possibilities of the future.

A limited population of itself is no guarantee of prosperity conditions. It is not to be supposed that if Canada today had twice the present population, it would necessarily be any greater prosperity-country than it is now. A large number of unemployed would not be anxiously absorbed into the economic life of the country. It is true, but with a return of normal conditions it will be of advantage to Canada that her population of the country reasonable numbers for a normal and steady growth.—Toronto Evening Telegram.

Family Record Of Chinese

Queen Can Be Traced Back Over 4,000 Years.

It is a matter of amusement to the western world that a young woman who had just been married in China is a descendant in the 77th generation of the great founder of Confucianism. If she traces her family record back only to the birth of Confucius, it covers 2,446 years, but Chinese historians profess to carry it back over 4,000 years. Yet, the shorter period of nearly 25 centuries would be enough to stagger the imaginations of those who boast themselves perhaps in the 11th generation descended from Roger Williams or the Pilgrims.—Providence Journal.

Tropical exports as such [illegible] in supplement.

British West Indian Roses are to be introduced into this country.

China realized nearly $600,000 from its first national lottery.

Incomparable Treasure Of Antiquities Is Displayed At The Royal Ontario Museum

Made For Blind Gardeners

Booklet By Ingoldsby Rhea Tells What Can Be Done

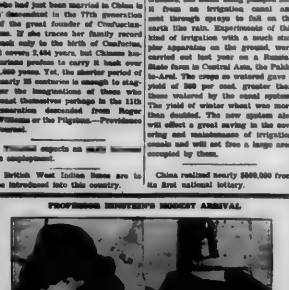
"Gardening for the Blind" is the title of a booklet issued from the office of the National Institute for the Blind, Great Portland Street, London, which is affiliated with the Guild of Blind Gardeners. Just what a blind person can do in a garden is told in this booklet by blind men. One of them says: "During the past 12 years of total blindness I have produced sufficient culinary vegetables to maintain an ample supply of all kinds for domestic use all the year around." But how can weeds be distinguished? Another blind gardener tells us. "The position of a weed is a good guide. The plants in the beds are known, and as they are placed in rows or change, it follows that any plant which is not a component is for our purpose a weed." And here we come to what would appear to be the most difficult of gardening tasks for a blind person mowing the lawn—though the writer calls it "the most pleasant of weekly jobs."

He admits that "it is not possible in cutting grass to keep a straight line," but considers the inconsistency "A little practice will enable one to detect the difference in sound between the whirring of the blades when cutting or when revolving freely."

Irrigating From Air

Experiments With Biplanes Distributor Have Proved Success

Irrigation of the land from the air is said to be possible by a new apparatus invented by the Russian Hydro-Technical Institute and the Lenin Academy of Agriculture. It consists of these which is carried in gas-filled balloons. The hose is attached to two trousers, the latter being pumped into it from an irrigation canal and sent through sprays to fall on the earth like rain. Experiments of this kind of irrigation with a much simpler apparatus on the ground, were carried out last year on a Russian State farm in Central Asia, the Pahlo-to-Ard. The crops so watered gave a yield of 300 per cent. greater than those watered by the usual system. The yield of winter wheat was more than doubled. The new system also will effect a great saving in the sowing and maintenance of irrigation canals and will set free a large area occupied by them.



PROFESSOR EINSTEIN'S MODEST ARRIVAL

Unannounced by any fanfare, Professor Albert Einstein, world-famed German scientist, a virtual exile from his native land, where he aroused the ire of the Nazis, is pictured as he left the liner at New York Harbour, whence he was taken by tug to Jersey City. The scientist left for Princeton almost immediately, even before reporters caught up with him.

The rest of Turkish is under that of Gaelic, because of the relationship in Turkish of the Royal Ontario Museum that which a magnificent new institution has recently been opened by the Provincial Government. The eastern provinces quotes from the London Times the opinion of an expert: "Outside London and the national museums of the British Isles generally, by possibly the finest collections have been found at Toronto, where the Royal Ontario Museum, the largest of all the Dominion museums, has not only incomparable Canadian collections but also world famous collection of Chinese antiquities and art." At the official opening this encomium was supported by the remarks of the secretary of the British Museum and the secretary of the Smithsonian Institute at Washington.

Ontario's institution has five departments, archaeology, ethnology, mineralogy, palaeontology, and zoology. Of the heads of these department C. T. Currelly, D.S.O., is the best known with his zeal for his job and his ability to make the dry bones of the past clothe themselves in glowing flesh

Though Mr museum, which under [illegible] providing for its foundation and maintenance must look to the governors of the University of Toronto among its trustees Ontario is moving for active plans for her, also of a far past of this Dominion. It is also spreading forth history of other lands and other times.

It should also prove an inspiration to the other provinces, many of which through the instrumentality of in some governmental connection have begun the long and fascinating adventure of building up a museum.—Winnipeg Free Press.

The World's Greatest Flyer

Lindbergh Says Kingsford-Smith And Kingsford-Smith Says Lindbergh

London raises an appeal to settle an important question: Who is the greatest flyer in the world? The query is answered one when Sir Charles Kingsford-Smith, Australian commander, clips 40 hours off the record by flying from London to Australia in 7 days, 4 hours, 44 minutes. The News Chronicle asks Col. Charles A. Lindbergh for an opinion and he replies: "I think Kingsford-Smith is the greatest flyer in the world." Then Kingsford-Smith is queried and he answers: "I don't think there is any doubt that Lindbergh is the greatest flyer in the world." And now the world will voice its own ideas on the subject—probably it will say both men are right.—Christian Science Monitor.

Women In Business

Efficient As Men And More Loyal Writes Sir Charles Higham

Women will play a big part in future as collectors of income-tax at the reorganized collection service at Somerset House. It was the last branch of income-tax work to which they were admitted, and now many more will be the appointment of a woman to the collectorate is announced.

Sir Charles Higham, speaking at an exhibition recently, said he disagreed with Sir Herbert Austin's view that it would be better for industry if women were kept out of business and back to their homes. Women were as efficient as men and were probably more loyal, he said.

Hall Caine's Last Book

Sir Hall Caine's "Life of Christ," considered to be one of the most amazing literary efforts ever attempted, is ready for publication in London. When Sir Hall completed it at 1 in 1931, he left a manuscript of 3 $80,000 words, equal to 60 novels. His sons, Ralph Hall Caine, M.P., and Derwent Hall Caine, engaged on expert who has selected material to make a work of 600,000 words. Every word of this is in Hall Caine's words it.

Soap making is becoming modern and scientific in India.

London's trolley fleet now owns 197 miles of routes.

WHEN WORK & WORRY PULL YOU DOWN

take WINCARNIS THE GREAT TONIC

OCCASIONAL WIFE

By ETHEL M. DELL

Author of "Jovetta," "Lyddick Hall" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, meet in an art class and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to be Peter down when he has so much promise as a sculptor. At an art school dance Miss Martin, Peter's roommate, who is jealous of Peter's success, takes Camilla out on the lawn to tell her "something she should know about Peter." Dan tells Camilla Peter is a cheat, that he only wants her money, and that he, Dan, loves her himself. If that becomes Peter appears on the scene and knocks Dan flat. On the way home from the party Camilla tells Peter they are going to do something about their problem. She decides that they are to be married, and until Peter establishes himself, go on living their separate lives. Above Peter's protests she carries her point.

(Now Go On With The Story)

CHAPTER XV

When Peter returned to his room, he found that Dan had been there and gone again taking with him all that belonged to him and several articles belonging to Peter, as well in the night which, Hallelujah, he missed very much. One of his possessions on he needed there his tie a lately acquired shirt his work pocket and materials. In place of these, Dan had left his own discarded belongings.

But Peter dismissed such trivial matters from his thoughts and devoted them to ways and means of justifying his marriage to Camilla as soon as school closed in June. All their plans were made They would be married quietly and begin it secret, if possible. Peter had wanted to take a studio somewhere near the museum, where he could work alone and devote all his time to studying and modelling. They agreed that he should do just that. Camilla had planned to remain with Mrs Hoyt during the summer, while she looked for a position Beyond that, everything was undecided. Her own family had evidently that she might return to them, but she had no desire now to share a home with a family which had deserted her once. True, it has been done in the interest of her welfare, but she resented it, nevertheless.

Peter had made plan for her, she thought, would be to share a room somewhere near town with her friend Hilda Martin, who already was a fine clerk in a downtown office.

"I've always liked Rose best, since she helped me with Peter," she told Peter. "Of course, we aren't much alike, having lived in such different environments, but we agree pretty well and she's a true little girl. I think I could learn a lot from her, and teach her things, too. It might be fun. And it's out of us, you see."

Peter favored that plan to her living at home, as it was tentatively arranged that he should have his meals obtained a position, she and Rose would take a room somewhere together. Mrs Hoyt was strong against it, but considered himself obligated to her as a husband Everything was to be secret—no one except their nearest acquaintances should know of their marriage. Camilla could not bear the idea of sharing inexpensive recreations such as they would have done under other circumstances. There was nothing to caution about considering their plans to Mrs. Hoyt.

"But why should we?" Camilla asked. "The way she is throwing me out upon the mercy of the world, she can't care much what becomes of me. I'll never have more than a home, and I would only make her more disagreeable until I do. If she were my mother or really interested in my future, it would be different. As for my own mother, she never has been concerned about me, except to give me away because it would provide a chance for me to live in luxury. Queer—to have two mothers and yet have none, really. I feel like a half-child, as it is."

"You're worth a million," Peter told her.

"I'm you," she reminded him.

"Well, it had better be to me," he laughed happily. "How about the marriage license?"

"We shall have that when you are famous and we can sell around the world," blithely.

"By that time, you will be a girl to old lady with white hair and I shall be a crotchety old fossil," he warned her.

"I'll wait! But, Peter, you might get your new studio ready to occupy on wedding!"

For which he applied himself to every odd task he could find that would add a few dollars to the depleted account. He had hoped to take one of the larger studios in the Craft by May, but he kept this cherished ambition to himself and managed a similar one in the Annex Hall, in the May. At least, it was very much better than the shabby rooming house where he had been living, and where he would not have taken Camilla for anything in the world.

There were times when he doubted the wisdom of their hopeless plans. They won't be very far wrong Camilla. Still—he could have her no other way unless he took some commercial position at a considerable salary and sacrificed his beloved dream. He would do that, even, if some situation

SOUR STOMACH, GAS

"I could not enjoy a meal, because of the bad sour gas and indigestion. I felt weak, had no appetite, and was losing flesh. I went to Medical Discovery about better. I enjoy my meals, and I felt so much better."

ROYAL YEAST CAKE

Coffee Cake

I Rell beat

COFFEE CAKE—equally popular for tea, luncheon or supper . . .

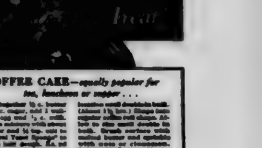
Cream together ½ lb. butter and ½ c. sugar. Add 2 eggs, well beaten, and mix well. Add this mixture with about 3 c. flour and ½ tsp. salt to 1 c. Royal Yeast Sponge to make a soft paste. Let rise slightly and place in greased pan. Cover and let rise again.

*ROYAL YEAST SPONGE:

Soak 1 Royal Yeast Cake in ½ glass lukewarm water for 10 min. Dissolve 1 tsp. sugar and ½ tsp. salt in 1 c. lukewarm milk. Add 1 cake of Royal Yeast softened as above and let stand 10 min. Add enough flour to make a thick batter. Let stand about 1 hr. (or 1 c. Sponge batter will be ready in 1 hr. 30 min. and needs to be used within 2 hrs.) Makes about 2 c. sponge.

Our free booklet, "Royal Yeast Cake Recipes," tells how to make delicious breads, rolls, coffee cakes, buns, etc. Write for your copy today.

Standard Brands Limited, Dept. 1-W, Toronto, Ont.



BE SURE to keep a supply of Royal Yeast Cakes on hand to use when you bake at home. Baked in air-tight waxed paper, they stay fresh for months. These features, plus the fact that they are more economical than other yeasts, have won for Royal Yeast Cakes the confidence of millions for over 50 years. And send for free copy of the ROYAL YEAST BAKE BOOK—gives 25 tested recipes. Address Standard Brands Limited, Dept. 1-W, Fraser Ave. & Liberty St., Toronto, Ont.

Almost Instant Relief From Neuralgia

For Quick Relief Say ASPIRIN *When You Buy*

Now comes *scientifically quick relief* from headaches, rheumatism, neuritis, neuralgia . . . *the fastest safe relief, if it is said, yet discovered.*

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. *And this is ready to go to work almost instantly.*

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S *quick relief*, be sure the name Bayer, in the form of a cross is on every tablet or package.

Does Not Harm the Heart

Just Silly Superstition

Nothing In Idea Almost Reckless Misuse Or Spoiled Salt

Don't be alarmed if you break a mirror and someone says that you'll have seven years' bad luck. That is the most superstitious. It is all nonsense and merely the end of witchcraft that was practiced during the Middle Ages. In those days if someone wanted to do harm to another he would contrive to break a mirror into which the second person had lately peered. It was said that if the mirror could be broken before the image of the victim had "evaporated" seven years' bad luck would be bound to follow the smashing of the glass. Actually, of course, the whole idea is ridiculous, just as ridiculous as thinking that the spilling of salt will bring bad luck. That particular superstition is the result of the very ancient idea that to spill salt at a man's table after one has dined with him is to insult him and challenge him to battle

Agriculture In Canada

Is Chief Staple Industry Of People In Dominion

Agriculture, including stock raising and horticulture, is the chief staple industry of the Canadian people, employing according to the latest available figures 33.7 per cent of the total gainfully occupied population and 33.9 per cent. or over one-third of the gainfully occupied males in addition it provides the raw material for many Canadian manufacturers, and its products in raw or manufactured from constitute a very large percentage of Canadian exports.

Taken from the Files

10 Years Ago Today

Wednesday, Nov. 4th, 1914

The death took place in Edmonton of Mr. Frasser Tims, ago 58 years. The late Mr. Tims came to the Fort in 1898. He was elected to the northwest Legislature for Victoria from 1905 to 1908.

The first snow fall of the season in this district occured today.

John Adamson left last Friday for his home in Regina.

Threshing will be completed in the Fort district within a short time. Messrs A McKinnon are at Bruce's, Fetherstonhaugh at home and Chris. Moss at the Lamont district. Fine yields have been made, notably Messrs A McKinnon, who report close to 100,000 bushels threshed.

What is believed to be the first car of Ontario (apple) ever shipped to Alberta and sold off the car took place last Monday, at the C. N. R. yards by R. R. Hopkins.

Corbett & Harper are now accepting their new and commodious offices in the Williamson block.

Sixty bushels of wheat to the acre is the record for Partridge Hill district. This was grown on the old Mosher farm by Mr. Partridge.

J. Calvert sought last a log in the jaws of a threshing machine, having to sacrifice a hand and tractor has broken in kicked free.

UNITED CHURCH OF CANADA

11 a.m. Morning Worship.
12:15 p.m. Sunday School and Bible Classes.
7:30 Evening Worship.

ST. GEORGE'S CHURCH

21st, Sunday after Trinity, in Octave of All Saints Day.

Holy Communion	8:00 a.m.
Sunday Services	11 a.m.
Evensong	7:30 p.m.
Sunday School	10:00 a.m.

Now that threshing is over for another season, we hope that our correspondents will take a few of their spare moments in which to make the doings of their respective districts known to their neighbors.

Keeping in mind, that an exchange of ideas is a means of education.

Mrs. Robinson had been inoculated preparatory to going abroad. Next day, to get over it, she remained in bed.

It happened that an intimate friend called, and the daughter was sent downstairs to explain.

"Mummy's in bed," she said.

"In bed?"

"Yes. She was inoculated yesterday and has a bad headache."

Fort Saskatchewan Record

VOL. 15 No. 32 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, NOV. 8th, 1922 $2.00 PER YEAR IN ADVANCE

Town Council Meeting Held Last Wednesday

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chamber on Wednesday the 1st. Instant at 8 p.m. Present Mayor Montgomery, Councillors, Lelande, Fillmore, Magee, Watt, Graham and Neale.

The minutes of the last meeting held were read and adopted.

The following accounts were passed for payment, Calgary Power Co., for streets $117.30, Town hall $6.60 and Memorial Hall $1.20; Beaver Lumber Co., $14.40 for Town properties, $5.47 for Memorial Hall and $6.35 for material for sidewalk; Fort Brand $2.35 advertising for coal tenders; Ed. Barnett $1.50; P. Robinson wood for Memorial Hall $4.00; Simmons Lumber Co. $1.40 for Memorial Hall; The Institute Press Ltd., $11. 05 for 2000 cheques; 4 special constables for duty on Hallowe'en were paid $12.00 each.

The Council accepted the Tender of Jerry Larson for 30 tons of coal at $8.30 per ton, This was the only tender received.

The offer of The Fort Hardware to supply 30 Sanitary Buckets at $2.75 each was accepted by the Council.

A motion was passed to the effect that a rental of $5.00 per night be charged to local organizations for the use of the Memorial Hall buffet room.

It was decided to have the streets and sidewalks cleared with snow plows when required, the same as was done last year.

Municipal District Hold Regular Meeting

The Council of the Municipal District of Strathcona No. 20 held a regular meeting on Monday the 30th October, with all members in attendance.

Considerable time was spent in discussing divest and indigent relief. As the Government had set the 1st of November as a cut off date for all relief recipients it was decided that all members of the Council should be a committee appointed to investigate all cases for relief prior to submitting new applications to the Relief Branch.

Application was made by the Sisters of Misericorde, Edmonton, for the Council's permission to cancel in to one block a number of lots they owned in Ardrossan. The Council offered no objection to the proposed cancellation.

The Secretary was instructed to issue transfer of Lots 21 to 32, Block 7, Ardrossan, to Mr. R. Bentley, he having completed his payments on same.

Messrs. Hoyer and Mast were appointed official delegates to the annual municipal convention which is to be held in Edmonton on the 22, 23, and 24th of November. The Secretary was given leave of absence to attend the convention.

Mr. C. T. Montgomery was appointed as Returning Officer for municipal elections in Divisions 4 and 5.

Three applications for old age pensions were approved and confirmed.

With the reading of the usual large volume of hospital correspondence, the discussing of same, and with the passing of payments and accounts the meeting adjourned at 5:30 p.m.

GET YOUR COUPONS IN AT ONCE TO YOUR MERCHANT

The winner will be advised immediately the "Suggested Name" has been produced.

Get your "Turkey Sheet" posters by the dozen at The Record office.

Josephburg News

The Josephburg Junior U. F. A. held their meeting at the home of Mr and Mrs. Albert Becker on November 2nd 1922.

The meeting opened by singing "Canada and the Roll Call and the Minutes followed.

It was decided to have a programme-committee for the next three months Those elected were: Elsie Griffin Lena Underwood.

JOSEPHBURG HALLOWE'EN PARTY

On the evening of October 31st, a Hallowe'en party was given by the pupils of the Josephburg school also assisted by the teacher's, Miss E. Gerlits and Mr. W. K. Griffin.

The guests, on entering, were given masked by ghosts and were then taken on an adventurous trip through the lower regions, given the move under supervision "The Mystic Valley of Good Luck."

On returning they took part in laughable games, ruby races, and candy pulling was in the offing. Mr. Griffin told a ghost story, which went off with a bang, (of paper bags).

A fine supper given by Vera Ashton and Stella Doan, Margaret Mast sang a solo.

At ten-thirty lunch was served by the high school students. Miss Gerlits then lead the party in community singing, the rounds being especially enjoyed by everyone.

This brought the party to a close.

We are now busy preparing for our annual Christmas Concert which is to be held on Friday, December 22nd.

REPPEL — WILLIE

A quite wedding took place at the Josephburg Manse on Nov. 4th, at 10:30 a.m. when Miss Dorothy Willie daughter of Mrs. Albert Becker of Josephburg was united in marriage to Rudolph Rippel youngest son of Mr. and Mrs. A. Rippel of Josephburg. Rev. Weinbrauch officiated.

The bride wore a gown of rose chiffon. Miss Adela Frey sales of the groom acted as bridesmaid and wore a gown of blue.

The groom was supported by Edward Willie, brother of the bride.

A wedding supper was given at the home of the grooms parents.

The young couple will reside at Josephburg.

UNDERCHULTE—HILLIER

A lovely wedding was solemnized Wednesday, Nov. 4th at 4 p.m. at the Josephburg Reformed Church, when Miss Elsie Miller of Lamont became the bride of Albert Underchulte, son of A. Underchulte, Rev. Weinbrauch officiated.

The bride looked charming in a gown of satin and lace with veil and orange blossoms and carried a bouquet of roses.

The bridesmaid, Miss Elsie Underchulte, sister of the groom wore a gown of rose crepe and carried a bouquet of carnations.

Mr. Joseph Miller of Winnipeg, cousin of the bride supported the groom. During the wedding service Miss W. Haase sang a solo. The wedding march from Lohengrin was played by Mrs. Ed. Mohr.

After the wedding, at the home of the groom's parents, Mr. and Mrs. A. Underchulte about 75 guests enjoyed a lovely wedding dinner. The table was centered with a charming wedding cake.

The evening was spent in dancing etc.

Mr. and Mrs. Albert Underchulte will make their home on the groom farm at Sentford.

If you want bigger business this fall then last, spend a little more money on advertising.

Fort School Board Hold Business Session

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chamber on Monday the 6th. November, 1922, at 7:30 p.m.

Present Mr. F. Gibbons, Chairman, Trustees Dr. Calhoun and Dr. Turner.

The minutes of the last meeting held were read and adopted on the motion of Dr. Calhoun.

The following accounts were passed for payment on the motion of Dr. Calhoun. C. A. Brown $2.80, North British & Mercantile Insurance Co., $25.50. The Simmons Lumber Co., Coal $122.05 and lime $1.85; Calgary Power Co. Str; P. W. Smith, School supplies $14.85; Jos. Graham grain for floor $2.80; A. M. Carmichael $64.65.

Mr. Anderson was present and submitted attendance and other reports for October. He also reported that 4 additional desks were required for the High School. It was moved by Dr. Calhoun and adopted that we purchase 4 individual desks, Empire seat at approximately $11.75 each.

It was moved by Dr. Turner and adopted that we purchase the library books requisitioned for by Miss Wood.

The Chairman was authorized by the Board to make any emergency purchases for the School in order to avoid delay in waiting for monthly meeting

The High School rooms will be closed on the 9th and 10th of Nov. to permit the two teachers to attend the High School Teachers' Convention.

A communication was submitted from the Minister of Education addressed to the Teachers of the Province of Alberta giving certain suggestions about the observance of Remembrance Day in the Schools.

The meeting adjourned on the motion of Dr. Calhoun.

VETERANS TO HOLD SERVICE REMEMBRANCE DAY AT 10:45

All veterans are requested to attend the Remembrance Day parade on Saturday. The unit will form up in the Memorial Hall at 10:45 a.m., and march to the Memorial Plot to observe the two minute silence at eleven o'clock. Padre Reed will be in charge of the service.

A smoker will be held in the Memorial Hall in the evening and you are requested to bring your "old front line" smile. The S. R. D. will officiate.

YPRES VALLEY

On Friday, Nov. 3rd at the home of Mrs. O'Gorman, a successful whist drive was held in aid of the Anglican Sunday School, by past. Eleven tables were in play. Prizes went to: Ladies' First, Mrs. Clark, Second, Mrs. Chas. Horton, Gents, First, Mr. Fred O'Gorman, Second Mr. George Rose, Consolation Ladies Mrs. Art Irwin, Gents Mr. Jos Bready.

After a lunch, six tables of bridge were played, prizes went to: Mrs. Jos Bready and Mr. H. Samson.

A table center, donated by Miss Camp was raffled off, Mrs. Hillman was the winner.

Mr. and Mrs. Pearce and daughter were over-night visitors, Saturday to Mr. and Mrs. Chas. Horton.

The monthly meeting of the Ladies Aid was held at the home of Mrs. C. Simmons. After the meeting a pleasant feature was the presentation of a box of chocolates to Mrs. Dave Cranston who leaves for an extended visit to Ireland next week.

The Parent-Teachers Ass. of this district were entertained Tuesday evening by Dr. Smith of the University, he spoke on "Child Welfare" and largely on the new methods of education. Parents and Teachers from neighboring districts also enjoyed the address.

Inspector Robinson will speak on Dec. 8th.

Good Hope

Mr. Wesley Johnston and Mr. Duncan Cranston were visiting in Edmonton for a few days last week.

Mr. and Mrs. A. E. Meyer were visitors at the home of Mr. and Mrs. Frank Bleay of Rose Creek, last Friday.

Miss Agnes Deeds of Fort St. John is visiting at the home of Mr. and Mrs. H. Townsend.

We are sorry to hear that Mrs. J. C'Gorman has been a patient in an Edmonton hospital. We hope to have her back in the community soon.

Mr. A. E. Meyer attended the Provincial U. F. A. convention at Gibbons last Tuesday.

Winding up an address on temperance the minister said: "In conclusion let us hope for the day when all the beer and whiskey will be thrown into the Badly River. We will now sing hymn 594 "Shall we gather at the river".

Canadian beaver had climbed to fourth place in the British market said a bureau of statistics bulletin.

Coming Events

The Women's Missionary Society of the Fort United Church will hold a Sale of Home Cooking on Friday, Nov. 10th from 2 to 6 p.m. at the store of Messrs Jones, Graham & O'Brien.

The Fort Badminton Club will hold their Grand Opening Badminton Dance in the Badmenton Hall on Friday, Nov. 10th. Dancing 9 till 2. Refreshments. Poppy Pale Orchestra. Admission 50 cash. Everybody welcome.

The regular monthly meeting of the Women's Institute will be held in the Union Hall Nov. 8th, at 3 o'clock. Mrs. L. Frost R.N., will be the speaker. There will also be an exhibit of Handicraft. All members and others please have any form of Handicraft to be displayed at the hall by 2:30 p.m.

The United Church Ladies Aid will hold a Tea, Sale of Work and Home Baking on Saturday, Dec. 2nd, in the store formerly occupied by Dubec Hardware. Tea 25c.

The Hudson Bay Route Again

The Financial Post of Toronto, that unsurpassing opponent of the Hudson Bay Railway, has taken note of the article which appeared in this column some weeks ago in which we took exception to the attempt made by this Eastern financial paper on this great national scheme to provide the prairie west with an ocean port somewhat nearer to its great productive areas than Montreal in the east and Vancouver in the west. It will be remembered that the Financial Post condemned the Bay route in toto declaring that the railway should never have been built, that it was nothing but a contractor's racket, and that having been built and harbor facilities and an elevator provided, it should now be completely abandoned. It criticized the granting of free elevator storage or low rates for a few years while the route is being initially developed. It characterized the whole enterprise as a "colossal failure," "a hybrid of a white elephant and a political sacred cow," and so forth, and so on.

We have no particular desire to enter into any extended controversy with The Financial Post, and it is gratifying to note the much more moderate tone of its later article and the almost apologetic manner in which it seeks to defend its attitude. Nor does it repeat its adversary of the complete abandonment of the route. However, it does continue its battle it and to argue that it is economically unsound and cannot ever hope to be a success. It repeats its unsupported charge that the building of the railway was "a pain ordinary contractors' racket from the beginning," and that it should have been opposed by all good citizens," wherever resident in Canada.

The Hudson Bay Railway was not a contractors' racket. Some of the old Manchester and Mann enterprises, notably the building of a line parallelling the C.P.R. around the north shore of Lake Superior, might be so designated perhaps, but it was not a group of contractors but the people of Western Canada who demanded the building of the Hudson Bay Railway. Nor was there any doubt that wanted in switching the original route from Churchill to Nelson, but sound business reasons alone influenced the switch back again to Churchill. Not incompetent contractors, but the best harbor expert in the world was responsible for that change. And once that decision was decided upon the railway was built with a maximum of speed and efficiency and at a minimum of cost. Possibly The Financial Post is a better citizen than more than a million people resident west of the Great Lakes, but we are not prepared to admit that all these people are not "good citizens," as The Post implies in its case.

The fact, in its later article, has this to say: "The trunk of the matter is that the opening up of the Hudson Bay route has not obtained any measurable volume of traffic on a purely economic basis. A certain amount of traffic has passed out in each of the past two years because of the remission of a major portion of the fees that the Government charged in collecting for that traffic."

As pointed out in our former article, and as The Post must admit, and does admit, the route has been only two years in operation. These two years were in the midst of the greatest depression the world has ever known. They were two years of greatly reduced crop production in Western Canada due to drouth. They were years of abnormally low prices for wheat. In every respect they were not normal nor average years. The Financial Post knows all this is true, but disregards it.

How grudgingly it may be asked, passed out of the part of Montreal in its first two years following the Government's decision to make it a real ocean port? Did, or did not, the Government offer inducements to encourage shipping to start out of that port in the years of its infancy? Were not millions of dollars were spent before the shipping world finally recognized the feasibility of the St. Lawrence route and a season part a thousand miles from the open sea? Does the Financial Post now declare that the part of Montreal should have been "completely abandoned" two years after its inception?

All the West asks is that The Financial Post, and other eastern interests like it, be fair. With much that The Post says about dizzy little harbors, wheaty sands scattered here and there all over the Hudson Bay route, we are in agreement. But the great Hudson Bay route cannot be tested in the same terms with these.

On page 2 of the same issue of The Post in which its later article on the Hudson Bay route appears, there is printed a despatch from its special correspondent at Ottawa in which the fact is noted that every year in the there is a serious lack of water in the lower St. Lawrence canals, the port of Montreal, and the ship channel to the Gulf. The Post despatch says: "Normally a fraction over 27 feet of water in the harbor, the port authorities at Montreal are extremely worried at the failure to receive more than 25 feet, perhaps, the most handicap to Canada's premier port. The Post despatch continues:

"This is not a pleasant prospect. But there is little that can be done about it right now. Shipping circles are putting up a vigorous demand for remedial measures to control the flow of water down the St. Lawrence canals, to ensure adequate depth for navigation. The Government is ready to carry out a conservation policy but there is a conflict of opinion as to how the work should to done. It is thought likely that a commission will be appointed and the report acted upon next year."

Even at this date, does The Post think the port of Montreal should be abandoned as "a hybrid of a white elephant and a political sacred cow?" Does it feel that this continuous dredging from year to year at the present rate of the taxpayer should be stopped? Does it, or does it not, favor the expenditure of more millions in order to ensure adequate depth of navigation in the St. Lawrence and the harbor of Montreal? Or as the St. Lawrence route from, say Quebec to Montreal, a "colossal failure?"

The West takes no narrow view of this matter. Montreal is a great national port. It must be maintained in its full efficiency at any hazard and at all costs. We believe all "good citizens" wherever resident should, and will, adopt that view. If the St. Lawrence route after half or three quarters of a century of governmental maintenance still is in need of improvement, it will be forthcoming. But why deny similar assistance to the Hudson Bay route in the initial years of that route, and years marked by great abnormal and extremely adverse economic conditions the world over?

Household Drudgery
The Bane of a Woman's Life

Nature intended women to be strong and healthy instead of weak and sickly, but how can a woman retain good health when she has to go through the household drudgery without any relaxation. Is it any wonder she becomes nervous and irritable, has backaches, faint and dizzy spells, shortness of breath, rasping and smothering sensations, and can't sleep at night.

Women who are rush and run down will find in Milburn's K. & N. Pills a remedy to strengthen the system and bring back the much desired health.

England Has Right Idea

John Bull's Objective Is To Keep Everything Moving

Americans, apprehensive of inflation, are reported shipping their dollars to England and Canada. Americans want to think in new terms. They should keep idle money at home.

There is nothing wrong with Uncle Sam's dollar in the world. It has behind it a greater per capita wealth in territory and foods and goods and technological productive capacity than any dollar on earth.

The truth is that Uncle Sam and his citizens, while rich in natural wealth and productive capacity, are poor in psychology and philosophy. Americans have not yet learned that it spells in money to hide it. Losses and recessions are all part of the game.

When old John Bull, rich in experience and philosophy, is unwilling to take losses; England's objective was to always keep the game or the business or the country going.—Vancouver, B.C., Sun.

Feels 50 lbs. Slimmer
After Losing Only 6 lbs.

"I started taking Kruschen Salts a month ago," a young woman writes, "and have lost 6 lbs. in weight, and I feel as if I have lost 50 the I am full of vigor, whereas before I felt listless and worried over little things. But I have also gained in health for I would not worry one bit today (thanks to Kruschen) if I put on 7 lbs."

Here's the recipe that banishes fat and gives one daily health: Take a half teaspoonful in a glass of hot water before breakfast.

Be sure and do this every morning, for "it's the daily dose that takes off the fat." You can take Kruschen on duty it means that every particle of poisonous matter and harmful acids and gases are expelled from your system.

Modify your diet and take gentle exercise. The stomach, liver, kidneys and bowels, the blood, and the pure, fresh blood containing these six salts is carried to every part of the body. These follows that Kruschen Salts is the essential means and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

STOMACH ACID BURNS LIKE FIRE

Sometimes stomach acid makes your stomach feel like a lake on fire. Then you belch and belch. Or the acid sends relief from burning pain, sour stomach and gas. Instantly with a spoonful of Bisurated Magnesia in half a glass of water. Any drug store has Bisurated and Just one spoonful will prove how quickly it works.

Robin E. Kindorf's Resigns

New Cabs Frontage By Director, Food Service Supplement Routes Of Railway

Among the most interesting recipes which have been evolved recently are Frontage Day Cakes. What's the matter with the cake? They're very easy to make and the crunchy deliciousness of the finished cake will thrill you. The basic ingredient is sweetened condensed milk. Sweetened condensed milk which is pure whole milk and cane sugar cooked down to a consistency of a frosting consistency as it comes from the can. It needs only eggs or two other simple ingredients for a perfect frosting. Wonderful when baked as usual and cooled. The frosting is then spread with a knife on the cake on a cookie sheet, or if you haven't frosted the cake use the pat of butter which the cookie sheet has been delicately in a hot oven (450 degrees Fahrenheit) and then cool as dry out as might be supposed because it is spread with much pressure on all sides. Be sure and watch the cake carefully while it is in the oven for sugar mixtures, as you know, burn rather easily.

CRUNCHY BUTTERSCOTCH ICING

Half cup sweetened condensed milk; 2 tablespoons butter, melted; 4 tablespoons brown sugar; 1 cup shredded cocoanut; mix all ingredients and blend thoroughly. Spread on cake. Place cake in broiler pan under a slow flame. Broil until the icing bubbles all over and the surface becomes lightly browned. Remove from broiler. Cool.

Further recipes will appear in later issues.

Production of automobiles in France has been increasing this year.

Newspaper Man Meet In Regina

Annual Gathering Of The Saskatchewan Section Of C.W.N.A.

A meeting of the Saskatchewan division of the Canadian Weekly Newspapers Association was held in the Saskatchewan Hotel, Regina, on Oct 27 John Scott, Whitewood president, with all members present.

D. C. Dunbar Estevan, was chosen president for the ensuing year.

H. Cumbie, Gull Lake, Humboldt, was elected vice-president. Short addresses for the new term include S. J. Duncan, Alameda, secretary-manager, who is now serving his sixth term; E. S. Hogg, Wapella, treasurer.

New members of the executive are C. H. Holmes, Rosetown, J. H. Bains ton, Bulyeaide; H. Sharpman, Milden Lake, and H. D. Pedler, Unbow

Hon. Howard McCumond addressed the association at the afternoon session, explaining the steps taken by the Government in the distribution of printing and advertising amongst the weekly newspapers.

A mutual system of insurance for members was recommended by W. Waughby of Milestone

The Mid-West Paper Sales Limited, tendered a complimentary dinner to the delegation.

Three in The Arctic

The only domestic animal bred profitably in the Arctic regions is the reindeer, because it requires neither hay for feed nor shelter for protection. There are more than 135,000,000 of them, and it is not uncommon for single breeders in Arctic Siberia to own herds of 10,000 at a time.

An old herdsman who had just wit. nessed a chicken walking was asked to remark: "They may not know it, but the yoke is on them."

Base Pain, Headache in Few Minutes

For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuralgia, neuritis . . . the fastest safe relief, it is said, yet discovered.

Them results are due to a scientific discovery by which an Aspirin Tablet begins its dissolve, or disintegrate, in the moisture upon it two seconds after touching moisture. And hence is at start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. As Aspirin Tablet starts to disintegrate almost instantly you swallow it. And then is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, be sure the name Bayer in the form of a stamp is on every tablet of Aspirin.

Across Africa In "Baby" Car

Two Englishmen Made Trip In 16B Days Including Delays

Alan Gill and Kelter Kay have just completed a journey from Liverpool, England, to Cape Town, South Africa, in a "baby" automobile. They covered 13,370 miles in 185 days, including delays, which at times extended for weeks. When they crossed the Sahara they were accompanied by a native "pilot," in accordance with demands of French authorities, and part of the way by bogus "escorts" carrying machine guns for protection against parasites Tuareg raiders. The distance across the desert is 850 miles, and the temperature was scorching. Tribal troubles caused Gill and Kay to make a detour of 1,000 miles from Tangier, where they were told fighters had closed the direct road south of Fez.

DOCTORING YOUR DAIRY HERD

Cows aren't machines. They can get sick or lazy. But Minard's Liniment makes it easy to cure for many ills in cows. Thos. Silsbey of Larde, B.C., found one of her herd with a lump in her udder. "I rubbed it with Minard's Liniment," she says, "and it soon got better."

Minard's is best for Cuts, Bruises, Colds, Distemper, etc., and generally good in stable or house. Well named "King of Pain".

Minard's Liniment for Rheumatism

Killed As Taboos Powder

Prisoner-of-war officers at Modern on the Franco-Italian frontier, recently noticed a railway car loaded with barrels, which were filled as containing powder. They were consigned from Italy to a man in Lyons. Seventy-five of the 111 barrels held choice smoked hams packed in taboos powder. The customs charges on the pork seized totalled $1,300.

U. F. M. HAVE DECIDED TO KEEP OUT OF POLITICS

Portage La Prairie, Man. The non-political status of the United Farmers of Manitoba will be maintained. It was decided at the three-day annual convention here A policy of independence, free from all political party affiliations, as adopted five years ago, was re-affirmed by a large majority

Rejection of the proposal for political action was brought to an end efforts made for political affiliation by the Co-Operative Commonwealth Federation, under the leadership of J. S. Woodsworth, leader of the group in the House of Commons The vote was not recorded.

A resolution was adopted request. ing mortgage companies to refund farm mortgages as speedily as possible on an amortization basis at low rates of interest It was described as a "measure of compromise" giving the "other fellow" a chance, and it's sponsors suggested a 20 to 25-year amortization plan with the possibility of administration through a provincial lands board.

Inflation, controlled by an independent commission under federal government supervision, debt adjustment and marketing problems were given

The suggestion was made all money contracts should be revised to levels where payments of debts would be possible. Immediate inflation, it was suggested, should be prepared to take their share of loss resulting from the economic depression.

Doctors Resign

Eleven Members Of Honorary Staff Of Winnipeg Relief Bureau Offer Relief Policy

Winnipeg, Man. -Eleven doctors on the honorary staff of Victoria Hospital, who handled their relief patients, to the board of directors a month ago, have resigned, it was announced by Geo. H. Sherwood, chairman of the joint committee of the Manitoba Medical Association and the Winnipeg Medical Society.

The resignations declared the doctors were not in accord with the directors on the policy laid down in Victoria Hospital for treatment of patients on relief. It was contended in other Winnipeg hospitals the honorary staff attended only emergency relief cases, whereas at Victoria hospital, members of the honorary staff administered to all relief patients.

Drop in Wheat Exports

Load Week In October Shows Decrease From Same Week In 1931

Ottawa, Ont.—A decrease of more than 1,500,000 bushels was shown in export clearances of wheat for the week ending October 27 as compared with the previous week, and a decline of more than 1,000,000 bushels as against the corresponding week of last year, according to a report issued by the Dominion Bureau of Statistics.

During the week ending October 27 the export clearances of wheat totalled 4,887,488 bushels compared with 5,537,000 in the previous week.

Canadian stocks in store on October 27 totalled 249,162,225 bushels, compared with 243,240,564 the week before and 239,454,907 on the corresponding date of 1932.

Bus Route Is Extended

Victoria, B.C.—Premier S. F. Tolmie hailed enthusiastically reports from Washington which, however, denied official confirmation, that $40,000,000 had been set aside towards construction of the projected Pacific Coast Alaska highway. "This work would solve the unemployment problem of British Columbia," said the premier. The highway would link Seattle and Vancouver with Alaska.

Report New Medical Discovery

London, England. Reports were in circulation among medical men that Dr F. G. Banting, Toronto's discoverer of insulin, had perfected a device to prevent contraction by miners of silicosis, dread lung disease, caused by inhalation of minute particles of dust in the air.

Prizes For Poetry

King George To Offer Models For Writers Of Empire Verse

London King A statement from Buckingham Palace said the king had signified his intention of offering an annually gold and silver medals for English poetry published within the Empire in volume form by British citizens.

A committee of judges to decide the awards will include John Masefield, poet laureate, as chairman Laurence Binyon, author and keeper of prints and drawings in the British Museum Walter De La Mare poet, author playwright, and actor, Ivan Richards, critic.

Sub-committees will be appointed abroad to recommend books from India, the Dominions and Colonies. Medals will be awarded toward the end of each year for works published during the preceding year. First awards will be made in December 1934, for books published in 1933. The medals will be given ports for their first or second books, or to poets up for the age of 30

Writer To Be Expelled

British Newspaper Correspondent To Be Removed From Munich Jail

Munich, Germany Noel Panler a British newspaper correspondent accused of insulting Chancellor Hitler at a Nazi gathering at which Chancellor Hitler spoke, will soon be released from the Munich jail and expelled from the reich, an official statement said.

The state's attorney in Leipzig, the correspondence declared, found after mature consideration that there was no further cause for prosecuting Panler and "in consideration of his sojourn in Germany is undesirable."

No data was set for his release and

Panler, a correspondent here for The London Daily Telegraph, was arrested October 23 and held at police headquarters on an official charge of "suspicion of espionage." For several days he was held in communication but the British consul-general made strong representations and was later allowed to see him.

Canadian Coal Industrial

Control Under N.R.A. Code Plan Is Explained

Truro, N.S.—Control of the Canadian coal industry under a code based on the principles underlying President Roosevelt's industrial recovery regulations in the United States would assure improved operations for Nova Scotia's mining industry, in the district convention of the United Mine Workers of America were told Wednesday by Thomas Kennedy, international secretary treasurer of the organization.

By this means, and by taking advantage of the N.R.A.'s operations below the border, the international executive declared, mining activity on the province could be brought back to a full time basis. Application of a Canadian code, he said, would mean an equality of wages placed the coal entering Canada in unfair competition with Canadian coal, thus providing a wider outlet for the domestic product.

For Reasons Of Economy

District Superintendents Fitting Postmaster's Place In Some Cities

Ottawa, Ontario.—For reasons of economy no appointments will be made by the government to fill postmasterships in cities where district superintendents are located, it was announced here. The functions of district superintendent and postmaster will be combined, the former performing the duties.

Vacancies exist at present in Toronto, Winnipeg, and Moose Jaw, but the government does not intend to fill them. The postmasters' duties will be undertaken by the district superintendents concerned.

Campbell Building New Car

Indianapolis.—William Sturm, of Indianapolis, business manager of the English speed king, Sir Malcolm Campbell, said the racer had started work on another automobile that would prevent him from crossing the Atlantic this winter to attempt to better his own speed of 272.108 miles an hour.

BEER IMPROVEMENT

J. P. Morgan, famous United States banker was quite talkative about the current improvement in British business conditions on his return from a lengthy visit to Great Britain. He emphasized that the Mother Country had turned the corner away from hard times.

Benefit Export Business

Sir Henry Drayton Sees N.R.A. Plan As Aid To Canada

Toronto, Ont —Possibility of the export business of Canada benefitting by the expense of the export business of United States as a result of the N.R.A., as it now operates, was foreseen by Sir Henry Drayton, minister Canadian Minister of Finance, in an address before Incorporated Accountancy and Auditors Association of Ontario, Toronto chapter.

"Increased price levels must always injuriously affect export business," he declared. "I expect the export business of the United States will be, no matters now stand, injuriously affected by the N.R.A. Its success would be a real benefit to us."

Millions Given By Japan For Relief

Multi-Millionaire Family Establish Fund To Relieve Distress

Tokyo, Japan.—The multi-millionaire house of Mitsui, Japanese banking family, has established a endowment of the 20,000,000 yen Mitsui foundation to relieve peasant distress. At the current exchange rates 20,000,000 yen is about $8,536,000 Canadian Funds).

Believed to be the largest private benefaction in the history of Japan, funds will be allotted to organizations working to ameliorate the poverty of farmers and fishermen and to scientific and industrial research groups for the same purposes.

SPEED IS DECEPTIVE ACCORDING TO RECORDING OF CHIMES

Our picture gives a vivid impression of speed and power as seen from the footplate of the new British locomotive, "Princess Royal." The train is approaching Low Gill on its journey from Euston to Carlisle and is gaining momentum for the ascent to Shap. A remarkable feature is the row of the revolving wheels while the "Princess Royal" is traveling at a speed of more than 65 miles an hour. The view was made possible by the projection of the camera from the engine cabin.

Liquor Smuggling

R.C.M.P. Strike A Blow At Illegal Trade in Quebec

Montreal, Quebec - Royal Canadian Mounted Police have straightened out details of what was described as their paralysing blow to the liquor smuggling industry and prepared for what is expected to be wholesale prosecution of rum-runners.

Rumors last Sunday of documents said to incriminate 525 persons in illegal liquor traffic between the French-owned islands of St. Pierre et Miquelon, and St. Lawrence coast towns in Quebec brought to a climax weeks of intense investigation into the detection of rum-runners.

Simultaneous descents were made on "headquarters" in the towns of Matane Riviere Du Loup, Ric, and St. Francois Du Lac, while several liquor-laden vessels—including the river boats Skipaking and No. 12—were also seized.

It is understood the leader of the ring was being detained at Riviere Du Loup and that several other arrests were imminent.

Remembrance Day Will Be Fittingly Observed

Ottawa Holding Usual National Service On Parliament Hill

Ottawa, Ont.—Remembrance Day will be observed in Ottawa by a national service in front of the home perary cenotaph on parliament hill. His Excellency the Governor-General will be present, together with Rt. Hon. R. B. Bennett, Prime Minister.

London, Eng.—Arrangements for Armistice Day celebrations here November 11 are largely along the same lines as in recent years.

Granted reasonably fine weather an enormous concourse is looked for when the king lays a wreath on the cenotaph in Whitehall His Majesty will be followed by the Prince of Wales and representatives of the Dominions and Colonies.

An army of 250,000 helpers will sell Armistice poppies throughout British Armistice Day.

Policy Of Agriculture

Premier Bracken, Of Manitoba, Advocates A National Policy

Portage La Prairie, Man.—A broad national policy for agriculture—not for one province, but for all—was advocated by Premier John Bracken, of Manitoba, here. The premier conferred with his plan a hope the west would give the London wheat agreement a more honest trial.

"The agreement was a challenge," the premier told delegates who attended the United Farmers of Manitoba annual convention. "It was a challenge to help save agriculture. No one measure could solve all difficulties confronting farmers," he said. He urged co-operation and an honest trial.

HAVE REACHED AGREEMENT ON OCEAN AIR ROUTE

St. John's, Nfld - Prime Minister F. C. Alderdice intimated that the governments of Great Britain, Canada, and Newfoundland had reached an agreement with regard to a proposed trans-Atlantic air service.

The terms could not be disclosed at present, he said but they were satisfactory to all parties who had participated in a conference here last summer

The prime minister was interviewed following the Rite Golden' announcement to shareholders of Imperial Airways in London, England, that the big British company had "established a very cordial relationship with official and commercial aviation interests in Canada and can anticipate development of this trans-Atlantic project in complete harmony between Britain and Canada."

Mr. Alderdice offered no prediction as to when the service would be established. He said he felt certain, however, a trans-Atlantic air route would be developed "eventually" in Newfoundland.

Duke Of Athol Summoned

Charge For Violation Of Lotteries And Games Commission In London

London, Eng.—A summons was granted in Bow Street police court against the Duke of Athol for violation of the Lotteries Act. The summons created a sensation in England.

The duke raised the money private bequest" of more than £150,000 by voluntary subscriptions and then distributed 746 gifts ranging from £2,000 to £1.

The duke set aside £60,000 for charities and distributed £30,000 among his employees. Cabs bought tickets after the manner of the Irish sweepstakes.

The lucky subscribers to the Duke's fund were announced Oct. 21. Afterward men from Scotland Yard held a conference with the duke at his Scottish seat.

The case will be heard in the Bow Street court, Nov. 14.

May Close Exchange

Calgary Grain Mart May Cease To Be Necessary

Calgary, Alberta - Calgary's exchange, in existence for years, will be closed shortly, it has been decided by members meeting here. The exchange, the meeting declared has ceased to be necessary

C W Rocnsch declared Vancouver grain exchange facilities had been increased so much as to make Calgary trading had moved to the coast city All export firms either had their own offices or were represented by agents there

The large majority of members he mentioned had decided they could no longer justified in shouldering the expense of the Calgary exchange.

Extending Mail Service

Airplanes To Carry Mail To Remote North Districts

Ottawa, Ont The post office department contemplates two extensions to its existing service down The Mackenzie River One will be the carrying of air mail to Cameall River, about 50 miles north from Camsells Bay the principal settlement on Great Bear Lake, while the other will reach out to the district of Arctic Ocean Rosil, to Coppermine, which is 200 miles north of Cameron Bay

"First flight cachets," eagerly sought after by philatelists, will be issued to commemorate the opening of the post offices at Cameall River and Coppermine There are special air mail stamps

Bank Report Soon

Ottawa, Ont The report of the royal commission on banking and currency, which recently concluded its work under the chairmanship of Lord Macmillan, has been referred to the Governor-General for his approval after which steps will be taken for its distribution and publication.

Ambitious Plan To Construct Ocean Airports To Facilitate Air Travel Across Atlantic

Long the blue-pencilled dream of an ocean-minded set of air-line executives, the construction of a chain of ocean-ocean docks across the Atlantic by many lines a reality under the NRA.

The Hamburg-Ocean Dock Corporation, formed to translate into actuality the plans of H. E. Arensberg, a construction engineer, has applied to the Federal Public Works Administration for a $50,000,000 loan for the construction of five seadromes.

Claiming the proceedings project to be a feasible and practical venture, the firm of the Dock would put 35,000 men back to work in 45 days and would create a demand for 150,000 tons of steel.

The seadromes or floating ocean docks, will be modelled by Arensberg in 1935, which he was engaged in the building and installed for the Hamburg-American Line. Their present plans the seadrome would be 1,000 feet long and 200 feet wide, at about 600 miles to provide safe landing spaces for planes.

As many trans-Atlantic planes will start, the seadromes in Line 200 feet in length and about 200 feet wide. To principal characteristic is a huge aeroplane hangar deck, enclosing workshops with service cells much like that of the landing deck of a modern aircraft carrier.

Here temporary berths would enable the landing deck on even land to land above the waterline while the gasoline and other liquid lines attached to the ocean bed by steel cables attached to a 1,000-ton reinforced concrete anchor.

Because of its open-sea gasket construction, sponsors claim the seadrome can withstand the heaviest of huge ocean waves which they explain will pass through the steel-framed structure without harm.

Beneath the huge landing deck would be accommodations for 1,000 persons and take off again will be service hangars, repair shops, weather bureau, radio beacon, customs, lights and modern hotels. Passengers will be able to step overboard at the seadrome hotels in the middle of the ocean where they can patronize cocktail lounges, steam beauty parlors, theaters and gymnasiums. The seadromes would also have short wave broadcasting and even fishing facilities.

The cost of the entire scheme is estimated at $50,000,000 or only one-fifth of the cost of one ocean liner. Flights would be made by the Atlantic ocean in a number of only 20 hours at the most.

Ocean seadromes, it would be found, would be ideal for the use of the Graf Zeppelin and could be established $5,000,000. Each will be manned by a combined personnel of about 120 and a landing payroll of between 200 and 300 persons.

The hotel seadrome would be established in the ocean about 200 miles east of New York city. Other seadromes would be built at intervals of 600 miles in a line due east to the Azores and the Mediterranean.

Seadromes proposed to be the good citizens, would be equipped with the usual tropical latitude of Bermuda and the Azores, are expected to attract many summer tourists.

In applying for the NIRA loan, the corporation set forth that the seadrome project will be self-liquidating in a period of twenty years from hotel and shore concessions and landing fees from the several trans-Atlantic airlines expected to participate in ocean islands of steel.

It is further pointed out that no federal credit, municipal or local bond approval is necessary and no local taxes are involved as the seadromes are to be constructed in international waters. It has been urged that the seadromes would completely free transatlantic ocean travel and place Europe only 20 hours away by air, it would have the cost of ocean and naval navigation service.

The seadromes will be constructed in sections, practically in ship-building yards at Philadelphia and Chester, Pa., towed to the Delaware breakwater for assembly, and from there to their final position out in the mid-Atlantic.

Clearing Hiking Shelter

Work Log Completed by Timber Park Patrol Detachment

Additional work at the Dominion Division of Agricultural Entomology has been one of much by members of the 0-4 to 0-6 per cent, but the total amount of existing conditions rubber goods has been increased 0.5 per cent, a manufacturing grade can be obtained when the 1st threshold follows a cold winter. Cotton is also used in the manufacture of tires.

Chemical research is also making rapid progress in the use of synthetic resins for a finer grades, shrubs and fully-equipped playgrounds for children, it was announced last week.

The most popular innovation, however, is a well-equipped department for small arts. Industrial and vocational training likewise is provided. Joseph Pater, superintendent of the adult training, recently said of the new experiment: "I have dreams of it for 20 years," he said. "I tried to convince such a plan in New York, but my plan was rejected. I sincerely hope your promising effort will succeed."

Good Increase Noted

Appendicitis Causes Many Deaths Annually Under U.S. Doctor

Dr. Hunford McKee, clinical professor of surgery, and Dr. Merlin Thomas, Montreal, told the Post-Graduate Medical Association of North America, in Toronto, Ont., that history discloses sometimes affect the eye, immediately in such a manner as to destroy the sight.

Appendicitis, the surgeon, F. Muller of the University of Pennsylvania, "has become so common that 30,000 people die each year in the United States because of it. By young people. I mean an average age of 24." The mortality for the disease is appendicitis cases, Dr. Muller added, is not known.

Seven years ago peritonitis cases was "absolutely fatal," but now says Dr. Cyrus C. Sturgis of the University of Michigan, it has a death rate of only 18 per cent.

Prior to 1929 peritonitis meant, a general infection or abdominal in the quantity of blood or the condition was "absolutely fatal with patients living an average of only two or three hours," he declared.

The use of liver and liver extracts became a part of the treatment developed during that time to control the high death rate.

Typing Hotel Experiment

Modern Equipment Is to Be Supplied in Chicago

Under direction of a foundation established by the late Marshall Field, an experiment in modern city housing is being conducted in Chicago.

It is in a 16-story apartment building, covering two blocks, and modern conveniences are provided.

Planned in colored tenancy of every room, the building has been completely fitted with refrigerators, stoves, radios, barber shops, and a community hall all are included in the building.

A roof garden, which the entire length of the building, and playrooms for a flower garden, shrubs and fully-equipped playgrounds for children, it was announced last week.

The most popular innovation, however, is a well-equipped department for small arts. Industrial and vocational training likewise is provided. Joseph Pater, superintendent of the adult training, recently said of the new experiment: "I have dreams of it for 20 years," he said. "I tried to convince such a plan in New York, but my plan was rejected. I sincerely hope your promising effort will succeed."

Lack Of Horses Serious

University Professor Says Coming Years Will See High Prices

Not nearly enough horses are being raised at present to replace the horses that die, Prof. R. C. Hope of the Department of Agricultural Economics at the University of Saskatchewan, points out. Farmers will be paying high prices for horses during the coming few years, he forecasts.

In a recent report, Prof. Hope and the farming district in the Qu'Appelle valley, figures from 177 farms showed that 171 horses had died during the year. The number of colts born in the same farms was only 73 and during the year 67 colts were broken. If a normal district less than half the number of horses needed to keep up the horse population was being raised.

The price peak of the regular price cycle in horses was not due until 1937 or 1938. If the history of past cycles was repeated the rise in price to the peak would be very rapid during the next few years. Even if more economical farm tractors were perfected, Professor Hope considered their adoption would hardly be sufficiently rapid to prevent a big demand for horses.

For the first 37 weeks of 1933, ending 16th of September, 2,186,280 bags were graded in Canada.

Greater Revenue Is Obtained By Provinces By Increased Cost Of Motor Vehicle Registration

Advice For Canadian Dairy Cow Exporters

Dog Giving Necessary Inoculation Would Be Recommended

In the report of Canadian dairy cows to the United Kingdom, shipowners and importers will benefit materially, says W. A. Wilson, animal products trade commissioner for Canada, in Great Britain, if a repeated statement be attached to the shipping documents on which is listed the ancestry number of each cow and the approximate length of quarantine. Buyers want cows that will freshen shortly after arrival and will pay according declared for definite knowledge on that head. Furthermore, in the total absence of this information, bargains on all sides, except in evident cases, proceeds on the assumption that the freshening date is speculative and will be delayed. The dairyman who are supplying the liquid milk trade, and who must have a nearly level supply, emphasize this point particularly. They may even decline to purchase cows whose breeding and condemnation are suitable, just because the freshening time is doubtful as to very desirable, therefore, that shippers, even at some inconvenience, take this necessary precaution. Records more than doubt, and thus give the importers the advantage of bargaining with certainty.

Revenues collected by the provinces from registrations of motor vehicles, operators, etc., for 1932 amounted to $21,136,377, as against $18,204,000 for 1931, according to figures issued through the Dominion Bureau of Statistics.

"Thus," the Bureau reports, "was an increase of $1,441,365, or 7.92 per cent, and was all made in Ontario and Alberta.

"These two provinces made increases of 20.90 and 22.35 per cent, respectively, by increasing the rates. All the other provinces collected smaller revenues, ranging from 4.41 per cent. for New Brunswick to 9.76 per cent. for Prince Edward Island. Although Ontario raised the average charge from $9.58 per car, and $9.46 per vehicle it is still the lowest of all the provinces.

"Of the provinces except Quebec and Alberta raised the gasoline tax during the spring of 1932 and Quebec made a raise in December, 1931. New Brunswick, Manitoba and British Columbia [illegible] from 4 to 5 cents and the other provinces raised it from 5 to 6 cents. These increases have thus affect reduced consumption and raised the gasoline tax revenue by $4,837,-197, or by 30.12 per cent. from $22,566,119 in 1931 to $37,086,316. Ontario led with an increase in gross revenue of $2,040,141 and Quebec followed with an increase of $541,313. In Saskatchewan the reduction in consumption almost offset the increase in the rate and the revenue of $1,228 981 was larger than in 1931 by only $18,-904, or 1.44 per cent. These revenues are gross, including commissions paid to gasoline distributors for collecting and forwarding the tax to the provincial authorities and also the expenses of the provincial offices are not deducted."

Metal Furniture In England

Cabinet Workers 70 London Almanac At Its Increasing Popularity

Cabinet makers, whose industry is widely established in the outskirts of London, have with some alarm the rapidly increasing popularity of metal furniture, both in home and office equipment. The tremendous advance made by metal workers during the recent months in producing elegant and by no means expensive household furniture is demonstrated by an exhibition now open at a well-known furnishing establishment in Tottenham Court Road. The exhibition is said to prove that modern metal furniture others all, and possibly more, of the comfort and elegance of designs hitherto only associated in wood. Tubing of stainless steel, chromium, and a new bantoon alloy of unusual qualities, is best in to flooring carpets to form easy chairs and the latest for dining and "occasional" tables. Cabinet-makers, however, say their comfort cannot be beat. The new metal furniture is so modern that it can be used only where modernism has taken the architects of the houses and take it to it is to be placed.

Collection Of Historic Shoes

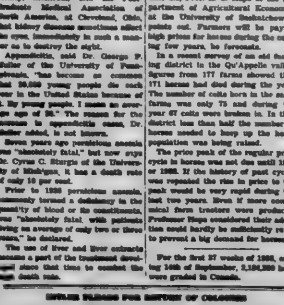
Collection Dedicated to New York Hotel Is Opened On May 20th

The boots Amelia Earhart flew to Paris in, the first dancing slippers of Mary Pickford, and the shoes worn by radio pumps and those worn by Irene Castle at her premiere are among the 200 pairs of historic footwear now on exhibition in the show cases of a Fifth Avenue store.

Only footwear of the historic 600 belonged to men—the shoes of Pope Pius VI, those of a Prince of Wales, and those of Lafayette. The footwear slippers of the Empress Elizabeth of Austria, an Egyptian king 3000 years old, and shoes of women from the Arctic to the South Seas are included. The collection is insured for $50,000.

Canada Buying Sleepers

A considerable trade in grafted sleepers is being developed between St. Louis, British West Indies, and Canada, and several cargoes are wrapped in paper as a result. Sleepers are prepared so to how the trail should be laid.



A report emanating from Berlin stated that Christopher Hitler has made a plea for the return of the German colonies taken from her under the Great War. Above is a rough outline map of Africa, showing the German colonies which were captured by the Allies during the Great War. These were, German East Africa, German South West Africa, with the exception of Walvis Bay, which was a British possession, and the Cameroons, divided with mandated from the French Cameroons. Also shown are small islands in the Pacific which were taken from Germany and which she would like returned.

ARE YOU TROUBLED WITH NERVES?

Do you find it hard to get to sleep at night? Do you feel nearly rested in the morning, "jumpy" all day, and "ragged" by evening?

Then take Wincarnis. Here's a delicious wine, not a drug, that soothes nerves as nothing else can, that helps you quickly to sleep and floods your whole being with vibrant new energy.

Wincarnis brings you all the valuable elements of grape-sunshine with the highest grade beef and guaranteed malt extract. Almost as soon as you begin taking Wincarnis, you feel wonderfully better. This is because Wincarnis nourishes your blood, soothes your nerves, and makes tonics for nerves of strength and energy.

Over 20,000 medical men have proved its praises. Use it also at the first sign in cases of jumpy nerves insomnia, anaemia, debility and general indigestion. Get Wincarnis from your druggist.—Sales Agents: Harold F. Ritchie & Co. Ltd., Toronto. 10

OCCASIONAL WIFE

By
ROMA BOOTH WEBSTER

Author of "Jovetta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Heyt, young and beautiful commercial artist, and Peter Anson, a struggling sculptor, meet in the cheap and fall in love. She is the adopted daughter of a wealthy family, but is not to share in their fortune when she comes of age. They are faced with the problem of "marriage or career" and Camilla does not want to let Peter down when he has so much promise as a sculptor. At an art school dance, Camilla Mattson, Peter a roommate asks a jealous of Peter's success, but takes the rate and the revenue of $1,228 981 was larger than in 1931 by only $18,-904, or 1.44 per cent. These revenues are gross, including commissions paid to gasoline distributors for collecting and forwarding the tax to the provincial authorities and also the expenses of the provincial offices are not deducted."

It was only a few minutes until Peter had slipped the little chased circlet of white gold over her finger and kissed her with no longer reticence as if a whole congregation had witnessed the declaration and they were man and wife.

They shook hands with the witnesses, the justice recited some perfunctory phrases of congratulation, papers were signed, the very nominal fees paid, and they were out on the street with the bewildered air of people with the enormity of the sudden [illegible]

They entered the waiting automobile and Peter directed the driver, "Out the boulevard to University Place." Their plans had included a wedding dinner at Chantecler near the campus. Camilla had said, "I'd like that because that is where we first met. It's a duck of a place, anyway. I always loved it there The same suits the place exactly, and perhaps it will be the charm for our future happiness."

The June day justified its reputation for being synonymous with love and happiness. The boulevard was a way flaunted riotous colors of flowers and vivid new greens of early summer. Tree branches arched and met to form shaded cloisters and roses rambled everywhere with leisurely abandon. A haze of golden light seemed to hang between the sky and earth, sentient with sound and color and fragrance.

Camilla's hand slipped into Peter's, their lips smiled and met, with obliviion to everything around them.

"Sorry it's over?" he asked anxiously.

"Why, of course not. There never was a happier bride than I am, Peter. How could I be sorry?"

"I hope you never will be," he declared solemnly.

"Oh, Peter, don't be so tragic. You act as if this were terribly serious. Aren't you happy about it?"

"It is serious, darling, just as serious as I am happy. And that is in the superlative degree. It means that I haven't a chance to fail now."

"Well," she laughed, "what better inspiration could you have? Isn't that why most people succeed who do because they have to? Whereas you have to win all or lose all, you can't ignore the challenge. It's the half-way people who don't take a chance, and who plod along forever. They risk nothing and gain nothing, of importance."

I guess that's right It takes the fear of losing to stir you to greater effort. My fear of losing you should goad me to the top like a skyrocket."

"Just be sure that you don't leave me behind," she warned him with a happy denial of any such possibility.

The wide, iron-hinged door of Charm Cottage stood open to welcome them and the gold of the setting sun flooded through its windows to bless them. It was early, and besides there were few students on the campus during this week between commencement and the summer term, so the place was almost deserted. They selected a table for two beside an open window, where the curtains of dotted muslin and the sunlight danced across the room in its reflection in the burnished copper plates ranged on the stone mantel. Quaint prints and oddities on the walls reminded them gently that there was not the first time in numerous [illegible] birds twittered drowsily in gilded cages a few cut flowers on each table contributed a festive air and the potted colored organdie frocks of the waitresses added their final touch of charm The little tables might have been filled with wedding guests and the serving girls altered for the occasion thought Camilla happily

The menu looks as if they had expected wedding guests," she murmured with delight. "Look at this special Peter; white fruit cup, jellied [illegible] cocktail, supreme, endive salad with Russian dressing asparagus Hollandaise — doesn't that sound like a nuptial feast?"

Order anything you wish, dear, and I'll have the same Don't, please don't look at the prices After today, you may," he conceded

"Then we shall have the special [illegible]

They lingered over the food, talking and planning with gay confidence. Peter had [illegible] his studio room alone, as he would have done before he knew Camilla. She had insisted that would prefer to see it after it was finished, and that she would wait until they were married for her [illegible]

"Of course, if you were not an artist, I should not consider such a risk, even if I am only going to be there temporarily. If you were an engineer or a lawyer or a scientist, the room which you would decorate would be impossible even for a one-room home But I leave it to you because it will be more your home than mine, and I'd like to be surprised."

"Well, you know I can't do much with my equipment [illegible] work of an artist. It may look pretty to you, surrounded by luxury as you have been."

"Luxury, dear—not beauty Most of the rooms I know are atrocious. Even when I was a youngster, my artistic eye rebelled at the total disregard for beauty in the lavish expenditure for that home Of course, it had been furnished in the days before interior decorators stepped into the crisis that is bound to result when wealth and a total lack of artistic appreciation meet. Naturally, I was not sent to live with Mrs. Heyt, I thought the house was a palace its heavy grandeur impressed me terribly, as compared with the unlovable crowded little home I had left

But it didn't deceive me for long. I remember my first rebellion," she chuckled reminiscently.

"Did you try to revive the solid mahogany four-poster with green paint?" Peter's eyes twinkled with appreciation.

"Almost that bad. No, I loved the [illegible] and four-poster, and always have I still experience fleeting moments of feeling like the princess I thought I was on that first night that I lay as rigid as a corpse in the midst of its canopied grandeur. But I first rebelled at the grim old oil portraits that stared down at me from every wall. It seemed to me that every secret I managed to keep from mother Heyt, they detected and scowled upon. So, with some of the first money I was privileged to spend unsupervised, I bought some oil paints and began a transformation of their austere countenances. I was about eight years old, then. For one thing, I made them all smile at me, then I added some modern touches to their costumes and painted blue skies or flowers in the backgrounds to brighten them up." The memory of the escapade still amused Camilla.

"And what was the penalty?"

"Plenty. After the various personal punishments were administered, the precious portraits were sent away to be restored, but never again to return to my room. That was all right with me, but the blank walls reminded me for one long year of my own unworthiness to spend for a whole many [illegible] What would you suppose I bought next?"

"Paper, I guessed. "The happy, beautiful ones that a child like you would love."

"Right you are Some of them I still have That was before the time of commercialized prints of adorable babies and modern youth. I favored Age of Innocence because it represented to me my idea of what my new mother expected of me and I could not seem to accomplish The girl was so guileless and submissive that I thought perhaps if I looked at her every day I should become more like her

"But you didn't, thank heaven!"

Camilla feigned shocked disappointment. "Now, is that nice of you?" then laughed.

"What were the others? Perhaps I can get some idea of your youthful [illegible]

"The Boy with a Rabbit was one, of course I adored animals, but I had no pets Mrs. Heyt had a horror of animals around the house I imagine it was because she couldn't keep their noise and know just what they were thinking or what they were going to do. There was also Baby Stuart with his cherubic mouth and the chubby hands clasping the red apple But the one which Mrs. Heyt thoroughly disapproved and almost forbade my hanging, but which I loved most, was the roguish Whistling Boy, with the light on his happy face and the tattered clothes. I want to have a son like him some day," she added [illegible]

"Your youthful state of mind was above par," Peter said with quiet admiration, after a moment's silence.

Fewness Self-Driving Auto

Frank Hughmer Believes Idea Is Quite Possible

An automobile in which a motorist may adjust the wheel and throttle, set the alarm clock and wake up hours later on the highway near his destination, is visioned by Georges Brouhiet, French engineer

The possibility, in the not too far distant future, Brouhiet insists, is not a "pipe dream." Further advancement in engineering progress, known as finding power—may revolutionize automobile travel, he believes.

"It is entirely possible," he says, "when now, broad, hushed roads are built, a driver could get into his automobile and go to sleep in Chicago and wake up in St Louis, still on the road."

I can highly recommend it to all expectant mothers." 50 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto. Dr. Chase's Nerve Food

Surgeon Performs Unusual Operation

Grafft Fixes Of Shortness To Man's Spinal Column

After suffering torturing backache for 15 years, Ernest Brandt, 25, of Denver, expects relief from a unique operation recently performed in a Denver hospital. Surgeons removed a piece of shinbone from one of Brandt's legs and grafted it upon the spinal column. He will remain in a cast for three months or more.

Bradstey's parents believe the backaches were caused by a fall when he was but nine months old. The operation is said to have been performed only six times in the United States.

Machine Order Kept Fort Erie Plant Busy Two Months

Two huge digesters, marked and dismantled, have gone from Fort Erie, Ontario, to Saint John, N.B., from where they were sent to Mahtid, India, to be used for the cooking of ground wood to make sulphide. The digesters, 42 feet in height and 14 feet in diameter, were constructed at a Fort Erie plant. They go by boat from Saint John to Calcutta and will be loaded there on to barges which will take them up the Ganges, where they will be set up. The order kept a plant busy for two months.

LOCAL NEWS

All grain elevators in the Fort will be closed on Saturday, November 11.

The Misses Letitia and Joan Foster accompanied by Miss Anne Beaber, spent the week-end with Mr. and Mrs. W. J. Foster, after attending the Teachers' Convention at Wetaskiwin.

The roads and sidewalks about town are in a frightfully slippery condition due to mild weather making the snow, this in turn freezing at night.

The light rain of Tuesday afternoon did not help matters any.

Cars had to be helped on the big hill West of Town, due to the icy surface of the road.

Chains were being placed on the wheels Wednesday.

The observance of Armistice Day, or Remembrance Day, on Saturday, Nov. 11th, seems to have caused quite a lot of controversy in the cities. Although it has been declared a statutory holiday, merchants in both Edmonton and Calgary seems to think that a great injustice is being done in having to close their stores to the public on a Saturday. As it, will be a number years before Remembrance Day falls on a Saturday again, surely we can stand it for once.

It seems feasible, that over a two-day holiday, those provisions would have to be bought, there can be had on Friday just as well as on Saturday.

The Canadian Legion are asking the merchants all over the country to observe Armistice Day.

At time of writing, Fort merchants still closely observe Remembrance Day, Saturday, Nov. 11th by closing the stores, but will stay open Friday evening as customary before holidays. This will give citizens an opportunity to purchase goods for the week-end.

Taken from the Files
19 Years Ago Today

Wednesday, November 11th, 1914

Dr. Mooney of Calgary, has opened an office in the Fort for the practice of his profession.

P. C. Gordon left on Saturday morning, returning the same evening with a fine specimen of deer. Some time record.

Due to the large amount of new business Gordon and Dobee have recently hired two more men for the plumbing and threshing business.

E. J. Smith and A. Watchmore left on Tuesday's stage for Radway Centre, where they will hunt the elusive moose.

POPPY DAY

The symbolism of the poppy, the sorrowful appropriateness of its blood-red bloom, takes a deeper significance with each succeeding year. The Great War is passing almost in to legend; a generation is bequeathed the duty of carrying into the years that have yet to come the work and the ideals of those whom the Poppy commemorates.

Canada has adopted the Poppy as a symbol because of the 60,000 graves in France and Belgium in which lie the dead of the preceding generation, because of the 170,000 Canadians to whom the conflict brought disablement of one kind or another. The crosses in the cemeteries of Flanders are garlanded with Poppies—dolorous emblems of a nation's youth consumed in the "Wrath-red forge of War."

On Poppy Day this Dominion pauses in its normal activities to recall the sacrifices of its young men, to pay tribute to their heroism, their hardihood and the uncomplaining fortitude with which they bore their privations and sufferings. At the same time, Canada strives to liquidate in some small measure, an obligation to those disabled men employed in the Veterans' Workshops of the Country, whose only means of livelihood is the making of these simple emblems.

The wide ramifications of the great Canadian Legion, with its tens of thousands of workers on Poppy Day, take care of the distribution of these Poppies throughout Canada. There is thus ensured to their disabled Comrades in these Vetcraft Shops a loyal performance of a sorrowful yet prideful task

All Canadians of every age and degree should wear a symbol on Poppy Day. For their's is a day of commemoration and of rededication to the work on hand of continuing the structure of civilization whose the workers of a previous generation left off.

Let us all wear a Poppy on Poppy Day.

Advertise it, or you may have to keep it.

VOL. 12 | No. 32 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, NOV 15th, 1933 $1.50 PER YEAR IN ADVANCE

Heavy Windstorm Damages Buildings

A heavy gale in cyclonic proportions struck the Fort around 6 p.m. on Saturday last, doing considerable damage to property about town.

The greatest damage occurred, when the tall brick chimney of the Williamson block toppled, crashing through the roof of the former Dubee Hardware store in the block. The bricks went through the roof and the force knocked 16 feet of the brick wall out.

A large plate glass window in the Fort Hardware was blown in, while numerous storm windows and signs were blow away.

Farmers living in the district reports outbuildings and greenfeed stacks blown over.

During the height of the gale, electric lights were out of commission for a few minutes, also connection on telephone lines were disrupted due to poles being down between here and Edmonton.

Rain accompanied the wind.

Curling Club Asks Support On Community Projects

The town people in general and the skating public in particular will be considerably gratified to notice the renovations and improvements being made this year to the skating rink. The ground has been levelled off, this morning to some extent better too. The outer fence which has been in very bad condition for some time, has been torn down and is being rebuilt with new lumber. Arrangements also are being made for the supplying of music for the skaters which will, we feel sure, fill a long felt desire on the part of all.

This work has been taken on by the Curling Club, the organization which has the skating rink in charge, and a considerable amount of time and money is being spent to procure these improvements.

Part of the cost of this work has been taken care of from the receipts of the Carnival held last winter, but more money has to be raised to pay off the balance of this expense. You can help by patronizing the Curling Club Dance to be held in the Badminton Hall on Friday, Nov. 24th. The work being done is a benefit, not only to skaters, but the community at large. Your attendance at the dance will demonstrate your interest in Community affairs.

C. G. I. T. CLUB NEWS

On Tuesday evening Nov. 14th, the "Happy Hour" group of the C.G.I.T. had the pleasure of a visit from their Provincial Secretary, Miss Constance Smith. After the business meeting the "Mothers" came to visit the group, enjoying the games and songs, also the splendid and instructive talk, which Miss Smith gave.

Mrs. Logan O'Brien the superintendent of the group and Mrs. Stanley Dennis their leader introduced Miss Smith.

A dainty luncheon was served and the meeting closed with Taps.

ALBERTA TURKEYS IN NEW ZEALAND

In far away New Zealand, the largest turkey farm in that country has been built up from foundation stock secured from turkey breeders in Alberta, according to information from the provincial poultry department.

This New Zealand farm is owned and operated by a woman, Mrs. Katherine Bell, who purchased her breeding stock from Alberta some years ago. She forwards a photograph of her flock recently taken by the governor-general of New Zealand, and she has also placed a further order for breeding stock with the provincial department.

VIKING EDITOR TO CONTEST CONSTITUENCY

At the provincial Liberal convention for the Sedgewick electoral division held at Killam on Friday, November 3rd, H. G. Thunsell, editor of the Viking News, Mayor of Viking, was nominated as a candidate to contest the constituency in the next elections.

Fort Legion Makes Merry

The Veterans of the Great War, with others, met on Saturday evening in the Memorial Hall for remembrance day, and social pleasure. The Chair was taken by Comrade Wootton and the usual armistice silence observed. Then followed the toasts of "The King" and the Canadian Legion of the British Empire Service League, drank in proper style. Followed by songs and speeches, anecdotes and ale, pawn rum and partly true.

Everyone seemed to enjoy themselves and an effort is to be made to revive the interest and membership in the Legion.

EDMONTON POLICE COURT

In the supreme court last Friday, Ernest Lawrence was found not guilty of arson by Mr. Justice Ives. On a second charge of defrauding an Insurance Company out of the value of goods for the skaters which will, we feel sure, fill a long felt desire on the part of all.

This work has been taken on by the Curling Club, the organization which has the skating rink in charge, and a considerable amount of time and money is being spent to procure these improvements.

Part of the cost of this work has been taken care of from the receipts of the Carnival held last winter, but more money has to be raised to pay off the balance of this expense. You can help by patronizing the Curling Club Dance to be held in the Badminton Hall on Friday, Nov. 24th. The work being done is a benefit, not only to skaters, but the community at large. Fort Observes Armistice Day in Fitting Manner

The Anniversary of the Armistice which ended the Great War was observed with all the usual ceremony. Just before 11 a.m., the Veterans gathered at the Memorial Hall and with them were the three local Cenpy, with other veterans of '85 and 1900.

Forming up in double rank outside Major Dawson gave the words of command that took them to the Monument. Here were the Cadets and Brownies forming a circle round it. The town bell gave the signal for the start and finish of the silence, after which Rev. C. Hood then read the ancient bidding to prayer, Rev. E. J. Hodgins led the prayer, and Mr. D. C. Rooney pronounced the Benediction.

A large number from town and district attended.

PASSED

Inspector: "Hold on, young lady, what have you to declare?"

Sweet Thing: "Oh, Mr. Inspector, I declare you're handsomer than any man I saw during my two months' stay in Europe."

Inspector: (blushing): "Er, oh, hurry up there, here's some one else wants to declare."

Don't forget now is the time to order your Personal Greeting Cards. Prices range from $1.35 per doz. up.

Custom in Vegreville will select ships and make general preparations for the coming season on Monday.

Badminton Club Holds Successful Dance

A large number spent a very enjoyable time at the Badminton Club annual dance held in the Simmons Hall last Friday evening.

Many young people home over the holiday from Vandhy, and with large numbers from the surrounding districts helped to make it one of the largest events ever to attend a dance here this season.

At midnight refreshments were served by the Badminton members. The local orchestra supplied the music for dancing.

WOMEN'S INSTITUTE HEARS INTERESTING ADDRESS

Fine Handicraft Exhibit

At the regular monthly meeting of the Fort Saskatchewan Women's Institute an interested gathering enjoyed a thoughtful and practical address by Mrs. L. G. Fyer, B.H. under the title "Parenthood and Some of Its Failures", she particularly stressed the serious consequences of excessive affection for children which leads to coddling, too much protection, or too much restraint, so that the child is robbed of the right of independence, self confidence and individual expression. Dealing with The Psychology of the Nursery, the speaker dealt with the mental growth and welfare. The thanks of the meeting are due Mrs. Frost for her thoughtful and thought-provoking address.

A handsome display of handicraft included many articles in knitting and crochet work, embroidered and knitted underwear, rug work, laundry embroidery, fancy articles of various types and hand made rugs.

LOCAL NEWS

Our attention was drawn to the neat appearance of the Cenotaph on Armistice Day, when they attended the service at the Memorial plot.

With so many changes of weather even the Caterpillers do not know when to hole up. Ernie Hallam coming along the C.N.R. trestle the other day picked up a pup Caterpiller, which was quite alive.

ALBERTA'S CORN BELT

The city of Lethbridge held its annual corn show last week, an event which has been a feature now for nearly ten years, during which period Southern Alberta has established itself as a real corn belt. In this connection it is interesting to recall that at the recent world grain congress in Regina, southern Alberta corn exhibitors in one class of corn, took 16 per cent of the money offered, in competition with exhibitors from Saskatchewan, Manitoba, Ontario, British Columbia, New Brunswick and the United States.

Taken from the Files
19 Years Ago Today

Wednesday, November 18th, 1914

Benson and McEachern made a record run with their threshing rig, having threshed 169,764 bushels.

Dave Buchanan shot a fine buck deer on the Fedorentenbaugh farm last Friday at mid-day.

The local school board have decided to install electric lights throughout the building.

The Yorkville school district has erected a fence 46 feet of 6 foot boards to serve as a windbreak for same.

A photo taken in 1899, at Edmonton of "The Dead-Shot Biker" was brought to the Conservator office. The personal is interesting old timers. They are Walter Rose, V. MacGillycuddy, J. Parker, W. H. White, R. H. Mewata, Geo. Ferguson, Andrew Long, Sergt. Todd, Jos Chabot and W. Hyde.

Good Hope

The wind last Saturday evening did considerable damage in Good Hope. Barns were moved and warped badly. Out buildings were turned over, and telephone poles were blown down. Many people are beginning to re-shingle providend. Haystacks were blown about the meadows again. Chimneys were blown down and roofs were damaged considerably. A large number of trees and windows were broken during the storm.

Mr. D. McCullough has been holidaying at the home of Mr. and Mrs. A. R. Corbett of Riverend.

Mr. Chas. Thomas spent a few days in Edmonton last week.

Mrs. Dave Cranston is holidaying in Edmonton this week.

A WAY OUT

A Scotsman went into a telegraph office to send a wire, and was told that he had to pay for his message, before he sent it over. He thought it over for a while, and then said to a broad Scottish accent: "Ye may no' think it, but I'm on ballies, and the name is 'I won't be home till Saturday'."

Coming Events

The United Church W.M.S. will hold its regular monthly meeting on Tuesday afternoon, Nov. 21st, at 3 o'clock.

This is an special meeting when the C.G.I.T. girls will affiliate. All are cordially invited.

The Pleasant View Young People will hold a dance on Tuesday, Nov. 21st, in the Pleasant View Hall. Dancing 9 till 2 a.m. Refreshments. Good music. Admission 25c each.

CURLERS ATTENTION

A general meeting of the members of the Fort Saskatchewan Curling Club, and all others interested will be held in the Town Hall on Friday, Nov. 17th at 8 p.m. This meeting is important and a good turn out is requested.

Chiselling

The N.R.A. campaign in the United States, if it has not added a new word to the vocabulary of the American people has at least given a popular and dynamic meaning to an old word. And has brought that word into every day conversation. It is being used by everybody from President Roosevelt to the man on the street corner The word is "Chisel." "Chiselled." "Chiselling." It has become an accepted slang phrase, and like an adage is slung words and phrases it is very appropriate for the use to which it is being put

In its recently accepted meaning, "Chisel" is the name of an instrument of iron or of steel used in carpentry, joinery, cabinet work, masonry, sculpture, etc., for paring, hewing, or gouging. In its slang adaptation it is applied to mean "to cut close," as in a wager, in a word, to cheat.

Thus, under the new almost universal N.R.A. code in the United States providing for shortening hours of labor, increasing wages, controlling sales prices, regulating production, the word is being applied to the individual or the concern which by one devious means or another seeks to pare off a little here or there from the spirit of the agreement into which they have entered, or to gouge a little out of their workmen or their customers. Such individuals or concerns are known as "Chiselers," and the tactics employed by them as "chiselling." They are apt and expressive words when so used.

One is inclined to extend the application of these terms beyond the N.R.A. to the United States, and apply them promptly to the chiselers in many people in all lands and of all classes and conditions to life itself, its manifold duties and responsibilities.

There is the boy and girl in school whose education is being provided for them possibly at great expense and very real sacrifices by their parents but who, instead of applying themselves diligently to their studies for the few brief years of school training, are just "chiselling" their way through devoting only sufficient time and thought to their work to "get by" but not really and earnestly striving to make the most of their opportunities. They are responsible for waste all round,—waste of money and of personal sacrifice by their parents, waste of their own time and opportunities, waste of the teacher's time and effort. They are chiselling something out of their own lives which, to their lasting regret in later years, they can never replace.

There is the teacher who, instead of giving of their very best to their pupils, and taking a keen interest in their advancement, are content to just "get by" their inspector and retain their positions by having a sufficiently satisfactory number of "passes" in their pupils' examinations of the fact as to whether or not real instruction has been given to them.

There are the "clock watching" employees, clerks, stenographers, workmen in all trades, laborers in every field, who, instead of striving to give a maximum of efficient service in return for the wages paid to them, are timeservers, doing just as little as they can, gauging their employers of time and effort which rightfully belongs to them. On the other hand, there is the employer who in one way or another gouges his most faithful employees.

There is the contractor and the manufacturer who gouges the public by using shoddy instead of pure materials, who pares off a part on of the rightful amount of material that ought to go into the production of an article or in the construction of a building, and who is not above slipping one or two imperfect articles into a shipment of goods, or using some defective material in a building where it is buried away from sight. They are chiselers, and they are indifferent to the fact that their chiselling may result in disaster, great loss and suffering to others.

There is the debtor on the one hand who resorts to every kind of a dodge in an endeavor to escape payment of his just debts, and the creditor on the other hand who takes advantage of the difficulties of his debtors to demand more for all they have regardless of the fact that these difficulties may be beyond the debtor's control and which to the best of his ability he is striving to overcome. Both classes are chiselers.

There is that large group who have a perverted twist or kink in their characters which induces the belief that it is all right to try and get the best of Governments,—persons who will smuggle, persons who "chisel" with great ingenuity when filling out an Income Tax form, persons who surreptitiously use their radios or motor cars without a license, and so forth and so on.

Then there are numerous people who "chisel" in the discharge of their general obligations as citizens. Men and women, for example, who are too indifferent to even take the trouble to cast a ballot; who defame all persons in public office who are endeavoring to serve the public welfare; who characterize politics as dirty and corrupt and who stand aloof instead of assisting and of discharging their own duty and actively assisting to raise the standard of public life.

Possibly each and every one of us is a chiseler in one way or another. And it might not be a bad idea for all of us to take stock of our own attitude towards many things and then seek to discover just wherein we are chiselers.

Then, there is the other phase of chiselling. The sculptor who takes an unusual block of wood, stone or marble and chisels away until there emerges a thing of beauty Such a one is typical of many men and women who are devoting their lives to chiselling away the superfluous and the unsightly in the world of life. They are engaged in removing the grime that may have accumulated on and marred that which is beautiful and good.

The vital question is What kind of a chiseler are you?

Child welfare is credited with saving 100,000 babies in England in the past year.

Cats may exempt from taxation all buildings constructed by private parties.

Soothing Sensations
Feint and Dizzy Spells

These feelings of faintness; these dizzy spells; these all-gone sensations; these "sinking" sensations which come over people, from time to time, are warnings that should not go unheeded. They indicate an extremely weakened condition of the nerves and other vital organs, and should be given immediate attention.

These suffering in this way will find in Dr. Williams's N. and N. Pills a remedy with which to combat their ills, build up their run down system, and bring back their lost vitality.

Dr. Williams's N. & N. Pills.

Testing Penny Flipping Odds

Professor Hill Goes To Prove Heads And Tails Are Almost Even

Penny flipping odds are about even on heads and tails after 48,000 scientific flips. That is what Professor Pops R. Hill, of the mathematics department of the University of Georgia, has found Months ago Professor Hill began his flipping. He assembled 200 pennies, a hundred of one date and the same of another. He balanced for each penny against the other down to one-thousandth of a gram. He expects to flip the pennies for the 100,000th time on July and then his experiment will be complete

LETTER FROM A MAN OF 90

About His Rheumatism

He asks us to excuse his writing We do more than that we congratulate him on being able to write at all at his age, especially as he has been suffering from rheumatism This is what he says in his letter

"Three years ago I was in bed for six weeks with rheumatory rheumatism. Since the time I have been using Kruschen Salts, and have not had another attack But my hands are still somewhat stiff I take Kruschen every morning before breakfast, and shall continue to do so, because I am sure it has kept me in good shape for three years Excuse this writing, as I am ninety years old, and use both hands to write

Kruschen does two very three medicine-poisoned crystals of uric acid which are the cause of all rheumatic troubles. It will also flush those chicken-breast crystals clean out of the system. If you keep up "the little daily dose," excess uric acid will never form again.

Placed On Retired List

"Billy-Bo V.C." Given Honorary Rank Of Brigadier

Known as the "Billy-Bo V.C." and stated to have been the first British soldier to enter an enemy trench in the Great War Lieut. Gen. Col. John Vaughan Campbell V.C., has been placed on the retired list under the age limit and granted the honorary rank of brigadier. Campbell suffered the scubriquet because he rallied his men under enemy machine-gun fire by blowing a hunting horn and giving the traditional hunting-cry.

Leaving Pacific For Summer

U.S. Fleet Is Ordered To Concentrate In Atlantic

The United States fleet will be concentrated in the Atlantic next spring for the first time in almost four years.

President Roosevelt matches what the first line of defence to start steaming from the Pacific to the east coast after the winter months. It will return to the Pacific in the fall.

The fleet, comprising the battle and scouting forces—the latter formerly known as the Atlantic fleet—has been stationed in the Pacific since the spring of 1925.

During the past 18 months the navy has explained that the scouting force was kept in the Pacific for reasons of operating economy. The situation in the far east was understood, however, to have played a considerable part in the retention of the full fleet in the Pacific.

The reason given for the order to return was explained by Henry L. Roosevelt, assistant secretary of the navy, as a return to the fleet's normal operating policy.

Was Well Hidden

The gentleman who was engaging a new chauffeur noticed with pain that he had ever had a serious accident. "Because, sir, when I had a bad front wheel skid as the result of running over a bottle. "Well, goodness gracious, surely you saw the bottle?" "Well, no sir. As a matter of fact, the chap had it in his pocket."

W. N. U. 2000

Had Outstanding Career

Director Of Pasteur Institute Dies After Long Illness

Pierre Paul Emile Roux died in Paris at the age of 80 after a long and outstanding career as director of the Pasteur Institute and collaborator with Louis Pasteur in studies of bacteriology and diseases this organisms.

He had suffered from tuberculosis for 40 years while a colleague Dr Albert Calmette who died first, 29 struggled to find a cure for the disease.

To much of the world Dr Roux seemed an ascetic recluse, for he ate simply slept on a hard camp bed and spent much of his time in research. From 1904 to 1918 he directed the Pasteur Institute

He studied infectious diseases and hydrophobia and produced vaccines in collaboration with Pasteur and others for anthrax, cerebral rabies scourge He aided also in the development of diphtheria toxins With Dr Behring he received the Nobel prize for their work on serum therapeutics

Hard To Replace

People Always Find Something Stupid About Old Friends

Old friends are so hard to replace. We meet new ones all the time but the new ideas are not the real ideas of years ago There is something stale about old friends You know them, and when you know someone for twenty-five or thirty years and meet them all the time it is a different kind of a hello than the new friend gives you. the hello from an old friend means so much more You look into each others eyes and see each wealth-string the stream of life which is gray, who is getting bald, who has grown the father, and when you both meet and one says you look the same as you did twenty-five years ago and the same compliment is returned makes the hello so different.

Developing New Industry

The latest Manitoba industry to be developed is the Manitoba bog cranberry Hitherto cranberries have been inspected into the province. The type that grows in Northern Manitoba is known as the "low bush" cranberry, which the early winter frost seems to sweeten so that Prairie harvest can be thawed with full flavor retained. The berries are coming to Winnipeg in 1,000 pound lots.

Newspaper As Institution

Col. R. R. McCormick, of the Chicago Tribune, says the newspaper is an institution developed by modern civilization to present the news of the day, to foster commerce and industry through widely circulated advertisements, to inform and lead public opinion, and to furnish that cheap entertainment which the condition of time has ever been able to provide.

Hail Hail
The Pipefulls Here

Yes... pipefuls of Ogden's Cut Plug for men who like a tobacco that packs right, that lights right, that burns right, that is right.

It's a mighty fine tobacco —the kind men like to "stay with". And one of the finest things about it is this—the last pipeful from the Ogden's Cut Plug pouch-age is just as good as the first one. That's the kind of quality that makes a pipe a real pal — the Ogden's quality that never changes.

OGDEN'S
CUT PLUG
If you "roll your own", use Ogden's fine cut cigarette tobacco and Chanticleer cigarette papers

Chief Power Of Life

Reverence is the chief power and joy of life; reverence for what is pure and bright in your own youth; in what is true and tried in the age or others, for all that is gracious among the living, great among the dead, marvellous in the powers that control us.

Quick Relief Now
From Neuralgia

Real ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headache, rheumatism, neuralgia, neuritis ... the fastest safe relief, it is said, yet discovered

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve instantly on the tongue the amazing specs of two seconds after touching moisture and hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And then it reaches to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN'S quick relief, ask for the name Bayer in the package. It's safer to buy a box of 24 tablets than a single tablet of Aspirin.

British Aviator Has Amazing Escape When Forced To Jump In Spinning Research Trials

Flight Lieut. C. S. Staniland, test pilot and racing motor car driver, had an amazing escape from death when he was making spinning research spinning trials with a secret type of aeroplane near Calshot, Middlesex, recently Spinning trials Form part of the routine work in the testing of new aeroplanes, and these trials are first done by the manufacturers and are repeated by the official test pilots of the air ministry's experimental stations.

Often considerable risks must be taken by these pilots when some novel feature is being tried out or, as in this instance, special research work is being done; but they develop special faculties for dealing with emergencies. It is doubtful if in the whole history of flying any test pilot has had such an anxious moment as Flight Lieut Staniland.

He was performing special research spinning trials at about 7,000 feet when a flat spin developed with high rate of rotation. For some time he endeavored to extricate the machine but without success. Finally he decided that he had come where he must jump with his parachute. The aeroplane was turning to the right and he decided to jump over the left side of the fuselage in order to fall clear of the machine.

Owing to the direction and speed of rotation of the machine, however, Flight Lieut Staniland was immediately hurled back into the rear cockpit of his machine. Fortunately he had not begun to pull the rip cord of his parachute, so that the canopy was still in the pack. The rear cockpit of this particular machine is deep and he found difficulty in getting up on to his feet as a result of the high centrifugal loads. But eventually he struggled to his feet and climbed out of the machine for the second time.

Through all these experiments he remained perfectly cool and was able to grasp the cause of his being thrown back into the machine. His presence of mind was faithful at a higher speed, and quickly. He fell clear but waited to ensure there was no risk of his parachute fouling the aeroplane. The aeroplane passed within a few feet of it as he so fell, and he pulled the rip cord immediately afterwards he saw the machine only a few feet below him While he had been pulling at cord the aeroplane must have passed behind him, falling at a higher speed than he had thought. He landed safely near Calshot and his aeroplane crashed in a disused gravel pit about two miles away.

Flight Lieut. Staniland is a pilot with a remarkable record. He has won many events, both on road and track, and recently during the Ulster T.T. motor car race he set up new class lap records in a six-cylinder car. In 1928 he was selected to be a member of the British Schneider trophy team. His skill as aerobatics is universally acknowledged.

Home Of Pool Restored

Philadelphia Home Of Edgar Allen Poe Now Looks Modern Again

Restored in every detail to its appearance of a century ago, the Philadelphia home of Edgar Allen Poe has been opened as a public shrine to the author.

Included among the original articles are a stove, a desk and bedroom furniture. A bust of Pallas has been placed in the study in which Poe worked.

Avoid Hunting Accidents

In deer hunting season in Missouri's rugged Ozarks a hunter without a red hat isn't well dressed. A red hat—or at least red feathers in a hat that isn't red—is supposed to be the signal to other hunters that the wearer isnt a deer. Not a single fatality was reported last year and red hats and red feathers were given much of the credit.

W. N. U. 2000

Unnecessary Accidents

Mechanical Conditions Of Many Cars Blamed To Safety

Justice Kelly, presiding at the supreme court at Whitby, Ontario, uttered a great truth when he stated that many automobile accidents were caused by people driving cars which had long since qualified for the junkpile His observations were made from his experience of court cases arising out of such accidents, and they will be supported by many who have been victims of accidents because of inferior and sometimes uncontrollable cars being driven on the highways

This condition is perhaps more apparent at the present time than it has been in past years Cars are being driven on the highways today which in more prosperous years, would have long before been consigned to the scrap heap unfit for further service But that is no reason why human lives should be endangered Nor should be allowed to travel on the highway unless the mechanical condition is such as to make it safe under control, to make a safe vehicle to drive.

Both pedestrians and motorists whose cars are in safe condition have a right to such protection, and if there is no law which can keep unsafe cars off the roads, then it is time one was enacted.—Oshawa Times

Discussion For Next Session

Federal House To Debate On Question Of Divorce In Canadians

Whether Canadians should be allowed to accept titles from the king, will be discussed by parliament when it opens next January Roger Conant Mitchell, Labor member for Hamilton east, is expected to start a full-fledged debate by moving a resolution to continue the titles-ban with the exception of judges military and naval officers.

Prem er R B Bennett, shortly before the close of the last session announced the government did not consider itself bound by the Nickle anti-titles motion passed in 1919.

Lancashire Woman Who Claims Relationship With Edison Has Some Remarkable Inventions

Safety In The Home

Commissioner Makes Given By Health Officer Of New York

New York's health commissioner has prepared a "home safety code for adults" containing a list of injunctions Some of these are:

Have every room and all stairs well lighted.

Keep floors clear of grease, boys, etc., and the stairs free of all encumbrances.

Use a rubber bath mat in the bathroom.

Use a step-ladder when working above the floor.

Use non-breakable cleaning fluids.

Keep out hands off electrical appliances.

Read the label before taking any medicine

Un commonsense, do not rush, be careful

These are all rules of elementary commonsense But it is just by the neglect of ordinary precautions that accidents occur in homes.

Missee Lost Female

"Aunt Minnie" Williams, Negro, who once tipped the scales at 702 pounds, has complained to the Sheriff's office at Jacksonville, Florida, that troublesome neighbors have caused her to lose 260 pounds. "They have made her feel hyperly", she said, and she wants peace and quiet restored that the lost poundage may be regained. She is forty-eight years, works the garden in which much of her food is raised.

Mrs. Pech: "She's very pretty, but she never says a word. I can't imagine why all the men speak so highly of her."

Mr. Pech: "I can."

Cost Of Armaments

Two Nations Spending Millions With Huge Budget Deficit

A Tokyo cable to the New York Times tells that Japan faces a budget deficit in the coming year of $270,000,000 Yet Japan will spend on her army and navy next year $281,000,000 Chrisnation truly is a baffling [illegible]—Ottawa Journal.

And the country where the New York Times is published has budget for a deficit of $897,000,000 in army and navy and army expenditures in charge of non-military [illegible] $960,000,000.—Toronto Star.

Black diamonds, or carbons, are found mainly in Brazil in river gravel workings and are the purest highest priced of all industrial diamonds.

Safety In The Home

Commissioner Makes Given By Health Officer Of New York

New York's health commissioner has prepared a "home safety code for adults" containing a list of injunctions Some of these are:

Have every room and all stairs well lighted.

Keep floors clear of grease, boys, etc., and the stairs free of all encumbrances.

Use a rubber bath mat in the bathroom.

Use a step-ladder when working above the floor.

Use non-breakable cleaning fluids.

Keep out hands off electrical appliances.

Read the label before taking any medicine

Un commonsense, do not rush, be careful

These are all rules of elementary commonsense But it is just by the neglect of ordinary precautions that accidents occur in homes.

Missee Lost Female

"Aunt Minnie" Williams, Negro, who once tipped the scales at 702 pounds, has complained to the Sheriff's office at Jacksonville, Florida, that troublesome neighbors have caused her to lose 260 pounds. "They have made her feel hyperly", she said, and she wants peace and quiet restored that the lost poundage may be regained. She is forty-eight years, works the garden in which much of her food is raised.

Mrs. Pech: "She's very pretty, but she never says a word. I can't imagine why all the men speak so highly of her."

Mr. Pech: "I can."

Cost Of Armaments

Two Nations Spending Millions With Huge Budget Deficit

A Tokyo cable to the New York Times tells that Japan faces a budget deficit in the coming year of $270,000,000 Yet Japan will spend on her army and navy next year $281,000,000 Chrisnation truly is a baffling [illegible]—Ottawa Journal.

And the country where the New York Times is published has budget for a deficit of $897,000,000 in army and navy and army expenditures in charge of non-military [illegible] $960,000,000.—Toronto Star.

Black diamonds, or carbons, are found mainly in Brazil in river gravel workings and are the purest highest priced of all industrial diamonds.

How He Understood It

Small Boy Slightly Mixed On Name Of Bank

A Hills boy who applied for registration at the Griffintown rink, one of the skating rinks operated by the city, evidently thought the Recording Angel must be a woman.

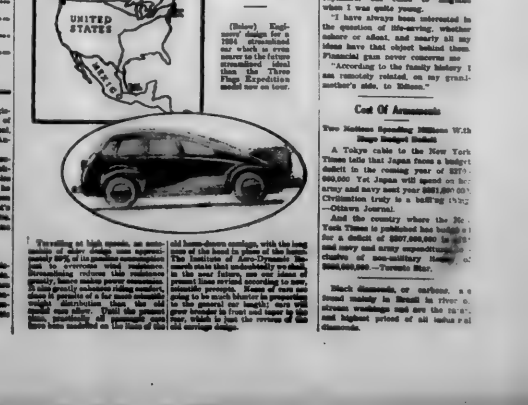
Asked by the registration book keeping, the lady who took his name asked the lad if he would run to the bank and get it from Miss Mockay. Up he scampered, and, knocking at the open door of the lady superintendent's apartment, said breathlessly: "Miss Bagson says will you please give me the Reservation Book!"

Honor Goes To Prunes

The world's oldest fish has been discovered at Palmerston, East Prussia. The venerable insect is 8,000 years old, according to scientific computation, and is housed in a piece of amber, found recently on the Baltic shore.

Under Three Flags Expedition

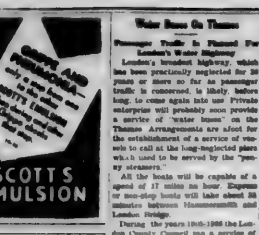
Traverse from Canada to Mexico with many stops in Canada and the United States. Over a dozen cars make up the caravan. (Above) A streamlined car which takes the lead.



At left) Map of the route the expedition will travel from Prece River, Canada, through the United States to Vera Cruz, Mexico, this month.

(Below) Engineering features of the 1934 streamlined car which is even newer to be the forerunner of the streamlined ideal when the Three Flags Expedition model now on tour.

Travelling at high speeds, an automobile of their design now appearing for the first time, is expected to overcome wind resistance. Streamlining reduces this resistance greatly, hence making greater economy. It also greatly reduces rolling resistance, which is the result of the weight of the car and the friction between the tires and the road. Means of cars are going to be much shorter in proportion to the general car length; cars will be lower in front and longer in the rear, which is just the reverse of the old narrow-desire carriage, with the long nose of the hood in place of the body. The Institute of Aero-Dynamics, Berlin, has succeeded in producing a car which is said to be practically perfect in the wind tunnel, and many of these features have been incorporated in the lines of the old



WORLD HAPPENINGS BRIEFLY TOLD

Big navy propaganda centers around Japan against interpreting the American fleet's removal from the Pacific as a goodwill gesture

A thousand men will be stationed this winter at single jobless camps in Hudson River Tidewater Park, it was stated by J. A. Wood superintendent

William F. (Carlton Hill) Cooper, 87, who married Mrs. Maud H. Elliott, 60 years, died recently in Tacoma, Wash., at a sanitarium. He was a friend of Jack London

King Victor Emmanuel made promises to Italian Fascists eminently reassuring to both the navy and the air after accepting the resignations of Air Marshal Italo Balbo and Admiral Giuseppe Bernotti.

The London Daily Express said an all-empire shipping conference would be held in London early next year to preserve empire carriers for empire cargo.

Fishermen of Palermo, Sicily, reported that they have heralded the skeleton of the French dirigible Dixmude which disappeared on a flight to Africa in December, 1923, with 52 men aboard

Under plans approved recently by Hon. Thomas Murphy, Federal Minister of Interior, work is being started on the Jasper Highway, west of the town of Jasper, over the 17-mile stretch to the British Columbia border.

A 55-year-old apple tree is bearing needless and odorless fruit on the farm of Dr. Perry Fullerton, near St. Joseph, Missouri. Never before has any tree in the orchard produced such fruit. The apples resemble the Jonathan variety.

If long-term contracts are arranged, the shipping capacity of the United Union not only for American machinery and tools but also for general commercial goods are unlimited, Leon Kes, former trade commissioner in Canada for United Russia declared in a recent speech at Montreal.

Letter Letters Are Clever

Letter Addressed in Figures

Letter writers in the post-office don't force people to address letters in code, but they make it known they could understand some of them.

One envelope received at Regina, Steve Sestin, with a series of numbers but not a letter written on it. "His Little Straight for the boys who toss around letters like a "basket" toss baseballs But the letter finally was delivered to a mother in Wellington barracks.

Each figure represented the corresponding numerical position in the alphabet they discovered.

Water Buses On Thames

Passenger Traffic Is Planned For London's Water Highway

London's broadest highway, which has been practically neglected for 30 years or more so far as passenger traffic is concerned, is likely, before long, to come again into use Private enterprise will probably soon provide a service of "water buses" on the Thames Arrangements are afoot for the establishment of a service of vessels to call at the long-neglected piers which used to be served by the "penny steamers."

All the boats will be capable of a speed of 17 miles an hour. Express or non-stop boats will take about 35 minutes between Hammersmith and London Bridge.

During the years 1915-1926 the London County Council ran a service of passenger boats on the Thames, which was eventually stopped because it did not pay.

It is believed that with the increased passenger loads of today, and better, more economical and weather-proof boats, such a scheme will now be a success.

TINY CHEF'S NEEDS—DARLING (THAT SO EASY TO SLIP-ON COAT) AND SMART

It is rather interesting to see any toy it is to fashion this darling coat. Practically only nine and number seems to join. And see the cunning gingham that part cut so smartly over the shoulders.

In worsted, this little coat is adorable, for leather is bright and pretty like.

In tiny checked woollen in cocoa brown, it is also equally charming, and in lightest weight plain wash cloth, it is delightful for "heat."

The "Tiny Chef" is designed for sizes 2, 4 and 6 years.

Size 4 requires 1½ yards of 54-inch material with ¼ yard of 27-inch contrasting and 1¼ yards of 36-inch lining.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

United Exports Higher

In the first six months of the current fiscal year Canadian exports of partially manufactured articles increased 400 per cent. over those in the corresponding six months of 1925. For the first half of the last fiscal year united exports of this class rose to $8,983,719, while for the same period this year the exports were valued at $13,072,288.

Figures will rank the centenary of the expansion this year.

The World Famous Remedy for LIVER & STOMACH TROUBLES

History Repeats Itself

The Three United States And Russia Change Places

Apropos of President Roosevelt's gesture of friendliness toward the Soviet Socialist Republic, a gesture that has been withheld for some fifteen years, it is interesting to recall that it took Russia thirty-three years to recognize the infant Republic of the United States. The great Empress Catherine thought the American Republic an infamy—a people who dared challenge the divine right of emperors who repudiated the Church from the State, and who had the insolence to declare that all men were born free and equal. To her Imperial Highness this was anarchy.

There followed the rule of the Emperor Paul, who played safe conservatism until Napoleon got rid of him by strangling him—the Russian alternative for elections. His successor, Alexander I., did the same and for why he should recognize a distant country across the sea, but as time went on and the other states were doing it, and the thing became expedient from a trade standpoint, he consented to take the risk.

Now, after more than a century, it is the United States which is debating whether it should recognize Russia—and for the same reason. It is a curious prank of history.—Ottawa Journal.

Helen F. Kimball's Recipes

New Cake Frostings By Director, Food Service Department Borden Company, Toronto

THE SNOW CARAMEL FROSTING

One cup granulated sugar (sold as caramelized) ½ teaspoon lemon extract; 2 eggs rice flakes.

Heat caramelized granulated sugar (sold as caramelized) ½ teaspoon lemon extract; 2 eggs rice flakes.

Heat caramelized granulated sugar (sold as caramelized) ½ teaspoon lemon extract; 2 eggs rice flakes. Mix thoroughly. Heat over hot water, beating. Lay and remove frosting with remaining rice flakes. Spread on a hot oven (400 degrees Fahrenheit) 10 minutes.

MARSHMALLOW CARAMEL FROSTING

One cup unwrapped condensed milk (caramelized) ½ teaspoon lemon extract; cup shredded coconut.

Heat caramelized unwrapped condensed milk (see note below for caramelizing) until smooth and creamy. Combine with finely cut marshmallows. Spread on top of cake. Sprinkle with shredded coconut. Bake five minutes or until coconut is golden brown in a hot oven (400 degrees Fahrenheit).

To Caramelize Sweetened Condensed Milk. Place one or more cans of unwrapped sweetened milk in a kettle of boiling water and keep at boiling point for three hours, keeping careful to keep can well covered with water. Chill thoroughly.

Airport For Singapore

Is Being Pushed and After Bad One In England

An airport patterned after the best in England and the continent is being constructed in Singapore, Straits Settlements. The new aerodrome will be about ten minutes by automobile from the heart of the city as compared with an hour for the existing landing field which is located on the other side of the island of Singapore. The site of the landing field now under construction is a huge mangrove swamp about 70 acres of which have already been drained.

SUNDAY SCHOOL LESSON

INTERNATIONAL

PAUL IN ATHENS

Golden Text: "In Him we live and move, and have our being" Acts 17: 28

Lesson Acts 17 16-34

Devotional Reading John 1 1-14.

Explanations and Comments

Paul in Athens, verses 16-22 — While walking the streets of Athens Paul's spirit was aroused by the sight of so many idols. A good insight into a man's character may be gained from the knowledge of the things that stir his heart.

In synagogue and in market place, wherever Jews and proselytes would listen to him, he "preached Jesus and His resurrection." Curious of the Epicurean and Stoic philosophers heard him, and some, in their curiosity, said, "What would this babbler say," while others said that he seemed to be proclaiming strange gods. The Athenians were wont to spend all their time in telling or hearing about some new things, Luke tells us in another place, and so one day they led Jesus on Paul and brought him to the place where the Areopagus, or Council, sat in judgment and there him explain his new teaching. Paul stood up and was questioned.

The Text Of Paul's Sermon, verses 22-23 — Pointing politely to the many ancient statues near by Paul began by saying, "Ye men of Athens in all things I perceive that ye are very religious." As many have rendered it "superstitious." Are they? Others read words familiar through the writings of Aristotle and Demosthenes, "Ye men of Athens" human mortals "more fearing." It could be taken as a compliment or the reverse The reverse meaning is given in the Authorized Version as "too superstitious," and in the margin of the Revised Version as "somewhat superstitious." Paul must have intended his words as a compliment, for, as Dr. A. T. Robertson remarks, it seems unlikely that he would give his audience a slap in the face at the very start. Paul was always courteous; he was "a Jew of Tarsus, a Pharisee," a Southerner orator.

"A modern St. Paul, preaching on the American Main Hill, might charge the American people with being "too superstitious," as did Paul the Athenians, "concerning the Christian Advocate of Nashville. "According to a writer in Popular Science, one is not having a wave of superstition such as has not been since the Middle Ages This means takes the form of the grossest fortune-telling practices of all kinds. One hundred and twenty-five million dollars is the sum spent annually on such foolishness. That sensible people should patronize these practices is proof of the ignorance for which we have no explanation.

As he had walked about that city, Paul told them, he had noted the objects of their worship, and had come to feeling their own need.

"When an appeal is made for help for Germany, are we not entitled to demand fair play for Britain too?" he asked.

It was a still greater outrage Sir John continued, for any man to seek to exploit the peaceful sentiment of British homes by falsely representing there was any difference between the two sides of the House of Commons in the matter.

Sir John only gave some figures to show what Britain had actually done for disarmament. Since 1914 her capital ships had been cut from 61 to 15; her cruisers from 108 to 54; her destroyers from 256 to 192; her submarines from 74 to 50; torpedo boats from 106 to nil.

The naval personnel had been reduced from 189,000 to 99,434. The Indian army had been cut by 17,000; the air force by 30 squadrons since the post-war period.

"Whereas," interrupted a voice from the Conservative benches, when Sir John said Britain now stood no higher than fifth in the list of national air forces.

"Great Britain is using and will continue to use every effort," he said, "to promote international conciliation and disarmament."

Nothing had occurred, he added, "to justify Germany's shock tactics in leaving the League of Nations."

"The most material contribution to restoring the confidence of Europe would be international disarmament agreement to which Germany must be a party."

SIR JOHN SIMON ON ARMS POLICY OF GREAT BRITAIN

London, Eng.—Sir John Simon, British Foreign Secretary laid the issue of disarmament before the House of Commons. He frankly recognized the gravity of the hour, but he dismissed deplorable exaggerations."

Whether Germany remained at Geneva or not, the British cabinet minister declared, the supreme aim of British policy would be to promote reconciliation — to endeavor to reconcile Germany's demand for equality with France's desire for security That was the general political issue

Sir John's exposition of British disarmament policy, with full cabinet backing, was designed to meet the attack from two sides from Labor members clamoring for further disarmament and from Conservative dreadnaughts seeking further strengthening of the fleets.

"At a time like this, when the internal coal system not up since the war is in jeopardy, we have declared ourselves without any doubt to be believers in and upholders of the League of Nations as the best possible instrument for international peace," declared Sir John.

"We shall not get out of our difficulties by trying for isolation The conditions for isolation have disappeared We have an immense moral authority in the world and we must use it by making no special or secret alliance with or against any country, but work for friendship and peace between them all"

There were early signs of the coming storms in parliament. Sir John took a dig at David Lloyd George, who sat in the front opposition bench, as an international movie star. He referred to Lloyd George's talk on disarmament for a news-reel film.

The minister had hard words also for Sir Hafford Crewe, one of Labor's leaders, for his declaration at Bagdad that to disarmament Britain had done nothing. Said the British disarmament convention draft, bar's of Geneva discussions, would "make the gods laugh."

He described Sir Stafford's statement as "a classic example of the morbid delight which some Englishmen take in the fact of the darkest face in finding their own nest.

"When an appeal is made for help for Germany, are we not entitled to demand fair play for Britain too?" he asked.

It was a still greater outrage Sir John continued, for any man to seek to exploit the peaceful sentiment of British homes by falsely representing there was any difference between the two sides of the House of Commons in the matter.

Sir John only gave some figures to show what Britain had actually done for disarmament. Since 1914 her capital ships had been cut from 61 to 15; her cruisers from 108 to 54; her destroyers from 256 to 192; her submarines from 74 to 50; torpedo boats from 106 to nil.

The naval personnel had been reduced from 189,000 to 99,434. The Indian army had been cut by 17,000; the air force by 30 squadrons since the post-war period.

"Whereas," interrupted a voice from the Conservative benches, when Sir John said Britain now stood no higher than fifth in the list of national air forces.

"Great Britain is using and will continue to use every effort," he said, "to promote international conciliation and disarmament."

Nothing had occurred, he added, "to justify Germany's shock tactics in leaving the League of Nations."

"The most material contribution to restoring the confidence of Europe would be international disarmament agreement to which Germany must be a party."

Roosevelt Announces Larger Relief Program

Reports To Give Work To Four Million Men

Washington.—President Roosevelt has announced an expansion of the federal relief program aimed at taking 4,000,000 men off public relief rolls.

The plan involves the creation of a civil works administration and the use of $400,000,000 of public works funds.

Through these additional funds, the president intends to increase the part time work of men now on relief rolls so that they may be put on a self-sustaining basis.

It is intended 2,000,000 men shall be put on a self-sustaining basis by Nov. 15 and that an additional 2,000,000 men may be put on the basis by Dec. 15.

Approximately 3,000,000 families are now being cared for by public relief agencies, a reduction since April of 1,500,000 families

Other recovery signs noted at the week-end were:

A rise in farm prices for the week ending Oct 25 from an index figure of 91 to 92.

A rise in prices paid by farmers of less than one per cent

A decrease in retail food prices of 1.2 per cent.

An average rise of less than one per cent. in commodity wholesale prices.

Livestock For Winter Fair

Several Carloads Will Go From Alberta To Toronto

Edmonton, Alberta.—About ten carloads of Alberta's best livestock will go to Toronto for the Royal Winter Fair opening Nov. 21 The stock has now been finally selected under government supervision and comprises three cars of market steers, one of which is the champion carload, three cars of Holsteins, a number of Ayrshires, 16 head of purebred Shorthorns, 12 head of purebred Herefords, a number of Clydesdale horses, one of horses, and one car of sheep

The animals have been picked from herds in various parts of the province and are declared to be a particularly fine lot, with good prospects of winning some of the main prizes as in previous years.

Canadian May Get Contract

Large Number Of Grain Elevators To Be Constructed In Argentine

Fort Arthur, Ontario.—Contracts which will involve an expenditure of more than $30,000,000 for the construction of a large number of grain elevators in Argentine may be granted a Canadian.

G. H. Howe, head of a boat clothing firm here, has gone from here to the South America republic for some weeks, touring the districts in which the elevators are to be erected. In a telegram received from him, he expressed confidence in securing the contracts.

Thirty Three Leave France For Africa

Air Armada Will Make Fifteen-Thousand-Mile Trip

Istres, France.—A great French air armada of 30 planes manned by 60 picked aviators started a mass flight to Africa on November 6. The first squadron of 15 machines took off in twins

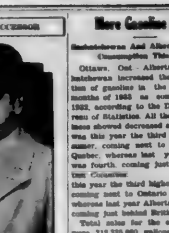
The start of the so-called "black cruise" was marred by a balky motor throwing one plane tardily out of line in the sky parade as the remainder took off.

On the 15 838-mile flight from this airport near Marseilles, descent of Dakar and Jungle will be braved for the sake of France's military, political, technical and commercial prestige.

More Work Necessary

London, Eng.—Declaration that a regular trans-Atlantic aerial service between Britain and Canada cannot be begun until a "great deal more" experimental flying is done, and suitable air bases established, is made by the aeronautical corps president of the Morning Post.

LIPTON'S SUCCESSOR



Tom Sopwith noted English sportsman and aeroplane builder, who has filed a formal challenge to race an American entry for the Amer ca's Cup, the world's most coveted yacht-ing trophy, in 1930 He will use an all-steel boat, designed by Chas Nicholson, and designed two of Sir Th mas Lipton's famous Shamrock challengers.

Troops Parade In Moscow

Fifty Million Take Part In National Holiday Celebration

Moscow, Russia. While all Soviet Russia observed a national holiday, Moscow's red square was the focal point. A million persons were estimated to have paraded From a reviewing stand atop the Lenin mausoleum Stalin, Kalinin, Molotov and their colleagues in government and Communist party watched and answered the cheers of the marchers.

Some 50,000 troops of the red army's Moscow garrison, together with several battalions of sailors, carried out the military phase of the celebration. The military held the square more than three hours as infantry, cavalry, artillery, tanks and the full complement of a modern army corps paraded in smartly-trained units.

Greatest Aerial Flight

Ottawa, Ont.—The greatest flight in aerial history was the crossing of the Atlantic by Alcock and Brown in 1919, in the opinion of Amelia Earhart, the first woman to fly the Atlantic solo. "It was an amazing feat, and the least appreciated They had practically no instruments of any kind I've we have now," said the aviatrix, here on a lecture trip.

More Gasoline Used

Saskatchewan And Alberta Increased Consumption This Year

Ottawa, Ont.—Alberta and Saskatchewan increased their consumption of gasoline in the first eight months of 1933 as compared with 1932, according to the Dominion Bureau of Statistics. All the other provinces showed decreased sales. Alberta was this year the third highest consumer, coming next to Ontario and Quebec. whereas last year Alberta was fourth, coming just behind Ontario and Quebec

Saskatchewan was this year the third highest consumer, coming next to Ontario and Quebec, whereas last year Alberta was fourth, coming just behind British Columbia.

Total sales for the eight months were 219,525,000 gallons as against 236,447,000 in the same period of 1932.

Club At Oxford Suspended

Conflict Between Fascist Tendencies And Forbidden To Continue Activities

Oxford, England.—University of Oxford authorities have suspended the "Oxford Club," which had a membership of several hundred students and is suspected of Communistic tendencies.

Club leaders were called into a long conference with the proctors and at the conclusion the students were announced, the club's members, apparently having declined to agree to conditions laid down by the authorities. The club will be forbidden to continue any form of activity so long as the suspension lasts.

Supporters of the club claim it is solely for the purpose of studying Communism, not promoting it.

Mussolini May Call Meeting

Discussion Of Disarmament Statements Is A Possibility

Rome, Italy.—The possibility that Premier Mussolini will call a meeting of four European powers and the United States to consider the disarmament stalemate was seen by well informed circles here After Il Duce and Norman Wilson Davis, touring former minister without portfolio, had an hour conference.

The conversation on disarmament was said to have revolved around the method to be pursued to re-open the arms parley, broken off shortly after Germany withdrew from Geneva.

MANY KILLED AS REVOLT IN CUBA FLARES UP AGAIN

Havana, Cuba.—A state of war existed throughout Cuba, proclaimed by President Zayas that alarms follow a vicious army and civilian rebellion. 24 hour old had killed an estimated 15 persons and wounded 183 others.

Reports came from Matanzas, just east of Havana, that almost the whole of Matanzas province had joined the uprising and that the ABC secret society had captured the town of Iguana.

Previous reports said the movement had spread to Santiago and that former army and navy officers from the Isle of Pines prison were prepared to march on the capital.

A lull in the day-long fierce fighting brought ghastly silence to Havana as night fell, but further clashes were regarded as inevitable.

Illinois troops during the day took possession of three important fortresses Fort San Ambrosio, Dragones and Atares, placing in each nearly 1,000 well armed dissidents. A sharp battle with gunboats in Havana harbor ensued.

Official reserve shrouded the condition of the gunboats "Cuba" and "Patriota" which fled to Mexico, but its was said in shipping circles the vessels were in bad shape Gunners at Atares fortress declared the guns were both near sinking condition. Harbor police said they were "badly damaged."

The state of war which ordered the constitutional of any "meeting" disorder who published news of an alarming nature."

A thousand blue-clad, armed ABC members and rebel soldiers rushed madly through the almost deserted streets and drew the fire of machine-guns lying in the grass in public parks.

Clanging ambulances speeded through the streets as Cuban Red Cross bands prepped through heavily shuttered windows, anxiously seeking information regarding the progress of the battle.

Foreign property was not attacked, except for the seizure by a group of rebels of an automobile belonging to a Spanish employee of an American and shots fired on the American club by soldiers.

World Tariff Truce

British Considers Fuel No Longer Of Any Value

London, Eng.—In view of the defections from the world tariff truce negotiated in London last June the British government considers the pact is no longer of any practical value, and consequently the United Kingdom will withdraw from it on December 7.

The House of Commons, crowded as it re-assembled, cheered this statement by Walter Runciman, president of the Board of Trade.

With the exception of Japan and some other nations practically all the nations represented at the conference adhered to the truce negotiated in the early and optimistic stages of the great London parley.

Since the abortive adjournment, if not conclusion, of the London conference, however, Britain has gradually come into disfavor Mr. Runciman pointed out Holland, the Irish Free State, Sweden and Switzerland had given notices of withdrawal while France and Denmark had made substantial reservations.

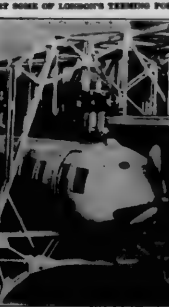
Library Opened By King

London, Eng. A new home for 4,000,000 books was inaugurated by the king when accompanied by Queen Mary he opened the new buildings of the National Central Library at Bloomsbury This country owes much to the late Andrew Carnegie and the generous policy of his trustees especially for their help in developing the public library service," His Majesty said.

Sealing Log Canoe

Ottawa, Ont The longest race in the history of the civil service took with the retirement of Alfred G. Kingston, chief accountant, public works department He is now on six months' leave of absence. Entering the service as an office boy in 1877, he has completed 61 years' service.

MAY TRANSPORT SCENE OF LONDON'S TEEMING POPULATION



Above is a working model of the new system of transport known as the "Railplane," which has been submitted to the London (England) County Council by Mr. Charles Boot, a Sheffield builder, Mr. Boot's scheme, if adopted, would involve the building of two satellite towns in Essex, linked by the railplane aerial railway to London. The railplane consists of streamlined cars slung from bogies which travel on a single overhead rail. The cars are propelled by airscrews fore and aft, are driven by electric motors or oil engines and their chief advantages are cheapness in construction and operation. The railplane is designed to work at speeds up to 130 miles an hour.

W. N. U. 2020

The English Way Of Hoarding

Governor Allows People To Keep Gold Coins, If It Is Hoarded

The Argonaut, San Francisco, says: Great Britain, long wise in the ways of finance and public psychology, has adopted an unusual attitude concerning the hoarding of gold. Disclosure of this attitude at a time when the United States government is actively engaged in persuading a fearful citizenry to refund to turn his gold over to the Treasury, brings to light a sharp difference of policies as between our country and Great Britain.

American observers have been puzzled for some weeks by the fact that practically every ounce of gold sold on the London market, including American gold now being exported, has been purchased, not by the central banks of Europe, but by individuals. Tracing the transactions further it is found that this gold is not being deposited in commercial banks and is not going into the arts and manufactures.

Where, then, is it going? It is going into hoarding, and everyone in Europe, including the bank and government officials, are quite aware of it. But no one is disturbed; there are no arrests, no prosecutions. England takes the reasonable attitude that a man's gold is his own and he may hoard it if he wishes.

The hoarded gold constitutes a second line of defense, a hidden strength, extra assets of credit and money which can easily be made available by governmental decree at any time. And it lends much better for citizens to purchase the gold and hoard it against future developments than it does for a government to do so. For governments can mobilize a national force, join happily in international agreements concerning the manipulation of gold resting anywhere in the branches that their citizenry has kept supplies of the yellow metal hidden away which the government can, and will, demand whenever it becomes necessary.

Used Rift To Save Home

An Incident of the Great War

Here is the story of a woman who met adversity with a smile and turned it into good fortune by courage and ingenuity.

Four years ago Mrs. Rebekah Wilcox, of Granville, Centre, N.S., was faced with a mortgage that threatened her of the loss of her home. She had no money, and it seemed the home must go for lack of it. Perhaps it would have, had not Mrs. Wilcox been out of the run of ordinary individuals.

She could not for ways of raising cash. She was an excellent hooker and rug maker. Her handicraft had been commended often. She had hooked, under some sales of her designs; infrequent, it was true, but some sales had been sold, why could not more be sold? People needed mats.

She finally decided to take up rug-making as a business. She dropped a few at first but gradually her skill increased as knowledge of her skill increased. One rug she sold for $125; others brought proportionately smaller prices.

Soon the mortgage had been paid off. Other debts went too. And then Wilcox found that she was deriving a comfortable income. She decided to keep hooking and making rugs like those she sells them to find as she can. Mrs. Wilcox has, she has found, a ready market for her rugs. Her husband helps with the designs. Anyone here or within The home for some larger rugs some from a neighbor. Mrs. Wilcox's husband.

Where Real Work Is Done

A prominent opponent the Child Welfare Bill, which is now before the House of Commons, is Mr. Arthur Meighen, who, in the course of a speech in the House on Thursday last, said that the Bill was a most dangerous one, and would be left to the administration of the Provincial Governments, which would be open to political influences. Mr. Meighen's opposition to the Bill is based on the ground that it would be unconstitutional, and that the Dominion Government has no power to legislate in this matter. Mr. Meighen's opposition to the Bill is based on the ground that it would be unconstitutional, and that the Dominion Government has no power to legislate in this matter.

Remembrance Day, November 11th, and once again the world bowed in silence to honor those who fought in the Great War, and whose mortal remains rest in the four corners of the earth. Ag Big Ben tolled the eleventh hour His Majesty King George stood before the great Cenotaph in Whitehall, London, to pay tribute to the Empire's dead; while on Parliament Hill, Ottawa, and before the Memorial Chamber, Canada took part in the Armistice Day ceremony. It is on the Altar at Ottawa, shown above, that the Book of Remembrance, containing the names of all Canadians who served in the Great War, will rest after it has been completed.

Hooded Great Patience

Wild Shooting Birds Are Tamed By U.S. Woman

Exercising patience and perseverance that would put to shame many wild animal trainers, Mrs. Myrtle Bruns, Kansas City bird-lover, has accomplished the utmost "impossible" by taming several wild hummingbirds which frequent her flower garden.

So tame have some of the tiny birds become that several will actually fly into the house and partake of their accustomed nectar from the same table as where the family are eating.

Mrs. Bruns' strange hobby began three years ago when a bird hummingbird complained that hummingbirds could not be tamed. "He was so persistent about it I determined to tame several hummingbirds I had seen around my flower garden," Mrs. Bruns said.

Among harvest with a tame bird filled with sweetened water and topped by a brightly-colored flower. Mrs. Bruns scanned the pens of the Shrine of Lily-by in the flower garden.

For hour after hour the birds watched Mrs. Bruns, but none would venture near. When the birds would disappear she would rest from her post.

Finally, a tiny bird, more venturesome than the rest, dipped down, stuck its long beak into the sweetened water, a quick drink and then back to safety.

Soon the marriages had been paid off. Other debts went too. And then Wilcox found that she was deriving a comfortable income. She decided to keep hooking and making rugs like those she sells them to find as she can. Mrs. Wilcox has, she has found, a ready market for her rugs. Her husband helps with the designs. Anyone here or within The home for some larger rugs some from a neighbor. Mrs. Wilcox's husband.

Wireless For Story

Young Boat Tells About Boat That Disappeared

Young Boat Tells About Boat That Disappeared

You've all heard fish stories, but here's a story about a rock-throwing goat.

This is told by a young Scot who is visiting Vancouver from the prairies and who at one time was on a fishing-boat operating out of Campbell River, on the north end of Vancouver.

According to this young man, he was before in his boat one day when he heard a sound like the bleating of a goat.

Suddenly a large seal popped up out of the water off the port bow. The seal was holding a rock between his two flippers. Then it hurled the rock at the fishing-boat, which it struck with a resounding clang. Subsequently clapping his flippers together the seal dived again.

The young Scot called the remainder of the crew on deck to witness the antics of the troublesome animal, which hauled out the seal became tired of hooking rocks and swam away.

It's the truth, cross word!

Teacher—Smith minor, what did you whisper?

Smith—I said you were a silly ass.

Teacher—Disgraceful, but I am glad you told the truth.

Electric safety razors are becoming popular in Switzerland.

Are Continents Adrift?

U.S. And Canadian Astronomers To Determine Truth Of Theory

Northwestern University astronomers of Evanston, Ill., in conjunction with the staffs of two Canadian observatories, that at Ottawa and the other at Vancouver, have determined to settle once and for all a theory that the continents are adrift. Four other United States observatories will assist.

As a result, Dr. Oliver J. Lee, director of Dearborn Observatory, maintained by the university, said oh, accurate will be carried on for two months.

Figures obtained will be checked against measurements to be made in the year 1940, when, if the drift theory is correct, the continents should be getting narrower. In the tests to be made the longitude of each observatory station will be carefully determined.

Just Across The Line

Two drug traffickers were arrested recently says The Niagara Falls Review, one in Canada and the other across the line. One, continued in Montreal, must serve fourteen years in a penitentiary, receive twenty-five lashes and pay a fine of $5,000. The other tried across the line was fined on a technicality.

Country Boy: "Listen, Sonny, I hear a cuckoo!"

City Boy: "Gee! I wonder where clock it escaped from!"

FANCIFUL FABLES

England Claims Drug Habit Is Increasing

Continental Drug Rings

Drug-smuggling and drug-taking are on the increase in England Extra customs officials, especially trained to ferret out smugglers, have been posted at all ports in a new drive against continental drug rings which have found in the British country a growing demand for cocaine heroin, morphia and other dangerous narcotics.

The French and German police also are co-operating with British authorities in their war against dope, and frequent consultations take place between Scotland Yard officials and continental to map out plans to trap the dope peddlers.

One of the difficulties experienced by British customs officers is that innocent persons are often used by the smugglers to get their contraband into England and to distribution centres in London and the Midlands.

In a recent case, officers examined a schoolgirl's book bag being carried by an elderly woman. It was found to contain a large quantity of morphine. The woman said she had been asked to take the bag to a girl friend who had left it at a Continental hotel. Her story proved to be true, but she had been made the tool of smugglers.

Despite the extraordinary precaution taken by physicians to prevent dangerous drugs from being used illegally, the drug habit continues to spread, as is shown by the increasing number of persons who appeal to doctors to be cured.

"Drug-taking is undoubtedly increasing in this country," secon'ng to H. W. Clothier, leading British chemical manufacturer and expert on drugs and poisons. "It is a common experience for a retail chemist to be asked to supply drugs on a false or falsified doctors prescription, but prescriptions are lessened by the drug smuggler."

Analysis Of Poison Ivy

Chemists Searching For Substance Which Attacks The Skin

The virulent essence of poison ivy does not vaporize and therefore although the plant is not dangerous. One must have actual contact with the poison of the plant to be affected.

This is the conclusion of a study of poison ivy being made by Washington University scientists in collaboration with the National Research Council here.

In the fashion of poison ivy are many stories of persons so sensitive that even the wind blowing over the plants will cause illness. This investigation studies show there must be some tangible substance to act as a carrier from plant to person.

Nine hundred pounds of ivy leaves have been gathered at Richmond, Va., and Cleveland, and tested to extract the itch-provoking oil. By chemical analysis it is hoped to learn the substance in the oil which attacks the skin.

Some of the oil has been sent to Chicago, Ill., for Dr. Menaker, of the National Research Council, came from the Canadian capital to confer with Professor C. Albert Hill, in charge of the experiments at Middleton.

The Danger Of Complacency

People Often Blind To Statement Some If Serious Danger.

Wynne Lippman, writing in the New York Times, says there is something about reading the paper, sitting at ease which permits the mind to wander. When the statement is published Dr. Einstein has found a theory and the bridges have been removed. It seems to me the history, and after that I am not interested. I am interested in the book, being in possession of a theory which no one else can understand. If what Einstein says is true, I am the only man in the world who understands it. I am glad to know that. I am glad to know that. I am glad to know that

A Foundation for Goodwill

There is a very solid foundation for the goodwill that prevails towards United Grain Growers wherever the sign of the company appears on an elevator throughout western Canada.

It rests on many years of useful service, and a long demonstration that this company not only desires to take care of the interests of its farmer customers, but it has the organization, the resources and the experience which enable it to do so.

Whether in selling grain or in buying farm supplies it is sound business to deal with this Company.

Fort Hockey Club Hold Annual Meeting

The annual meeting of the Fort Saskatchewan senior hockey club was held on Monday of this week. Con-sidering the large attendance it is judged that the team is about to start on a very successful season.

The officers elected for the coming year were:

Hon. President, Warden J. D. McLean
President, J. R. Good.
Manager, F. Collins.
Secretary, I. Hutton.
Executive Committe
P. Morot, F. C. Sherman, J. Latour.

It was decided by the Club that they would hold a dance on Monday, Dec. 4th, in the Robinston Hall.

Contest Tickets Being Looked Over by Judges

Tickets on the "Name the Park" contest sponsored by the merchants of Fort Saskatchewan were gathered up last Thursday morning and were taken to Edmonton over the week-end.

It is doubtful if the results of the contest will be made known in time for it to be published in this weeks' paper, but the committee assures everyone that the winner will be announced as soon as it is known.

The contest as a whole was a success, both in making the park known and as a business booster for the merchants who ordered this contest. Out of the 1000 tickets, 900 hundred were given out by the merchants. With each ticket representing $5.00 worth of merchandise, a total of $4,-500 dollars worth of business must have been done by Fort merchants in two months.

Only a few of the nine hundred tickets out were not turned in.

MARKETING GRAIN THROUGH POULTRY

Marketing grain through the poul-try route would mean better than dollar wheat for the farmers who have poultry flocks, even at present poultry prices, according to the pro-vincial poultry commissioner, in a recent bulletin on the finishing of poultry on the farm.

A report of F. C. Elford, Dominion poultry husbandman, given at the world grain congress last summer, stated that experiments had shown that it takes 22 pounds of mixed grain wheat, oats and barley, to grow a 6½ pound Barred Rock cockerel. In other words, 4½ pounds of grain can be converted into one pound of chic-ken meat. On the basis of the present price of nine cents a pound for No. 1 chicken, 100 pounds of grain fed to good poultry for most purposes would have a value of $2.45, or at the rate of $1.15 a bushel for wheat, 96 cents a bushel for barley and 46 cents a bushel for oats.

Taken From the Files
19 Years Ago Today

Wednesday, November 25th, 1914

F. E. Wright is a prisoner of war. This news came in as we were on the press.

P. Nelson, Whitford, had a banner crop of oats this year, the yield be-ing 120 bushels per acre on a 15 acre lot.

Mrs. Mooney received on Thursday afternoon of last week for the first time since coming to reside in the Fort. Mrs. Robert Bowell received with the hostess and Mrs. Karyl Bates assisted in dispensing hospi-tality during the afternoon.

James McConnell, our local dray-man, was compelled to shoot one of his horses which was badly injured in the runaway last week.

Rev. C. H. Johnson has accepted an invitation to preach Bible society anniversary sermons at Lloydminis-ter, Daysland, Innisfree the last week in December.

Josephburg News

R.-v. A. Winebrenck visited with Rev. and Mrs. Kerr at Vegreville for several days.

oooooo

A shower was given in honor of Mrs. Rudolph Rippel, nee Dorothy Wilke, on Nov. 9th, at the home of E. Hanz. Many lovely gifts were received and Mrs. Rippel in a few well chosen words thanked everyone. The rest of the evening was indulged in dancing and card playing. At mid-night a dainty luncheon was served.

oooooo

A special evening service will be held on Sunday, Dec. 3rd., at 7.30 p.m. at the Reformed Church

oooooo

Mr. and Mrs. J. Galbe, and daugh-ter Gladys, Miss C. Steinbach, and Messrs. J. Steinbach and G. Rosko of Vegreville visited several days with Mr. and Mrs. Geo. F. Hahn.

oooooo

Messrs. Leonard and Alfred Berg, and Ernest A. Mohr motored to Westlock to visit with Mr. and Mrs. Philip Rippel for several days.

oooooo

Mr. John Mohr Jr. returned home on Thursday from Winnipeg, where he attended the U. F. A. Convention.

Mail Your Christmas Parcels And Other Mail Early

The post office department at Ottawa has issued its annual remin-der of the approach of the Christmas season and the importance of sending mail early for the holiday season to prevent congestion and delay in the rush week or ten days, or at the latest, so as to leave Saint John, N.B. on the s.s. Duchess of Atholl, Dec. 5, from Halifax Dec. 9.

Edmonton mail for Christmas de-livery in Europe should therefore be mailed not later than Dec. 4th and 9th.

WARM NOVEMBER WEATHER

Alberta has been experiencing a sort of second Indian Summer dur-ing the past week, with very high temperatures at many points. The snow which came in the latter part of October has entirely disappear-ed in most places, and reports come from Southern Alberta that the cattle are once more on grass, and maximum temperatures have reached as high as 60 degrees early in the week. How-ever, such warm weather is not ca-tirely unusual for Alberta, for the records of the past ten years show some very high November temper-atures during that period, as well as some quite low ones, of course.

At Edmonton, in four of the ten years, the November maximum tem-perature was over 60 degrees, with a record average of 74 degrees, in 1921. The average mean temperature for November in the ten years at Edmon-ton was 34 degrees.

Coming Events

CURLING CLUB DANCE

The Fort Saskatchewan Curling Club will hold a Dance in the Robinston Hall on Friday, Nov. 30th. Refreshments. Dancing 9 till 2 a.m. Good music. Admission 50c each.

oooooo

The Partridge Hill Ladies Aid will hold a bazaar in the Memorial Hall on Saturday, Nov. 25th, at 2 p.m.

oooooo

The Holycke Church Aller Hustej ladies will hold a Bazaar, Baked Tea and Whist Drive in the Memorial Hall on Wednesday, Nov. 29th. Good prizes will be given for cards, also a special door prize for the person holding the lucky number ticket.

Tea from 3 to 6:30 p.m. 25c
Cards 8:30 p.m. 25c.

Good Hope

Mrs. Dave Cranston left for her home in Belfast Ireland, last Monday.

oooooo

Mr. A. K. Hoper is attending a Municipal convention in Edmonton this week.

oooooo

Mrs. Robert Johnston and Ernest were visiting in Edmonton for a few days last week.

oooooo

Mrs. C. M. Webber of Edmonton is visiting at the Moyer home this week.

oooooo

The Good Hope Christmas Concert will be held in Good Hope School on Friday, December 22nd.

oooooo

Paul Hawke and John Daigal em-ployed in the neighborhood have been playing for the last week or more.

Dave Roberts Elected U.F.A. President

David Roberts, secretary of the Municipal district of Clover Bar have, was elected president of the U.F.A. West Edmonton federal constituency convention at the annual gathering of that body held last Friday in the council chamber of the Civic block, Edmonton. He succeeds Charles Bur-nell.

Seventeen delegates from seven U.F.A. locals, U.F.A. and U.F.W.A. members numbering 40 attended the convention which was the first held since the re-organization in August necessitated after the redistribution bill altered the boundaries of the constituency.

Other officers elected were vice-president, Mrs. M. Cavanaugh; sec-and vice-president, L. Bateson; sec-retary, J. M. Bentley.

BIG PAYMENT FOR BEET GROWERS

Sugar beet growers of Southern Alberta recently received payments totalling upwards of $400,000 net from the plant at Raymond for de-liveries of beets this year.

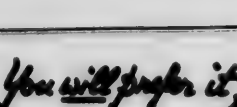
You will forget it



Democracy vs. Dictatorship

Out of the welter of financial and economic difficulties and problems now trembling a continued world, and which are directly or indirectly the epidemic and aftermath of the Great War, there has emerged one great question which now begins to overshadow all others, because all others are bound up in it. That question may be summed up in the words: Has Democracy failed? Are democratic forms of government adapted to the morbidly feverish mood with conditions as they now exist in most countries and in the world at large?

The Great War, we were told, was a war to end war; a war to save civilization; a war to protect democracy from autocracy. Nevertheless if by actual results as we see them throughout the world today, there is ever more talk of war than there was in the early months of 1914; there are more people who question whether civilization was saved, or can be saved; there is more of the autocratic in government than was the case during a half century before the war.

The question, therefore, that most naturally is disturbing the minds of all thoughtful people is: Whither are we drifting? What is to be the outcome of the present drift? Is it impossible under democratic forms of government to solve present problems, and, in order to solve them, is it necessary that our systems and forms of government be not up?

Four great nations are today under openly acknowledged dictatorships. Russia, Italy, Germany and Austria. Parliamentary institutions are either wholly abolished or suspended in all these countries. Under stress of existing financial and economic emergencies, greater powers have been granted to a Democratic President in the United States by a Congress under control of the Democratic party than were even dreamed of a few years ago. In Great Britain certain emergency powers have been conferred upon a Conservative Government, while in Great Britain a union of members of all parties exists under the name of a National Government.

There is, however, this difference as between Russia, Germany, Italy, Austria, and the United States, Canada, Great Britain, that whereas in the first four named countries parliamentary government is, for the time being at least, abolished, in the latter named countries Parliaments still retain full control of the situation and can at any time withdraw the powers granted by them to their respective governments.

It would, however, be idle to deny that there is an under-current of opinion existing in the realm of all political groups to a greater or less degree that present representative forms of government have not measured up as well as it was expected they would, should and could, to the needs of the time. As a result, intelligent men and women are asking whether the fault lies in the free democratic system itself, or whether it has rather in the failure of those who for the time being are the leaders and representatives of the people under that system to adequately meet the responsibilities and discharged the duties imposed upon them.

One writer in a Western magazine discussing the rise of dictatorships in Europe, says: "Those who are out-and-out democrats, and who believe in parliamentary government, will regret this relapse, but it is evident that it is only under certain conditions that democracy in the widest and widest form of rule. When people are controlled by passion or prejudice, or when they are ignorant or stupid followers of custom, they are unfit for self-government. When they are thoughtful and intelligent and have a high regard for justice and equity, they may be trusted to manage their own affairs." His conclusion:

"The moral of all this for Canada is very obvious. She is worthy of parliamentary rule as long as wisely-chosen parliamentary intelligence governs their powers, but when these are indolent or the slave of party or controlling interests, then there is bound to be agitation for reform."

In other words, the question is: Are the people themselves measuring up to their individual and collective responsibilities? The answer appears to be that it is not the democratic system of representative government that is at fault, but the men which the people themselves are making of their system in governing themselves.

At election times when as a people we are choosing our representatives in Parliament, and through them placing a Government in power over us, are we acting intelligently, or are we swayed by passion or prejudice, or blindly following a chatted course without thinking whether we are giving heed to what we are doing?

It is never safe in life to make great decisions when we are not in a normal state of mind. It is an unwise to make such decisions when we are on the mountain-tops of prosperity and laboring under an undue optimism; it is equally dangerous and unwise to make them when in the deep valleys of depression and controlled by a warped pessimism. The machine of our minds should be directed, not by our emotions, but through the application of our thinking powers.

Dictatorships mean the loss of liberties now enjoyed, but if as a people we do not show our appreciation of these liberties by using them properly, then we are not deserving of them. Dictatorships are dangerous. If the elections of the world resort to dictatorships there is bound, sooner or later, to be a clash between that dictator and that dictator. Dictators want their own way, or they cease to be dictators, and when the desires of two or more of them come into conflict the people under their authority and control will suffer.

If we cherish our present democratic institutions of government, if we want to retain them, we must as a people prove ourselves worthy of them. We must think for ourselves and act intelligently. Otherwise some person will arise and assume to himself the autocratic power to think and act for us.

Many Boys Sleeping Sights Wreak the Nervous System

Men and women lose night after night on sleeping beds. Their eyes do not close in the refreshing repose that comes to those whom nerves are right. They are irritable and nervous, weak and worn out, and everything looks dark and gloomy.

Milburn's H. & N. Pills is the remedy that is employed to restore them the blessing of good health. They bring back the sound refreshing sleep, tone up the nerves, and impart that sense of buoyancy to the spirits that is the result of renewed vitality and right blood.

Modern Project Planned

Air Line Across Sahara Desert in Aim Of France

With only 36 hours from the heart of Europe to the heart of the Sahara, French experts are drawing plans for a Sahara Air Service instead of encountering on the Trans-Saharan Railroad, which yet may take years to complete.

The success of several aviation and automobile missions to various points of the Sahara both from Morocco and Algiers, has convinced the French Government officials interested in central African development that the lesions between metropolitan France and the African colonies can be accomplished easily by air.

The Trans-Saharan Railroad Commission has made exhaustive studies of the proposed railroad possible route, but these plans still are in dispute because of the more recent and very accurate findings.

The advantages of automobile and aviation routes are apparent in that sudden tactical surprises, or heretofore unknown developments of a climatic, or geological aspects, may be overcome by a simple change of the route.

French civil aviation authorities still are working on plans for the Air Service Budget Law. In the 1934 budget contains an appropriation of ten million francs for Trans-African studies, which would provide for an air route joining France and the desert with other contiguous bases over North Africa.

A 266 lbs. MAN LOSES FAT

56 lbs. Off—Feels Better

A woman writes about her husband as follows: "He started to take Kruschen Salts for rheumatism. His weight was then 266 lbs. He began to lose weight and now he is 210 lbs., and feels better. He took half-a-teaspoonful of Kruschen in a cup of warm water every morning. People keep asking him what he has done to fetch his weight down, and he always says Kruschen Salts."—(Mrs.) H.E.

Thousands of overweight men and women in Kruschen Salts a far better means of reducing them by taking that. The little daily dose of Kruschen Salts keeps the organs functioning properly every day and lets you with such a feeling of radiant vitality and vigor that before you know it you are fairly possessing part of your skin" with energy instead of merely wishing around—and reduction fol-

In Spite Of Handicaps

Many Old People In Canada Go To Church Regularly

From many parts of Canada have come little stories of men and women advanced in years, who, despite great handicaps, are attending church services regularly.

A case is reported from northern Alberta where a woman more than 70 walked three and a half miles to attend an Anglican church service some weeks ago. Even in Nova Scotia a United church elder nearly 90 years of age drove 35 miles with his wife on a recent Sunday morning to a near-by community, making the trip by horse and carriage.

Good Way To Stop Acid Stomach

Any druggist will tell you the best way to stop acid stomach and indigestion is to take a little Bisurated Magnesia in water after meals. This will stop your indigestion and sweeten the stomach, get rid of gas, and avoid belching in no time. Ask any druggist.

New Gas Discovered

Fuel gas with a greater specific gravity than ordinary gas and condensible to such an extent that it can provide a gas for cooking in bottles has been produced at the Carbon Lorraine coke at Hells, Germany, the Paris gas journal says, by a process not in the distillation of benzol from coal. According to tests, one bottle is sufficient to supply the ordinary household for from one to three months.

Production of gears in the United States has more than doubled in the past twenty years.

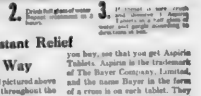
Here's Quickest, Simplest Way to Stop a Cold

Almost Instant Relief in this Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICKEST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you cough it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet. They dissolve almost instantly. And then work almost instantly when you take them. And for a gargle, Aspirin Tablets dissolve so completely they leave no irritating particles. Get a box of 12 tablets or a bottle of 24 or 100 at any drug store.



BOES NOT HARM THE HEART

Have Nations Forgotten

European Countries Seem To Be Preparing For Another War

The news that comes from Europe makes one wonder if that continent has already forgotten the bloody days of 1914-18.

France has just completed a "great wall" of fortification extending back 18 miles from her German frontier which were five years in the building and which cost millions of dollars.

Alarmed by Hitler's blood-and-thunder attitude, Belgium is undertaking immediate improvement of her eastern fortifications.

Equally distrustful of Hitler's intentions, Austria is making an addition to her army, bringing it up to its full authorised strength under the treaty of St. Germain. She may also reintroduce universal military training.

Hitler himself is talking and blustering in a manner that makes the ex-kaiser look like a novice in that art.

And to think that in the year 1918 —only 15 years ago—the nations concerned thought that they had concluded the war that was to end war.—Brockville Recorder and Times.

Helen E. Kimball's Recipes

New Cake Frostings By Director Food Service Department Borden Company, Toronto

BAKED FUDGE FROSTING

Two squares unsweetened chocolate; 1½ cups (1 can) sweetened condensed milk; 1 tablespoon water; 1 cup shredded coconut.

Melt chocolate in double boiler. Add sweetened condensed milk, stir over boiling water five minutes until it thickens. Add water. Fold in half the coconut. Spread on cake. Sprinkle top with remaining coconut. Place in hot oven (450 degrees Fahrenheit) 10 minutes or until coconut browns.

TOASTED PEANUT FROSTING

One and one-third cups (1 can) sweetened condensed milk; 2 tablespoons peanut butter; ½ cup chopped peanuts; Peanut halves.

Place sweetened condensed milk and peanut butter in top of double boiler. Cook over boiling water for five minutes, or until mixture thickens, stirring until well blended. Add chopped peanuts. Spread on cake. Decorate top with peanut halves. Bake in a hot oven (450 degrees Fahrenheit) 10 minutes.

LEMON CRUMB TOPPING

One and one-third cups (1 can) sweetened condensed milk; ½ cup lemon juice; 1 cup zwieback crumbs.

Stir sweetened condensed milk and lemon juice together until mixture thickens. Add ½ cup zwieback crumbs. Spread on top of cake. Sprinkle with remaining zwieback crumbs. Bake in a hot oven (450 degrees Fahrenheit) 10 minutes.

There are about five to six million rat blood cells in the body of a grown man.

Map Depicts All Canada

Moving Cinema Being Painted By Montreal Scenic Artist

A moving panorama map of the Dominion of Canada, the largest of its kind in existence, is being painted by Gordon Hamilton, well-known Montreal scenic artist, who created the gigantic map used in Canada's exhibit at the Century of Progress Fair at Chicago. The huge canvas is 160 feet long and ten feet high and will be mounted on a belt behind a stage equipped with an opening ten feet high by twenty feet wide. It will be exhibited throughout Canada and England.

Starting from the Atlantic Ocean, the scene takes in the whole of Canada to Victoria and the Pacific coast, displaying various colors for cities, towns, lakes and rivers. Government parks stand out distinctly, as do the mining areas, and the relative positions of one place to another can be easily picked out. Even Canada's sports facilities have been included in this important undertaking.

Scientists Are Making Good Headway In Solving The Secrets Of The Ocean's Depths

From cone which nicolas called for more confusion in search of Spanish gold the yacht "Carolina" recently returned to Washington with new treasure found in the ocean's depth.

This new treasure comes from attempts to answer the question, "How deep is the Ocean?" as well as, "What is in the Ocean Deep?" The answers, so far, are incomplete. But that revealing contributions have been made to the store of human knowledge is certain. Still, the survey from the "Carolina," which included studies in the physics, chemistry and marine life and bed life of the waters north of Puerto Rico, covering an area extending from Santo Domingo in the Virgin Islands, has only begun.

Under the direction of Dr. Paul Bartsch of the Smithsonian Institution, the expedition, pursued for two months has been made possible by the joint effort of a group of scientists and the co-operation of Mr. Eldridge Barrett, Johnson, who contributed the use of his yacht and financed the assembling and installation in it of special equipment and apparatus.

The winter's exploration was to reality in the nature of a sampling expedition. Primarily it was planned for the purpose of obtaining what scientific equipment was needed for a detailed survey which is to continue through four winters. Actually much more was accomplished. The Caroline gathered many specimens of deep-sea plant and animal life.

The region just north of Puerto Rico is interesting for two reasons, among others. It is the deepest known part of the Atlantic. Depths in excess of five miles have been found (the deepest was Blake Deep, being 30,200 feet), and yet greater ones may be discovered. Modern scientific knowledge of the ocean floor, of which waves of sound are flashed into the deep to be echoed back from the bottom, is comparatively new. Until it was lent by the navy to check old records or establish new ones.

A single bottom sounding might have been seen on a freighter, mounted on the quarterdeck was temporarily the "Sonic Depth Finder" which "Carolina" might be on some special mission. But beside there was not only mechanical sounding equipment, but instruments for measuring the water temperatures at different levels; for detecting trends of currents and analyzing the water itself.

Blood cables became fishing lines miles long. There were traps and nets and hall of centered district Hugh to lure the luminous denizens of the deep —fish with head and tail lights. Mixed in hall is matched from the hook by a hose, huge nets, twenty-five feet across, or loops of heavy pipe dredges—not constructions, were torn from the floor of fishing lines a thousand feet or more below the surface of the Atlantic.

One of the most important results of the winter's cruise was the successful testing of new methods of underwater photography. Even specially designed cameras proved their worth. One was effective 180 feet below the surface, taking pictures that used at depths down to 1,800 feet.

At times the open deck of the "Carolina" which resembles the laboratory was covered with thousands of brilliantly colored creatures of the deep sea, unwitting travellers to a new world of light and air. Here, where there was ample light, M. Elie Cherbatage, the artist, painted feverishly to catch the quickly changing hues of many specimens previously not seen by man.

Our Qualification

Dora was in the middle of her s'ng-ing lesson when her mother arrived on the scene. After listening for some time she broke in:

"Ah—er—how is my daughter getting on? Do you think she will eventually make a great singer?"

The music teacher seemed at a loss for words.

"Well, madam," he said at last, "it's rather difficult to say."

"But you must know by now if she possesses some of the qualifications," said the girl's mother, sharply.

"Well, she's got a mouth," replied the teacher.—London Answers.

Maple Crops In Favor

Figures For September Show Big Increase in Imports

Curtitude had the bicycle is coming into its own again is shown by the importations. Although September is supposed to be late in the year for a great sale of wheels there were actually 815 imported compared with 52 a year ago. As usual the greater number came from the United Kingdom, there were 490 British and 18 from the United States. Contrary to experience 53 motor cycles came from the United States and seven from the United Kingdom. Usually the majority of these imports are British. However in the case of motor cycles the reverse seems more important than a year ago.—Dominion Bureau of Statistics.

Jewish Soldiers Honored

Bulgaria Unveils Monument To Men Lost In Great War

A monument to the unknown Jewish soldier dedicated to all Bulgar members of that race who laid down their lives in the Balkan wars and the world war, has just been unveiled at Sofia, the ceremony being attended by both Jews and Christians.

Speeches eulogizing the valor of Bulgarian Jews in fighting for the Christian king were made by Dr. Vatoff and Col Tadjer, who recalled that out of 5,000 Jews mobilized before the armistice, 380 were killed in action.

The Bulgarian Jew has always been conspicuous for his bravery. And the Bulgarian Macedonians say that he has given the smartest "turnout" to the International Jewish Congress recently held in Jerusalem.

Wounds Were Forgotten

Germany To Honor Noted Blogger Navigator Was Spotted

An international ceremony was called off at Montreal when one of the delegates forgot to bring along flowers.

A party of distinguished guests from France and Montreal gathered near the city hall to pay tribute to Viaquain, noted Dieppe navigator of the 13th century, and to place a wreath on his monument. Greetings were exchanged. Speeches were made. And then the ceremony was called off completely satisfied with his electrical system.

Operates From Light Socket

Ebay X-Ray Capable Of Photographing Entire Body

The smallest X-ray built in this country was demonstrated for the first time to the American Congress of Radiology at their recent convention in Chicago. Radiographers from all over this country and abroad attended.

The small unit is rated at 50,000 volts and has milliamperes, and stands in marked contrast to the monumental 300,000-volt X-ray tube recently installed for cancer treatment at Mercy Hospital, Chicago. The new device operates from an ordinary light socket, is short proof, and may be operated in perfect safety by any layman—a combination of virtues long sought by the X-ray industry.

The small unit is capable of making X-ray photographs of the entire human body, or it may be carried around and used for making fluoroscopic examinations in industrial plants. It can be used in rural areas house to examine children suffering from adenoids, or package, at race tracks and stables for the inspection of horses' ankles in tat and dog hospitals, or for research and therapeutic examination of aeroplane parts.

The baby X-ray can be used with perfect safety by the average layman and is of particular value in the examination of suspicious packages, it was stated.

Interest Is Quickened In Trans-Atlantic Air Travel By Survey Of Northern Route

In Memory Of Blakiston

Symbol Erected On Alps 8,500 Feet Above Sea Level

The late Burt Blakiston, great Australian air ace and squadron leader in the British Air Force, will be a symbol for all fliers from Britain to the East.

The Aero Club of Aeosta has erected to his memory a fine cairnet of white limestone, standing 8,000 feet above sea level, on the Tuscan Alps, near the spot where he crashed last January during one of those furious storms which frequently assail the highlands.

He had left London and was heading for Sydney, Australia. Nothing was heard of him from the morning of his departure from the British capital until four months later in May, when a shepherd going up the Alps near Florence crossed the pass near Campo Magno, and saw wreckage sticking out of the partly melted snows.

Recently his Burt Blakiston's body and the remains of his aeroplane. His diary showed that he had had stormy weather and was trying to cross Italy to reach Brindisi before his next hop to Persia. He must have lost his way in the storm and crashed on a mountain side.

The memorial is a remarkable landmark, and in clear weather can be seen for miles around.

Market For Wheat

Opportunity To Sell Canadian Wheat Exists In China And Japan

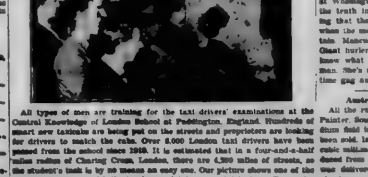
Increased markets for Canadian wheat exist in Japan and China, John M. Imrie, managing director of the Commercial Journal, told the Young Men's Canadian Club at Toronto.

In order to benefit western Canada, he said, there must be formed co-operation in carrying out the London wheat agreements; willingness to encourage consumers to use more flour; establishment of pools; stabilization of prices; establishment of a farm products marketing commission.

While The Wind Blows

Bob Marquis, a farmer near Abernathy Texas, need pay no electric light bills. He has installed Edison cells and has installed on the farm house roof a wind motor which operates a generator which charges a radio battery which ignites an automobile light bulb. The battery gives him only one light but Marquis never did use more than one coal oil lamp, so he is completely satisfied with his electrical system.

LONDON'S TAXI-DRIVERS IN THE MAKING



All types of men are training for the taxi drivers' examinations at the Central Knowledge of London School at Paddington, England. Hundreds of smart new taxicabs are being put on the streets and proprietors are looking for drivers to match the cabs. Over 8,000 London taxi drivers have been passed from the school since 1923. It is estimated that in a four-and-a-half million radium of Charing Cross, London, there are 4,300 miles of streets, so the student's task is by no means an easy one. Our picture shows one of the classes in progress, with the teacher explaining some intricate traffic regulation in the heart of the British capital.

How To Order Patterns

Ayr, Scotland, has adopted a five-year building plan for municipal houses.

Interest in the future of trans-Atlantic air travel has been quickened markedly by the survey flight of Colonel Charles A. Lindbergh over the Greenland route.

London despatches give assurance that expert advisers of Captain and Mrs. Mollerhead are not lagging at a time which calls for foresight and vigorous initiative. Announcement of the new project after advance bulletins in the interest of all the larger Powers in the mapping of the world's airways.

According to the London reports, agreement was reached at the Anglo-Canadian air conference in St. John's, Newfoundland that Harbor Grace shall be the Atlantic Coast terminus for overseas flights. Harbor Grace, it would appear is to become the "forks of the road," one route leading from there to New York, while the other, via Montreal, will serve Canada.

Although the Lindbergh survey was undertaken largely to survey landing-field facilities in Greenland, the decision of the Anglo-Canadian conference is to be the direct overseas flights between Newfoundland and Ireland, without touching Greenland soil. Stops in Iceland would of course, involve the co-operation of the Danish Government.

The proposed plans for the all-British route seems to be in consonance with the most recent developments in the matter of aerial construction. The Pan-American Airways, which Colonel Lindbergh represented, is building six large flying boats with a view to entering upon the Atlantic—Toronto Globe.

Working For Peace

British Foreign Secretary Talks About Disarmament At Round Table

Sir John Simon, British Foreign Secretary, told Senatrel London at a luncheon the other day that Britain's all-round foreign policy possessed qualities that would contribute mightily to a peaceful solution of current problems. "We have tried to conduct our affairs," he said, "in a way that we mean to maintain, so far as we are concerned, on friendly relations with other nations. We mean to make no secret or special alliance which is bound in its turn to provoke some counter combination. We mean everywhere to support all policies and all movements in all countries that are honestly aiming at the restoring of that thing, ingredible in itself, but so necessary for the recovery of commerce credit and confidence."

No Single Test

Varieties Of Mushrooms Deborn and Must Be Carefully Tested

H T Gussow, Dominion botanist, says in a letter to The Ottawa Journal that there is no single test to determine which are good mushrooms, and that many of the tests commonly used are survivals of the dark ages. "They pool very well, they have such a good odor." I boiled some, and put with them a silver coin, and it did not turn black. These are statements but they decide nothing concerning edibility." Only by careful and detailed study can a cell ever know which variety to avoid.—Toronto Star

Excuse Was Worn Out

Gus Mancuso, New York Giants catcher, is credited with one of the best wise cracks of the recent World series. In the final game of the series at Washington the teams went into the tenth inning with signs indicating that they might still be playing when the moon came over the fence. Gus Mancuso walked up to bat. Umpire Clint Barlet, and said: "See here, Mister what's the idea? It's time for supper. She's not falling for it that time gag any more."

Australia Reduces Gold

All the radium produced in Mount Painter, South Australia, the only known field in the British Empire, has been sold, is seven months' output of cubic millimetres of radium being valued from ten tons of ore. The ore was delivered to seven tubes, each about a quarter of an inch long (about as thick as a lead pencil

The Evening News of India said that eggs were buried at a plateau on which M. K. Gandhi, Indian leader, was seated during a public meeting at Bhagpur. The incident was regarded as the first of its kind in Gandhi's public life.

Honor Heroes Of History

Many Countries Represented On Panels In Plaza At Dallas

Fourteen incidents in which heroes played an important part in history are depicted in as many panels painted by the n ely known Irish artist, John Keating, for the Plaza in Dallas, where the drawing for prizes for the Irish sweepstake is held.

Paul Revere's ride is the subject for the section from United States history; one of the first and not the least important of the events in the American War of Independence. Napoleon's heroic "Miscegie" is seen in another of the panels. It was captured in 1799 by a French soldier during a battle with the Turks in Egypt. The admiral carried Napoleon from that time until it was wounded at Waterloo.

Canada is represented by the Royal Canadian Mounted Police; England by Dick Turpin and Black Bess; Spain by Don Quixote and Rosinante; Highland by Lady Godiva; Belgium by Roland's ride from Ghent to Aix, and Ireland by Emmin Macha a race horse famous in English history to obtain a woman matched speed with a horse.

Cruises To Mediterranean

Canned Line Plans Delightful Winter Cruising To Southern Climes

No less than twenty-three cruises have been scheduled by the Canard Line for the coming season to sail out of New York, as well as a large number of cruises from the United States.

The "Mauretania" will make nine cruises to the West Indies and South America, including at ports of Venezuela, Curacao, Panama and Cuba. The ship will sail on Saturday evening and return a week from the following Friday, allowing for an even two-weeks vacation within two provinces.

The Aquitania will make two cruises to the Mediterranean, covering 33 days and calling at Madeira, Gibraltar, Algiers, Nice, Malta, Port Said, Istanbul (Constantinople), Athens and Naples. The sailing dates will be January 31 and March 7. Tourist class passengers will be carried on these Mediterranean cruises.

The "Franconia" will sail on her annual cruise around the world departing on January 9. Previous to this she will make a 9-day holiday cruise to Nassau, spending New Year's Eve in Havana. For this tour she will leave New York on the evening of December 26 the day after Christmas.

The "Samaria" will make six 11-day cruises to Bermuda. Nassau and Havana. If conditions are identified in the Cuban capital the ship will go to Kingston, Jamaica, instead. The dates for these cruises will be January 20, February 4, February 17, March 3, March 17 and March 31.

The "Carinthia" will make three cruises in conjunction with Raymond-Whitcomb Company. The first cruise will cover 14 days and will call at ports in the Virgin Islands, Dominica, Martinique, Grenada, Trinidad, Venezuela, Curacao and Jamaica. The second will go as far south as Rio de Janeiro, occupying 27 days, and calling at ports in Barbados, Curacao, Venezuela, Trinidad, Brazil and Martinique. The third will be an 8-day cruise to Nassau, sailing from New York February 8, covering the better part of four days.

Started On Tower Hill

Premier Bennett Has Romantic Career In Mission Quarter

Many distinguished careers have started on Tower Hill, in the City of London, but Prime Minister Ramsay MacDonald seems to have been the only one who began his career in that historic quarter. In "Pageant of Tower Hill," published and written by Mr. Geoffrey Clayton, leader of the Tax Is movement, and H. R. Lafwich, Hackney House librarian, it is revealed that Mr. MacDonald on Tower Hill as a warehouse clerk in 1886 at a weekly wage of about $2.

Women's Weekness

"I had a headache, the most fifth pains persistently, morning to I could hardly get at night and hardly I had to lie down. I tried Aspirin, but it only relieved the pain for a short time. Then I got a bottle of Nerviline. Before I had taken half of it I felt fine. I have had no more headaches since taking it. I recommend Nerviline to all my friends."

Mrs. [illegible], Nerviline is a powerful, penetrating pain relief. Get a bottle today. Large family size $1.00. Trial size 25c. At your dealer's.

SUNDAY SCHOOL LESSON

NOVEMBER 26

PAUL IN CORINTH

Golden Text: "I determined not to know anything among you, save Jesus Christ, and Him crucified."—1 Corinthians 2 2

Lesson: Acts 18.1-18, 1 Corinthians 1:1-4.

Devotional Reading: 1 Corinthians 13.

Explanations and Comments

Paul's Exhortation To Unity, 1 Cor. 1:10-18 In Paul's first letter to the Corinthians after his salutation and words of thanksgiving (verses 1-9), he takes up the report that has come to him of contentions in the church at Corinth and appeals to them to be of one mind. I beseech you, brethren, through the name of our Lord Jesus," he wrote—a name that should be a reminder to them of their oneness as His disciples—"that ye all speak the same thing," that is, make up their differences, "and that there be no divisions among you." Paul is urging not unity, but harmony."

"If the litigious knew the taste
Of friendship with the Friend,
Think you that their life would waste
In quarrels without end?"

—Sir Edwin, Persian Poet.

But that ye be perfected together in the same mind and in the same judgment." Be perfected together! the Greek word is used in surgery for setting a bone, "and in Greek Politics for composing factions."

There were three parties in the Church at Corinth, Paul had learned from members of the household of Chloe, that were called by the name of the leader which each admired the most and regarded as the most important: the adherents of Paul, Loose of Apollos and those of Cephas (Peter). Those who ranged themselves under Paul's name were probably Gentile converts, and they claimed too great liberty, regarding legal lawful as indifferent, treating the scruples of others with disrespect, and causing great scandal by partaking of sacrificial meats. Those of Apollos' party were attracted by his eloquence, and were doubtless those who were inclined to think poorly of Paul's preaching. Those of Cephas, or Peter, were doubtless the Judaizers, determined opponents of Paul, who had come to Corinth with letters of recommendation and professed to be ministers of Christ, but were false prophets, they called in question Paul's apostleship, probably on the ground that he was not one of the original Twelve. Then there was the party "of Christ," which may have started as a protest against anyone's way man the leader of the church. They showed little Christian spirit in assuming superiority over others, and their use of the name of Christ as the watchword of a party must have seemed a dreadful thing to Paul.

Against the basis of his claim, whether personal knowledge of our Lord while on earth or presence that it best understood His mind, its aim and in making the name of Christ the rallying cry of a sectarian spirit and condemning Him into rivalry with Paul and Apollos and Peter."—James S. Riggs.

"Is Christ divided?" Paul questioned. Christ belonged to the whole church, not to one part of it. "Was Paul crucified for you? Or were ye baptized in the name of Paul?" As continued. It was unreasonable that they could put himself or any one else on the level with Christ.

Let no one forget that Paul and Apollos and Peter were disciples of Christ and that Christ Himself said "I pray for them, that they all may be one; as Thou, Father, art in Me, and I in Thee, that they may be one in us."

Clever Golfer Is Sightless

Leyden Caddy Leads Blind War Victim And Directs Putts

Since J. Aitken, of Cowgate, Nigeland, returned from the war, totally blind, he has been playing golf. And now he can make a perfect 150 yard drive and putt with amazing accuracy.

The sightless golfer perfects his game by tireless devotion. At every hour of the day he was out on the course practising, with the aid of his caddy, until he had perfected the system which overcomes his handicap.

The caddy has lost both his legs. He not only followed Aitken's drive and leads the golfer to them but is an invaluable aid in putting. He taps the metal casing of the hole and, guided by the sound, Aitken makes his putts.

YOUR HIDDEN TROUBLE

Incomplete elimination of body waste matter is a frequent cause that is generally overlooked. Nature provides the kidneys to filter poisonous matter from the system. Do not place abnormal strain on these delicate organs. Drink plenty of water. Get Doan's Pills. Doan's are recommended the world over. Insist on Doan's. Use only as directed. Refuse substitutes. Get Doan's Pills at any druggist.

DOAN'S PILLS

Fishing Fly Tuition Pays

Miss Doris Long, of Fort Worth, Texas, literally has picked and preserved her way through two years of college work at Texas Woman's College there. The enterprising student this year put up $21 cans of foodstuffs, 106 of them cucumber pickles, which she sold to pay her way through the school year.

THAT REPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile.

—Without Calomel

You are feeling grouchy, sour and sunk because your liver isn't producing the daily two pounds of liquid bile it should. Your bowels need a thorough cleansing to get rid of this bile. Then you feel like a new person.

Calomel is a dangerous drug. Don't take it. Ask for Dr. Edwards' Olive Tablets instead. Purely vegetable. Act on the liver like calomel but without the danger. Don't gripe or sicken. Just a wholesome cleansing that gets fresher than calomel. Mild, safe, sure. Take one or two nightly for a week. Watch the difference in how you feel and look. 15c and 30c per box.

LORD MACMILLAN PRAISES BANKERS OF DOMINION

Toronto, Ont.—A definite program embroidered to accelerate business betterment in Canada will, it is understood, be announced shortly by Prime Minister R. B. Bennett, the Globe said in an Ottawa despatch Mr Bennett is understood to have been encouraged by the recent distinctly improved trend in trade and federal revenues, and is now studying policies designed to produce a forward movement.

The despatch also reports there will be a conference with provincial authorities to see what can be done in the way of providing short-term and intermediate rural credits proposed by the Macmillan banking commission report.

Another feature of the government's program the story continues is the proposal to revivify the stagnant construction industry through out the Dominion, thus providing employment for thousands of artisans who have been out of work more than for two or three years. An effort will be made to bring about an increase in the prices of farm products, particularly livestock and butter

Fair Prices For Products Of The Farm

Prices That Would Be Fair To The Farmer, Distributor And Consumer

Ottawa, Ont.—The importance of securing fair prices for agricultural products was emphasized by W. J. Stevens, Minister of Trade and Commerce, in the course of an address to the eastern Ontario branch of the Canadian Society of Technical Agriculturists here.

Mr. Stevens suggested that technical agriculturists might draft a detailed policy for Canadian agriculture and periodically suggest minimum prices for agricultural products of number one quality. These prices should be fair to the farmer, the distributor and the consumer.

The minister said he hoped that the day for collectivized farming would never come in Canada. Canadian farmers were individualists, and he hoped that they could always remain so.

Heavy Succession Duties

Ontario To Receive $625,000 From Estate

Toronto, Ont.—Ontario treasury officials said a settlement had been reached between the government and the executors of the estate of the late Sir Clifford Sifton, by which the government will receive close to $625,000 in succession duties.

Certain matters in the estate and the duties to be paid have been in dispute for some time, with the result the government threatened to take action to recover.

Demand For Beef

Calgary, Alberta.—Big demand for grain fed beef steers from Canada will be forthcoming from the British market next spring, according to Jack Byers, manager of Western Stock Growers' Association, home from a trip to England.

Opium Cache Seized

Vancouver, B.C.—Opium valued at $1,100 is held by police and three Chinese are under arrest here charged under the Narcotic Drugs Act. Police state the Chinese came ashore from their ship, "City of Victoria," Tuesday morning and were negotiating to get the opium when they were arrested.

Word Is Appreciative

Ottawa, Ont.—Western Canada was deeply appreciative to eastern Canada for several consignments of relief supplies sent by private groups in Ontario and the maritime provinces, W. J. Lucka, Conservative member for Rosetown, Sask., stated here.

Sentence Is Affirmed

Washington.—Secretary for Commerce Roper said the public works administration had allotted $1,500,000 for building a seadrome, a quarter the regular size, 500 miles off the Atlantic coast, for experimental purposes.

Naval Programme

London, Eng.—Faced with the fact other naval powers in their building up or replacement programme are going in for cruisers of the most powerful type, the British government let it be known it had reluctantly decided to substitute two 9,000-ton cruisers and one 8,000-ton ship for the four smaller cruisers of the 1929 naval programme

"If our programme, as already approved, should be materially cut in new cruisers, would be definitely inferior to those being developed by other powers," pointed out Sir Bolton Eyres-Monsell, first lord of the admiralty, making the announcement in the House of Commons. "As the House is aware, however our fleet cruiser tonnage is limited by the London naval treaty.

"The result is we have been the lowest of a very serious disadvantage. If we proceeded with our existing programme, all cruisers we should have certain of the cruisers being built by other powers. If, on the other hand we were to build any cruisers after his programme, we must reduce our number from four to three. The first alternative could not be accepted."

The substitute 9,000-ton cruisers would have increased armament which presumably means they will have more numerous six inch guns than the smaller vessels they replace. Neither will have eight-inch guns, the cruiser maximum

Sir Bolton emphasized the British government did not intend to build up to a treaty strength if they wished. It was recalled, however, British naval strength in general U.S. programme was announced that it might be unfavorable to the progress of disarmament.

Royal Winter Fair

B.C. Seeding Youths To Compete In Judging Events

Victoria, B.C.—In connection with the Canadian council of boys' and girls' clubs, the British Columbia Department of Agriculture is sending a team of boys and girls to Vancouver to compete in the junior judging events of the Royal Winter Fair.

The boys, from Vernon district, constitute a poultry judging team, and two boys from Kamloops and two from the Fraser Valley, experienced calf clubs and swine clubs respectively.

The teams are being accompanied by Ian Cameron, district agriculturist, New Westminster, and leave for Toronto Thursday.

Prizes for poultry team from Grand Forks, B.C., was first place at Toronto.

Valued Painting Found

Toronto, Ont.—A portrait of the late Dr. Goldwin Smith, painted by John Russell, was found in the cellar of the Toronto Reform club here, its frame wrecked, the canvas punctured, and the painting badly marred by the ministrations of time. The artist valued the work at more than $7,000.

Appointment For Greenwood

London, Eng.—Lord Greenwood, astro of Whitby, Out., and better known in Canada perhaps as Sir Hamar Greenwood, has been appointed honorary Canadian member of the executive party. This office has been relinquished by Lord Ebbisham, owing to pressure of business and political engagements.

Probe Canadian Sale

Juneau, Alaska.—The Alaska Native Brotherhood, composed of Indians, asked in a resolution in annual convention that the southeastern Panhandle section of Alaska be sold to Canada. Speakers said the Dominion "takes care" of its Indians better "than Uncle Sam does."

French "Aces Cross Desert

Gao, French West Africa.—Twenty-five "planes of the French "Black Squadron," which are flying from France across Africa, arrived here from Biskra Five, the hourly fahara gasoline station. These ships remained there to help one which had motor trouble.

Trade Volume Shows Increase In October

Over Seven Million In Excess Of October Last Year

Ottawa, Ont.—Canada's trade volume continued its upward movement during October, according to the national revenue department the total volume of $161,943,153 being $7,582,333 in excess of the corresponding month a year ago The export balance of approximately $19,000,000 varied very little.

Eight of the 12 principal items of export showed increases and four dropped.

The most spectacular rise was in exports of unmanufactured nickel, which rose from $600,443 in October a year ago to $2,435,472 last month, an increase of 406 per cent.

Export of planks and boards was up for 208 per cent increase of 146 per cent in export of partially manufactured copper, 720 per cent. in newsprints and 143 per cent. in fish exports featured the upward surge. Wheat flour and woodpulp exports also showed marked increases.

Student Aviator Injured

Young Chinese Hurt In Accident At Saskatoon Aerodrome

Saskatoon, Sask.—Falling from a high altitude when his machine slipped into a tailspin, Tony Wong, 24-year-old Chinese student aviator suffered painful injuries in a 'plane crash near the Saskatoon aerodrome. The machine, owned by the Saskatoon Aero Club, was badly damaged. Wong was taken to hospital with injuries to his face and leg.

This was the first 'plane mishap since the Saskatoon Aero Club resumed operations two years ago, but it was the second accident on the Prairie flights.

States Idea Is Preposterous

Father Of Lieut. Baillie-Stewart Denies He Confessed Guilt

London, Eng.—The startling fact that Lieut. Norman Baillie-Stewart, condemned "prisoner in the Tower," had fully confessed his guilt shortly after his court-martial and sentence to five years' penal servitude under the Official Secrets Act, was revealed in the House of Commons.

Baillie-Stewart was incarcerated in the Tower of London several weeks before his conviction on seven out of 10 charges against him, when he was also removed from the army in which he was attached to the Seventh Highlanders.

Captain Alfred Duff-Cooper, secretary to the war office conveyed the information in answer to questions from John McGovern, Gery Labourite, who sought to reopen the case.

Colonel Wright, father of Lieut. Norman Baillie-Stewart, young Seventh Highlander now imprisoned in the Tower of London, told the Daily Mail the idea his son had confessed was "absolutely preposterous."

Statements made in the House of Commons by Alfred Duff Cooper that the young officer "had made a full confession of his guilt soon after his conviction," provoked a denial from another member of the House.

Suggest Market Plan For Farm Produce

Idea Proceeded By Secretary Of Ontario Growers' Marketing Council

London, Ont.—Radical ideas on the marketing of Canadian agricultural products were presented to local fruit and vegetable growers by C. W. Baxter, secretary of the Ontario Growers' Marketing Council.

Based on the British Agricultural Marketing Act, the scheme, proposed by the council and backed by the Ontario Department of Agriculture, calls for legislation which will empower a majority of organized growers of any one product to market that product and force minority growers to fall in line.

It is hoped to make the scheme applicable throughout the Dominion. Growers in British Columbia, Nova Scotia, New Brunswick and Quebec are understood to be strongly in favor of the plan.

Shipping Durum Wheat

Canadian Raisers Profit By North Dakota Embargo

Minneapolis, Minn.—Canadian raisers of durum wheat have taken advantage of W Fordham Johnson of British Columbia, one hour after the retiring premier. Dr Simon Fraser Tolm s, and officially tendered his resignation as minister of his cabinet

His cabinet is: Thomas Dufferin Pattullo, Prince Rupert, Premier, minister of the council and minister of railways.

George Mohr Weir, Vancouver, provincial secretary and minister of education.

Gordon McGregor Sloan, Vancouver, attorney-general.

Arthur Wellesley Gray, New Westminster, minister of lands.

John Hart, Victoria, minister of finance.

Kenneth Cattenach Macdonald, Vernon, minister of agriculture.

George Sharratt Pearson, Nanaimo, minister of mines and labor.

Frank Mitchell Macpherson, Cranbrook, minister of public works.

Of cabinet-making the premier said:

"The only thing more distressing than running a government is forming one, because of the personal equation. There is a wealth of material in the new legislature.

"Given capacity, I have deome t desirable all portions of the province should be represented. The new cabinet embraces both requirements"

Hearing Famous Landmark

London, Eng.—Westminster h spital, almost as famous a London landmark as either of its big neighbors, the Houses of Parliament and the Abbey, is to come down After 30 years' deliberation the governors, ch.ef of whom is the Prince of Wales, have decided to make a move to a site some way farther west, near to Lambeth Bridge.

RECOVERY PLAN FOR CANADA IS LIKELY PENDING

London, Eng.—"Nothing impressed Sir Charles Addis and myself more than the high character, sense of responsibility and integrity of the bankers of Canada," declared Lord Macmillan, chairman of the royal commission which recently investigated the Canadian banking system, when he spoke at a luncheon of the Canadian Chamber of Commerce in London, England. Sir Charles was his English colleague on the commission.

Lord Macmillan was one of the principal guests at the luncheon, others of the distinguished gathering including J. H. Thomas, secretary for the Dominions; Prince Arthur of Connaught, Hon. G. Howard Ferguson, Canadian High Commissioner, and the Lord Mayor of London.

Referring to the unofficial recommendation of the bank commission's report, urging establishment of a central bank, Lord Macmillan said that whether it was acted upon remained to be seen. It was not a political question, but one of purely economic and business policy

"I am frankly convinced Canada is on the threshold of a great development," he added.

Mr. Ferguson declared the results of the Ottawa pacts had so far been most encouraging.

"There is not a Canadian business man or a real citizen of the empire who is not seriously disturbed at the condition of the world today," declared Mr. Thomas.

"It is absurd," the minister as d, "to assume the countries of America or Europe are immune Insists herself from the events and happenings in Europe. It is equally absurd to assume that we can be blind to what is happening on the American continent.

"We all hope the policy the United States is following will succeed. Nobody can dogmatize but it is certain the actions of the United States will have their first reactions upon Canada, the Dominion today there was, to his personal knowledge, unbounded faith and confidence in the future, he added.

Pattullo Cabinet Sworn In

Wealth Of Material In New Legislature Makes Premier

Victoria, B.C.—The Liberal Government of Thomas Duffern Pattullo was sworn in by Lieutenant-Governor J W Fordham Johnson of British Columbia, one hour after the retiring premier. Dr Simon Fraser Tolm s, and officially tendered his resignation as minister of his cabinet

His cabinet is: Thomas Dufferin Pattullo, Prince Rupert, Premier, minister of the council and minister of railways.

George Mohr Weir, Vancouver, provincial secretary and minister of education.

Gordon McGregor Sloan, Vancouver, attorney-general.

Arthur Wellesley Gray, New Westminster, minister of lands.

John Hart, Victoria, minister of finance.

Kenneth Cattenach Macdonald, Vernon, minister of agriculture.

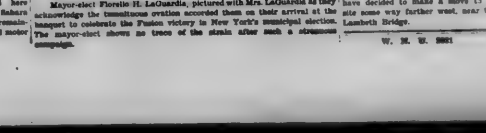
George Sharratt Pearson, Nanaimo, minister of mines and labor.

Frank Mitchell Macpherson, Cranbrook, minister of public works.

Of cabinet-making the premier said:

"The only thing more distressing than running a government is forming one, because of the personal equation. There is a wealth of material in the new legislature.

"Given capacity, I have deome t desirable all portions of the province should be represented. The new cabinet embraces both requirements"



NEW YORK'S NEW MAYOR AFTER VICTORY

Mayor-elect Fiorello H. LaGuardia, pictured with Mrs. LaGuardia as they acknowledge the tumultuous ovation accorded them on their arrival at the banquet to celebrate the Fusion victory in New York's municipal election. The mayor-elect shows no trace of the strain after such a strenuous campaign.

Looking For Investments

Depositors, Is Financial Want To Put Money To Work

Millions upon millions of pounds are lying idle in Great Britain waiting for a chance of investment. In the nine clearing banks of the country there are deposits of £1,810,000,000. And in the Bank of England the different banks have deposits of more than £110,000,000, which is some £20,000,000 more than a year ago.

Banks are wonder-ing what in the world to do with all the money. The people have not been investing lately, but now they are getting restless and watching for favorable opportunities to put their cash into projects of a sound nature. The celebrity with which the recent Canadian loan was snapped up is an instance of how quick the investors are in put their money at work.

How to get all these millions of pounds under circulation is a problem that is confronting the country. With business reported to be picking up in England, it is believed that investment opportunities will be found soon. Many institutions have been going along, planning to expand when the time was right. Now the time. Many of them are about ready to step out. There is plenty of money in Britain. All that is required is some way of getting it moving around more quickly.—London Globe Mail.

Tribute From Royal Scot

Engineer Placed Wreath on C.P.R. War Memorial in Montreal

Completing the transcontinental tour of the "Royal Scot," crack flyer of the London, Midland and Scottish Railway, Driver William Clarkson, in a splendid tribute to the employees of the Canadian Pacific Railway engaged them for long and remotely in the Great War, stepped from the footplate of his engine at Montreal and, dismounting, placed a wreath of red roses on the Canadian Pacific war memorial in Windsor Station.

He was accompanied in the tribute from the British railway employees by Fireman Arthur Anthony Matchett and by Mechanic C. C. Webb. The wreath was inscribed: "In grateful memory of the splendid services and great sacrifice of the employees of the Canadian Pacific who laid down their lives for king and country in the Great War; this wreath gratefully and solemnly offered by the employees of the London, Midland and Scottish Railway Armistice Day, November 11, 1933.

Mystery Solved

Mounted Police Believe They Have Found Remains Of Missing Trooper

Regal Canadian Mounted Police believe they have identified a human skull found on the shores of Great Slave Lake as that of Chester W. Graham, 32, trapper and native of Cadillac, Mich. Graham was of Canadian parentage.

About two years ago, the youthful trapper, who had spent several seasons in the Great Slave Lake district, had some dental work performed in Edmonton. The skull is now in Edmonton in the hope that some dentist may recognize the dental work.

In the meantime, a patrol is combing the northern coast line of Great Slave Lake for signs of Graham's remains. Police state that the trapper was an expert woodsman and they hold to the theory that his canoe was swamped. Part of the suit of the canoe has already been found, the R.C.M.P. revealed, and has been identified as belonging to Graham.

Aluminum Windows

Window panes of aluminum, so transparent that they may be used like glass are being introduced in Germany, A German manufacturer has produced a material from the metal which combines the qualities of aluminum and glass. It may be used for glass roofs, skylights and many household articles. It eliminates the yellow rays of the sun.

Why do her people subject to Dominion Plumbering?

His Wife: There are seven in her family and his car only holds five.

Our picture was taken at the Commercial Motor Transport Exhibition at Olympia, London, known as "The Ideal Home Exhibition," and shows the streamlined forward control transport bus. It is two years since this show was held and during the interval public services have improved and all recognition. In many respects mechanical and coachwork refinements have gone a stage further than motor cars.

Crew Will Be Absent

Admiral Byrd's Furious Dog Team Defies Regulations

Admiral Richard E. Byrd, with 5 men of 70 men, improved scientific equipment and a large store of supplies, left from Boston for the Antarctic.

There was one thing missing—Admiral Byrd's dog, Igloo, one of the famous dogs of Amundsen. Igloo died seven months ago and the expedition has departed without benefit of a mascot.

"I have not replaced Igloo," Admiral Byrd said prior to sailing. "It can't be done, as we are taking this trip without dogs. I could not, even if I wanted to, have Igloo with me. There was never any doubt about it. At least I always was sure on my own end, too.

"I don't mean that we won't do as well without that good look sign, but we'll miss Igloo, at least the 70 of us who went on our last expedition will. There isn't much to do with idle hands in the cold Antarctic, you know, and Igloo was a sort of companion who tied us up with civilization somehow.

"There isn't much to do there, outside of working hours. We play poker and bridge. One bridge game lasted six months. We played poker for cigarettes. And we read. Igloo was there to lend touch to the cutting and we'll miss him."

Wheat Producing Countries

Exceeding Russia, United States Had Largest Crop Last Year

Excluding Russia, the five largest wheat-producing countries in 1932 were: United States, 756,481,000 bushels; Canada, 420,514,000 bushels; India, 378,137,000 bushels; Argentina, Italy, 276,000 bushels. Production of wheat in Canada for 1932 was: Prince Edward Island, 621,000 bushels; Nova Scotia, 71,000 bushels; New Brunswick, 353,000 bushels; Quebec, 982,000 bushels; Ontario, 17,622,000 bushels; Manitoba, 43,000,000 bushels; Saskatchewan, 282,000,000 bushels; Alberta, 364,000,000 bushels; British Columbia, 1,062,000 bushels.

Gems Rested Breath

The Montreal Children's Intelligence says it would seem that bouquets have gone a long way from the ancient fame when people sprinkling did not use up so much of the flowers. Bouquets were once real social events, with the play of wit and flash of brain, but an hide-bound fashion-plate on a banquet can by any imaginative stretch be placed in that class, where the great majority of the customers have to listen to a series of speeches commencing ——

Aristocrat (at party) — "Speaking of old families, one of my ancestors was present at the signing of the Ten Commandments."

Modern Cynic — "And one of mine as present at the signing of the Ten Commandments."

Rebate Buys Art Treasure

A Russian art treasure 1,000 years old has just been purchased for the nation by the National Art Collection Fund. It consists of a beautiful ikon (very similar to holy water bucket), carved with scenes from the Passion of Christ, and bears an inscription with the name of the Emperor Otho, in whose honor the state was made. The price paid to the Dutch dealer, who originally bought it out of the Hermitage collection was £7,000.

The ikon is regarded by the museum authorities as one of their rarest possessions. Only seven examples in ivory are greatly prized, as only four or five of these are known to have survived. There is one in Milan cathedral, but nothing like that now acquired is to be found in any museum. It is known as the Sarlovsky Situla and had been in several private collections before Czar Alexander III acquired it in 1880.

The 11 scenes carved with great delicacy all round this ornamental piece include Christ washing the Disciples' Feet," "The Betrayal," "Judas accepting his 30 pieces of silver," and "The Crucifixion."

Many Gifts From Admirers

Colonel Lindbergh, now in Europe, is said to have received more gifts from admirers than any other private citizen in history. They occupy a special wing in a museum at St. Louis, and have been visited by the home of people. They range from tooth-picks and boxing gloves to priceless relics and a priceless manuscript of the Koran.

It takes two to make a quarrel, but no one makes it unanimous.

Treating Insomnia Patients

Night Clinic For Sleepless People Established In Germany

A "night clinic for sleepless people" has been established in Germany, by Manfred Sonnenberger.

It is the only institute of its kind in Germany, and London people how to sleep properly.

Dr. Sonnenberger treats his patients with psycho-therapeutic methods, discarding drugs altogether. He found that that belong to people, counting their grists and sorrows and making them rend a few chapters of the Bible had a more reassuring and quieting influence than the administration of soporifics.

Massaging the neck and temples has proved very effective, too, but the treatment worn on the patient's mind rather than the body.

After a few "trial nights" the patient is sent home again and if by this time he has not learned to sleep he has to spend a few more nights at the "sleeping sanitarium."

Dr. Sonnenberger claims success in many so-called hopeless cases, and his night clinic is much frequented.

Was Gat Anyway

In a village cricket match the local batsman was batting, when a ball hit him on the head. The wicket-keeper caught the ball.

"How's that?" he yelled.

"Out!" said the umpire.

"But it hit me on the head!" protested the batsman.

"I don't know where it hit you" retorted the batsman.

tested the batsman.

tested the umpire, "but I know the sound of wood, so out you go!"

Harper's magazine is an proud of being banned in Germany that it's advertising the fact.

H. Salvador may establish a government bank.

The Rights Of Women

Britain Following Canada's Lead In Respect To Changing Nationality Through Marriage

Britain is following Canada s lead in legislation for the women without a country Under the present British law when for the woman without a country she takes his nationality But in the case of some countries, the United States particularly, the new nationality and power acquired by marriage and a woman having lost her British nationality by marriage to an alien without a country

The Home Minister, The Home Secretary moved second reading of a government Bill in the House of Commons the measure permitting British Subjects to retain their British nationality on marriage. Canada had already passed similar legislation Sir Hilton Young the bill was of limited scope but he heralded the difficulty of securing agreement between all parts of the Empire on common action of any more radical nature Canada, however, had already acted in anticipation of other members of the British Commonwealth.

The new bill immediately came under the fire the Labor benches Thomas Attlee, former Postmaster-General, moved rejection on the ground it failed to give full effect to the policy of the British government at the 1931 League Assembly in favor of removal of all disabilities of married women.

It was a very small measure, he said, it would remove some anomalies but not the main grievance.

It is the only institute of its kind in Germany, and London people how to sleep properly.

Fort Saskatchewan Record

VOL. 13 No. [illegible] FORT SASKATCHEWAN, ALBERTA WEDNESDAY, NOV. 23rd, 1932 $1.50 PER YEAR IN ADVANCE

Committee Selects Name 'Old Mountie Park' For Fort Saskatchewan's New Park

FLASH! The judges report on the Park name contest is just to hand to our paper was on the press so we held it over to get the winning name in. This report will be published in full next week. In the meantime we congratulate Mr. Dave Gunn who suggested the winning name of 'Old Mountie Park'.

Here is the winner of the prize of $15.00, having turned in his suggestion to James, Graham & O'Brien on Can. 14th, 1932 at 4 p.m. ticket No. 348.

The naming committee comprising of C. L. Gibbs, M.L.A., Frank Pike, Manager of the Bank of Montreal and A. W. Maddox, City Engineer, of Edmonton, have recommended to the committee here responsible for bringing about the contest, that Fort Saskatchewan's new Park be called "Mounty Park" in honor of the R. N.W.M. Police who came to the Fort about sixty years ago and established a fort here.

This name was selected by the judges after looking over many hundreds of tickets sent in, among which were "Depression Park", "Prosperity Park" and "Fort Royal Park".

The contest was held during the months of September and October with a large number of people contributing suitable names for the park.

During the past two months improvements have gone steadily forward at the Park and at present time all undergrowth has been cleared away, gates erected and paths constructed. A large number of fence posts have been donated, these have been put in and plans will be completed in the spring.

CLOSED SEASON FOR FISH

Closed season is now in effect for both whitefish in Alberta lakes, and for angling in the various rivers and streams of the province, and information of the regulations in this connection are being firmly dealt with, declared Hon. R. G. Reid, minister of lands and mines.

Several convictions have already been recorded. "It is of first importance that the restrictions of such infractions should be emphasized," said Mr. Reid. "There is a very definite reason for a closed season, and that is to protect the fish during the spawning season, and consequently to insure a continuance of the supplies of the fish in our lakes and streams. Were there no closed season, the supplies would very soon be depleted."

Noted as a wit, the late Sidney Boyd-Carpenter while addressing a public meeting was interrupted by a heckler who asked him if he really believed that the whale swallowed Jonah. He replied that if he vouched Heaven he would try and find out. "Ah, but suppose Jonah is not there" said the questioner. "Then you will have to ask him yourself," came the rejoinder.

The Fort Senior Hockey Club are holding their annual dance next Monday in the Badminton Hall. The program includes all the late new hits with a sprinkling of old time numbers.

It is not too late to order Personal Greeting Cards! The Record have a splendid range of samples to choose from.

Potato blight was the cause of the great potato famine in Ireland in 1846-47 when over 20,000 inhabitants perished from starvation.

Sir David Murray, president of the Royal Academy, London, Eng., died 1907, died Nov. 4. He was 84.

MOTOR ASS. ASKS MOTORISTS TO SIGN PETITION

The Alberta Motor Association having distributed copies of a petition in various business places in town and are asking the motorists for their support. The text of the petition is, in part, as follows: "We petition to declare the auto license year to be from April 1st to March 31st, instead of from January 1st to December 31st as at present.

By changing the dates, it is felt that many more cars would be in use during the first months of the year and it is suggested that the rebate usually given after certain periods could be abolished.

HEBEKAH CARD PARTY HELD

At the Princess Rebekah card party held in the Union Hall Monday evening, eighteen tables of bridge were in play. One of the largest crowds in years turned out, making this event a very successful and enjoyable affair.

Tasty refreshments were served at 11:30, after which the prize winners were announced: Mrs. Williston was the lucky first; Mr. Arnold Mast, guests first; Mrs. F. Baker, ladies consolation; Mr. Ben Pollard, guests consolation.

Large Number Enjoys Combination Bridge Party

A very successful combination bridge party at four different homes kindly lent for the occasion was held on Wednesday evening 16th inst. Mrs. Reed at the Rectory assisted by Mrs. Yea Hilland, Mrs. Wagner and Mrs. Alec Smith, Mrs. Ritchie assisted by Mrs. Wicks and Mrs. E. Graham, Mrs. W. A. Graham assisted by Mrs. Carscadden and Mrs. Mollison, Mrs. Hamer assisted by Mrs. Rudd, Mrs. Roberts and Mrs. Hallam.

Several members score were made at each home, the "Contract" being the expected, the higher. Everybody enjoyed themselves.

The high scores were at Mrs. Reed's, 1st lady, Mrs. Alec Smith, 1st Gents, Mr. Collins, at Mrs. Ritchie's, 1st lady, Mrs. Davis, 1st guest, Mr. Hatten, at Mrs. W. A. Graham's, 1st lady, Mrs. Butler at Mrs. Hamer's, Mrs. Lasher and Mrs. Grover.

Excellent refreshments served at the end, with social intercourse following put a fitting cap on the whole affair, and some guests hoped for a frequent repetition.

CHILLED BEEF SHIPPED

An interesting angle on new trends in live stock marketing is given by the announcement that the first shipment of chilled beef to leave Western Canada for the British market, went forward from Winnipeg last week. This shipment was a substantial one, and its reception will be watched with interest.

Josephburg News

The ladies aid meeting will be held at the home of Rev. and Mrs. A. Wiembrecht on Dec. 7th at 2:30 p.m. All ladies are cordially invited.

A shower was given in honor of Emma Hennig at the home of A. Rippel's on Thursday, Nov. 23rd. Many beautiful gifts were received. The evening was spent in dancing and at midnight dainty refreshments were served.

Mr. and Mrs. John Mohr of Vegreville spent several days with relatives here.

Mr. Merkle of Vegreville visited with relatives a few days.

Fort Curling Club Hold Successful Dance

The annual Curling Club dance held in the Simmons Hall last Friday evening was a successful affair in spite of the unfavorable weather.

Old-time and modern dances were highly enjoyed by the dancers.

At mid-night refreshments were served by the members of the Club, after which dancing was again resumed until a late hour.

Having more cakes than were needed for refreshments, these were auctioned off by Mr. J. D. McLean and were sold readily.

The Phipson's Vice Orchestra supplied the music for dancing.

WEDDING

Pearce—Smith

At the home of the bride's parents, Mr. and Mrs. F. C. Smith of Lamont, on Nov. 21st, Miss Annie Bell, their only daughter, was married to Mr. Ray L. Pearce of Lamont. The ceremony was performed by Rev. E. J Hodgins of Fort Saskatchewan, assisted by Rev. N. D. McLeod.

The bride was attended by her cousin, Miss Constance Smith, and Mrs. Ruby Larson, while Mr. Fred Larson supported the groom. Mrs. B. Shearn played the wedding march from Lohengrin, and accompanied Miss C. Smith, who effectively sang "I love you, truly" during the signing of the register.

Mrs. R. E. Harrison and Mrs. Wilbur Brown presided at the tea table, assisted by the Misses Evelyn Pearce, Jessie Archer, Alice Bell and Dorothy Stone.

Out-of-town guests included Rev. and Mrs. E. J. Hodgins, Mr. and Mrs. Steve Nichol of Andrew, and Mr. and Mrs. Fred Jackson of Clover Bar.

Both young people belong to prominent families, and many valuable gifts testified to their personal popularity.

They plan to make their home in Lamont.

Senior Hockey Dance

BROADCASTS OF GREAT IMPORTANCE TO SCHOOL CHILDREN

The Department of Extension of the University of Alberta is arranging a one-hour broadcast for teachers and children, interested in School Festival week. These broadcasts will be on Saturday mornings from 10:30 to 11:30 a.m. commencing on Saturday, December 3rd and will continue until Feb. 17th, omitting the Saturday during the Christmas holidays—Dec. 23rd and 30th, making ten broadcasts in all.

The first half-hour of each Saturday will be devoted to singing, under the direction of Mr Vernon Barford. The second half of the program will be used by Mrs. N. W. Haynes for dramatization.

This series of broadcasts should be of particular interest to those intending taking part in the annual school festival.

Canadian fish and shellfish are builders of body and health. The wise family has them frequently on the table.

Fish foods are valuable sources of vitamins, and that's one reason why they are excellent fare for growing children as well as for grown-ups.

Jones, Graham & O'Brien's

Will Inflation Benefit?

One of the many results flowing out of the Great War was the development of a narrow nationalism which found expression in many ways and has had a profound effect upon not only national policies but in forms and methods of government. Out of the Great War grew an economic warfare more intense than in the years that preceded that titanic struggle. That economic war led to the use of tariffs, quotas, and other trade restrictions on a scale hitherto unknown. All nations engaged in it, some reluctantly, but whereas they were forced into it by the actions of other nations.

As this economic warfare progressed it inevitably led to still greater war,—a war of contempt. The value of the currency of one nation rose or fell in relation to the value of the currencies of other nations, and as it rose or fell it directly affected the trade of the nations as well as the whole financial structure of all, and the misery of one group of people to meet the obligations of another group.

But always in war, no matter the nature of the struggle, one party or country always endeavours to enable the other. It is an ill-peculiar warfare: it is true in one world war. It is equally true in a war of inflation. When one country embarks upon a policy of inflation, even though it be primarily as a matter of domestic concern alone, it immediately affects every other country concerned. In other words, if any country proceeds with a policy of inflation, and personal gain in it, sooner or later other countries will follow suit, and, in following suit, will, of course, seek to go closer considerable "some better."

Whatever may be said in favor of a degree of inflation on the one hand, or deflation on the other, to meet changing economic conditions,—and a country engaging in either the one policy or the other always proceeds on the assumption that great care will be exercised, and that the policy will only continue for a short period of time,—the net result invariably is that it finally is reversed. It getting out of hand, the net result invariably is that it does get out of control, and the final stage of affairs is made worse rather than improved, and the process of financial recovery made more difficult and of longer duration, with losses made heavier.

A policy of inflation is being applied in the United States at the present time. As always, President Roosevelt is anxious to keep it within bounds, but there are great and powerful influences at work to prevent it for beyond what the President desires and has in mind. Can the situation be controlled? When Congress re-assembles, indications are not lacking that great pressure will be applied to put the printing presses to work turning out billions of paper money in addition to the present inflationary policy of decreasing the gold value of the dollar. And Congress is still supreme in the United States. It conferred very extensive emergency powers upon the President, giving him almost dictatorial powers. But it can withdraw those powers, or it can bestow upon him further powers if it thinks necessary. It is not unlikely that it will do so much further than the President and his advisers deem it wise to go.

And Canada cannot be indifferent to or prove immune from the effects of United States policy, whatever it may be. Our trade and other relations ships are too closely interwoven, and our financial undertakings, both public and private, so entwined that Canada will be directly affected. Whether we like it or not, Canadian policy must, of necessity, be governed to some extent, —possibly a large extent,—by United States policy in this matter.

Inflation and deflation, and their consequences, may be traced throughout the course of history, dating back to the years B.C., and the lessons of history teach us that inflation appears to have generally, if indeed, not always, ended in disaster. There was at first always the intention of control, but the movement usually ended by breaking all bounds. Increased purchasing power through inflation is only temporary; higher prices stimulate overproduction and check consumption; new debts appear, and a return to stability is increasingly difficult.

The depression beginning in 1929 was preceded by wild speculation, encouraged and made possible by an expansion of credit, but encouraged and stimulated by instalment selling on a scale never before witnessed. Many were the warnings issued at the time this wholesale expansion of credit, and unprecedented instalment buying, was in progress. It could be seen by anyone who willing to pause and consider that such instalment buying,—all based on credit, could not go on indefinitely; that a point must be reached when and where millions of individuals committed to instalment payments would reach the limit of their purchasing power, having used up all their credit and pledged all their resources. The saturation point was reached late in 1929, and the crash followed.

People had bought land, houses, motor cars, radios, equipment of all kinds, and many luxuries all on the promise to pay, monthly, monthly, yearly instalments. The time came when they could make no more owners and as production stopped, and with its stoppage, millions were thrown out of employment and were thus placed in a position where they could not meet their debt-owned instalment payments. Prices fell, and everybody sustained losses.

Inflation might temporarily raise prices, just as speculation and instalment buying,—which, after all, was inflation pure and simple,—did raise prices. But one form of inflation can not overcome the evils caused by another form of inflation.

Russia Builds Giant Plane

A giant airplane which can carry 120 passengers in addition to the pilots and crew has been built at Kharkov in Soviet Russia. The great aircraft is known as the K.-7, and has 16 compartments fitted with four sleeping berths in each. For day flying each berth can be converted into two seats. There is also a cabin with seats and tables, and a promenade in the middle of each wing.

Prince George Was Shot

The Prince of Wales and Prince George were present at a dinner in London recently in celebration of the passing of the Factory Act. Prince George, in his capacity as a Home Office Inspector, acted as host to his brother.

Dumbbas: Scotland, recently celebrated the 700th anniversary of the coming of the Bishop Clement.

There were just as many carriages driven thirty years ago, but the horses and men were more.

Woman's love for ribbons may be accredited to her having originated from a rib.

A Tired, Worn Out Woman Can't Make a Happy Home

There is no happiness in the home when the mother is sad and tired. If you are worn out, nervous and irritable, have dizzy spells, pains in the back, headaches, lose sleep, can't eat, and get up in the morning feeling as tired as you went to bed, and is downhill and discouraged,

Milburn's H. & N. Pills will soon convince you. It is not necessary to suffer, as they build up the nervous system and bring back the former health and vigor.

Currency Of Albania Is Very Competitive

Smallest Nation In Balkans Uses Gold Of Other Nations

The tiny kingdom of Albania, smallest in the Balkans, is the only country in that region which still pays its officials in gold, and where one may obtain gold in exchange for paper.

A general gage of Albanian money was established in Italy the other day, when the Albanian Bishop Vissarion, representing his nation at the International conference for the union of International Friendship through the churches, calmly pulled a fat purse from under his cassock and paid his hotel and other expenses in hard yellow coin.

His Grace explained that Albania, having no national currency of its own, is obliged to pay the officials on the basis of the gold franc, and that pre-war phenomenon is rare today, Bartish sovereigns, Turkish piastres, Italian lire, and Austrian florins are also legal tender, and Albanian subjects have gone back to the precious metal itself.

In all other Balkan countries the currencies have confounded all gold, replacing it by depreciable local paper currency. Heavy penalties are imposed on those found exporting gold, or taking foreign exchange out beyond the borders.

THREE RLLS ROUTED

Health Tip From Woman Of 67

"For headache—constipation—rheumatism—I use Kruschen. And sure I have used it, I am in very much better health. In fact, I hardly ever take with those bad headaches and that gnawing feeling. Kruschen has helped me beyond words. I am 67 and feel young." This writes Mrs M. G.

It is reasonable to ask why it is that headache, constipation, and rheumatism all yield so completely to Kruschen? What is the secret of Kruschen's effectiveness against these different complaints? The secret is an open one. It is revealed in the analysis on the bottle—for physicians and everyone else to see for what natural salts. That is the secret. Each of these six salts has its action of its own. Where one cannot penetrate another can—and does. Stimulate, your kidneys and digestive tract are all benefited and toned up to a top-notch condition of efficiency.

New Kind Of Glue

Resin Made In Germany Show That It Neither Splinters, Nor Breaks

Glues which neither splinters nor breaks has been discovered in Germany. In tests made recently three adults used a long narrow sheet as a seesaw. The glue used in sticking another to that of highly flexible steel. A heavy steel ball dropped from a height of 10 feet left no impression. The material is produced by a special heating process. Railway and automobile officials are interested in the product.

Gas In The Stomach

One in the stomach, belching, sour water breath, pain after eating, etc., are symptoms of indigestion. Now if you will take a little Bismuted Magnesia in water after you eat. The ordinary Bismuted Magnesia, which you can get at any drug store will correct acid stomach and stop acid indigestion immediately. Try it and see.

A Link With The Past

London Free Press: St. Lawrence Hall, a famous Montreal hotel where Sir John A. Macdonald had his headquarters, is being torn down. Like the old Queen's hotel in Toronto and the Tecumseh in London, St. Lawrence Hall was a hostelry that met commodious with Canada's early history.

Teacher, introducing lesson on Holman: "What statue in London has a tilted eye?"

Bright Lad: "Cleopatra's Needle."

How to Stop a Cold

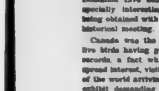
Quick as You Caught It

Almost Instant Relief in This Way

The simple method pictured above is the way doctors throughout the world now treat colds.

It is recognized as the QUICK-EST, safest, surest way to treat a cold. For it will check an ordinary cold almost as fast as you can say it.

Ask your doctor about this. And when you buy, see that you get Aspirin Tablets. Aspirin is the trademark of The Bayer Company, Limited, and the name Bayer in the form of a cross is on each tablet that you take. Then almost instantly And this work almost instantly when you take them. And for a gargle, Aspirin Tablets dissolve so completely, they leave no irritating particles to get a box of 12 tablets or bottle of 24 or 100 at any druggists.



ASPIRIN TABLETS ARE MADE IN CANADA.

New Wrinkle-Proof Fabric

No End To Possibilities Of Discovery Made By Swedish Inventor

A pair of men's trousers that hold their creases for six months or longer, and a complete suit of clothes which can be stretched over the body of the body and then snapped back, were demonstrated in New York by their inventor, Percy Andersson.

"The suit I have on," said Andersson, pulling the buttoned vest out and letting it fly back with a pop, "hasn't been pressed since last spring.

"I had an entire wardrobe made up of the new process fabrics. I made a trip to Europe. Whenever I unpacked, I simply took out my suits, shook them and they were ready to wear. Not a single wrinkle, and the creases stood up in all their pristine splendor."

The inventor pulled up a resilient leg and demonstrated his socks. The tops, while maintaining an ordinary, innocent appearance, were flexible, and there was no need for garters.

Andersson, who was born in the Lapmarken, Sweden, is a textile chemist and has been in the textile industry all his life, explained that there is no end of the possibilities of his discovery. Clothing for men, women and children already is being manufactured from "rubber" fabrics. The yarn is thread looks like yarn, only of thread, as does its fabric. Yet in contains latrum, a newly-developed rubber form, and stretches surprisingly.

Andersson brought out a sample of satin and samples of silk, cotton and wool. He pointed out that the amount of latrum in each fabric can be varied at will. The latrum is treated in such a manner that washing as well as pressing will not affect it. Further more, the soap will never leave the fabric.

Belgium Closing Four Prisons

Crime Seems To Have Fallen Off Since War

Crime has fallen off to such an extent in Belgium since the armistice that four of the thirty-one prisons are to be closed. Prison officials attribute this state of affairs to the leniency of the courts and the operation of the first-offenders act. They say that the prisoners who formerly went to prison now go to the reformatory, which is not listed as a prison.

Low Water In St. Lawrence

Formation of a commission to investigate the causes of low water levels in the St. Lawrence ship channel and the port of Montreal and to recommend remedial measures for low water which prevailed this season was urged on the Dominion government by J. W. Nicoll, president, at a meeting of the Shipping Federation of Canada.

Railway Representation

Member Of Irish Dail Elevens Will Not Take Pay

Frank MacDermot a descendant of King Roderic O'Conner, refuses any remuneration for acting as a member of the Dail Eireann, the parliament of the Irish Free State. When the department of finance insisted on presenting the $150 a month salary he earns, it argued, the amount was really an allowance toward expenses, MacDermott said he would buy livestock with it, and keep it in the name of Roscommon County Council, and if lucky the winnings with be used to benefit the poorer farmers either through lower taxes or welfare projects.

Few Kangaroos In Australia

The kangaroo business in Australia is not what it used to be, F. White, of New South Wales, says. Ordinary people seldom see the animals. The kangaroo is one of many menace animals in Australia, according to White. They may be used only for meat and occasionally for hides, but are seen only in the interior regions.

Fame Of Canadian Poultry Once More Demonstrated At World's Congress Held In Rome

Canada's world-wide fame for efficiency and the high quality of poultry has once more been fully demonstrated. With the return from the Fifth World's Poultry Congress, which was held at Rome, Italy, F. C. Elford, Dominion Poultry Husbandman, official co-delegate with W. A. Brown, Chief of the Poultry Division, Dominion Live Stock Branch, some specially interesting information is being obtained with regard to this historical meeting.

Canada was the only exhibitor of live birds having government official records, a fact which created widespread interest, visitors from all parts of the world arriving at the Congress exhibit demanding to be shown the birds with the Government certificates.

Canada was represented at a small but attractive exhibit and consisted of by a number of registered R.O.P. and exhibition bred birds. When the live bird exhibit was being prepared, and because the birds were first promised by the Canadian National Poultry Record Association, it was considered better housed and fed in Ottawa, and so sent there. Mr. Elford and Mr. Brown then proceeded to Montreal, and the names were entered in the Government certificates.

Funds Are Lacking

Proposed Establishment Of Central Library Agency Off For Present

The Carnegie Corporation of New York stands ready to establish a central library agency for Canada, at a cost of more than $250,000 for the first five years, if guarantees are forthcoming that the project will receive adequate financial support from Canada at the end of the five-year period.

So stated John Ridington Tilsley, chief of the Canadian librarian who returned from a conference in Chicago with Dr Frederick Keppel, president of the Carnegie Corporation.

The scheme was temporarily abandoned, Mr. Ridington said when he could give no assurance that either the federal government or provincial governments would continue the grants. Discussions will be resumed next year after further investigation in Canada.

The agency would be established in Ottawa and "would act as a focal point for all library activities in the Dominion, serve as a liaison between the Canadian Government and a trio to the British Consul General in Rome.

There were also the two official delegates already mentioned, and in addition many Canadians attended in their private capacity. The educational exhibit told the story of Canada's national breeding policy; illustrations showing poultry instruction in schools and with boys' and girls' clubs, farmers' fleets, the interior of a poultry laboratory, poultry culling and selection, R.O.P. flocks, laying contests and egg-testing, trap-nesting, culling, grading, etc. The attractiveness and the completeness of the story made the Canadian exhibit a very popular one.

One remarkable point about the Congress was that it marked the reopening of the Market of Trajan after a period of 2,000 years. During all that time the market-place had been lying buried amongst the ancient ruins of Rome, and twenty centuries ago had been the popular produce market where the Roman citizens purchased their eggs and poultry from the farmers. These ruins have been dug out and repaired and, appropriately enough, have reopened as a laboratory, poultry culling and selection, R.O.P. flocks, laying contests and egg-testing, trap-nesting, culling, grading, etc. The attractiveness and the completeness of the story made the Canadian exhibit a very popular one.

A Successful Tour

Nearly 60,000 People Attend Forestry Car Lectures Last Season

Nearly 60,000 people attended the lectures on the Canadian Forestry Association Tree Planting Car during the past season, according to the report of Alan B. Brown.

The car left Regina March 20, and travelled for four months over the C.N.R. lines and then for three months over the C.P.R. lines.

It visited 126 centres, at which 288 lectures were given. Often 900 people crowded into the car to hear the lecture and see the movies scenes from every province in the Dominion, and beautifully colored slides from actual photographs taken in Saskatchewan, showing home beautification.

One hour of actual lecturing on tree planting and its benefits, particularly for shelter belts, home, street and public building beautification as well as for churches, cemeteries was given Question periods followed each lecture. Invariably 30 or more especially interested listeners took part in the discussions which followed.

Civic authorities were assisted with plans for civic tree planting and beautification. Similar assistance was given to many farmers whose grounds were visited by the car staff.

Four hundred and sixty letters of inquiry for information were answered in addition to personal contacts. School authorities and teachers declared holidays that children might attend special question period added to children's lectures for benefit of older pupils. Hints and assistance given on planting of trees and shrubs on school grounds.

Many orchards were found spring-ing up as a result of protection afforded by shelter belts which in turn had been injured by earlier busy ing of the forestry car.

The car continued to Regina, October 28.

Mileage covered was 2,917 miles.

Express Thanks

Saskatchewan Wheat Pool Delegation Grateful For Assistance Given

On behalf of their farmer organization, the Saskatchewan Wheat Pool, seven Wheat Pool at Regina, expressed deep appreciation to the people Inland Canada province when have given assistance to the drouth-stricken areas of Southern Saskatchewan A meeting of the Board of Trade of Regina from the affected areas was adopted unanimously.

As it was pointed out, the other provinces of Canada, from coast to coast, had come to the relief of these parts of people by successive crop failures, by supplying feed with cars of fruit vegetables, clothing, etc. pointing what this help meant to Southern Saskatchewan people in a period of great distress, the delegates wished to make known how keenly they appreciated the action of their fellow-countrymen.

Jones: "What do you chave with in the house evening?"

Smith (saltedly): "My wife's business, cutter."

Proposal To Establish An Educational Foundation As Memorial To Farm Leader

By an unanimous vote, delegates at the Saskatchewan Wheat Pool, at their annual meeting in Regina, approved the establishment of an educational foundation probably to include all three pension provinces as a memorial to the late A. J. McPhail. Mr McPhail was first president of the organization and of Canadian Co-Operative Wheat Producers, Limited.

Accordingly, steps will be taken immediately to secure contributions to a fund to be known as the McPhail Memorial Foundation.

The objective of the foundation would be by means of an educational programme to perpetuate the memory of an outstanding Canadian. This educational programme would be designed to serve: (1) The development of a fuller appreciation of the principles of co-operative effort; (2) A higher standard of living for the farm homes of western Canada, with a greater share in the comforts of civilization and an opportunity to live a fuller, freer, and happier life; (3) The building up of a wider recognition of the finest quality of citizenship as between rural and urban dwellers, to the end that equality of opportunity may be forthcoming to all classes of citizens.

The other provincial pools have indicated they are prepared to co-operate in the establishment of the foundation.

The committee suggested that the educational activities of the McPhail foundation might include—many contests in schools, promotion of study groups among the agricultural population, award of scholarships and bursaries in western Canadian universities; placing of suitable reading material in public school libraries of the west; junior and senior experimental and research work in agriculture.

Hunted Cattle For Hides

For 200 Years Argentine Ranchers Cared Little For The Meat

For two centuries, says the National Geographic Magazine, man's chief occupation among the gauchos, or cattle ranchers of the Argentine pampa was the pursuit of wild cattle. Stupendous numbers were slain merely for hides and tallow, as was true in California when I was now it and Montana when "Two Years Before the Mast," Besides the many hides sent to Spain and smuggled out to other lands, countless thousands were used on the pampa for making clothing, huts, tents, sleds and even fences.

Cattle were so cheap that a rider would not use money to cut meat enough for his lunch One Argentine historian says soldiers used to shoot a beef so that they might bathe their horse to its hocks, there being no fuel.

And it was easy to capture them. A band of gauchos simply surrounded the herd. Then each man, armed with a lasso-handled pick, or hoose, with a sharp blade like a half moon fastened to a long animals as possible before the herd broke away. This ham-stringing, or gauchoing destroyed the value of the fallen animals, and abandoned the meat to carrion birds and wild dogs.

Hides took the place of money. When, by the treaty of Utrecht, England obtained the sole right to import Negro slaves into the New World, she stipulated that the hides should be paid for with hides and tallow.

From hunting cattle mostly for their hides, the folk of the pampa returned by 1580 to the export of dried beef. They went to feed slaves in the West Indies, where their labor was then building up the tobacco and sugar industries. "Jerky" (salt beef) is still made by the ton in the most dry-ing shed on the big estancias, and Argentine beef keeps ranks of it, like hogsheads, are piled in the open air.

Cash Fell Cranbrook Island

No One Hurt In Cliff Slide On English Coast

A new island has appeared in the English Channel between Dover and Deal, when thousands of tons of chalk at Larkinlade Point parted away from the cliff and hurtled into the sea with a great roar.

Collapse of the cliff was the greatest on the English coast for many years. At high tide the chalk forms an island 200 feet from the mainland. No one was hurt in the slide.

Machinery for making clothes has been developed which is said to enable three men to do the work that ordinarily took 150.

Cow At Banquet

Brampton Honors Jersey Cow Who Broke World's Record

"Brampton Bantius," a Jersey who has just broken the world's record for butter fat production, was honored in a single year, was guest of honor at a banquet held at Brampton Col. Dow owner of Mr. Bull, started to th...ak of the ladies of the Sunbeam Women's institute for providing the repast.

"Mooo—" interrupted "Brampton Bantius." Mr Bull didn't finish his speech

A half-pint of milk in bottles, part of the enormous output of 20,168 pounds of milk which "Bantius" produced in a 365 days' test, was given to each guest.

Among the guests was Hon Robert Weir, Federal Minister of Agriculture.

Placing The Blame

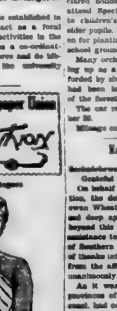
Not Generally Known That A Woman Introduced The Stiff Collar

When man curse the inventor of stiff collars, they are cursing a woman—though doubtless few of them know it. She was an American, Mrs Hannah Montague, the wife of a Troy manufacturer. She worked her husband's shirts and in doing so noticed that the collar was nearly always more dirty than the shirt itself So, with a sudden inspiration she cut off the collars and put bands round the necks. Then she starched the collars They stayed clean longer Mr Montague was agreeably surprised He told friends. That was a century ago A tablet on a house in Troy, New York, still bears witness to the memory of the inventor of stiff collars.

The first man to use a microscope to study causes of disease is believed to have been the Jesuit priest, Athanasius Kircher, who lived in the seventeenth century.

Wool grading has stimulated the consumption of Canadian wool in Canada and has at the same time provided a steady outlet in the United Kingdom and foreign markets.

A French naturalist states that on walking from sleep each years rat stretch their legs like human beings.



MEN: WATCH YOUR NECKTIES! MODERNS HAVE TAKEN A LIKING TO NECKTIE SILK BLOUSES

Today's pattern shows a smart lingerie-like blouse with right up to the neckline and tied in sporty scarf or ascot. However, if you prefer to be a bit more feminine, trim the edges with ruffling. The manner you trim illustration is fascinating even with ruffling. The pattern envelope illustrates exactly how to make the ruffling. It is so simple to do it.

Colourful tie ends inspired this model in coral-pink tones. It's stunning with a black wool or black velvet suit.

Sheer brown, navajo green, navy blue, crepe satin, etc., in satin or faille crepe are other nice schemes.

Style No. 5394 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inch bust.

Size 16 requires 1¾ yards of 39-inch material with 1¼ yards of 39-inch contrasting.

The pattern is cut in one size only, and can be procured by sending 15 cents in coin (coin is preferred). Wrap coin carefully.

Source Of Leather Supplies

United Kingdom Taking The Lead In This Class Of Manufactures

For generations, the United Kingdom has been an outstanding source of leather supplies for manufacturers of leather goods shrewd and especially those in the principal European centres of the trade. At the same time leather goods manufactured in the United Kingdom have enjoyed a world-wide reputation for quality of workmanship and materials.

A number of influences in recent years have contributed to stimulate a natural development, namely, the increasing manufacture of a wider diversity of leather goods in the United Kingdom itself. In certain branches of leather goods manufacture, notably saddlery, travel goods, belts, purses, pocket books and so on, Great Britain has always held a predominant position. Prior to 1914, however, British manufacturing production followed traditional lines and restricted itself to a somewhat narrow range. Few factories in the United Kingdom specialized in the production of such articles as leather handbags and the demand found very variety of leather "fancy goods." That condition, largely as a result of the general course of economic development since the World War, has now been entirely changed.

The outstanding characteristic of the British leather and leather goods industry today is its amazing diversity. Nowhere in this more evident than in the growth in size and scope of the leather and leather goods activities of the British Industries Fair. Here every type and kind of leather and leather goods may be seen—from hand and shoe leathers, book-bindings and fancy leathers, upholstery leathers, leather cloths and so on to saddlery, harness, handbags, travel goods, pocket books, dressing cases, fancy leather goods, fabrication leather goods, gold leather goods, picnic cases, purses, razor strops, saddlery, sports bags, leather coats and kindred requisites.

Indeed, the trade buyer need go no further than the 1934 Fair to find leather goods of every conceivable kind and in a variety of designs unsurpassed anywhere. To this may be added important considerations in that, because production methods have been overhauled and costs have been drastically cut, British prices today are astonishingly low.

Every known kind of leather is used in one or other of the British manufactures ranging from waterproof solid leather, through the many qualities given by dressing with British calf work, to delicate pyralin and other reptile-skin leathers, patent leathers and, of course, Morocco, which is obtained largely from the British Isles, Indeed, thirty per cent. of the leather used in Great Britain is produced within the British Empire. A large proportion of it emanates from Canada.

In becoming a predominant centre of many varied leather goods manufacture, and especially in developing the range of trade and fancy leathers and leather goods, British manufacturers have availed themselves of every new style opening from all parts of the world, within the last few years, the development of Continental manufacturers have opened leather goods factories in Great Britain for the production, there, of their own distinctive goods.

In this way a cosmopolitan wealth of style, design and ingenuity, developed in many countries, has been combined with the traditional high quality of British craftsmanship and workmanship. It is owing to this that the United Kingdom has become the natural source of supply for leather goods of every description. The scope of its resources in low unit cost is unrivalled.

Canadian buyers of leather goods of all kinds who wish to buy in the best advantageous and keep abreast of the latest developments in design and production cannot afford to miss the 1934 British Industries Fair which opens in London on the 19th of February.

Canadian Beef Preferred

Show Cattle Bring Good Price On Scottish Markets

Canadian cattle occupy a favorable spot in Scottish markets and invariably sell at a slight premium over Irish cattle, A. J. Tagg, assistant live stock commissioner in Scotland, writes in an article for the Commercial Journal.

It is realized, however, Mr. Tingley says, the Canadian market, like the market in Scotland, prefers young, well-bred cattle and, unfortunately, the surplus of these for export does not provide a sufficient number to ship only this class.

Canadian cattle breeding generally is on a higher level, some of the rougher class will find a way to the British markets, as a result shows, however, cannot be placed upon the necessity for Canadian farmers to continue to breed for the commercial herds, the commissioner writes, and for shippers to send over only young stock of good class and quality.

The type of animal most demanded is a young bullock approaching two years of age, from eight to nine cwts. in weight and of good quality and breeding, the writer says. Aberdeen-Angus or Shorthorn crosses are preferred, he writes.

Running For Centuries

Clock In England Rumored Capable Of Going Indefinitely

The clock in the Parish Church at Rye, England, which was erected in 1561, was finished in 1569, and has been running ever since, except for the few times it was stopped for repairs. A well-known firm of clock makers now has the contract to keep it going and it seems capable of running indefinitely. They say it is to be the only clock in the world having a pendulum swinging through the roof and into the middle of the church. For years its 1,200 pounds swung over the choir before it was discovered to be supported by only a two-inch rusty rod.

Twenty wild animal preserves, covering 300,000 square miles, have been established in British Africa.

PAUL IN PRISON

Explanations and Comments

Preaching in the Synagogue And In The School Of Tyrannus, 19:8-10 — On his third missionary journey, Paul came to Ephesus, where he followed his customary method in preaching first to the Jews, and then to the Greeks. For three months in the synagogue he reasoned and persuaded as to the things concerning the Kingdom the subject of Jesus' teaching. But instead of heeding his message, the Jews hardened their hearts, and some of them even spoke evil of the Way" (used as a synonym for Christianity, recall Acts 9: 2). Paul was obliged to break with the Jews, leaving the synagogue for the lecture-room of Tyrannus, where he taught for two years. Tyrannus was probably a Gentile who had been a school of philosophy. Paul may have rented to the Ephesians to be one of the wandering professors of philosophy who were so numerous in the early Empire. In the lecture-room of Tyrannus from eleven to four, after Tyrannus had finished his lectures, Paul proclaimed unto his hearers Jesus the Christ.

For two years Paul continued teaching in the school of Tyrannus, and "all that dwelt in Asia heard the word of the Lord, both Jews and Greeks." Within easy reach of Ephesus were the other cities of the Roman province of Asia (now the western shore of Asia Minor). During these years were probably founded the others of the Seven Churches of Asia (Revelation 1:4, 11).

"Forty years after this Pliny in his famous letter to Trajan will say of Christianity: 'For the contagion of this superstition has not only spread through cities, but also through villages and country places'."—A. T. Robertson.

Special Cures, verses 11, 12.—Both people were cured by mere contact with handkerchiefs or aprons which had touched Paul's body, we are told. The words subject to this with difficulties, since we do not even know why Paul condemned the particular cases here mentioned. That Paul was conscious of being on occasion the medium of superhuman energies we know from his own witness (Romans 15:18; 2 Corinthians 12:12). But Paul, himself, would surely have discouraged such unethical and magical methods, so alien to faith as he understood its saving virtue. But, without his knowledge, the faith of fresh converts and others conveyed to the sick in body and mind objects which, having been in contact with his person, had, relative to the crude but intense faith and expectancy of the recipients, a healing value. What exactly Paul thought in the matter we do not know."—Bartlett.

"Religion has to steer between a superstitiousness that sees the magic-agency everywhere, and a materialistic realism that sees God nowhere."—Henry Churchill King.

Law courts in London, it has just been ascertained, have two and one-half miles of corridors.

About the only people who get satisfaction by going to law are the lawyers.

Tests New Diving Bell

Fantastic Robot Of U.S. Navy Goes To Great Depths

The United States navy has completed preliminary tests of a fantastic robot diving bell, represented as able to plunge into the ocean, pick up a dozen or a twenty-five-foot locomotive crane, and carry workers into depths heretofore beyond their reach in salvaging submarines and saving lives.

The pear-shaped, two-armed contrivance, invented by E. J. Romano of Seattle, is radically different in dimensions, outlines, grappling hooks and lights from ordinary diving apparatus.

The device has been manipulated more than 850 feet under water and tested to withstand pressure deeper than 1,000 feet, in contrast to the 100-foot operations of average divers in old-style equipment.

The advantages of the device, the inventor says, are the delicacy of touch of the grappling irons—they have been used to drive tacks and play cards, yet they have tons of crushing force—the great depths to which it can descend and the unique lighting system, effective at greater depths, he claims, than any other known.

Company Protects Titles

Marriage Involving Money In Exchange For Title Not Recognized

An important test step is put on end to title-hunting on the preserves of the German nobility.

A new law adopted by the cabinet prohibits any marriage transacted after November 9 that involved the exchange of a title for a certain monetary consideration paid and void.

By this law, the government hopes to eradicate the abuses of sham marriages and adoptions which have become rampant since the war, especially among the impoverished German nobility.

Invented Anti-Aircraft Gun

Polish Prisoner Escaped Death Sentence In Astounding War Officials

Sentenced to death for murder in Warsaw, Poland, a man has been saved from execution as that War Office officials may study his invention, an anti-aircraft gun. The day before he was to be executed he managed through the prison governor to interest war officials in a model of his device. They recognized the value of the weapon, which is expected to revolutionize air defense, and are keeping the details secret.

Indigestion Gas

Mrs. Elizabeth Stroud of 129 E. Caroline St., Rochester, Ind., says: "I had indigestion and all kinds of gas and was constipated. I took Adlerika and it relieved me of all my trouble. Adlerika is wonderful for gas, constipation and stomach trouble." All druggists. Dixon Dr. Pierce's Chem. Buffalo, N. Y.

W. N. U. 2020

ADVISER OF ROOSEVELT NOW IN OPPOSITION

Philadelphian — James P. Warburg who has been regarded as unofficial economic adviser to President Roosevelt, expressed "reluctant" opposition to some of the methods of the president's monetary policies.

"What I reluctantly oppose" said the New York banker who was financial adviser to the American delegation to the world economic conference, "are some of the methods by which he seeks to attain his goal; some of the misconceptions that seem to be behind his purpose; and the disregard of the accumulated experience of centuries manifested by all too many of his advisers."

Warburg made a surprise address at the American Academy of Political Science in slipping himself with Dr. H. P. Fairchild, formerly a resigned special adviser to the treasury, is nothing to arouse public opinion against the president's monetary measures.

At the same meeting Prof Irving Fisher of Yale University, said in an address that the monetary policy of President Roosevelt "is substantially right."

Warburg expressed doubt that as a practical matter there can be any such thing as a dollar of constant purchasing power" which President Roosevelt espoused in his message to the economic conference last July and Mr. Fisher remarked in the first time that he had resigned from the American delegation after the President's message had [illegible] [illegible] [illegible].

He said he did not let his resignation become known at that time because he was hopeful of being able to convince the president that it would be a mistake to continue his policy of monetary uncertainty and experimentation."

United Kingdom Sees Activity In Industry

Increase In Railway Traffic And Other Improvement Noted

London, Eng.—From several directions have come indications of the United Kingdom's steady advance in greater industrial activity.

All four of Britain's great railway groups issued traffic returns showing considerable gains over those for the corresponding week last year. A "very British" train will start early in the new year on a tour covering the whole southern district and part of the northern district of England, calling at 60 important commercial centres.

Savings banks reported greater business and revenue from amusement taxes was said to have risen.

A great steel firm will begin immediately work to supply more than 30 miles of steel pipe for Jerusalem, which, from the days of King Herod, has depended for its water supply on wells and springs. Another firm has received a [illegible] [illegible] from Robertson.

Special Cases, verses 11, 12.—Both people were cured by mere contact with handkerchiefs or aprons which had touched Paul's body, we are told. The words subject to this with difficulties, since we do not even know why Paul condemned the particular cases here mentioned. That Paul was conscious of being on occasion the medium of superhuman energies we know from his own witness (Romans 15:18; 2 Corinthians 12:12). Grain Awards

Westerners Annex Many Honors At Royal Winter Fair

Toronto, Ont.—H. G. Marshall, Cassils, Sask., had the best sparring wheat in the registered or certified seed class at the Royal Winter Fair here. Second place in this class went to Wm Whitelock, of Kelwood, Man., and third to R. H. Carter Minnedosa Sask.

For flaxseed wheat, Middington, Bros., of Lethbridge Alberta, had the best exhibit and Axel Bergkvist, of Sandford Man., captured honors in the Minchum class.

Western Canada entrants topped all others in the white oats section of the seed grains in sacks at the Royal Winter Fair. H. H. Taylor of Lashburn Sask., led a list of 38 while second and third places fell to Lester Ball, Edmonton South Alberta and H. C. Neufeld Cordelle Sask respectively.

In the barley, six-rowed sections D. L. Reid of Clear Creek, Ont., was awarded honors over Nels Linden of Wetaskiwin Alberta.

A Griffin of Brooks Alberta annexed premier honors in the field beans (small white division).

Honors entered by John H. Teevin Crystal City Man was considered the best sack of grain in the [illegible] [illegible] [illegible].

In the spring wheat section, the Smith Farms Limited, [illegible] Alberta, H. G. Neufeld Cordelle Sask., and Wm Whitelock of Kelwood Man., were awarded first, second and third respectively. Two other Western Canadian entries, Wm F. Rigby Wembley Alberta and Stephen C. Harrington, Marwayne Alberta won fourth and fifth places.

Germany Asks Return Of Saar Territory

Greatest Obstacle To Accord With France Stated Either

Paris, France — A government spokesman said that the French door is wide open to Chancellor Hitler, of Germany, if he cares to proffer an olive branch.

This authoritative invitation was made as a comment on an interview which the German chief had Fernand De Brinon, a close friend of former Premier Edouard Daladier, published in a newspaper, Le Matin.

The interview quoted Hitler as offering peace and security to France and declaring the inability of Germany

Le Matin said Hitler visualized the greatest obstacle to accord between France and Germany as the question of the Saar Territory, now held by France. The French government spokesman said, "the question is [illegible] [illegible] [illegible] to the supervision of the armaments we know he is holding."

"I am convinced," said Hitler "that once the question of the Saar —which is German land has been settled, and returned to nothing, absolutely nothing which can oppose Germany to France."

Despite Germany's desire to avoid war, which the chancellor said "would settle nothing and only make worse the state of the world." Hitler reiterated his intention not to return to the League of Nations

It "has aggravated instead of clearing up the misunderstandings of the world," he said.

Dr. MacMurchy Retires

Has Been Head Of Child Welfare For Last Thirteen Years

Ottawa, Ont.—A kindly and aggressive personality in child welfare work, Dr. Helen MacMurchy has been retired from the Department of Pensions and National Health. Since 1920 she has been chief of the division of child welfare in Ottawa. She is taking up her residence in Toronto.

Last summer Dr. MacMurchy made a notable speech in Winnipeg before the Federated Women's Institutes of Canada on "The Mother, the Children and the New World Order." It is a gripping address which was later circulated in printed form throughout the country.

Dr. MacMurchy has written some 25 books and pamphlets. She graduated from the University of Toronto in 1901 and did post graduate work in famous hospitals of the United States.

As head of the Child Welfare division here, she was energetic in the prevention of infantile paralysis.

Ottawa Will Ignore Canada

Lord Baden-Powell, Head Of Boy Scout Movement To Tour Dominion

Ottawa, Ont.—Announcement of a visit to Canada in September and October, 1934, by Lord Baden-Powell, world head of the Boy Scout Movement, was made by His Excellency the Earl of Bessborough, Chief Scout for Canada, at the semi-annual meeting of the executive committee of the Canadian General Council of the Boy Scouts Association. Lord Baden-Powell will be accompanied by Lady Baden-Powell. The world chief scout is known to have suggested a four-power parley in Italy, was pointed to as a possible mediator between Russia and Britain in the mid East and Germany on the other.

Likely To Be Ignored

No Comment Made On Outburst By British Labor Member

London, Eng.—Apparently nothing more will be heard of the utterance in the House of Lords as parliament opened when Labor M.P. Lees-Smith, Labor leftwinger, burst out in front of the King and Queen and the assembled nobility of England, at the conclusion of the speech from the throne with a denunciation of the peers and peeresses as "parasites" living on the wealth created by the people "while the people starve."

The House of Commons adjourned today on the address in reply to the speech from the throne without any reference to the incident being heard in the House.

Fast Driving

Motorists From Vancouver To Hold Claim They Beat Train

Barrie, Ont.—Driving day and night on their trip from Vancouver, two youthful Barrie motorists claim they made faster time than the fast trans-continental trains.

The youths, Vernon R. Taylor and Douglas Terrifory, now had by driving night and said they covered the 3,397 miles in an elapsed time of 108 hours and 15 minutes. Actual driving time, a letter they mailed in Vancouver had not been delivered in Barrie when they arrived.

Russian Plane Wrecked

Fourteen Including Chief Pilot And Mechanic Reported Killed

Moscow Russia. A despatch from Kharkov said the newly-constructed aeroplane K-7, said to be the largest aeroplane for overland flying in the world crashed there killing 14 persons.

The dead were reported to include the chief pilot and mechanic and several Kharkov aviation officials but several [illegible] were [illegible] were given. The craft was a six-motored monoplane without the orthodox fuselage.

Instead, all accommodations for luggage and fuel space, as well as controls, were in the wings. Only a slight framework of steel composed the structure on which the rudder was anchored.

The great aeroplane's capacity was designed to carry 120 persons, including its crew. It was designed with sleeping accommodations for 64 persons. It was commissioned only last week.

Will Visit Canada

Lord Baden-Powell, Head Of Boy Scout Movement To Tour Dominion

Ottawa, Ont. Announcement of a visit to Canada in September and October, 1934, by Lord Baden-Powell, world head of the Boy Scout Movement, was made by His Excellency the Earl of Bessborough, Chief Scout for Canada, at the semi-annual meeting of the executive committee of the Canadian General Council of the Boy Scouts Association. Lord Baden-Powell will be accompanied by Lady Baden-Powell. The world chief scout is known to have suggested a four-power parley in Italy, was pointed to as a possible mediator between Russia and Britain in the mid East and Germany on the other.

Makes Britain's Task Hard

International Relations Affected By Exaggerated Reports Stated Premier

London, Eng.—In the House of Commons, while making his speech when the House re-opened, Prime Minister MacDonald referred to what he described as a very unbalanced attack by the opposition against private armament firms in Britain, in which it had been charged Britain supplied one-third of the total export trade in armaments.

That was an exaggeration of the grossest character, said the Prime Minister, "which becomes almost fantastic."

"Exaggerated and disturbing statements of this kind," said the Prime Minister, "only make more difficult the task of this country in international relations."

A TYPHOON DESTROYS HOUSES IN INDIA

One of the most picturesque weddings to take place in India was formalized at the Church of the Resurrection, New Delhi, when Major Roland Travers Laurence, M.C., married Miss Elizabeth Margaret Addison. The bridegroom, a former A.D.C. to the Viceroy of India, is the private secretary to His Excellency the Governor of the Punjab, while as bride is the daughter of Major-General G. H. Addison, C.B., C.M.G., D.S.O., and Mrs. Addison. One picture shows the happy bride and groom leaving after the ceremony, which was attended by the Viceroy of India and the Countess of Willingdon.

DISARMAMENT CONFERENCE TO TAKE RECESS

Geneva, Switzerland — Formal work of the world disarmament conference was suspended until mid-January, by a vote of its steering committee, to permit diplomatic negotiations a end at saving the parley and getting Germany back

The committee accepted unanimously a statement by Arthur Henderson, British chairman of the conference, that there shall be "parallel and supplementary effort between the various states and the full use of diplomatic machinery conducted energetically to advance in every possible way the work of the conference."

It was learned that France particularly is inclined to favor a parallel between the political positions of Germany, which withdrew from the disarmament body, and Japan, and is convinced that disarmament efforts to succeed, must be of universal scope. In the British delegation were said to concur.

The full negotiations, it was learned, will be directed toward reaching a French-British joint policy and then be extended to Italy and finally to Germany.

It was authoritatively stated that [illegible] [illegible] [illegible] without agreeing on details, had already reached an understanding on their respected common policy based on a principle that they will not be influenced by any German "threat."

President Roosevelt's World Peace Plan is known to have suggested a four-power parley in Italy, was pointed to as a possible mediator between Russia and Britain in the mid East and Germany on the other.

Charges Canada Delays Agreement With Russia

British Labor Member Makes Statement In House Of Commons

London, Eng.—"It is atrocious that Canada should prevent Britain from entering into a new trade agreement with Russia," declared J. Batey, Labor member for Spennymoor, during a debate in the House of Commons on the address in reply to the speech from the throne.

Batey argued the long delay in concluding the negotiations for a new pact with Russia was because of Canada's protection of the import duty of Russian timber to Britain, which Canada contends is against the spirit of the Ottawa trade agreement.

Will Visit Prisons

Secretary Of Social Service Council To Investigate Conditions

Winnipeg, Man.—Armed with blanket authority from the Dominion government to investigate conditions in Canadian penal institutions, the Rev. J. Phillips Jones, Toronto, general secretary of the Social Service Council of Canada, is Winnipeg recently

He will inspect first the penitentiary in Manitoba and later will travel west to visit Prince Albert and New Westminster, B.C. penitentiaries.

Dr. Jones has already inspected Kingston, Ont., penitentiary. His credentials entitle him to question prisoners. He has held ministerial charges at St Winnipeg, Calgary and Lethbridge.

Finance Chief Named

Moncton, N.B.—The Canadian banking system is sound and little is need of organization, said Sir Maurice Bonham Carter, London financier, in an interview here, but establishment of a Canadian central bank would greatly aid "the uniform stabilization of finance throughout the British Empire."

Nazi Give Hitler Salute

Kiel, Germany — The Nazi Church Council of the Lutheran Evangelical Church seized an order Wednesday commanding that all church services shall the Schleswig-Holstein district must open and close with the Hitler salute.

A mountain 27,000 feet high has been added to the impressive ranks of Tibetan peaks, by a recent discovery.

Studying The Weather

People Do Not Realize Work In Connection With Forecasts

People do a lot of complaining about the weather, but, as someone else said, nobody knows almost anything about it. Scientists are trying to do something about it, however. The only way they can learn is by a system of watching and recording the weather all over the world. Even in the remotest parts of the earth observers are stationed. Five hundred times per day reports are received from these observers. Then the forecasts are made. Of course, there are many complaints as to the accuracy of these forecasts, but research and understanding of data about that will give more precise forecasts in the future. Weather forecasting is a science, to the public.

A party of Canadian meteorologists recently returned to civilization from the Arctic, after spending a year studying the mysteries of Canada's most Northerly region. They made 700 photographs of the auroras and 4,000 pictures of clouds, besides making charts daily and monthly, all of which will be used by meteorologists in the east in the future, and which will take years to unravel the many months to unravel and co-ordinate. But when everybody's data has been reduced to understandable forms, our weathermen will be able to supply more accurate information as to the "probs." which will be of advantage to farmers, to farmers, road and boat and boat, or to the farmer who plans a picnic for the morrow, or the woman who wonders if it will be all right or not to put out the washing on a day.

Just think of that when you give a casual glance at the "probs" put on conspicuous places you.—St. Thomas Times-Journal.

B.C. Motor Licenses

Worldwide Silence Gathering Automobile Operation for January and February of next year will be issued by the Columbia motorists who paid their 1932 license fees before March 1, as British Columbia provincial police maintain a record method of encouraging payment of fees early, according to Inspector G. A. Hood of the motor branch.

Skidders will also be barred to those taking out licenses after March 1 on payment of one-sixth of the fee, the inspector said. Under new government regulations, motorists must either pay full fees by March 1 of next year or lay up their cars until April 1 and pay 11-12ths of the fee before resuming operation at that time.

A reduction will be made to motorists residing in deep-snow districts. Owners of cars east of the Cascade range may lay up their vehicles after Nov. 1, 1931, and have their plates and licenses to the motor branch and receive a refund for four months.

Birds Fly Long Distance

The golden plovers have arrived in Finland for the winter after their customary 2,500-mile non-stop flight from the Atlantic islands. Joseph Merwey, sportsman, who has been studying their migratory habits for thirty years, said that the geese birds are reputed to make the feetic night from the Bering Sea in twenty-four hours by flying at ninety miles an hour in the high air currents.

Husband (tripping over lawn carpet): "I shall beat any lawyer with this carpet in a minute!"

Wife: "That's right, dear, do. Then take a stick and give it a jolly good lashing out on the lawn."

Artificial Eyes

Great Skill In Some Used In the Making of Substitutes

At least 3,000 people in England lose an eye every year. These out of these misfortunes are no

The losing of eyes is no new thing. Even in A.D. That is to Some Extent, Blood Letting Was Practised and Eyes were supposed to be removed as a remedy for a disease who suffered from epilepsy. Nowadays the removal of an eye is only undertaken when it is necessary to the health of the patient that the operation should be performed.

The most interesting part of the whole matter is that artificial eyes are made to look as natural as possible. The eyes are made from the genuine article. The enucleation (removing from the eye-socket) of the eye is performed by the surgeon, and the eye is then sent to the factory where it is carefully examined and the size of the eye-socket is taken. The eye is then placed in a mould and the artificial eye is made. The eye is then placed in the eye-socket and the eyelids are closed. The eye is then placed in the eye-socket and the eyelids are closed. The eye is then placed in the eye-socket and the eyelids are closed.

French Schools Shut

Have Trouble Maintaining Staff

Via Toronto Star Weekly from Our Own Staff Correspondent

Because an instructor can teach mathematics and spelling by means of paper bags, the Paris Town Council today by 37 votes to 36 decided to close down 700 primary schools of the eastern and 4,000 pictures of clouds, besides making charts daily and monthly, all of which will be used by meteorologists in the east in the future, and which will take years to unravel the many months to unravel and co-ordinate. But when everybody's data has been reduced to understandable forms, our weathermen will be able to supply more accurate information as to the "probs." which will be of advantage to farmers, to farmers, road and boat and boat, or to the farmer who plans a picnic for the morrow, or the woman who wonders if it will be all right or not to put out the washing on a day.

THIS ENGLAND'S DECEPTIVE JOURNEY ESTABLISHED NEW RECORD

Our picture shows Gordon Richards, England's champion jockey, after he had established a new British record by riding 247 winners in one season.

Telescope Built From Junk

Ontario Enthusiast Made By Farm Boys Of Kenora

Curiosity over what might be next in the heavens has led Walter Dyck and his cousin, Paul Kuhlman, Kenora farm youths, to construct from an old discarded range, a telescope powerful enough to bring them nearly the course of the stars.

The boys, who are still in their teens, were required before they had transformed the pieces of "junk" into an intricate and efficient instrument which will undoubtedly be centered on a star for several hours.

Most of the parts of the instrument were picked up about the farmers. A part of an old stove formed the base, upon which is fitted an upright pillar made of an old axe, fitted with counters. A spring driven motor from an old phonograph keeps the main revolving upon part of the rear wheel of a discarded motor car.

So closely is the instrument geared to the movement of the earth that once focused the telescope will remain in focus for hours.

The finished lens is seven and one-fourth inches in diameter. So nearly perfect a job did the boys do in grinding and centering it with silver that the light reflected is more than 90 per cent.

In Asia, which contains half of the population of the world, there are no dogs. "Personnel" will be necessary as the tour by an English boy visitor, Harold Fielding.

Delinquent Juveniles

Presents A Serious Problem Says British Woman Official

Seven years experience as presiding officer at the juvenile court in St. Pancras district, London, England, has led Mrs. Philip Bright, J.P., to believe that children who break laws are often treated in too lenient a fashion particularly when they repeat offences.

The tendency in need of a few pounds, the discoverer of a pet to overthrow the throne or assassinate the prince and even the queer fell-w by send easily led hosts into pubs and "Shakespeare—they all send letters by the score and keep the prince waste of time.

For the rest there is the usual daily pile of letters from institutions asking for donations upon the prince's time and begging him to attend some public or private function. The doorway scenes get a sympathetic ear and are taken down in shorthand. The accepted scenes and events are then carefully marked down in the prince's appointment calendar.

Crank Letters Are Numerous

Prince Of Wales' Mail Contains Many Odd Contributions

A conventional letter arriving every day of the year at St. James' Palace addressed to the prince's personal staff secures approach to danger lacking in the never-empty mail bag of the Prince of Wales.

A glimpse into the palace room where secretaries sort and open the huge correspon. Book revealed a conglomeration of human nature with communications from all parts of the world. There were letters from cranks, millionaires, and persons called closest touch prominence in Africa and even from cowboys most of the Rockies.

Across the face of many envelopes was the inscrip. personal. "Personal and strictly" has to be opened by secretaries. Many of these bear only the prince's name and are kept for his personal attention.

Among the strange contributions found in the prince's mail bag came every week until recently was a wide gap between containing an old age pension, a piece of string and a few pounds of cheap tobacco. The contributor, a Londoner, explained that he had a dream. The package was posted each time from one of the London

Eventually mysterious in the minute which secrets regarded every month. Addressed to the Prince of Wales, it was a letter from a man living in the Armenia in 1918 from Hamburg.

When the envelope is torn open there is no letter, but always a 500-mark note. The hand-addressed envelope is a man's writing and gives no clue to identity or address. The money is automatically paid into one of the charitable funds in which the prince is interested.

Ever since March, 1923 comes a letter containing a scriptural text, generally copied fro mthe Book of Revelations. The letters are forwarded Chancellor, but all attempts to trace the sender have failed.

Fairweell Tour

Madame Tetrazzini, the Italian prima donna, began her farewell tour of British recently. "This is the beginning of my world farewell tour," she told a reporter. "It will last more than two years. Afterwards I shall settle down in my home near Milan with my pets. I know I am making the farewell tour."

And it's a premium that keeps the popularity of the Arrowhead tough on the boys and girls because the drumsticks are shorter. There is more of the good old white meat around the wishbone, however.

In San Bernardino County, California, white feathered crop for the market totals 23,500. Last year, 1,000 more than 1932, the full-breasted variety is popular. Growers report it is bringing from four to six cents a pound more than the long drumsticks.

"Show" In Western Canada

What's in a name?

When it comes to cabinet portfolios, page the MacPhersons or the MacPhersons. Thus, British Columbia's new cabinet has its Hon. F. M. MacPherson, Minister of Public Works. Alberta has Hon. G. L. MacPherson, Min. Minister of Public Works. Saskatchewan has its Hon. M. A. MacPherson, Attorney-General and Provincial Treasurer, and Manitoba has its Hon. R. A. McPherson, Provincial

Nerve is a funny thing. You have it with you until you need it. And then you have it somewhere.

Prince's biggest dredger, which has just been launched, can operate at a depth of 75 feet.

FORT SASKATCHEWAN RECORD

RUN DOWN? TAKE WINCARNIS

If work and worry have got the better of you and you are feeling weak and tired, Wincarnis—the full-bodied tonic of more than 20,000 medical men. Take Wincarnis three times daily.

To thousands who once felt as you feel now, this safe-yet-sure has proved an absolute. Wincarnis brings to you all the valuable elements of grapes (2½) lbs. in each bottle), plus the strength building nutriment of beef and malt extract. It is not a drug, but a delicious, blood and tissue building wine which quickly enriches tired nerves and builds new wells of energy.

From the time you start taking Wincarnis you will sleep better, wake more cheerfully, and feel more nearly as you should. You will know, then, how wonderful it is to be on the road to sustained, vigorous health.

For those who are run-down, or who suffer from ragged nerves, insomnia, neurosis or debility, Wincarnis as a tonic-restorative is unsurpassed.

Sold by chemists and stores everywhere. Obtainable also from the sole Agents: Harold F. Ritchie & Co. Ltd., Toronto.

OCCASIONAL WIFE

By

ELIZA ROSS HUMPHREYS

Author of "Jocasta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful art student and Peter Anson, a struggling sculptor, fall in love and marry secretly deciding to live apart until the time Peter can establish himself. Camilla, the adopted daughter of wealthy parents, is not in the heroic mood when she comes of age. She is preparing herself for life with a career in commercial art, hoping to get a job to enable her to support herself. She has been making the rounds of agencies.

(Now Go On With The Story.)

CHAPTER XIX

Returning home, Camilla was surprised to discover how tired she was with the day's efforts. Study and classes at the school had been perplexing, but there was a vast difference between preparation for work, and work itself. Camilla knew that already had discovered. While she dressed for dinner, she reviewed in her mind some of the truths which had been themselves evident to her that day. She always had supposed that if you were willing to work, there was a place for you. It was obvious that not only was that supposition wrong, but that not even if you were capable of doing the work you chose, you were given the opportunity.

Gazing around at the furnishings of the big luxurious rooms that had sheltered her for so long and making rapid calculations with the values of her possessions, she was astounded at the total she estimated it would require her to earn the money they represented.

Even if she were given the opportunity to work for pay, how long would it take her to earn what the clothes she was putting on had cost her? Her frock was an imported model that had cost three hundred dollars, her shoes, twenty-five; her stockings, and lingerie another seventy-five. Her wardrobe and dressing table drawers were filled with such costly garments.

Of course, she knew that when she earned her own living, she would no longer patronize exclusive shops and wear hand embroidered lingerie. But she wondered how many of the women who wore such garments could earn the money for even very poor substitutes, if they were obliged to. With sudden panic, she wondered if she could.

Sitting before the triple cheval glass at her dressing table, Camilla did not see her glowing beauty. She was gazing into the vast blank unknown days that gaped suddenly at her feet that storm of life into which she was about to leap. Apprehending it, she had been so confident and secure, standing now at the brink and gazing into its abysmal depths, she drew back with horror. Then suddenly, there appeared before her Peter's dear and earnest face, the grave eyes ravishing with that purity she loved, and she reached out and clasped his hand, no longer afraid. She was ready to leap into life with Peter.

Peter was modelling with intense interest, striving for a new effect before the idea should become lost in the ethereal continuum of conception. Sporadically that their significance had failed to rapture quickly enough. His hands were gray with plastic clay and his mind was projected into the realm of creative fancy. A knock on the door suddenly interrupted the summer study of stillness and drew him back to reality.

His forehead wrinkled with annoyance, for he had no wish to be disturbed. Then the reminder that it might be Camilla who had come to see him made him call quickly "Come in." He always wanted to see Camilla no matter how disturbing she might be.

There was an instant's hesitation then the door knob turned and the door opened to disclose a strange girl. A very beautiful stranger, she was so beautiful that Peter stared at her stupidly for a moment. The girl just smiled friendly and said. May I come in?

"I don't doubt it."

"But that isn't now." She tossed the stub of her cigarette into a tray and walked across the room to stand beside Peter. A heavy fragrance enveloped him, and some latent memory stirred. Unconsciously he wondered where he had been surrounded by that same perfume before. His pungent overwhelmed behind a cheap variety and seemed incongruous on a girl who was desperate for work. Of course, a girl like Sylvia Todd spent money extravagantly and that did have it and therefore was the more desperate when she did not, he thought she was going on in a confidential voice, "Tell you what I'll do, Mr Anson. I'll work for half the regular pay, everything being on the down and down as it is. And if I were not hungry you being on the bottom, yourself—I'd work for you nothing," she added softly.

The word "hungry" startled Peter and touched that responsive chord in him that denied no creature his pity "Is it as bad as that?" he demanded anxiously.

She nodded, her head lowered, and when she looked up again the blue eyes glistened with tears, like dew on blue violets. But she smiled sweetly. "I walked out here all the way from seventy-fifth, so I could use my last dime for a sandwich to have strength to work on."

"Why didn't you think I would hire you?"

"I heard you were going to enter the exhibit, and had no model yet. Don't you think I would do?" wistfully.

"You might—If I needed a model," he said thoughtfully, as if he were considering something. Finally, "Tell you what I'll do: let me give you a little money for some dinner and I'll think it over again. If I decide that I need you and can afford to pay you, I'll let you know tomorrow. That's the best I can do now."

"That's awfully sweet of you. But I think you would be positively goofy not to try for the scholarship. If that was your first idea. Don't give it up, please, and if you can use me, I'll make the price as low as possible.

Kidney Troubles

cause poisons to accumulate in the system and bring on persistent Backache, Lumbago, Rheumatism, or Sciatica. Take Gin Pills to restore the kidneys to a healthy condition and eliminate the poison from your system.

NERVOUS WOMEN

Take Lydia E. Pinkham's Vegetable Compound

"I was so nervous it seems as though I could not stand it. I had a pain in my side and I was so weak I could hardly get around. I took Lydia E. Pinkham's Vegetable Compound and it has made me well and strong. I am glad to tell you what it has done for me."—Mrs. Ethel Hall, 1 Lincoln Ave., Bellows Falls, Vt.

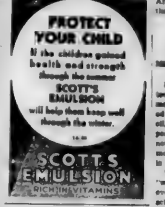
Why suffer from nervousness, backache, headache, dizziness, "dragging-down" pains, when you can find relief in Lydia E. Pinkham's Vegetable Compound? Made from roots and herbs, it has helped thousands of women who suffered from these distressing symptoms. Why don't you try it?

PROTECT YOUR CHILD

If the children gained health and strength through the summer

SCOTT'S EMULSION

will help them keep well through the winter.



Well, are you crazy, or am I cuckoo?"

Neither, I hope. It just happens that affairs have developed recently to change my plans."

She watched him with a calculating expression for a moment. "A girl friend?"

You aren't by any chance a detective?" he inquired

If I were" she laughed "I might not be out of work"

I don't know." Peter observed The depression has hit everything."

Don't I know it? Models in particular. Say, Mister, Big Boy, when there's work enough to go half way around this baby has more than she can do"

"I don't doubt it."

"But that isn't now." She tossed the stub of her cigarette into a tray and walked across the room to stand beside Peter. A heavy fragrance enveloped him, and some latent memory stirred. Unconsciously he wondered where he had been surrounded by that same perfume before His pungent overwhelmed behind a cheap variety and seemed incongruous on a girl who was desperate for work Of course, a girl like Sylvia Todd spent money extravagantly and that did have it and therefore was the more desperate when she did not, he thought she was going on in a confidential voice, "Tell you what I'll do, Mr Anson. Colony For Mentally Sick

Million Dollar Building For Defectives Planned In England

Sir E. Hilton Young, British Minister of Health, in opening a colony for mental defectives which was instituted by the Hertfordshire county council, at a cost of $1,250,000, said the people of the United Kingdom should not be content with the existence of mental deficiency to the degree that is the case in this country.

"For that reason," he continued "we shall press ahead and search out ever possible means of social and scientific work by which we can reduce mental deficiency." He added, "I put in the forefront of the work of the state and the local authorities the prevention of this evil and the necessity of finding the means whereby it may be diminished."

THE RHYMING OPTIMIST

By Alina Michaelis

UPLAND PICTURE

That summer day the air was amber clear,
Such rocky hill stood drenched in ardent heat;
I, stumbling, saw a drowsy snake lazily
His mottled coil and slither past my feet.
Hind hoard and heid surround, an eldin sound
Of golden bells tinkled all the afternoon.
And, while the sun went blazing on his round,
From heaven there poured the wine ghost of the noon.
There was no little breeze it scarcely stirred
Grotesque mosquitos' dust-covered, feathery grass;
There came no breath of flower, no song of bird
To break the strange contentment of that place.
For, far below the breezy river lay
Asleep, like all the land, that summer day.

Wild Ponies Wiped Out

Nearly 2½ Hundred Killed By Tropical Storm In Virginia

After surviving winds and storms for generations, the 200 or 300 wild ponies of Virginia were practically wiped out by the tropical storm which recently swept the region. Only three of their number are left. The ponies were descendants of the Arab stock that continued to reach the shore when the vessel bringing them from Spain to America foundered off the Virginia coast over two centuries ago.

Hercule, trunk horse, is a victim of habit. He would and now only until he reached an intersection, then stopped obstinately for the red traffic light.

Enoch Sub-Arctic Mission

Work Of Two Priests At Repulse Bay Meeting Completion

Finishing touches are being given to a new mission of the Roman Catholic Church at Repulse Bay, lonely northern outpost, high up in the barren lands. The construction is the work of Father Armande Chabenat and Rev. Father Pierre Henry.

Material for the mission for the building were taken in this summer from Churchill, 800 miles to the south. The mission will be a welcome addition to the small settlement situated at the southern tip of Melville Island. Priests will minister principally to Eskimos and roaming bands of Indians who make frequent visits.

Repulse Bay nestles just south of the Height of Land. It was crossed and surveyed during the thrilling hunt for the lost MacAlpine party in 1929, and has been known to explorers since 1615. Visitors from the "outside" are not numerous.

Too Tame For Him

A father was talking severely to his son, who showed a strong disinclination to work.

"And let me tell you this, my boy," he concluded, "hard work never yet killed a man."

"Exactly, dad," replied the young man. "That's just the trouble. You see, I'm rather keen on a spice of danger"

Little Helps For This Week

"Trust in the Lord and do good, so shalt thou dwell in the land, and verily thou shalt be fed."—Psalm 37:3.

Build a little house of trust
Around today;
Fit the space with loving work,
And therein stay;
Look not through the sheltering haze
Upon tomorrow,
God will help thee bear what comes,
Of joy or sorrow.
—Mary Frances Butts

Let us fill up our hearts and ask Lord what will Thou have me to do?" Then light from the opened heaven will stream on our daily task, revealing the grains of gold in what yesterday seemed all dust, a hand shall sustain us and our daily bread, so that coming at yesterday's tears we shall say "This is easy, this is light." Every loss in the way as we come up to it shall be seen chained, and the gates of the Palace Beautiful shall be open, and in us, feeble and fluctuating as we are, ministries shall be assigned and through our hands blessings shall be conveyed to which spirits of just men made perfect might delight."—Elizabeth Charles.

ALBERTA'S OPPORTUNITY

in the

British Bacon Market

For the first time in history the World's Greatest Bacon Market has granted a definite quota to Canadian Bacon Producers, under Controlled Imports to Assure a Steady Market. Canada's quota is 200,000,000 lbs. annually.

The Key to This Market is Quality

Alberta was second in 1926 among all provinces in total hog marketings, but only eight hogs in every 100 marketed were suitable for the Bacon trade.

Not More Hogs, but Better Hogs

What is needed is not greater numbers, but a greater proportion of the Select Bacon Type required by the British Market.

Policies to Encourage Production of High Quality Bacon Hogs Suitable for Overseas, have been adopted by the Alberta Department of Agriculture in co-operation with the Federal Government, Railways and Packers. These methods bear fascinating and enchanting of self-type hogs by the farmers for selected sales from the packing plants.

Write for particulars to

Alberta Department of Agriculture

GEO. HOADLEY, Minister of Agriculture. S. G. CARLYLE, Live Stock Commissioner.

LOCAL NEWS

With mild weather making the snow, Pioneer have started to haul and bloom again on the farm of Mrs. A. H. Spallin. A fine bouquet of fresh pansies were picked last Thursday morning.

The members of the Fort Saskatchewan Women's Institute were the guests of the Edmonton Branch of the Women's Institute on Monday evening, Nov. 20th. The interesting program as well as the social hour was very much enjoyed by all those present.

RURAL PARKS

The possibility of establishing pleasure grounds and parks in these rural municipalities which are fortunate enough to have lakes or rivers within their boundaries, became a live topic at the convention of rural municipal districts when Hon. G. H. Reid, minister of lands and mines, called the attention of the rural councillors to the offer made by the provincial lands department to reserve land for this purpose along lake or river fronts, where such land happens to be owned at present by the government. Several such reservations have already been made by a number of rural councils. The land is granted on a long lease at a nominal fee.

19 Years Ago Today

Thursday, Dec. 3rd 1914

An enthusiastic meeting of the curlers was held last Thursday in the council chamber, when the following officers were elected and other business was transacted:

Hon. Presidents—Warden H. A. Driggs, Hon. vice-pres. Mayor S. O. Jones. President, F. A. Walker, M. L.A. Vice-pres. Deputy Warden W. Blythe. Secretary-treasurer, J. Snowden. Soliciting committee, Messrs. Walker, J. Bowden and N. White. Executive committee, P. Gordon, D. Harper, F. Atkinson, A. Carscadden, and N. White.

At a meeting of the hockey club last Tuesday, Hans Walker was appointed captain and Percy Jardine, Secretary. The boys have entered the intermediate series of the A.A. H.A. and with the assistance of several new ones who have come to town this summer, should improve their showing this year.

The A.Y.P.A. held their regular fort-nightly meeting at the residence of D. Harper last Monday evening at which W. Graham was elected president and J. Brown, Secretary-treasurer for the ensuing year. After further business being completed a social hour was spent.

Rev. D. J. Graham entertained the Adult Bible Class last Thursday evening, when the young people turned out in full force and spent a charming evening at the manse, with music and mirth. In a floral contest Miss Gladys Williamson won the prize of a dainty box of chocolates. Miss Ruth Graham assisted her father in dispensing hospitality.

A Foundation for Goodwill

There is a very solid foundation for the goodwill that prevails towards United Grain Growers wherever the sign of this company appears on an elevator throughout western Canada.

It rests on many years of useful service, and a long demonstration that this company not only desires to take care of the interests of its farmer customers, but it has the organization, the resources and the experience which enable it to do so.

Whether in selling grain or in buying farm supplies it is sound business to deal with this Company.

VOL. 12 No. PORT SASKATCHEWAN, ALBERTA, WEDNESDAY, DEC. 6th, 1922 $1.50 A YEAR IN ADVANCE

Fort School Board Held Business Session

Minutes of a regular meeting of the Fort Saskatchewan School Board was held in the Secretary's office on Monday the 4th of December, 1922, at 7:30 p.m.

Present Mr. F. Atkinson, Chairman, Dr. Calhoun, Dr. Grunert and Dr. Turner.

The minutes of the last meeting held were read and adopted on the motion of Dr. Turner.

The Secretary received instructions from the Board with regard to the collection of certain unpaid tuition fees.

It was moved by Dr. Calhoun and adopted that the Medical Health Officer, with the co-operation of the School Principal be authorized to make a medical examination of the pupils of the Fort public school. (This examination is no way obligates parent or guardian).

The report of the Inspector of High Schools of his inspection on October 5th was submitted to the Board.

The School winter vacation shall extend from the 23rd day of December to the third day of January.

The next regular meeting of the Board will be held on the 8th January instead of the 1st of January.

The Principal was present and submitted attendance and other reports.

In connection with the medical examination referred to above, the Board asks the kindly co-operation of the parents.

The following accounts were passed for payment on the motion of Dr. Calhoun:— A. M. Carscadden $6.25, E. N. Moyer & Co., 4 new chair desks and other supplies $60.15, Imperial Oil floor oil 10.54, J. Comps $1.50, Fort Hardware Co. $2.80, Calgary Power Co. for Oct. $2.65, Jones, Graham & O'Brien 35c.

The meeting adjourned on the motion of Dr. Calhoun.

LETTER TO EDITOR

11511-69th Street
Edmonton, Alberta
Dec. 3, 1922

Editor: Fort Saskatchewan Record,

Dear Sir:

On Friday, Dec. 1st, it was my agreeable duty to come to the Fort to inspect the 1st Fort Saskatchewan Rangers. During the evening 13 boys passed their First-Star badge and are well started toward their Second-Star badge.

It is notable that such a fine Post, of more than 30 enthusiastic, and well-disciplined boys, is established, under the expert guidance of Owen Lemmon (Akela) and his able assistant Ed. Roberts (Baloo).

"Keep it up Fort".

George Audley.

LOCAL NEWS

Mr. Carl McKenzie, late of Mundare has recently opened the former James Graham Garage. See announcement in other part of paper.

The United Church Sunday School will hold their annual Christmas on Tuesday, 19th, in the Empress Theatre.

Mr. Leon Frost has recently resigned from the Provincial Govt staff.

Light snow storms covered over the week-end with slightly colder weather. Skating on the river was enjoyed by many on Sunday.

With the municipal road grader on the roads farmers will again be able to come into the Fort.

After 12 years prohibition in the United States has come to an end Tuesday, when 23 States permitted immediate sale of liquors.

A large hog weighing 1,200 lbs was exhibit at the Chicago show recently.

Advertise it, or you may have to keep it.

Josephburg News

A card party was given by Mr. and Mrs. Philip Mohr on Friday, Dec. 1st. Six tables played and the winners were, Ladies first Mrs. Geo. F. Mohr, Consolation, Mrs. Dan Thomas, Gents first, Albert Mohr, Consolation, Dan Thomas.

A dainty luncheon was served by the hostess. After midnight dancing was indulged in.

Mr. and Mrs. Adam Wagner of Edmonton spent the week-end with Mr. and Mrs. John Mohr Jr.

A interesting wedding took place at the Josephburg Reformed Church Tuesday afternoon at 4 o'clock, when the daughter of Mr. and Mrs. J. A. Hennig of Josephburg was united in marriage to Mr. George A. Mohr of Josephburg. The bride wore a gown of white satin with veil and head dress. The bridesmaids were Miss Ruth E. Mohr and Miss Leona Hennig. The former wore a gown of coral pebble crepe and a bouquet of carnations, while the latter wore blue point d'esprit net and a corsage of carnations. The bride carried a bouquet of roses.

The groom was supported by Mr. Alfred Hennig and Mr. Alfred Mohr.

Mrs. E. Mohr played the wedding march from Lohengrin.

The nightly relatives attended the wedding reception held at the home of the bride's parents Mr. and Mrs. J. A. Hennig. The brides table was centered with a beautiful four-tier wedding cake. After the supper the evening was spent in dancing.

Mr. and Mrs. Geo. A. Mohr will make their home on the farm at Josephburg.

The Junior U. F. A. held their regular meeting at the home of Mr. Walter Cameron on December 1st, 1922. The meeting opened by singing O'Canada.

The minutes of the last meeting were read and adopted and the Roll Call was answered by a short word spelled backwards.

It was decided that the Juniors would go and visit the parliament during the next session.

Work is being done on the efficiency contest and the girls plan on having a sewing-bee to prepare work for the handicraft competition.

Mr. R. Hannig gave a debate on the "Value of Registered Seed".

The next meeting will be held at the home of Mr. and Mrs. Frank Bailey on December 15th, 1922 and the Roll Call is to answered by a Wonder of the World.

Josephburg Junior Grain Club to Hold Achievement Day

The Junior Grain Club will hold its Achievement Day, consisting of a seed fair and public meeting, in the Josephburg School on December 9th, 1922 at 9 a.m.

The program will consist of:—
10:30 a.m. Demonstration in selecting and judging grains.
1:00 p.m. Judging Competition.
2:30 p.m. Public meeting for distribution of prizes and discussion of seed improvement.

The meeting will be attended by fieldmen of the Department of Agriculture and other sponsors of club work, including the Alberta Wheat Pool and United Grain Growers.

Everybody welcome.

CARD OF THANKS

The Catholic Church Altar Society ladies wish to take this opportunity of thanking all those who helped to make their Bazaar and Social evening a success.

CARD OF THANKS

The Fort Hockey Club wish to thank all those who so kindly helped make their hockey dance a success.

ANNOUNCEMENT

The Hillcrest Hospital wishes to announce that special rates are now in effect on all maternity cases at 10 days for $35.00, this includes confinement and medicine.

Good Hope

The Good Hope Christmas Concert will be held on Thursday, December 21, instead of December 22.

The roads are being put in passable condition with the large maintainer and tractor. A little more without wind will put the roads in first class condition.

Altar Society Ladies Hold Successful Bazaar

The Altar Society ladies held a very successful tea, bazaar and whist drive in the Memorial Hall last Wednesday. A very good attendance was noted at the tea, and the sale of work found many ready buyers.

In the evening a whist drive was held with 14 tables in play, the winners were; Ladies first, Mrs. Ben Pollard Jr.; Ladies consolation, Mrs. Walter Wilkes; Gents first, Mr. D. Campo; Gents consolation, Mr. Tony Lalonde.

The door prize, a sack of flour was won by Mr. F. Collins. Mr. Pete Morel won the drumed doll.

After cards refreshments were served by the ladies which brought the successful day to a close.

Hockey Club Provides Enjoyable Evening

The hockey dance held on Monday though not patronized as well as it should have been, proved to be a real success inasmuch as it provided those who did attend with a most delightful evenings entertainment.

The hall was nicely decorated in the hockey club colors, the music provided by the Poppy Pals was better than ever.

On the dance program several old-time numbers and quadrille in specialties were very much appreciated.

The luncheon provided was very appetizing.

To hear all the papers pulling for advertising makes us think of a story we once read about. An editor who was very hard up and who had written to a manufacturing concern asking for some advertising. He received a letter asking him over how wide an area his paper was read, to which he replied that his paper "goes every where in this world and it is all I can do to keep it from going to hell.

Jones, Graham & O'Brien's

Is This Progress?

Were it not for the occasional event of great significance, civilization would stagger on towards whatever goal it is heading, without much real hope or fear, or the more acutely aware of its steady progression. World attention momentarily ventures the prediction that another great war inevitably would wreck the civilization of today, and the statesmanship of three years ago would undoubtedly be taken at their face value, were it not for sporadic manifestations of the dynamic basis which distinguishes western civil entities. Other men of renown have said civilization has no goal, no great achievements to its credit, in that it is and increasing and has not increased the sum total of human happiness. But again, some event hits Lo Great pages of the daily newspapers indicating its triumphal march somewhere, which completely upsets Canadian complacency and chastises us of stagnation.

The events which have called forth this opening paragraph are, of course, those which occurred recently in the great and glorious State of Georgia. There, two confirmed kidnappers were apprehended, put into the brute, mass-mere, crowd which, instead of being punished for usurping the functions of the state itself, are exonerated and even lauded by the chief executive of that state. In fact, Governor Rolph was so far from taking punitive measures against the crowd which (perhaps) saved his bengaman a job, that he declared to the press his wish that he had the power to release all kidnappers held in California ready prisons in the hands of mercies of the mobs inside. It might be added, not as a deterrent to kidnappers elsewhere in the United States. Your civilization marches.

Possibly there is truth in his contention. It is equally true, however, that rigorous enforcement of the laws enforced to his administration would serve the nefarious purpose and achieve as good results. If his contention be to mean that lynch law can be invoked with impunity in the warfare against kidnapping, it might be urged that the cure is as bad as the disease. In fact, the cure was itself a disease which it took more than half a century of repression to eradicate. Governor Rolph is dabbling in a strange homeopathy; and perhaps he would be well advised to study the history of the law and its enforcement, through the police and the courts, than thus encouraging the revival of a discredited elsewhere. That law-breakers should lynch lawbreakers is, in effect, a protest against the inefficiency, the inadequacy and the inhumanity of a law-enforcing machinery. Perhaps then, Governor Rolph should begin the clean-up against kidnapping nearer his own office.

* * * * * *

They have a new premier in France. M. Chautemps is, in fact, the 101st premier France has had in some 65 years. Apparently the motto over the door of the office reserved for the chief executive in France is "Have hope, gone tomorrow."

Old Lawrence Sherm it was who said: "They do things better in France." It would be hard to persuade those accustomed to the more staid and dignified British process of placing and replacing Prime Ministers, to agree with this sweeping statement. Changes in the French cabinet are made without involving the machinery of an election. They just change- that is all. A prime minister comes, and collects a group of colleagues, some of them adhering to his own political party or even sharing his political faith. He selects such individuals as appear to him to have sufficient of a loyal following among their particular group as to command a working majority in the Chamber of Deputies. The parliament runs its course. Ministers change without committing their platform to the people. The system removes government from the people and makes inevitably to place the real authority in the hands of permanent officials of the civil service. Responsible government, as Canadians know it, is impossible under such a system, while the bargaining that inevitably precedes the formation of a French cabinet is a fertile hot-bed for turmoil into the political arena which is repugnant to western minds.

Shipment Arrived In First Class Condition

Drastic Fire Well Satisfied With Results of Demonstration

Sample of Saskatchewan honey arrived in Great Britain in first class condition. The honey, a carload shipment, was sent to Britain on the S.S. Brandon, via the Hudson Bay, by British importing firms.

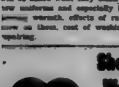
R. W. Pugh, provincial apiarist, states that W. Waldron, Saskatchewan marketing representative in England, and Mr. Heath, of the Canadian Trade Commissioner's department, made a personal inspection of the honey at the London dock. They write that the honey landed in first class condition, the cartons being clean and the honey in an uniformly good state.

The British importing firm to which the honey shipment was consigned, writes as follows: "We are exceedingly satisfied as the honey has been delivered in excellent condition and the quality is first class."

Trying Out New Uniforms

Japanese Soldiers To Report On Silk And Wool Cloth

Official trials are now expressed by the Japanese War Office over a period of a year that silk uniforms were to be provided for the soldiers, has apparently been retracted. Experimental uniforms have now been issued to some battalions. Some of the uniforms are made entirety of silk, but most of the cloth is a mixture of wool and raw silk. The silk-clad soldiers are still be asked what they think of the new uniforms and especially in regard to warmth, effects of rain and snow on them, cost of washing and repairing.



Shortness of Breath Weak, Sinking Feelings

If aching up stairs, climbing hills, walking too fast; if the least exertion causes you to stop to get your breath, or if you have weak, sinking feelings, it is time for you to stop and think as to the cause of your trouble.

What you should do is take a course of Milburn's H. & N. Pills. They tone up and strengthen the vital organs so as to prevent any dreaded attacks of heart trouble.

Ask your druggist for Milburn's H. & N. Pills.

A Practical Check Up

World Must Better Health Status Now Citizens Declare

"Ten years from now, or even earlier," was the message Dr. C. J. Hastings, of New Orleans left at the Canadian College of Physicians, to those who neglect to check up on their health occasionally.

Many persons visited in spite of the great advances in hygiene in the last 20 years, many thousands of persons are to "sick" before their time simply from their own neglect.

Smallpox, for example, is almost completely preventable; yet, he said, there were 150,000 cases of it each year in the United States. Typhoid also is almost 100 per cent. preventable, he declared, but nearly 25000 die of the disease annually.

Formula For Long Life

Woman, 109 Years Old, Gives Some Good Advice

Woman, if you want to live to be 100, among other things, don't put anything on your face that you wouldn't put in your stomach.

Such was the advice of Dr. Maria Chevriche De Cobten Devenport, born 1827 years ago, at Kalinkovitchi, Russia, now Leningrad, Russia." The doctor, on a lecture tour, gave the following formula for long life:

"Never get angry; learn self-control; develop agility; be quick and active, and remember, avoid excesses in all things; don't put anything on your face that you wouldn't put in your stomach; don't let your mind die."

Chile is increasing its fare on air passenger tickets.

WORK IS EASIER NOW FAT HAS GONE

"I was so stout about 11 months ago," a woman writes, "that I became a burden to myself. The slightest exertion set into my joints, and I had to go on sticks. For some time Then I started to take Kruschen Salts, and I am overjoyed with the result. Lately I have reduced them. Honestly, I had no idea one could feel so different. I am much more active than I was. Since taking Kruschen I have lost nearly 28 lbs. of superfluous fat; I can now run about as well as when I was 20, and I feel as if I owned the whole of the world." (Mrs.) C. H.

Unlike certain drastic drugs, Kruschen does not aim to reduce by rushing food through the body; its action is "tonic" combined with a slight part of the system. It has a tonic influence upon every organ of elimination, every gland, every nerve, every vein. Gently but surely, it rids the system of all fat-forming refuse of all poisons and harmful acids which give rise to rheumatism. All of them are pushed the bright yellow which makes fat cure as recognizable at race meetings today. And he himself watches every small detail of the estate's management—even to the laying out of the gardens, which was done to his plan. Lancelot, each of whom is of a different character, Italian French, and so on.

Air Fields Across Canada

Within A Year Stations Will Be Ready For Service

A year from now air fields across Canada will be ready for service, Group Captain Arthur, Brigadier J. Lindsay Gordon, commanding officer of M.D. 12, told the Young Men's Board of Trade at Regina.

Highly unemployed, Brigadier Gordon pointed out were doing work that would prove a big factor in the future of aviation in Canada. The great obstacle in a trans-Canada route in the past, the northwestern part of Ontario, was the scene of camps for the preparation of airports.

By next fall, Brigadier Gordon forecasted, facilities to permit the establishment of an air line from Halifax to Vancouver, Brigadier Gordon pointed out. This would be of the shortest route from Europe to Asia. The Pan-American airways had already received concessions on a portion of the route, which would have a total of 14,000 miles.

In spite of the possibility of competing with the United States in oriental silk shipments, although, he said, passenger traffic was as much in Canada as not in merit the operation of an air line simply for passenger purposes.

Foreclosure Proceedings

Large Tracts Of Land In Manitoba and Saskatchewan Are Involved

Foreclosure proceedings involving first mortgage debentures in excess of $650,000 and second mortgage debentures of $713,000 on large tracts of land in Saskatchewan and Manitoba settled during the past eight years by Mannoulins, have been taken in Saskatchewan courts. By an order made recently arrears must be paid by October 3, 1934, or foreclosure will be [illegible].

The debenture bonds first issued were sold to large investors in Canada, while the second issue bonds were sold mainly to Mennonites already settled in Canada and the United States. The company promoting the settlements was the Intercontinental Company. The National Trust Company has been named trustee for the first mortgage debenture holders.

The decision of the court does not affect the position of the numerous settlers.

Radio Examinations

Fifty-One Candidates Examined During Month Of October

The radio branch of the Department of Marine announces that 51 candidates were examined during the month of October. Successful candidates who obtained certificates of proficiency in radio included:

Commercial:—H. W. Hall and H. C. Heywood, Vancouver; W. H. Rundell, Moose Jaw.

Amateur:—H. V. Freeman and H. E. Mills, Calgary; H. E. B. Bennett, Jasper, Alberta; J. Sowry, [illegible], Alberta; R. Hill, Revelstoke, B.C.; V. H. Heywood, Vancouver; W. L. Aswell, F. H. Hiscb and L. C. Parkhurst, Victoria, B.C.; H. L. Alexander, Victoria, B.C.

Lord Lonsdale's Medal Estate

Grizzly Stands To Sell Of Management Wholesale By Owner

Lord Lonsdale, in addition to his many-sided sporting interests, is chairman of a publishing firm. He has wonderful way with animals—in particular with horses and dogs and birds. At most times at Lowther each privileged dog comes into the dining-room, goes sedately to its own particular corner, and there remains quietly with one eye fixed on his master. Lord Lonsdale's movements. The stables would give any number of films a mass of material no other estate can offer, for these days could offer save the interiors Mail. They are magnificently run in the old-fashioned English manner —as, indeed, the whole house is—without any regard to the modern love of informality and speed. Lord Lonsdale has kept all his old coaches and carriages—in themselves a small museum which will interest future generations. All of them are painted the bright yellow which makes his cars so recognizable at race meetings today. And he himself watches every small detail of the estate's management —even to the laying out of the gardens, which was done to his plan. Lancelot, each of whom is of a different character, Italian French, and so on.

The Hand That Fills The Pipe Bowl...

with Ogden's Cut Plug has learned how to insure full pleasure in pipe smoking.

Home after a hard day's work —"the little woman" brings a light to your well-tamped bowl of Ogden's Cut Plug—that's real comfort! And every pinch of Ogden's adds to your enjoyment right down to the last fragrant puff. Such cool, companionable good-ness can only come from a tobacco grown, cut and made for pipes only.

OGDEN'S
CUT PLUG

If you "roll your own", use Ogden's fine cut cigarette tobacco and Chancellor cigarette papers

It Happens Frequently

People Travelling In Europe Forget Most Foreigners Speak English

An Englishman who knew no language but his own had lost his way in Rome. In his perplexity it occurred to him to write the name of his hotel in large letters on his card and hand it to the first benign-looking individual he met.

An Italian thus accosted turned, and with the charming manners of his race, accompanied the perturbed Englishman for about 30 minutes in silence until they reached the hotel designated. Then the tourist poured out voluble thanks in the only language at his command.

The Italian looked at him in amazement, then remarked in perfect English: "I thought you were deaf and dumb!"

BUCKLEY'S Gives You Far More For Your Money

Buckley's gives more cases at far as confirmed smoke records can show, than any other brand ever offered. Buckley's is the only cigarette that is sold without compromise by the manufacturer, and that is why Buckley's gives you more cases at far as confirmed smoke records can show, than any other brand ever offered. Buckley's is the only cigarette that is sold without compromise by the manufacturer, and that is why Buckley's gives you more cases at far as confirmed smoke records can show, than any other brand ever offered.

"That's what people say, "It sure likes a duck!" My daughter is correct."

The shape — no round dainty cream — but a full, rich, generous shape that gives you more cases at far as confirmed smoke records can show, than any other brand ever offered. Buckley's is the only cigarette that is sold without compromise by the manufacturer, and that is why Buckley's gives you more cases at far as confirmed smoke records can show, than any other brand ever offered.

Buckley's is sold everywhere.

Unique Banquet Held At Royal Winter Fair When Menu Featured All Canadian Products

Several hundred farmers from all parts of Canada were present at a banquet during the Royal Winter Fair, held in Toronto, November 22 to 30 at which every item on the menu was the product of, or mainly all of them, farm products.

There were opulent from Prince Edward Island, and the sheaf fish from there are incomparable Alberta provided the pages; produced from sugar beets grown at Raymond near Lethbridge, British Columbia sent celery and fruits, and Ontario also provided fruits and other edibles. The bread was made from flour from Saskatchewan wheat. The turkeys came from Manitoba and cranberries for the accompanying sauce were from New Brunswick contribution.

Butter by the one coffee was served at this banquet, the beverages being limited to apple cider from Nova Scotia, grape juice from Ontario, and Canadian ginger ale. The spirits and flavors came from Quebec, principles from New Brunswick, and the pumpkin pie from Ontario. The Ottawa Government Central Experimental Farm, Ottawa, supplied the cheese, and Canadian and British Columbia furnished the nuts.

Although Canada is a great exporter of food products, she imported large quantities of foodstuffs, particularly seasonable fruits and vegetables, much of which came from the United States.

The All-Canadian banquet a feature of the Royal Winter Fair is just a little demonstration that Canada can feed herself if necessary and suffer little, if any from lack of variety or quality.—Canada Weekly Week.

Swiss Watch Trade Menaced

Japanese Selling Timepieces in Geneva By The Pound

"Why buy a watch? Buy a pound of watches."

This has become the slogan of Japanese dumpers on the Swiss watch market.

Watches "made in Japan" are selling in the Jura district of Canevas for 13 francs (about $3)—and no local manufacturer can compete with them.

That delicate timepieces should be sold by the weight like common nails or tacks has stunned the big watchmaker of Switzerland.

An urgent emergency measure based on eighteenth century economic reasoning has been hurriedly put into force to protect the age-old Swiss trade.

All watch machinery exported from the country is taxed a prohibitive export duty of 2,000 Swiss francs, according to the measure.

This tax is based on the theory that the only way to kill competition is to prevent it. "Keep the watch machinery in the country and there will be no foreign competition," says the Swiss Government.

But the leading manufacturers are not satisfied and are asking for stronger protective measures. They demand a quota system be applied to all foreign watches.

England Gobbles Fresh Chickens From Canada

Former Shipments In Were All Confined To Cold Storage Supplies

Fresh Canadian chickens are now being shipped to Britain for the first time.

The shipments are made possible by recent tariff changes in Great Britain which admit empire poultry duty free, while foreign poultry must pay threepence per pound duty, which is much higher than the former rate of 10 per cent. ad valorem.

Formerly, Canadian shipments of poultry largely were confined to cold storage supplies. The four leading suppliers of poultry for the British market were Hungary, Irish Free State, Serbia and France, while Canada came sixth.

Nursery surroundings in Germany are showing a marked increase.

Canada comprises 37 per cent. of the total area of the British Empire.

Printing Crime News

Publicity Is Punishment Which Many Law Breakers Fear

Dr. R. Forbes Cadman, noted lecturer, has recommended an interesting thought upon the publication of crime news in a recent speech. He said "It is not the publicity which should distress us, but the deeds that cause concealment. If their evildoings were done in secret, how they would flourish. Rogues could strut among us unashamed and thieves and assassins commit their art with far less fear of detection." Every newspaper can produce evidence of the value of publicity as a deterrent to crime by the number of requests which are made from time to time to keep names out of the paper in connection with police court cases, showing that publicity is a punishment which is feared.—Chatham News.

TREFLE—RED HAIRY WOOLLEN BEXURE AND SWAGGER IS THIS FOR-LINE TOWN OR COLLEGE DRESS

Paris has put all kinds of interest in sleeves this season.

Today's model favours two of the new ideas to give shoulder height. It is made with sleeves with points standing up upward line at the shoulder, with a fairly capitated as in the small diagram.

You'll like its buttoned wrapped closing. It gives it tailored chic and is decidedly stunning.

Carry it out in wool jersey, tweed, faille crepe silk, silk and synthetic satin, or velvet.

You can make it in about two yards.

Style No. 491 is designed for sizes 34, 36, 38, 39 years, 36, 38 and 40 inches.

Size 16 requires 2¼ yards 54-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Raising More Sheep

Marked Increase In Number On Alberta Farms

Striking evidence of the decided swing to mixed farming is the marked increase in the number of sheep on central and northern Alberta farms. Small farm flocks continue to climb and, according to authorities, there is a wide market for Alberta wool in England and elsewhere. The price of wool has increased more than 100 per cent over last year.

In the 1931 census, 71 156 farms in Alberta reported the possession of sheep, compared to 39,886 farms in 1926.

The sheep population of the province grew from 510,000 in 1927 to 853,700 in 1932. The value of sheep per head in 1932 stepped to the lowest level in more than 20 years.

J. F. Andrew, assistant deputy Minister of Agriculture, in the authority for the statement that there is a definite place for the small farm flock on northern and central Alberta farms each flock leading to make the farm more of a self-contained unit.

Mr Andrew commented on the steady increase of farm flocks in northern and central Alberta, one indicative of the northward drift of farm population. Not many years ago, a flock was something of a rarity except in the southern part of the province.

Making Stations Attractive

Europe And England Realize Gloom Not Attractive To Tourists

Good news for tourists is the announcement that the primordial gloom of European railway stations is to be dispelled by a brightening-up process.

The cold, dank atmosphere of stations in Britain, the railways realize, probably has done more than anything else—next to bad hotels—to keep foreign visitors from returning by reducing their fare recently, they also found that E-gloomum were ready to travel by rail instead of motor cars if conditions could be made slightly more attractive.

Meanwhile water taxis have begun appearing on the Thames to relieve the commuter a novel and pleasant way of going to the office. Until now the Thames alone has escaped the traffic congestion common to London's narrow streets.

Fall Rye Average Low

Fall rye average in Saskatchewan in 1932 shows quite a decrease from the figures for 1932. In 1932 there were 264,000 acres of this grain seeded in Saskatchewan and this fall the acreage is given as 240,000 The total decrease in Canada 50,300 acres Saskatchewan shows the greatest decrease of all provinces.

Basic English Suggested As A Simplified Language For General Use The World Over

Byrd Expedition Using Oil-Packing Machine

To Determine Whether Land Or Water Lies Under Ice Cap

Another machine has been developed to determine whether water or solid soil is beneath the ice.

The equipment, now in [illegible] for oil in the United States, was developed by a Yales firm, and it is this firm that will give the radio directions.

The station is being assembled now and will be ready for use January 1, 1934, when the Byrd party is expected to start actual work in the Antarctic Daily reports of progress will be received, all the messages being in code.

The equipment was developed by the Seismograph Service Corp.

Advice For Dandies

Keep Painter's Mind Occupied In Secret Of Painless Work

Dandies "small talk," that constant line of chatter with which the practitioner tries to keep the patient's mind off the buzz of drills and the yank of forceps, now is glorified under the name of applied psychology.

Delegates to the annual convention of the Western Pennsylvania Odontological Society extracted that bit of wisdom from an address by Dr. C. A. Whitmer, of the University of Pittsburgh.

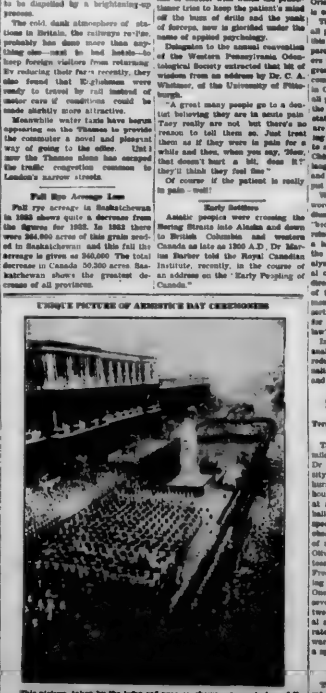
"A great many people go to a dentist believing they are in some pain. They really are not but there's no reason to tell them so. Just treat them as if they were in pain for a while and then, when you say, 'Now, that doesn't hurt a bit, does it?' they'll think they feel fine."

Of course if the patient is really in pain—well!

Early Settlers

Asiatic peoples were crossing the Bering Straits into Alaska and down to British Columbia and western Canada as late as 1200 A.D. Dr Marius Barbeau told the Royal Canadian Institute, recently, in the course of an address on the "Early Peopling of Canada."

UNIQUE PICTURE OF ARMISTICE DAY CEREMONIES



The picture, taken by the infra-red process, shows a general view of the impressive two minutes' silence at the Cenotaph in Whitehall, London, England. The red uniforms of the guards become almost white, and the trees along Whitehall change to perfect specimens of orange blossom as the infra-red pierces the misty morning to reproduce a remarkable photograph.

Plan Basic English Into Old-Fashioned Machine

To Determine Whether Land Or Water Lies Under Ice Cap

Another machine has been developed to determine whether water or solid soil is beneath the ice.

The equipment, now in [illegible] for oil in the United States, was developed by a Yales firm, and it is this firm that will give the radio directions.

The equipment was developed by the Seismograph Service Corp.

Basic English Suggested As A Simplified Language For General Use The World Over

"Basic English," a simplification of the English tongue intended to provide a workable solution to the language communications problems of the world, has been launched by the Orthological Institute of Cambridge, England.

Failure of many attempts to provide an "invented" language that would be used throughout the world as a means of communication between the people of all nations who speak 1,000 living languages led to the effort to adapt the English tongue for the purpose.

The new form of English, introduced to Canada at the Institute of Passing Relations Conference at Banff, in August, contains only 850 words, one of them means 100 adjectives 18 verbs or means of operators and the rest adverbs, prepositions or names of directions.

These, in addition to numbers, weights and measures, the calendar and such words as club, radio and telegram, already internationalized, do the work of 500,000 words of English, at a level of ordinary conversations.

English was chosen for the new medium because it is the most widely administrative language of 350,000,000 people, and because no other language is susceptible to the same kind of simplification. With its word order and analysis in structure it is not only closer to the language habits of many [illegible] but, for the same reason, is easier to learn.

The interest with which persons in all parts of the world have reacted to this form of English (in which this paragraph is written) gives its backers reason to hope that it may be put to a great number of uses. Letters have come into the Orthological Institute in Cambridge by the thousands from all parts of Europe, from Asia and the United States. Schools in the states on the American Pacific Coast are interested in a way of helping the young Chinese and Japanese to a good knowledge of English. In the Chinese schools, where English is the second language, there is much interest in it, and Japanese teachers are about to put it in their schools.

Widely differentiated uses of a word are eliminated in the new medium, such as "for" in the sense of "because," "that" in the sense of a relative pronoun, or "hit" as part of a horse's harness. It makes use of the fact almost all words can be analyzed into one of a few fundamental operations in combination with a few opposites. The simplified operations of these equivalents for 2,000 common verbs, such as "put in" for "insert" "go up" for "ascend," "put out" for "exstinguish," and "go against a law" for "break a law."

In the same way, by descriptive analysis, many names of things are reduced to telescopic terms. A "journalist" becomes "a newspaperman" and a "desk" a "writing table."

Hurricanes Above The Earth

Terrific Storms Observed At Height Of Sixty Miles

That terrific storms rage sixty miles above the earth is the report of Dr Charles P. Olivier of the University of Pennsylvania. Some of these hurricanes, travelling at 150 miles an hour, blow at an angle of 25 degrees at a speed great enough to draw a balloon upward at twice express train speed. Three high-speed winds were observed and measured in the land of meteor "trains," according to Dr Olivier They were caught while [illegible] sun streams between New York rail Fredericksburg, Virginia, were charting the flight of the Leonid me o rs One of these trains was watched f. several minutes while it moved between fifty and sixty miles up. Several stations checked its motion reasonably The wind drove the train upward at an angle of 35 degrees and a speed of 143 miles an hour

Sky Has Set Red

The Soviet flight to the stratosphere that bettered Prof. Piccard's record was a deep disappointment to Moscow, states The Argonaut. The city at eleven miles was a deep, a very soft, purple—and red.

WORLD HAPPENINGS BRIEFLY TOLD

Temperance will be included in the study course of 600,000 Mississippi public school pupils beginning next September.

The "Friendship" peace pact between Jugoslavia and Turkey was signed recently by emissaries of both countries.

Upward of $100,000,000 has been loaned farmers by the United States farm credit administration since March to help alleviate mortgage troubles of agriculturists.

"There can be no question of an all-Irish parliament," declared Viscount Craigavon, premier of Ulster since the Irish partition, in a statement two days before polling in the northern Ireland general election.

Sun Ch Ii Chiang, secretary of state in the Domin on cabinet, recently left Mukden for Hsinking, capital of Manchukuo, to attend the Lady Hosokawa, for a holiday cruise through the West Indies and to British Guiana.

After entertaining thousands of Chicago and foreign visitors with picturesque smoke, Hadj Mohamed, 65, returned to his native Tunis, Africa, only to be frisk by him by one of the reptiles.

The American Library Association, which includes members in Canada as well as the United States, has chosen Montreal for the 56th annual convention. It is announced The convention will be held in June, 1934.

The tariff board has ruled that roasting peanuts is a manufacturing process and therefore subject to duties. The board turned down an appeal made recently by the Canadian Fruit and Vegetable Association for a contrary ruling.

Dr. Alan Blair, Canadian member of the medical faculty at University of Alabama, who recently allowed a "think widow" spider to bite him in the interest of science, has now fully recovered and plans to continue his experiments.

Canadian cats possessed special hunting qualities and were therefore employed by the war office for the reserve supply depots. Captain A. Hall-Cooper, Canadian secretary to the war office, explained in answer to a question in the British House of Commons.

Wins Poultry Prizes

Hinds Irvin, Prairie Shelley Player Is Winner of Powder

Hinds Irvin, youth of the Vermilion Maple Leads hockey team, knows how to raise smart poultry as well as smart hockey players. He showed the best Wyandotte cockerel at the Royal Winter Fair and captured sixth and eighth prizes with a hen and a pullet.

This is the second time the well-known sportsman has walked off with honors for himself at the Royal. He showed for the first time last year, and this time won third and fourth prizes in Wyandottes. Mr. Irvin hails from Regina, and his win making the first time this prize has been taken by the west.

There are others in the sports world who chase pucks in the winter and raise chickens, cows and horses in the summer, it was learned. Russ Bell, of the Maple Leafs, Mr. Irvin said, has a ranch at Regina. The famous Boston Bruins hold-out, Eddie Shore, and the Cook Brothers of the New York Rangers are neighbors, as distances go in the west, of the Irvin ranch.

Mr. Irvin has been raising chickens for 22 years—ever since he determined a profession for Regina lower than safety, Hamilton.

He also raises racing pigeons and Great Danes.

"I'm counting both to get the Legion cream pool some day," he said.

A Hungry Pachyderm

The following is an estimate of what the London Zoo needs for food for the animals: Apples, 8 tons; oranges, 1 ton; currants, 10 cwts.; potatoes, 32 lbs.; oranges, 14,000; meat, many tons; egg yolk, 140 lbs.; nuts, 20,000; grapes, 150 lbs.; condensed milk, 18,000 lbs.; and 600 gallons; dates, 15 cwts.; nuts, 15,000 lbs.; biscuits, 15 tons; honey, 81 lbs.; bread, 6 tons; vegetables, 10 tons; fish, 15 tons.

Prince Has Model Baby

Granddaughter Of Ambassador At Bakersfield, California, Just Adorable

Being a rosy-cheeked schoolmaid in an Adamless Eden is no great attraction for any woman, ancient or modern, according to the theory of Sheriff Cox Wallace, of Kern County, California, himself a typical western sheriff and a first-class cowhand.

"They will get tired of it," commented Sheriff Wallace, on a visit to the new State Prison for Women, which includes a model dairy. The sheriff's comment was prompted by the arrival of thirty additional women prisoners from San Quentin. The first contingent of 26 women arrived at the new institution last month. The prison w it soon provide sanctuary for 145 women prisoners.

The model reformatory is in a secluded valley fifty miles east of Bakersfield in the mountains.

Each inmate has an attractive room, and each dormitory has a separate kitchen and dining room.

The group of buildings was erected at a cost of $500,000 on an 1,800-acre farm which the women will operate.

Recipes For This Week

(By Betty Barclay)

WASHINGTON PIE OR PAN PAT

2 cups cooked prunes.
¼ cup sweetened condensed milk.
½ pint whipping cream.
2 oranges.
12 candied cherries.

Remove pits from prunes and cut into small pieces. Peel oranges, remove white membrane and cut oranges into small pieces. Cut eight cherries into small pieces, saving four to decorate ice cream Whip cream. Combine prunes, oranges, cherries, and condensed milk, into thoroughly. Fold whipped cream into mixture. Pour into refrigerator pan, decorate top with remaining sliced cherries, place in freezing unit and freeze three or four hours.

QUICK CABBAGE

1½ quarts shredded cabbage.
1 cup water.
1 cup cream or rich milk.
2½ tablespoons butter.
2½ tablespoons flour.
2 teaspoons sugar.
Salt and pepper.

Cook the cabbage for two minutes in the three cups of hot milk. Add the cup of cream or rich milk, the tablespoons butter, flour, sugar, salt and pepper. Cook rapidly for three or four minutes. The result is a crisp vegetable, delicate in flavor and color.

SUNDAY SCHOOL LESSON

DECEMBER 10

PAUL IN CAESAREA

Golden Text Herein I also exercise myself to have a conscience void of offence toward God and men always.—Acts 24 16

Lesson Acts, Chapters 21 26.

Devotional Reading: Psalm 2 1-8.

Explanations and Comments

Arrested By Tertullus, 24 1-9. Lysias, the chief captain, had charged Paul's accusers to appear against him before Felix. Within five days the high priest Ananias with a deputation from the Sanhedrin arrived in Caesarea Paul was summoned for trial. Tertullus, the advocate whom the Jews had engaged, presented their case against him. After his set words of flattery for Paul, even unpressing gratitude for his reforms, Tertullus accused "this pestilent fellow" of three things inciting disturbance amongst the Jews throughout the Roman Empire an active against the Nazarenes as an offence against the law of Moses and desiring to profane the temple. Lysias then appeared and gave his evidence in favor of Paul, even confessing gratitude for his reforms. Felix, however, put off the decision, declaring he would wait until Lysias came to Caesarea to hear further evidence.

Paul Pleads, 24 10-21. When Felix made a gesture signifying that Paul should make his defense, Paul with quaint dignity answered the charges that had been brought against him. He began in a courteous way, saying that he spoke with great confidence because Felix had judged for many years and was well acquainted with the state of affairs. Contrary to the usual beginning was the fulsome flattery of the opening words of Tertullus.

Then Paul denied that he was a disturber of the public peace (the first charge made) and that he had been but twelve days since he came to Jerusalem for the express purpose of worshipping there, investigation could be made and no proof of his conduct charge would be found.

That he belonged to the so-called sect of the Nazarenes Paul acknowledged, but he was not an apostate from the Jewish religion. Contrary to the charge, verse 21, for he served the God that had believed the law and the prophets. "The law and the prophets" stand for the Old Testament writings. Christianity, the Way, was not a new religion in Paul's mind, but the development of Judaism. "To believe the Bible is something more than to believe a letter but sometimes something different. It is to believe what God intended by the letter. If the Scriptures taught circumcision as the only means of grace, then to believe in God intended by the letter was to be circumcised. If they taught animal sacrifices, then to believe in God was to offer animals. He knew the Bible as no one else in that day knew it, and defined the object of the law (Romans 3 24). He made the students between his teaching and that of Moses (Romans 3 31; Galatians 3 21).—James M. Stifler.

Paul believed in the resurrection of the just and the unjust, as did the Jews before him. Paul claimed the ground of his belief. Paul strove to have a clear conscience toward God and toward men.

"I am alone with my conscience in the place where time had ceased to be measured and my former feelings in the land where the years increased, And I felt that I should have to answer

The question it put to me.
And to face those questions and answers
In that dim eternity."

Officials Strong For Newspaper Advertising

Sale Of Man Publicity Board Pleased With Results

Newspaper advertising has so well paid the Isle of Man this year that the official publicity board is asking the Manx Government for an additional sum of $7,500 for advertising next season to supplement the customary grant of $25,000 which legislature annually makes for this purpose.

Publicity board officials report they have never previously received so many applications for guides to the island in one year.

W. A. Cregeen, the secretary, said the efficiency of a judicious newspaper advertising campaign in attracting visitors had long been proved by all boards. It was not just a matter of chance—the results could be counted upon.

A Real Bargain

Sandy Macpherson and Maggie, his wife, stopped in front of a restaurant window in which was hung a card bearing the words: "Luncheon From 13 to 2 p.m., 1s. 6d."

"We'll have our lunch here, Maggie," said Sandy. "Two hours' steady eating for a shilling and six pence is no' sae bad."

Production in Poland is now above the high of 1929.

A Partner For Discussion

National Chancellor Defends To Germany Says Sir John Simon

Sir John said there could have been no procedure more calculated to "drive the iron into Germany's soul" than to have told her that withdrawal from the conference made no difference that the convention would be completed and then she be asked to sign on the dotted line.

"Germany," said Sir John, "is not a target for dictation; she is a partner for discussion."

Hit and dthe government mire-dy has taken steps to play its full part in endeavoring to promote diplomatic conciliation.

The foreign secretary told the legislators:

"We have already made it plain to the French Government unhappily that government fell last night, but I don't believe it will regret that the French policy will change—that if she saw her way to enter into closer consultation with Britain, that would have our complete good will in doing so.

The British Government, Sir Joan said had communicated to Chancellor Hitler of Germany "that the whole of our influence would be used for the purpose of trying to maintain the spirit of negotiation and co-operative action instead of keeping Germany at a distance."

We also," said Sir John, "have communicated to Italy how well satisfied we were to learn she agrees with us in keeping the conference in being, and now satisfied we were that the present proposals, which Italy has been urged on us, was the correct procedure."

Voice Of Firestone Returns To The Air

Lawrence Tibbett And Richard Crooks To Be Heard Over N.B.C. Network

On Monday evening, December 4th, another series of outstanding radio concerts was inaugurated by the Firestone Tire & Rubber Company.

The many radio listeners who appreciate the finest in music and who enjoyed the Firestone concerts in the past will be pleased to know that Lawrence Tibbett, leading baritone of the Metropolitan Opera Company, and Richard Crooks, noted tenor, have been re-engaged and will be heard alternately every Monday evening throughout the winter months. As in the past, their repertoires will include "A Song For Everybody." They will be accompanied by the Firestone Symphonic Orchestra under the baton of William Merrigan Daly, brilliant young conductor and protege of Walter Damrosch.

In addition to numerous requests, Harvey S. Firestone, Jr., will resume a series of short dramatic and educational talks which created such favorable comment two years ago.

"The Voice of Firestone" will be broadcast over a coast-to-coast N.B.C. Network, CPCP, Montreal and CFCY, Toronto, at 9:30 p.m., Eastern Standard Time and again at 8:30 p.m., Pacific Coast Time for the Western Provinces.

Souvenir Of The War

Only Thing One Englishman Had Was Love Certificate

As the result of a chance encounter in Charing Cross post office a week or two ago, I dined the other night with an old comrade of the war.

This gentleman, though he served as a private in the ranks of the same battalion as myself, was then, as he still is, a man of considerable wealth. He has a fine house in Mayfair, a very pleasant country place too, several cars, and a big staff of domestic servants, including a smart ex-service chauffeur. We had not met since going over the top together in 1918, on an occasion that landed both of us on a stretcher. After dinner the talk was all of old army days.

At last my friend remarked he had many souvenirs, in addition to some fifteen-year-old cigars, of the Great Adventure. "Chaps then," he said, pointing with his cigar at a small framed document on his smoke-room wall. It was a brave certificate, duly signed by an army M.O., vouching that my host was "free from vermin and scabies."—London Correspondent Ottawa Journal.

PASSING OF GENERAL SIR ARTHUR CURRIE

Montreal, Quebec.—Sir Arthur Currie, commander-in-chief of the Canadian corps in the great war, died here May 30. He was 57 years old. Since 1920 he had been principal and vice-chancellor of McGill University. Death occurred at 2 30 a.m.

Sir Arthur was taken to hospital May 7 suffering from blockage of a blood vessel in the left leg.

The famous soldier made an impressive last fight. Pneumonia developed Sunday to complicate his condition, however, and hope had to be abandoned.

Sir Arthur's distinction was chiefly due to his success as a soldier and a commander, but capacity for organization led to his reputation being further enhanced after he became head of McGill.

Arthur William Currie was born in Napperton, Middlesex County, Ont., Dec. 5, 1875. He went to the Pacific coast in 1894 and soon took an interest in military affairs in Victoria. He went overseas with the rank of brigadier-general in command of the 2nd Canadian infantry brigade. In September, 1915, he was appointed commander of the 1st Canadian division, which post he held until he became commander-in-chief of the Canadian corps.

Basden Lady Currie, Sir Arthur is survived by one son, Garner Ormsby Currie, a student at McGill, and one daughter, Mrs. A. E. Carmichael, wife of a well known architect here. Lady Currie was Lucy Sophia, daughter of Mr. and Mrs. William Chaworth Hamilton, of Hamilton, Ont., and Montreal.

In 1917, after the battle of Vimy Sir Arthur became commander-in-chief and received his 13th K.C.M.G. He had received the first order of Knighthood Commander of the Bath, in 1915 following the second battle of Ypres.

The tragic victory of Passchendaele was won in November, 1917, and he organized the preparations for the 1918 offensive. On August 8, 1918, Sir Arthur led the Canadian corps—developed to a high state of efficiency—at the battle of Amiens and the victorious advance. The battle of the Canal du Nord, north-ea the most brilliant feat of arms in the war, was planned and executed by the Canadian commander.

Rescue Three Passengers

Air Steward Leaps Into Shoulder Wind "Plane Forced Down

Windsor, Ont.—Heroism of Miss Kathleen Smith, Chicago, air hostess, helped the rescue of nine passengers and two crew of a Detroit-bound American Airways plane which crashed through the ice on Lake St. Clair after being forced down by engine trouble. Standing in water up to her neck, Miss Smith assisted the passengers to climb onto the wings of the plane, where they remained until rescuers arrived.

Passengers were loud in their praise of Miss Smith, who had been with the company only six weeks, and Pilot Smith for the careful way in which he "pancaked" his machine to landing.

Ice retarded rescuers who hastened to the scene. It was necessary to break a channel to the stranded 'plane and for about 20 minutes the passengers and crew watched the battle with the ice until the boats reached the side of the 'plane. Thoroughly chilled and most of them drenched, the 13 were rushed to a cottage near the river side and given attention. No one was hurt in any way.

Limit On Dumping Duty

Ottawa, Ont.—An order was issued by the Department of National Revenue late Wednesday that Canada would not impose a dumping duty to offset depreciated currencies of foreign countries unless the foreign currency was at a discount of over five per cent. in relation to the Canadian dollar. This will have a far-reaching effect in connection with importations from the United States.

Market For Liquors

United States To Seek Exchange Of Commodities Abroad

Washington The United States will give Canada and other countries a market for the f iquors in exchange for a place in our surplus farm and industrial products.

Governmental trade agreements are now in process of negotiation with several countries.

Governmental officials made this known at a hearing on a code for importers that would give the federal alcohol control administration authority to limit the volume and origin of wine and spirits imports on a quota basis.

Mastering the administrative machine to be in complete control of the Senate situation December 5, the repeal drive that will supersede the 18th Amendment by Dec. 5 will be occupied by managers of greeting from various parts of the empire.

Finally, from 10 to 10 05 a.m., there will be a message from Buckingham Palace.

The Canadian radio commission has arranged to bring the program to Canada by trans-Atlantic cable and will distribute it over the network wires to broadcasting stations in all parts of the country.

Stock Awards

Should Be Awarded On Basis Of Real Value

Toronto, Ont.—Unless prices on the basis of real value are given, the purchase of agricultural exhibitions and the assistance given them by the federal government fall said Hon. Robert Weir, Minister of Agriculture, in addressing a luncheon of exhibitors of the Royal Winter Fair here

"For example, if two men set up with a horse from midnight until the time he enters the ring, making one bad hock look like the other good one, and the horse wins, it isn't the horse that wins, it is the two men who set up with him," remarked the minister.

Mr. Weir said exhibitions should strive in their prize lists the importance of breeding qualities. Unless the get of a sire or dam showed some of the characteristics that made the sire or dam a prize winner, the awards were not made on a true standard he said.

The federal minister addressed a distinguished gathering that luncheon. Hon. W. C. Bachle, Saskatchewan Minister of Agriculture, and Hon. George Hoadley, Minister of Agriculture for Ontario.

Investigate Lynching

Governor Of Missouri Says There Was No Investigation

St. Joseph, Mo.—At the direction of Governor Guy B. Park, who declared there was "no investigation" for the mob's action, a state investigation was begun here in an attempt to fix a responsibility for the lynching of Lloyd Warner, 18-year-old negro accused of assaulting a young white woman.

William Sawtor, assistant attorney general who was sent here from Jefferson City to conduct the inquiry.

"If the responsibility for the lynching can be found," said attorney-general Roy McKittrick, "this office will assist and aid in the prosecution."

Governor Park, who ordered out a National Guard tank company in a vain attempt to save the negro from the mob of 6 000 which stormed the county jail and burned Sheriff Otto Theisen to surrender Warner, said in a statement Wednesday:

"I have no objection to punishment of crime or to attempt to obtain altered civil rights, in always and that of course is the duty of government. To condone such an offence is to encourage lawl-ssness, deny the processes of the courts and the power or constituted authority."

Ready For Arms Talk

France Willing To Negotiate With Hitler Through Ambassadors

Paris, France.—France is ready for arms talks directly with Chancellor Adolf Hitler or through the ambassadors, foreign office officials indicated, but all decisions they think, must be made in consultation with others of the war-time allies.

Premier Mussolini's presence to discuss the four-power pact signed by France, Germany, Italy and Great Britain, and the British discussion to mediate, it was said, tend to direct negotiations because France is anxious to avoid little group meetings where she would be urged to sign on the dotted line.

Premiers May Meet

Victoria, B.C.—Premier T. D. Pattullo, of British Columbia, sent telegrams to Premier John Bracken, of Manitoba, Premier J. T. M. Anderson, of Saskatchewan, and Premier J. C. Brownlee, of Alberta, inviting them to meet here early in December to discuss relief and unemployment.

The Claim Is Disproved

Toronto, Ont.—R. H. Neil appeared before the pensions commission here and asked for a pension increase for loss of his hair during the war. He claimed fever contracted in the trenches removed his hair Neil maintained he should be recompensed for the cost of five wigs.

1933 ARTHUR D. CURRIE

Commander-in-Chief of the Canadian Army Corps in France during the Great War, who died in Montreal on Nov 29

Fire At Indian School

Laundry And Hospital Of Alberta Institution Were Destroyed

Grouard, Alberta.—Fire, which broke out in a laundry room, destroyed the laundry, hospital and two adjoining buildings at the St. Bernard Indian Settlement, a Roman Catholic institution here.

School authorities and the bishop's palace were saved by wet and work on the part of boys and girls and residents of the settlement, according to word reaching here. There was no loss of life.

St. Bev. Bishop Gay, in whose diocese the fire occurred, is receiving treatment at St. Boniface, Man.

Christmas Broadcast

Re-lb From Church Of The Nativity At Bethlehem To Be Heard

OTTAWA, Ont.—The Canadian radio broadcasting commission arranged to co-operate with the British broadcasting corporation on its plans for on emp re Christmas broadcast program.

Under the revised plans of the British broadcasting corporation, one part of the empire broadcast will take place December 24 This will be a broadcast from Bethlehem of the bells of the Church of the Nativity. It will come through at 2 p.m., Eastern Standard Time, in Canada.

On Christmas Day the broadcast will start at 9 a.m. (E.S.T.), in Canada. The first 65 minutes will be largely taken up with a description of the celebration of Christmastide in various parts of the old land. The following 15 minutes, until 10 a.m. (E.S.T.), will be occupied by messages of greeting from various parts of the empire.

Finally, from 10 to 10 05 a.m., there will be a message from Buckingham Palace.

The Canadian radio commission has arranged to bring the program to Canada by trans-Atlantic cable and will distribute it over the network wires to broadcasting stations in all parts of the country.

Alberta Pool Earnings

Figures Show Net Amount Of $170,-854.64 For Year Ending July 31

Calgary, Alberta.—Operations of the Alberta Wheat Pool for the business year ending July 31 showed earnings of $907,848.88. It was reported to the annual meeting by R. D Purdy, general manager

Net earnings were $170,854.64, after providing $536,000 04 for depreciation and payment of $283,430 interest to the Alberta Government in connection with the 1930 overpayment.

Total handlings of the pool during the year were 480,200,000 bushels showing an average of 160,333 bushels per elevator. In 1932 the amount handled by pool elevators was 91,411 bushels per elevator.

Settlement Plan

British Farmers May Be Established In Manitoba Area

Edmonton, Alberta.—Two or three group settlements of British farmers may be established in Manitoba as the direct at no cost to the city, provincial or federal governments, according to Brig.-Gen. M. L. Hornby, of Letchworth, who is visiting in the city He is interviewing various authorit es in regard to proposals for assisted British settlement.

The general said that no locations in Alberta had been selected as yet, but that two locations had been approved in Manitoba and four in Saskatchewan.

DUKE OF ATHOLL CONVICTED OF BREAKING LAW

Here we see the Duke of Atholl (left), chatting with a police sergeant outside Bow Street Police Court in London, after he had answered a summons alleging an infringement of the Lotteries Act of 1823. The Duke conducted an Appeal Fund for British hospitals and issued tickets. He was found guilty and his conviction cost the 66-year-old Scottish peer a fine of £25 and court costs of 33 guineas, whereas his "appeal" took in $746,732, more than one-third of which was handed over to hospitals. The Duke will appeal the case in a higher court.

COMMITTEE TO URGE FEDERAL MARKETING PLAN

Toronto, Ont.—Representing the agricultural interests of the Dominion, a committee was appointed by the Dominion-wide marketing conference to press for federal marketing legislation after the conference had passed a resolution calling for representations to the federal minister of agriculture.

The conference closed with the passing of the resolution.

The committee includes A. Amess, president of the United Farmers' Co-Operative Company, Limited, with H. H. Milliken, K.C., and H. B. Cowan, Peterborough, as chairman, secretary and assistant secretary respectively.

Eastern members are W. J. Lendrum, Winnipeg, A. M. Mercer, Vancouver, P. Robbin, Saskatoon.

The resolution asking the minister of agriculture to "forthwith cause to be prepared a form of products marketing measure which, based on the principle of legislative authority extends, will enable the producers of agricultural products in any part of Canada to take advantage of legislation that may be federal or provincial, embodying the principles of the British Agricultural Marketing Act and that such federal legislation, before enactment, shall be submitted to the committee appointed by this conference to persuade the enactment of such legislation."

Imperial Co-Operation

Strong Policy Is Necessary To Overcome Difficulties

London, Eng.—"We must recognize that for the time being world co-operation is impossible, and concentrate upon devising ways whereby we of the British Empire can help one another," is everyone Immediate difficulties and get our people back into employment," declared Stanley Bruce, Australian High Commissioner in Britain, in a speech before the Empire Industries Association.

Speaking of the world conference and of world co-operation made a driving force embracing the whole Empire's imperatives, the former Australian prime minister. He suggested creation of a small group of the best possible men available, to devote all their time to immediate study of a strong policy of imperial co-operation.

Obstacles to trade which have arisen in the form of prohibitions, quotas, and tariffs, Mr. Bruce went on, and the development of Japan with her efficient standards of living had created a new problem. The paramount necessity at present was a strong policy of imperial co-operation, in his opinion. He suggested such a group as he mentioned might be provided over by a British Cabinet minister, if that were deemed desirable.

Trade Is Doubled

South Africa's Special Agreement With B.C. Brings Results

Vancouver, B.C.—British Columbia trade with South Africa has almost doubled since the special trade agreement went into effect June 30 of this year, and most of the business has flowed through the port of Vancouver, according to a report just issued by the Vancouver board of harbor commissioners. In July, August and September, the volume of the export this year was $2,066 000 as against $1 079,000 in the corresponding period of 1931.

Wheat Shipped To Churchill

Prince Albert, Sask.—Two million four hundred bushels of wheat have been drawn from this division of the Canadian National Railways and is now in storage in the Churchill elevator The grain was supplied by the Saskatchewan wheat pool and will be shipped out by the Hudson Bay route next summer.

Wood Siberia Continued

Edmonton, Alberta Express a approval by resolution that Canada delegates to the league of nations assembly went on record as be ag opposed to the private manufacture of armaments for profit, the fourth annual peace conference in Edmonton urged the government at Ottawa to continue its efforts in this direction

NOTED ARTISTS RESUME BROADCASTING

LAWRENCE TIBBETT

RICHARD CROOKS

The many radio fans who appreciate good music will be glad to know that Lawrence Tibbett and Richard Crooks resumed broadcasting on Dec. 4th and will be heard alternately every Monday night throughout the winter months over the N.B.C. Network.

Has Limited Number Of Feminine Workers

Women Presently Attending Their Employment In Public Offices

Premier Manning at last abolished the employment of women in public offices in an order demanding that the number of feminine workers in many state offices be limited to five per cent of the total number of workers on the payrolls.

This limitation applies to state, provincial and communal offices and to state financial concerns. In "inferior" forms of employment stress is laid principally to telephone operations, grocery and dairy carrier jobs per cent, if in total.

The order makes home to the official to found that has "nothing to be done the fact are to total home and other families.

Employment in shops and the printed was not affected by the order.

A Curious Town

Buchans Mines, Newfoundland, Has Been Most Astonishing One

One town that's 100 per cent. alive is Buchans Mines, Newfoundland. There are no dead there, because people who die are shipped home for burial. The town has few natives—it is scarcely seven years old—and it has no cemetery.

Buchans Mines is a curious town in other ways. Most of its population of 1,500 work for the Buchans Mining Co., and outsiders meet with a cool reception. It is a "closed town" and permission must be secured from the company before any visitor may take up residence.

The place has only two furnaces. These form a huge central heating system, from which steam is piped underground to almost all the town's homes. Although the town is still in infancy, almost all modern conveniences are available to its residents.

Develops Cheap Method Of Producing Hydrogen

Engineers Claim Invention Of Cheap Electrolytic Industry

Working in an improvised prison workshop, a convict in Folsom Prison, California, has developed a system of making hydrogen at a cost experts estimate is one forty-fifth the present commercial production charge.

Engineers who witnessed a demonstration by the convict, James F. Burke, said his method may revolutionize the hydrogen industry.

Using four sized dressing jars, a single dry cell and other home-made equipment, Burke made hydrogen in a small room off the cellar of Warden Court Smith.

The convict claims to have developed a "separating" solution which hastens the decomposition of water into hydrogen and oxygen, its principal elements.

Poison Ivy

Annual Contest With The Plant Necessary To Be Affected

The virulent essence of poison ivy does not vaporize and therefore cannot be carried from the plant in any manner. One must have actual contact with the poison of the plant to be affected.

This is the conclusion of a study of poison ivy being made by Washington University scientists in collaboration with the National Research Council of Canada.

In the folklore of poison ivy the many absurd theories of persons who find even the wind blowing over the plants will poison them. The Washington students there have must be susceptible substance to act as a medium from plant to person.

Self-Control Of Men

Power Which Enables Them To Govern Outside Influences

Men and women are not like leaves, always ahead by every wind, or like

[illegible]

W. N. U. 2000

Streamlining Breaks "Horse-and-Buggy" Precedent

Above, Left: An American design embodying wind-tunnel tests, and which makes a complete break from all horse-and-buggy precedent. Engineers have found that a blunt nose and tapering body offers the least resistance to wind, conserves fuel, places all the passengers forward of the rear wheels and provides oil channels improvements that eliminate pain and ripples in riding.

— — —

Engineers of three of the world's great engineering nations are devoting men and sums of their time to the study of aero-dynamics, or streamlining. The Institute of Aeronautical Research pended there will be revolutionary changes in the automobile of the future.

Registered Seed

Westerners Capture Many Prizes At Toronto Fair

Western Canadians obtained many prizes in seed exhibits at the Royal Winter Fair.

In the registered or certified seed section Andrew Gibbs, of Okotoks, Alberta, was first in barley, two-rowed varieties approved for registration, including Hannchen Charlottetown 80, Duckbill and Canadian Thorpe, James Hogg, Ellrow, Sask., was second.

Other results were:

Clover and grass seed certified (mixed):

Sweet clover (2)—1, W. J. Bryant, Bayle, Alberta; 2, James Hogg, Melrose, Saskatchewan; Alsike (14)—1, Henry Dahl, Dunham, Alberta.

Alfalfa (19)—1, A. Terkovich, Winnipeg Beach, Man.

Western rye (3)—1, Arthur M. Smith, Wembley, Alberta; George Shell, Wembley, Alberta.

Brome (1)—1,B. Hlrsop, Hanlan, Alberta.

Crested wheat grass—A. Gribb, Brooks, Alberta.

Statistics Reading Matter

Books For Rural Areas Of The West Through Agency Of Saskatoon Public Library

Starting a long-list scant of country people for literature with which to while away the monotony of winter evenings, 5,000 books soon will be made available to rural areas of Saskatchewan by the Saskatoon Public Library.

Sponsored by Angus Mowat, local librarian, this coming distribution of 5,000 volumes may be only the start of widespread distribution of books to many areas of the province. Canadian Pacific and Canadian National Railway Companies have agreed to carry second-hand books free of charge from eastern Canada to the west.

Inauguration of the scheme was [illegible] in this week by Mr. Mowat and in the east by George H. Locke, chief librarian of the public library of Toronto. Mr. Locke has promised his self in the plan after hearing of the great need for reading material in the west through a letter from Mr. Mowat.

Rapid World Alliance

To Meet In Berlin, Germany, Next June

The Rapid World Alliance announced it would hold its next meeting in Berlin, Germany, Aug. 5 to 15. The convention is held every five years.

Thousands came to see some very fine exhibits of rapid transit vehicles in Germany, were impressed when the executive committee decided that no rooms were required to prevent carrying out the original plan of meeting in Berlin.

Scientific Research Methods

British Marketing Act Is Also Applicable To Canada

Principles of the British marketing acts were applicable to Canada also L. F. Burrows, Ottawa, secretary of the Canadian Horticultural Council, told the Canadian agriculturists' meeting in conference at Toronto.

"In this country, as elsewhere," he said, "legislation has proved necessary to put the standardization of farm produce on a national basis."

Although efforts are afforded, the producer has most at stake and the most to lose by continuance of the present unsatisfactory conditions, something that he will employ her. He cannot afford a model, but promises to think it over.

(Now Go On With The Story)

Pictorial Discovery

British Columbia Pilchard Cast Shows Of Sardine

British Columbia and Europe are a long way apart, but there are family ties between some of their fish.

For instance, British Columbia's pilchard, a tasty food, is a close relative of the trans-Atlantic fish whose young are the sardines of European commerce.

Poplar is generally known as a perishable wood, difficult to dry; this is in a sense, true. In the green condition poplar may easily become infected with fungi, with consequent rotting of the wood; this is particularly true of the sapwood. The convincing of certain precautions in the interval between the felling of the tree and the conversion of the log into lumber will prevent infection. By the observance of good drying practices, the manufactured lumber may be kept sound without much loss through degrade caused by either rot or twisting and warping.

The Forest Products Laboratories of the Forest Service, Department of the Interior, Ottawa, have devoted a good deal of time to a study of the possibility of developing additional uses for poplar, and have assembled considerable data of interest to conservers and producers of this wood.—St. Thomas Times-Journal.

Hunting With Camera

Visitors To Africa Get More Excitement Than With Guns

Lion hunters in Africa have discarded the rifle for the movie camera, according to Robert Mendel Kohn, game-control officer of Cross Plains at New Orleans, formerly of Rantlier, Africa.

It is more exciting and dangerous to hunt lions with a camera hence hunters have abandoned guns except as defensive weapons in case of attack," Kohn said.

Though not a hunter himself, Kohn said he enjoyed the sport of tracking down game. He was confined in Africa five years, and spent 22 years in the British diplomatic service.

Registry Of Aircraft

Great Increase In Number Of Machines Inspected By Lloyds

Lloyd's has been known throughout the world for over 170 years for its registers of shipping. But recently it has assumed to great importance that the Committee of Lloyd's has established a register of aircraft. Up to the end of June last, 453 aircraft were inspected for renewal of certificates of airworthiness, and 32 of these machines were found to be unfit for flight. There were also 21 others initially accepted, of which 17 were withdrawn, leaving numbers of 70 and 25 machines respectively in each class of inspection as compared with the previous twelve months.—Toronto Mail and Empire.

Many Uses For Poplar

Possibilities Of Canada's Most Abundant Hardwood Seem Endless

Poplar is the most abundant hardwood in Canada and its fuller utilization is of great economic importance to Canada in the more complete development of her forest resources. Poplar lumber is white in color, light in weight and, being practically tasteless and odorless is used to a considerable extent for wood containers. Flour barrels and apple barrels are being made from poplar staves, and butter boxes also have been made to some extent of poplar though spruce is most generally used for this purpose.

VOL. 1 [illegible]-37 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, DEC. 13th, 1933 $1.50 PER YEAR IN ADVANCE

Fort Saskatchewan Record

Town Council Meeting Held Last Wednesday

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Town hall on Wednesday the 6th December at 8 p.m.

Present Mayor Montgomery, Councillors Lalonde, Magor, Watt, Graham and Heath.

The minutes of the last meeting held were read and adopted.

An application from Mr. V. A. Porter to purchase at $150.00 the vacant warehouse and lots in connection therewith was considered by the Council. Mr. Porter Jr. appeared before the Council in support of the application. After discussion the Council passed a motion setting the price for this property at $200.00. Several offers for this property were rejected.

The Council accepted the offer of Albert Jacobs to purchase lot 32 Blk. 5 Plan G with house thereon for $100.00; $50.00 cash and the balance in monthly payments of $10.00 provided he signs an agreement which was decided upon by the Council.

Letter from Mrs. Dinham of Edmonton, asking if the use of a hall could be secured to give a lecture along behalf Miss early in February. The Secretary was instructed to write and say she could have the Theatre for one night for $5.00 payable in advance. Letters from Superviser of Charity and Relief and the Secretary of the Unemployed married men's Association asking if relief could be authorized for Geo. Robinson and wife in Edmonton, but the Council decided that relief would only be authorized if they returned to Fort Saskatchewan to live.

Eleven application for relief have been approved by the Council.

The report of Dr. Beatty, the Medical Health Officer was submitted.

The Voter's lists for the year ending 1933 was put before the Council.

The following accounts were passed for payment: Calgary Power Co., $117.60 for Streets, $9.75 Town Hall and $1.20 Memorial Hall; Alberta Gov't Telephones $5.50; A. M. Carscadden $2.25; W. A. Graham $6.17; Roberts' Bros. $2.50; Fort Hardware for sanitary buckets $85.00; Western Municipal New new ledger and forms $16.56; J. Larson, coal $40.17; Jones, Graham & O'Brien relief $20.00; J. T. Lalonde relief $13.24; Woodard & Day, legal advice $17.50.

Coming Events

The annual meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Dec. 14th starting at 2 p.m. sharp. Bridge will be played, also exchange of Christmas gifts. All members please turn out and make this Christmas party a success.

Important: Cards will start at 3 o'clock sharp.

******

There will be a meeting of all ladies interested in Curling this season at the home of Mrs. H. Anthey on Tuesday, Dec. 17th.

All ladies wishing to curl are requested to attend so as to make an early start.

******

The Junior Hockey boys are holding a dance in the Fort Badminton Hall this Friday evening. The boys are all of high school age and are holding this dance to raise money for equipment. Here is your chance to help the boys and have an enjoyable time at the same time.

Second Payment for Beets

The beet sugar growers of Southern Alberta have had a second cash payment on account of beet deliveries made to the sugar factory at Raymond. This payment totalled $128,000, and it is expected that the entire payment to the growers for the current season will reach the grand total of more than $600,000 before Christmas. The factory is slicing beets at the rate of 1200 tons daily.

Josephburg News

The local club held its Seed Fair on Dec. 9th, at the Josephburg School with Mr. Hemley from the Department of Agriculture in charge. At 10 o'clock, Mr. Hunley judged the grain and following this he gave an illustrated talk on the judging of grain.

After lunch, the judging competition was under way with honors going to Earle Cranston with mark of 92.5 Wilfrid Mann with 92.5 and Clarence Cranston with 87.5, the rest ranging fairly high the lowest mark being 67.

Following this competition Mr. Hunley showed some pictures of the large terminal elevators at Vancouver, Prince Rupert, Port William and Port Arthur, and also the ways of grain transportation in Argentine.

At 4 o'clock, Mr. Hennig called the meeting of the seed club to order and the following officers were elected:

President, Walter E. Frey
Vice-President, Earle Cranston.
Secretary-Treasurer, R. R. Rippel
Club Leader, R. Hennig.

It was decided that the club grow wheat and oats next year, and anyone wishing to join the club is asked to get in touch with one of the officers at an early date.

Mr. Hunley gave an outline of the history of Grain Clubs in Alberta.

Following is the order in which prizes were received for a bushel of wheat:

Earle Cranston, Clarence Cranston, Carl Unterschultz, Fred Hennig, Wm. Unterschultz, Arnold Frey, R. R. Rippel, Walter E. Frey, Ernest Krebs, Ernest A. Mohr, and Wilfrid Mann.

Fred Hennig also received a $5.00 prize from the Alberta Wheat Pool for the best Standing crop. Wm. Unterschultz got 1st prize for a quart of hand-picked wheat with Carl Unterschultz second and Clarence Cranston third.

School Literary Society Holds 'Smokless' Concert

The Grade 7 & 8 Literary Society under the leadership of Charlie Hunsperger presented a program in Miss West's room on Friday afternoon Dec. 8th.

The Program Committee of the Literary Society arranged a lovely entertainment, Mr. Anderson, principal, consented to the arrangement so that both Public and High School were privileged to attend. The admission charge to everyone was a coin, anywhere in value from 1 to 5 cents. The surprising proceeds of $10.40 were sent to the Farmer, Editor Relief Fund, to bid in Drought.

Thus who entertained and Miss West, for the use of her room, are to be thanked very kindly for their co-operation.

To pick out any outstanding figure would be an injustice to the other entertainers. We are therefore submitting the entire program as follows:

Program

1. O'Canada
2. Minutes of the last meeting
3. Paper 7 & 8, Jean Badger
4. Dance, Kathleen Wootton
5. Recitation, Olive Lawrence
6. Dance Solo, Leola Mann
7. Paper, 11 & 12, Donald McLellan
8. Dance, Pauline Graham, Jean and Edna Sherman.
9. Guitar Solo, Melvin Rashleone
10. Recitation, Jean Rashleone
11. Song-duet, Birdye and Faye Roberts.
12. Paper, Room 5, Tommy Cavendish.
13. Piano Solo, Rita Sherman
14. Dance, Wanda Kolsebern
15. Paper, 9 & 10, Bruce Graham
16. Piano Solo, Hugh Watt
17. Bobbie's Budding Brendan, a 5 piece orchestra, with the following personnel:— Bobbie Graham, Drums, Hugh Watt, Piano, Omer Williams, Banjo, Eric Roberts, Kazoo, Tommy Carscadden, banjo.
18. God Save to King.

St. George's W. A. Elects Officers for Next Year

The annual meeting of St. George's W. A was held at the home of Mrs. Wallis on Thursday afternoon, Dec 7th. Mrs. Wallis in the chair. The Secretary, Mrs. W. A. Graham read the report for the year showing what excellent work had been accomplished in spite of the depressing times. The Treasurer, Mrs. A. Carscadden stated that all obligations had been met with a balance on hand.

The Rector then took the chair for election of officers, taking the opportunity to thank the members for all they had done and for their loyalty to the church.

The following officers were elected for the ensuing year:

Hon Pres. Mrs. C. Bond
Hon. Vice-Pres. Mrs. Wallis
President, Mrs. W. A. Graham
Vice-Presidents, Mrs. Taylor and Mrs. McLellan.
Secretary, Mrs. Alex. Smith
Treasurer, Mrs. A. Carscadden
Junior Supt., Mrs. E. Graham
Dorcas Secretary, Mrs. Von Iffland
Living Message Sec., Mrs. C. Magor
Refreshments were served by the hostess and Mrs. Redd.

Crowds Attend Bible Class Play "Small Town Romeo"

The United Church Bible Class drew two good audiences at the presentation of their play, "A Small Town Romeo", in the Empress Theatre Friday and Monday evenings.

The play, a mystery drama was packed with three acts of fun, and action, with an ending that was cleverly worked out that surprised the closest observer.

It was a huge success and much credit is due to the members taking part in it and to those responsible for the directing.

We could eulogize greatly on this performance, but we believe it fair to say that all did real well.

One needed only to see this concert to realize the talent that is possible to obtain in this town.

The play was directed by Mr. H. A. Watt.

The following took part in the play were as follows:—

Arthur Simmons as Jay Stanford, a brassy young playwrite.
John Gibson as Sly Perkins, the village constable.
Warren Kingsley as Red Williams the village mechanic.
Fred Taylor as Morton Kendall, the village miser.
Arnold Mann as L. B. Lapid, the sly oriental guest.
Margaret Kolsebeun as Betty Braxton, the young owner of the hotel.
Eileen Truby as Sarah Higgens, the spinster maid-of-all-work.
Jewell Butler as Jane Hastings, the village banker's daughter.
Ada Truby as Miss Gaze, another mysterious guest.
Dorothy Mann as Anna Aldrich, the village school mistress.

Miss Rita Sherman gave several splendid piano selections during the evening.

During the first and second act, guitar selections by Homer Wilfrid Lamoureux and Melville Rashleone were enjoyed by the audience.

Mr. H. A. Watt gave a solo, "The Flying Dutchman" between the second and third acts which was well applauded.

A black cat persisted in appearing on the stage although it had no part in the play caused much amusement to the young folks who lined the front rows.

A large number were noticed from the country in the audience.

The Josephburg Sunday School Children will have their Xmas concert on Dec. 24th.

The Nobel committee of the Norwegian Storting (parliament) decided not to award the Nobel peace prize this year.

1/3 MORE ECONOMICAL

Plug tobacco is the smoke for thrifty men—it burns ½ longer in the pipe—gives ⅓ more enjoyment for the money.

DIXIE

ONLY 20c A BIG PLUG

A Happy Warrior

Many letters and postage parcels being delivered to people in Canada and the United States these days bear a little stamp in addition to the regular postage stamps. To a casually increasing extent at the Christmas season these little stamps are in evidence on our mail.

What do they mean? What object do they serve? What message do they bring?

They bring a message of Christmas greetings and good wishes from the sender of the letter to the receiver of it. The regular postage stamp is a purely business stamp, a notation and receipt, as it were, that the carrying charges on the letter or parcel have been paid. But this other little stamp appearing on the reverse side of the letter from the address side is a very personal thing, carrying a purely personal message.

But there is nevertheless a business aspect to these unofficial stamps. The question has been asked, what object do they serve? The answer is that through the sale of these little stickers for our mail, money is raised for our great national purposes in so huge a measure as to be of material importance throughout the year upon the grand division of tuberculosis. And it is at the time when all people recall the Christmas message of "Peace on earth, goodwill toward men," that this little harbinger of hope reaches its annual appearance.

One cent is not a large sum of money, and that is the price of one of these little messages. But when thousands of people buy them, when hundreds of hundreds, and the total sale of the stamps runs away up into the hundreds of thousands and millions, and the one cent pieces roll into the coffers of the anti-tuberculosis associations in hundreds of provinces and states, it means that many people all over this great continent are going to receive preventive treatment against tuberculosis which otherwise they could not obtain. It means that a danger and a menace to every home throughout the land will be diminished and in many homes banished altogether. It means that countless numbers of children will be saved from this dread disease to live lives of good health and usefulness whereas otherwise they would probably fill an all too early grave.

But these little stamps serve still another purpose. They mean more than a Christmas greeting and a simple practical method of raising money for a great health and humanitarian purpose. They remind us that the hearts of the land are hitters and parcels soon a year with a kindly warning. They call us to take note of them; to stop and consider what they represent; and they bring a feeling of responsibility to every home that receives them. They say that we check up on ourselves and our homes once again to ascertain whether or not we are living under conditions, or indulging in habits, conducive to the dissemination or development of disease.

The message of these stamps is to educate people to prevent tuberculosis from getting even a foothold, just as the practical object of their sale is to raise funds to maintain educational preventative agencies all the year round and to provide means of treatment for those who in very earliest stages where it has unfortunately obtained a foothold.

So, to the man, woman or child who has a nasty, persistent cold, the stamp on your mail says: Beware; do not neglect that cold, take steps to stop it at once, and if it doesn't stop see a doctor without loss of time. It says to the boys and girls who get their feet wet, and to their mother, put them wet boots and stockings off, dry and warm those feet. It points a danger of wearing in homes where there is a lack of pure, fresh air, and says: open the windows and let in all the sunshine and air you can, winter as well as summer.

Because the little stamp means so much, carries such important messages and performs such a highly important work, the more of them that are started out on their mission the better. Individual sales of only a little way means how much extra good they have accomplished by placing these stamps on their letters and parcels during the next few days. The few cents they cost will be put to good purpose, and you may thereby be directly responsible for the saving of a life. Don't be sparing with the stamps on your letter into the home of a friend or relative may result in greater care to prevent tuberculosis being taken to that home. Possibly the stamp on a letter received by you from a friend may result in your getting a stamp into some home where this beneficial results may follow.

A business man says it is the content thing in the world to come a hard-boiled person a week. But it is difficult to get your head much.

Health For Young Girls

Happiness For Tired Women

Thousands of women known that rest and sun shine, together with diet and pill, and proficient cultivate life a healthy.

The whole outlook of life is changed when the nervous, sick headaches and discouragement, the pale of cheeks, of weakness and tiredness, the dull eye, the cloud, languid feelings disappear with the use of Milburn's B. B. B. Pills. They tone up the nerves, enrich the blood, and bring the health back to tumed cheek.

Assist For Farmers

Amendments, To Regulations Under Saskatchewan For Act

Saskatchewan's legislature for farmers will receive relief from repayment payments on farm-raised for-housing animals through amendments to the regulations under the Saskatchewan For Act, provided for by order-in-council.

These regulations provide for no collection of royalties on silver black fronts, fisher or marten, bred on a licensed for farm, and provides also for the rebate of all royalties collected on all other furs except muskrat, where sufficient proof is provided that the pelts were from animals certainly raised on the farm.

In the case of all furs with the exception of fox, fisher or marten, royalties are collected, and are subject to rebate in a similar manner to the way in which gasoline tax refunds are made.

The new regulations also make provision for the abolition of fees in respect of permits, although such permits are still required. Such permits will be issued free of charge.

Relief is also given from purchasing pelts. Formerly purchasers were required to pay 25 cents per pelt, but under the new regulations "a fee equal to the royalty" which would be due and payable on such pelts.

Code Of The Hobos

He Had Such Something For Nothing And Knew Much Others

While they lost no time in drawing up a code of fair practice, the Hobo of America has been somewhat at their annual convention find that "riding the rods" of box cars has become a thing of the past. The veteran "bos," who with the new mode rods and the high trucks now in use, has to behave himself or ride the hitch hiker and do not such something for nothing. The code for the "gentlemen of the road" drawn up by the Juvenile Court. Officials was regarded as a colossal task, whether the father or was a consistent offender or a hobo who was a hot-shining man.

She is a firm believer in the sanctity of marriage, and would scale it the different idea. She says a gay is gay divorce, except when one partner in the marriage is a habitual criminal or is found to be homosexual or insane.

Crime conditions have improved very considerably in Britain, Mrs. Bright says. "We are closing prisons in England—not building them," she added.

Reviving The Horse

Used In Steven Hospital When Over-taken The Supply

It is arguable that farmers in the long run can do as much for themselves by co-operation than they can do by devastating the dollar. Students of the agrarian problem know that no small part of the farmer's trouble is due to the gasoline engine, which has been displacing the horse for a number of years past, and is not yet for his day and feed. Millions of acres have thus gone out of cultivation. In 1920 there were more than 30,000,000 horses on the nation's farms. In 1920 they were down to 13,000,000.

Since the depression the horse has been coming back. A bulletin of the Horse Association of America says that there were on March 1 this year, 15,- 250,000 horses on the farm. Receipts of horses at the public stock yards in the first eight months of this year were nearly 25 per cent. higher than for the same period last year. Can depression, agreement it but when horse prices are down it costs less to feed horses and makes them to feed tractors.

Then has its revenge. Tractor agents in the past no doubt warned the farmer against drought animals which ate their heads off. The farmer or new wants all the horses—and he does not have to—he can find to eat their heads off. He still has foodstuffs to sell.—New York Times.

Alcoholic Poisoning

Many Deaths From This Cause Says University Professor

Prof. Joseph Barcroft, assistant professor of chemistry at the University of Toronto, addressing the Women's Canadian Club, said that "people died of alcoholic poisoning than all other causes added together.

"In the year 1918 there were 7.8 deaths per cent. of alcoholic beverage; 75 per cent. died from heating or bathtub gin. He pointed to the potency of the beverages consumed and the ability to launch a man out—something which was a fact but which was not yet understood by chemists. The danger in drinking one's own wine or alcoholic beverage was obvious he said.

Germany is suffering so tremendously large volume into small forces.

Juvenile Law Too Lenient

Women Magistrate From England Has Had Seven Years' Experience

Seven years' experience as probation officer at the Juvenile Court in St. Pancras Division, London, England, has led Mrs. Philip Bright, J.P., to believe that children who break laws are often treated in too lenient a fashion, particularly when they repeat offenses. "I admit," said Mrs Bright when interviewed at Montreal that I am one of the few women judges who has ever ordered a boy to be birched But the boy was a repeated offender and I must say that after he had been birched he never again appeared in the court before me."

No children appear in juvenile court in England until they are eight years of age and are considered responsible until they reach 17, Mrs Bright pointed out The whole atmosphere of the juvenile courts is one of informality, she explained the police officers last flying in civilian clothes instead of the ever-inspiring blue and brass. She felt this appearance acted as a hemorrhage as it tended to do away with much that would oppress the normal boy or girl with the majesty of the law which they had broken.

As long as the mother was "all right," Mrs. Bright said, it was felt that the children of the family could easily be led back into paths of rectitude from which they might have strayed, regardless of the character of their father But if the mother was "no good," the work of Juvenile Court Officials was regarded as a colossal task, whether the father was a consistent offender or a hobo who was a hot-shining man.

She is a firm believer in the sanctity of marriage, and would scale it the different idea. She says a gay is gay divorce, except when one partner in the marriage is a habitual criminal or is found to be homosexual or insane.

Crime conditions have improved very considerably in Britain, Mrs. Bright says. "We are closing prisons in England—not building them," she added.

Multi-Colored Bricks

Building Bricks Of Various Hues And Tints Now Having Vogue

In recent years there has been a marked improvement in England, particularly in the south, in favor of multi-colored rough-textured bricks, states a report, issued recently by the Department of Scientific and Industrial Research, on the building brick industries.

The colors range from white, yellow, tan, brown, red to purple, blue, black grey with variegated and mottled tints. Descriptions such as "autumn tints," "cherry red," "brindled," "dark strawberry," "orange red flame," "silver grey," "golden grey," "pot-pourri," "brown mottled brindle," found in catalogues, give an indication of the wealth of vivid colorings.

But these are greatly outdistanced by the Americans. Urged by the recent enthusiasm of architects for color, they have achieved a remarkable range of gradation in light shades—white, cream, stone, limestone, grey to match natural stone, iron buff, golden buff, as well as in vivid tints and tangerine, mottled red, gray, green, rose, blues and purples. They have reproduced the tints of the specimens of Italian marbles and colors peculiar to the pueblo provinces was grown both at Middlebury, Vt., and at Port Credit, ponent Hills of west, on grey, wooded soil, and samples compared, "very strong difference" were found.

Whole quality of the grain needs good brand when grown at Edmonton, several test off considerably in good quality when grown at Port Credit more striking were the differences after the flour had been stored for six months. The Port Credit flour was "dead," and unfit for use. The Edmonton-grown samples had deteriorated sadly, only a very few of either the old or new varieties at Edmonton being found making first class bread."

The fact that some variation do undoubtedly both their initial quality and their quality after storage, even when grown under these conditions, Dr. McCalla considered, was of great importance to the plant breeder, who must now do not his object to produce varieties which possessed this valuable characteristic. In the meantime, cereal chemists, including himself, investigating their effect to explain the cause of the differences found.

By his own work he had been shown that the nutrition of the wheat plant affected the quality of the grain very directly. The amount of soil nitrogen available to the crop determined very largely the quantity of protein in the kernels but apparently had little effect on the quality.

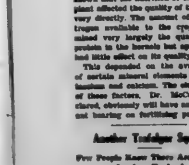
This depended on the availability of certain mineral elements like potassium and calcium. The abundance of these factors, Dr. McCalla declared, obviously will have an important bearing on fertilizing practices.

Another Trafalgar Square

Few People Know There Are Two in London, England

It is surprising to find how many Londoners are unaware of the existence of another Trafalgar Square in London, England, besides the one surrounding the Nelson Column.

It is tucked away off the beaten track in old Chelsea, and whereas one or two new white houses are reminiscent of the South of France or Hollywood, the majority still retain their English Georgian air London Daily Sketch.



Scientific Help For Farmers In Improving The Quality Of Wheat In The West

Equality and Security

France Reminds Germany About Wording Of Last Year's Agreement

Albert Sarraut, former Premier of France, said:

"This country will keep its word, fold, it will avoid exciting alarm and it will face tomorrow calmly for it does not know fear, and France now possesses a material and military position which is the result of her own united effort.

"I say to the German Government 'Ten affirm your desire for peace That is also our desire We have no wish to diminish or lessen your country by fear that Germany shall have a just part in the concert of nations. We are not insensible to your sufferings. We have never closed the door against your economic expansion. We have always sought and are always ready to seek possibilities of agreement and understanding.'

But when that has been said, we have a right to demand that this policy of agreement should be loyally applied in settling the question of equality of rights. It should be remembered that the declaration of December 13 last year contained the two words equality and security."

Transforming Old London

Familiar Landmarks Pulled Down To Make Way For New Buildings

Imperceptibly the London that we know is disappearing Old familiar landmarks are being pulled down. What is almost as important the London that we can see is disappearing also.

When a building however charming and fam iar, but of no particular historical interest, has outlived its times and usefulness, there is no valid objection to its removal

But ruthless something for 4-to to control the erection of new edifices which towering to heaven completely blot out some of the finest architectural views of the world"

It was only a few the tall new telephone building in Queen Victoria Street was finished that London became aware that the fine prospect of St Paul's from Blackfriars Bridge had been stolen from the public.

Similarly when the temporary Waterloo Bridge has been removed it will be found that the new Lever House has sadly interfered with the famous view of St Paul's rising over the city.

Fears are now entertained that the grand view of Whitehall, with the towers of Parliament in the background, may be destroyed by the proposed government offices there

Instructions have been prepared for the architect which effectively confine the new building within the limits necessary to preserve the Whitehall view.

Maine Curiosity

Bearded Turtle Reaches Vancouver From China

A bearded turtle is the latest addition to British Columbia's marine curiosities.

It is not unique, but is rare enough to be considered sacred by Chinese.

The biranie one, about the size of a man's hand and 20 years old, arrived aboard the liner Empress of Pacific in a gold fish bowl on the "Empress of Russia," resting in the cabin of Ship's Interpreter Chen Sang, where pets stinks burned night and day in its honor.

The turtle is honored among Chinese for its sagacity and longevity, but when it has a covering of hair, it becomes sacred.

The present specimen has long green hair and was captured in the sacred lake of Hong Chow on the T'ai-tze-Kiang River. It will be presented to Mayor Louis D. Taylor and the citizens of Vancouver.

Appointed To Justice Staff

George Franklin McFarland, Toronto, has been appointed judge of the high court of justice for Ontario. The appointment was made by Hon. Hugh Guthrie, Minister of Justice on Mr. McFarland succeeds Mr. Justice W. E. Raney, who died recently.

Enlarging The Vocabulary

New Words Are Added To English Dictionary

The King's English has been brought up to date with the publication of the supplementary volume of the Oxford English Dictionary Needless to say there are hundreds of words in this supplement of which Dr Johnson was ignorant

Take a few examples cubism, futurism robot par dom radium moron, tabloid tank, hooligan, broadcasting loud-speaker lipstick psychoanalysis pussyfoot, photo-play profiteer, gyp-gyp, bobbly and slapstick

"It gives the impression of a very talented, very nervous, highly-strung people," remarked a writer in appreciation equally harassed by the pleasures as by its pains, and eager to pass from one sensation to another," said the president of Magdalen, George Gordon, at a luncheon at Goldsmiths, Hall in celebration of the completion of the supplement. It is full of many words expressing contempt for age —dodderer, back-number, and so on I find too large a vocabulary—for a writer nation—devoted to distinguish every possible kind of content at every hour of the day and night."

Mr. Gordon added that however rude or crude were American terms for the appurtenances of modern life, they were the truth, that it was very hard to resist them a place in any honest lexicon.

Such terms were graft, stand-over, dope, foolproof, and step-on-the-gas. Honest contributions from America, he was to make ambosomer, barnacling and no-flue-on-me. A fanfair and very modern phrase, which Mr. Gordon thought was of British, and growth—leaves me cold—might certainly have come from Germany.

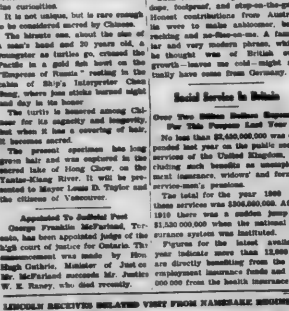
Social Service In Britain

Over Two Million Dealt With Since 1919 By Unemployed Lead Year

No less than $2,450,000,000 was expended last year on the public social services of the United Kingdom, Sir Alfred Mond, Minister of Health, told the House of Commons in the Budget statement made by Hon. Winston Churchill, Chancellor of the Exchequer.

Figures for the latest available year include more than 13,000 000 persons directly benefiting from the unemployment insurance funds and 16,- 000 000 from the health insurance

LINCOLNS RECEIVED RELATED VISIT FROM NAMESAKE REGIMENT



The 2nd Battalion Lincolnshire Regiment on its journey from Dover to Colchrick, created quite a sensation when it passed through the ancient city of Lincoln. It was the first time in 30 years that a regular battalion of the Lincolnshire Regiment had paid a visit to the City of Lincoln. Our photograph above the battalion marching through the ancient Stonebow Arch in the city.

Canada won her 19th world wheat crown in 32 years and her second consecutively at the international hay and grain show at Chicago.

Judges associated with the world's wheat growers to Frank Isachsen, of Elfros, Sask., and premier position among growers of oats to Ian Smith, Wolf Creek, Alberta.

Victories of the two western agriculturists climaxed a score of wins by the Dominion's growers at the several grains were judged. They attained leading positions in many classes.

Smith's oats topped their sheave by Miss Aldrich of Fairgrove, Mich. He gained the prize won last year by Fred Hansen, of Gandhame, Alberta.

A pioneer in the Elfros district since 1906, Isachsen won the major prize of the show on hard red spring wheat. Of the Brownell variety made famous by the three-times wheat king, Seymour Train, of Wenonah, Ill., Isachsen's grain, grown in 1920 in the spring wheat class and in 1920 was 2013.

Saskatchewan's string of wheat entered in the international mounted to 11 as hackers achieved victory.

Alberta had won the title seven times and Manitoba five times. But of all wheat kings was still Seager Wheeler, the grand old man of the soil at Rosthern, Sask., who won the crown five times.

Just as important to Canada as Isachsen's victory was the honor won at a British Empire exhibit. Seymour Rogers, of Tappen, who carried off the reserve championship in the wheat competition.

Rogers in the company of the rocky coastal province Rogers grew a strain of wheat looked on as inferior to the hard spring wheats. It was Mindum type of Durum, yet it surpassed in quality scores of other varieties grown at the show.

Two other important victories were given Canada—both of them Isachsen—in the grain classes. J. H. B. Smith of Weir Creek, who in 1920 won the wheat crown, was awarded a regional first place in the two-row barley class. Nels Lindon, of Wetaskiwin, captured first in the six-rowed Trebi type barley class.

Isachsen's international championship wheat had previously been selected as the best hard red spring wheat in the show and the first, 60 awards. Saskatchewan growers took 26; Alberta, 20; Manitoba, three, and British Columbia one.

E. B. Allsop, of Wembley, Alberta, captured the champion-ship of the hard red winter wheat class and following Rogers, of Tappen B.C. in the Durum class were six Saskatchewan growers, four from Manitoba, four from Ontario and one from British Columbia Ontario won two and British Columbia one in the awards made in the soft red winter wheat. Five awards in the white winter wheat class went to Ontario and one to British Columbia.

Schools Protected

Schools In Southshore Areas In Saskatchewan Are Again

After being without fire insurance for at least two years, some of them longer, 60 rural school buildings, practically all of them in northeastern Saskatchewan, either in or close to Southshore settlements, are again insured.

Premier J. T. M. Anderson, as Minister of Education, announced the government had been able to complete arrangements whereby the schools could be insured, and the districts against loss as the result of fire.

It was learned the insurance was taken out through a group of companies at a rate somewhat higher than the usual premium on school buildings.

So many schools located in Doukhobor districts were burned in recent years, most of them known to be incendiary, that the companies flatly refused to carry insurance on any of them. It has been known for some time the government was making efforts to correct that situation.

WORLD HAPPENINGS BRIEFLY TOLD

License for a 100-watt radio broadcasting station at Middlemount, Man., has been granted James Richardson & Sons, Ltd., Winnipeg.

First doctor in Canada to secure membership in the British College of Obstetricians and Gynaecologists, Dr. J. Ross Vant of Edmonton has been awarded the degree of M.C.O.G.

The steady movement of soldiers into northern Saskatchewan has absorbed all the available soldier settlement board farms in the sub-district north of Prince Albert.

Sir Hubert Wilkins, Lincoln Ellsworth and Bernt Balchen, United States flyer, left New Zealand aboard the supply ship "Wyatt Earp" on the first stage of a new Polar adventure in the Antarctic.

A 160-year-old strong beam vat, manufactured in France in 1772, is being heard in Fish Pool, Manitoba. It is owned by John Vandal, 79-year-old Jugoslavian, who came to Canada three years ago.

Frank Keyser, 54, for 15 years on the "dead and missing" list of the Great War died of a heart attack which came after he decided to identify himself to government authorities.

The assertion that Germany will "strain all her resources to meet her just obligations" is made by Dr. Hjalmar Schacht, president of the Reichsbank in the German-American commercial bulletin.

Canadian cats possessed special hunting qualities and were therefore purchased by the war office for the reserve supply depots, Captain the Duff-Cooper, financial secretary to the war office, said in the British House of Commons.

The famous "Royal Scot," crack train of Britain's London, Midland and Scottish Railway, came home aboard the Canad an freighter "Beaverdale." Behind her were about 6,000 miles of ocean voyaging and 14,000 miles of Canadian and United States rails.

Some Soviet Rubbe

Russia Has Botanical Store Thou

Any Other Nation

One of the most interesting explanations of the new recognition of the Soviet by President Roosevelt is made in the debt problem. These debts are not so often mentioned in the U.S.S.R. gross as those owed by Premier or Stalin. Sometimes Russia has repudiated more debts than any other nation. They owed $18,750,000,000 to France, and $4,013,722,000 to Great Britain. Of course, there are more recent debts contracted in trade by with Germany. The Premier Premier Goering said that "more German workers could live if Russia paid her bills." That the soviet government does not pay its bills is obvious. Therefore, in the accounts debt to the United States is the amount of $200,000,000 in Washington asking recognition of the bills at all? Brandon Sun.

Smith In A Chemical

Benalto is a fashion chemical entity scientists of the Connaught laboratories stated in connection with the appeal being made in Britain for an embargo on Canadian products. Chemical scientists supported the view of Prof. Robert Robinson, 1? the British Nobel prize? finds that benalto is a chemical substance the tariff will be jumped from 10 to 22½ per cent.

An American firm will construct a bridge, 1,800 feet long, over the Pearl River in China.

Remember, too—you can get at our Poker Hand Premium Stores, or by mail, large packages of "Vogue" or "Chancellor" cigarettes papers free in exchange for one complete set of Poker Hands.

Educationalists Convene

Provincial Pedagogues Of Canada And U.S. Meet At Banff

Some of the most prominent educationalists of Canada and United States, in deep conference at Driftoff, took three days recently to watch a pair of their leaders tune harpsons into their own methods.

The harpsonning began with an address by Dr. Burgess Johnson, of Syracuse University, who told the National Council of Teachers of Riggle- ish he believed Shigaree almost invariably he, and that mathematics is a form of ebb."

Dr. Stephen Leacock, famous humorist and economist of McGill University, Montreal, who spent today's sitting, graduate has been "badly damaged" by his education. He said the trouble lies in the fact that "education, in nine cases out of 10, is not pursued for its own sake."

Bill Instead Of Fortune

Man Works About Legacy And Gets The Notice

England's most disappointed and disillusioned man is J. Moore, of Wandsworth.

Fifty-five years ago his wife's grandmother bought land just outside Melbourne, Australia, and then forgot about it.

Recently Mr. Moore read that a building scheme in the same district had turned a man into a millionaire. He had also been left a millionaire.

It was a pleasant thought. Mr. Moore pasted the original documents in a passe-partout, to the Premier of Melbourne and asked for an estimate of the value of the property.

Back came a letter stating that the land had not been built on, and that its value was still £30. Enclosed was a bill for £13 10s.

The bill was land tax for 55 years at the rate of five shillings a year!

Doukhobor Trouble

Believes Unrest In B.C. Resulted From Internal Controversy

Suggestion British Columbia's trouble with Doukhobors including mass parades, fires, bombing etc. centred around leadership and arose from internal controversy in the Christian Community of Universal Brotherhood, is made as a reference to the subject in the annual report of Col. J. H. McMullin, commissioner of B.C provincial police.

Since Peter Verigun left the province," the report states, "we have had no trouble of any kind with the Doukhobors. It is not suggested the Doukhobor unrest was in any way directing the perpetration of those outrages. On the contrary, our information indicates it is highly improbable they have had anything to do with them at all; but the sudden cessation creates a suspicion all Doukhobor tradition, including nude parades, centred around the leadership and arose from an internal controversy among the directorate of the Christian Community of Universal Brotherhood."

An Amazing Incident

Boy Swallows Coin Into Hospital To Must Equal Value

There was an amazing incident during the Duke of Gloucester's tour of the Pontypridd and Rhondda areas of the South Wales coal-field. When he visited the Pontypridd Hospital the Duke chatted with all the 30 patients, including a nine-year-old boy recently been allowed to return from hospital. Some think he does. Cross of Lorraine has been conferred by insults caused by the ill-feeling Jews attacking Lone Christian fellow-countrymen. They may Paul suspected by imperial officers; but fat themselves obliged to be very careful to avoid all show of disturbance.

Preaching And Teaching In Rome, verses 16-31—A special message was appointed when special numbers of Jews came to Paul's lodging to hear him. He preached to them, proclaiming the spiritual nature of the Gospel of the Lord, for he commanded his first belief was in a temporal kingdom, and by recalling the law and the prophets he endeavored to persuade concerning Jesus. As always, some believed and some disbelieved.

For two weeks years Paul abode in his own hired house, and to all who came to hear him he preached the Kingdom of God, and taught them concerning Jesus, speaking with all boldness, none forbidding him.

"It is still hard to get justice and get it quickly. How can judges, juries, attorneys-at-law and police officials be Christ-minded? Can the poem sentiments which many of them feel personally find expression in their professional activities? It was funny years to convict Chicago's chief gangster, and in his conviction the courts of the city and state where he resided had no part. Moreover, he was found guilty of minor offenses only. The case is flagrant, but not exceptional. Apparently the only thing for good citizens to do is to keep the machinery of politics public-spirited by upon judicial machinery and to use the ballot to retire officials who have proved themselves unworthy.—Edward Laird Mills.

SUNDAY SCHOOL LESSON

DECEMBER 17

PAUL IN ROME

Golden Text: "I press on toward the goal unto the prize of the high calling of God in Christ Jesus." Philippians 3 14.

Lesson: Acts, Chapters 27, 28.

Devotional Reading: Psalm 23

Explanations and Comments

The Meeting Of Paul And The Chief Jews Of Rome, verses 17-22.—After three days, Paul summoned the chief Jews in the city to meet him, and told them of circumstances, how, although he had in no way violated the customs of "our fathers," he had been delivered by the Jews at Jerusalem up to Roman soldiers. It is his custom. The latter had been ready to set him at Liberty, but, when the Jews opposed this he had been forced to appeal to Caesar. He had sent for them to tell them this, that because of the hope of Israel, the Messianic hope, he had been put in chains.

The most difficult task before Paul, the one he naturally most dreaded, was this conference with these Jewish authorities, and this was the first business in which he obtained. "Tackle the dread" are the words which help over a business man's task. That is good counsel.

The Jews politely answered that they had no written nor verbal report from Jerusalem concerning Paul; they wished to hear what he had to say, although they knew that this sect (speaking of the sect of the Nazarenes, Acts 24:5, as they accused of the sect of the Nazarenes) was everywhere spoken against. Why were the Roman Jews so reserved and non-committal? "The commonly received answer is that they lived in Rome in a state of great insecurity. They had not recently been allowed to return from banishment. Some think the decree of banishment had been occasioned by insults caused by the ill-feeling Jews attacking Lone Christian fellow-countrymen. They may Paul suspected by imperial officers; but fat themselves obliged to be very careful to avoid all show of disturbance.

Preaching And Teaching In Rome, verses 23-31.—A special message was appointed when special numbers of Jews came to Paul's lodging to hear him. He preached to them, proclaiming the spiritual nature of the Gospel of the Lord, for he commanded his first belief was in a temporal kingdom, and by recalling the law and the prophets he endeavored to persuade concerning Jesus. As always, some believed and some disbelieved.

For two weeks years Paul abode in his own hired house, and to all who came to hear him he preached the Kingdom of God, and taught them concerning Jesus, speaking with all boldness, none forbidding him.

"It is still hard to get justice and get it quickly. How can judges, juries, attorneys-at-law and police officials be Christ-minded? Can the poem sentiments which many of them feel personally find expression in their professional activities? It was funny years to convict Chicago's chief gangster, and in his conviction the courts of the city and state where he resided had no part. Moreover, he was found guilty of minor offenses only. The case is flagrant, but not exceptional. Apparently the only thing for good citizens to do is to keep the machinist of politics public-spirited by upon judicial machinery and to use the ballot to retire officials who have proved themselves unworthy.—Edward Laird Mills.

ACREAGE CUT PLAN IS READY FOR NEXT CROP

Ottawa, Ont. Representatives of the Winnipeg Grain Exchange interviewed Prime Minister R. B. Bennett and offered their co-operation in carrying out Canada's undertakings under the world wheat reduction agreement adopted in London last summer.

The delegation was composed of H. E. Sellers, president of the exchange, and Sidney T. Smith and R. Y. Ennis, members of the council of the exchange. Their visit to the Prime Minister was to ascertain what steps should be taken to implement the agreement.

Mr Bennett spent an hour with the exchange officials and discussed many angles of the wheat situation. The method by which the reduction would be brought about was being considered, he said, and would be ready for general consideration in time to apply it to the next crop. The wheat advisory committee appointed at the London conference was still in session in that city.

There has been much agitation in western grain circles for the establishment of a board, which would have a marked effect upon the operation of the exchange. An official statement made public after discussions made no mention of this aspect of the question.

On his western tour in October Mr Bennett met representatives of three provinces in Regina and discussed the wheat agreement, on the heels of similar discussions with the provinces in the North American Act.

Subsequently the subject was discussed at a conference of the three prairie province governments in Calgary. The conclusions of this conference are being considered by the Dominion government and no definite decision has been announced as to the course that will be followed.

The members of the grain trade assured the Prime Minister, the statement said, that inasmuch as present world economic conditions made it necessary that some steps be taken to relieve the wheat price situation from the depressing effect of an abnormal world carryover, the grain trade were prepared to support the proposal and co-operate with the appropriate authorities in implementing Canada's undertakings under the agreement."

Business Cut Dole

Free To Commence On Question Of Ireland Leaving Empire

London, Eng.—The correspondence between the Irish Free State and British governments relative to the question of Irish separation from the Empire has been forwarded to all the Dominions for their consideration.

They are free to comment on it if they desire, but, as J. H. Thomas, secretary for Dominion affairs and colonies, told the House of Commons, there is no intention of dragging them into a domestic dispute.

Eamon de Valera, President of the Irish Free State and his colleagues, are to commence on Monday next a campaign to get "more tobacco for their money" and, lastly, they want Poker Hands in exchange for valuable Free Gifts — so they smoke Turret Fine Cut because it's the best cigarette tobacco that gives them all three advantages. Try a package of Turret Fine Cut today—you'll like its mild, cool fragrance.

Dublin, Ireland.—Publication of the texts of notes exchanges between the Irish Free State and the British government signified tension in the Free State and the belief increased that there was little likelihood of a general election in the near future to vote on the question of secession from the empire.

Speed Of Oxford Movement

London, Eng.—Since 40 members of the Oxford group went to Canada a year ago the movement has spread across the Dominion and there are 130 groups in Toronto alone, declared Lenton Hamilton, prominent in the Oxford group, at a special meeting at Westminster.

Condemns Lynching

President Roosevelt Calls It Form Of Collective Murder

Washington.—President Roosevelt, in an address here, called lynching "in the form of collective murder."

The president also indirectly rebuked Governor James Rolph of California who, recently expressed approval of mob action in San Jose, California, which resulted in the deaths of two men.

"We do not excuse those in high places or in low who condone lynch law," Mr. Roosevelt said.

He did not, however, in his speech before the federal council of Churches of Christ in America, directly refer to the California lynching or to similar occurrences recently in Missouri and Maryland.

Mr. Roosevelt expressed faith in the "new generation" as a problem to his strong condemnation of mob violence.

The president said the United States Government was seeking the goal the churches look toward, and that from "the bottom of my heart" believe that this beloved country is entering upon a time of great gain

Night Solve Problem

Controlled Exercise Of Germany Has Been Suggested

Geneva, Switzerland.—In the absence of the president of the disarmament conference, now in Paris to discuss direct negotiations, the question is voiced by many delegat ons present at Geneva that the probable solution of the crisis will be found in controlled rearmament of Germany.

A committee appointed to devise a system of control of armaments has concluded its examination of the problem.

Examination of armaments in all countries by spot investigation has been recommended to the committee by sub-committee.

Chairman Burgess, of Belgium, will summarize the committee's suggestions, which are understood are found to be difficult in the absence of Germany.

Meanwhile secret negotiations have been started between France and Germany. Their success, it is believed, will depend on whether France and Germany can reach a real political understanding. The European problem of reduction of armaments hinge directly on this.

Fire Takes Four Lives

Parents Trapped With Two Children In Burning House

Glace Bay, N.S.—Trapped by an impenetrable wall of fire almost on the threshold of their home, Mr. and Mrs. Joseph Volo and two of their children, for whom they sacrificed their lives, were burned to death and their home completely consumed their two-story frame house.

The four bodies were found within the charred walls of the family's front door—the door through which the mother and father carried two of their children and then raced back in a fruitless effort to beat rapidly-spreading flames to the little beds where the other children awaited rescue.

Successfully they battled their way through smoke and flames within a few feet of the door where Betty, nine, and Buddy, five, who were saved, awakened them. But they were halted by the leaping flames and overcome by smoke.

The fire's origin was not known.

The bodies were then together, the mother clasping the body of Josie while Harold was held in his father's death grip.

Scholarships Award

Successful Candidates From Three Western Provinces

Toronto, Ont.—Awards for the post-graduate overseas scholarships of the Imperial Order Daughters of the Empire were announced at the provincial executive committee meeting here.

The successful candidates include: Alberta Helen L. Sorensen, B.A., University of Alberta.

British Columbia—William Robbins, B.C., University of British Columbia.

Saskatchewan—Gerald Bates, of Regina, University of Saskatchewan.

ROBERT C. MATTHEWS

Who has recently been appointed to the post of Minister of National Revenue in the Dominion Government. The post has been made vacant by the resignation of Hon. E. B. Ryckman due to ill health

Takes Over New Duties

Robt. Matth ws Secure In As Minister Of National Revenue

Ottawa.—Ont.—Robert Charles Matthews, member of parliament for Toronto East Centre, has been sworn in as minister of national revenue to succeed Hon. E. Ryckman, whose resignation, due to ill-health, was accepted recently.

The appointment was not unexpected, the name of Mr. Matthews having been generally mentioned as successor as soon as Mr. Ryckman's resignation was accepted.

Mr. Matthews has no time in taking over his new duties. Within half an hour after the formal swearing in at Rideau Hall Mr. Matthews was at his desk in the Connaught Building representing himself with the staff.

Successful Flight

Lindbergh Cross South Atlantic In Short Hours

Natal, Brazil (Ct. Charles A. Lindbergh and his wife completed their trip, the former Anne Morrow, have successfully flown the South Atlantic Ocean. They alighted on the harbor here at 2:10 p.m., Brazilian time (1:10 p.m. E.S.T.) after fly ng from Bathurst, Gambia, Africa, 1,870 miles away, in 14 hours, 10 minutes.

It was their first view of America since July 22 when they took off from Cape Cartwright, Labrador, for Greenland, on a survey flight across the North Atlantic.

The whole population of Natal, its shops and offices closed for the fresh welcome, its streets decorated, packed the waterfront.

With the alighting of the ship, Mrs. Lindbergh became the first woman to fly in an aeroplane across the South Atlantic.

Business In Custody

Thirty-Five Strikers Trapped In Railway Coach And Placed Under Arrest

Fort William, Ont.—Trapped in the same they had seized, 35 striking transcontinental workers were in custody of Chief Provincial police here on charges of conspiracy.

Outnumbered as the strikers quit camps in the Mabell district and heard d the Canadian National Railways train for here police made o' berts at conci-at on when the hundreds refused to pay fares.

Cries of "throw on off" were heard the met. The police, half a dozen in number made on effort to prevent the men from the train.

Insisted they left the coach. Quickly the doors were slammed shut and wired while more were guarded and the train began to move. The men were held prisoners until the train reached here when additional police arrived and placed them all in custody.

Low Rates Bring Business

British Railways Find Low Fares Have Increased Revenue

London, Eng. British railways have found the low two-cent per mile fare originally instituted for summer holiday traffic productive of such greatly increased revenue they have resolved to maintain them indefinitely.

During the early part of the year passenger receipts were down 1½ per cent. compared with 1932, but with the institution of the two-cent rate came a rapid recovery and during a recent week, for instance increased by $500,000 over the same week a year ago.

The Southern Railway announces it will electrify 60 more miles of line between Brighton and Eastbourne at a cost of nearly $10,000,000.

The Irish Question

Matter Is Discussed In The House Of Lords

London, Eng.—Viscount Hailsham, secretary for war, threw cold water on suggestions in the House of Lords that the United Kingdom recall its representative in the Irish Free State or that it raise the tariff wall against Free State goods. The suggestions were made during debate on the plight of British Loyalists resident in the Free State

Hailsham opposed a proposal of Lord Dansefort, distinguished jurist, that the representative be withdrawn. Lord Hailsham said: "It is easier to break off relations than to find satisfactory means of re-establishing them." He added such a course would not be a "satisfactory or helpful step."

THE UNLUCKY BOYDLAW SQUADRON

Perhaps the most "unlucky" formation flight ever undertaken by a squadron of British aeroplanes took place recently when a number of military "planes, manned by Egyptian officers, took off from England for Egypt, where they were intended for general purpose duties with the Egyptian Army Air Force. Shortly after the start of the flight bad weather was encountered and it was only after a fight against tremendous odds that the machines reached their destination. En route one 'plane crashed, killing the Egyptian officers, and later another machine was forced down with injury to the fliers. Our picture shows the squadron with an Egyptian officer in the foreground.

NEW LEAGUE OF NATIONS PLAN IS LAUNCHED

Rome, Italy — A new program which would radically reorganize the League of Nations in the hope it may attract within its fears Japan and Germany and other world powers has been launched it has been learned by the Associated Press.

The movement is under dictators n several European capitals, it was divulged. Its sponsor Senor Rossi is to come into the league as well as the United States.

Italy has not yet formulated definite formal proposals to other members but also wants armed existing league articles which bind signatories to use military and economic forces to preserve boundaries created by the Versailles Treaty.

By these means it is hoped to remove the principal obstacles to United States membership.

(a) Associated Press dispatch from London said it was learned last Great Britain held questions of disarmament should supersede consideration of league reformation.)

Under the proposed reform of Geneva, a "league within the league" would be formed of the United States, Russia, Germany, Japan and possibly Poland and Spain or one or two others.

Under the proposed reorganization, it was learned, the world would be divided into three blocks of influence to be dominated by the large nations:

(a) Europe, to be influenced by the United Kingdom, France and Italy.

(b) The Americas, to be dominated by Russia and Japan.

(c) The Americas, with the exception of Canada and other British territory, to be dominated by the United States.

Fighting Red Propaganda

Post Office Department Co-Operating With Government To Prevent Entry

Ottawa, Ont.—A new drive against a flood of red propaganda said to be sweeping over Canada has been launched by Departments of the Federal Government. The chief publication which Ottawa is determined to keep out is the Moscow Daily News. Reports from several leading cities in Canada including Winnipeg and Montreal, are to the effect that thousands of copies of this paper are being delivered to Canadian residences through the mails.

The newspaper was banned by the postal department, on the urgent request of the Canadian Mounted Police, some months ago, but meanwhile to prevent its entry have proved ineffective.

The post office department reported that full co-operation would be given to the customs department in the drive. New barriers will be erected at every customs port in Canada. It is explained that the simplest way to stay illegal matter entry to Canada through the mails, is to check up on all imports.

Liquor Exports

Canada Intends To Conform With U.S. Regulations

Ottawa, Ont.—Canada intends to keep liquor exports in conformity with United States regulations. It was announced when orders were issued by customs collectors that bond release would not be granted when a certificate was presented from an American consul.

Under Washington liquor regulations, which will be observed by customs officers here, an importer must secure a license before buying foreign whiskey. As a double check, the Canadian distiller must have his invoice validated by the consul in his territory before the Canadian officials will release the liquor from the bonded warehouses.

Explorer Receives Welcome

Wellington, N.Z.—New Zealand's officialdom gave a warm welcome recently to Rear Admiral Richard E. Byrd, who has decided to sail for the South Pole this week. The explorer received a cordial greeting from Premier G. W. Forbes and members of his cabinet.

Blames The Weather

Psychologist Claims A Affects Economic And Social Life

Blame it on the weather."

That's the advice of Dr C A Mills, professor of experimental psychology at the University of Cincinnati, who declares that the weather is a great energizing influence upon the human race, affecting not only biological but sociological and economical trends as well.

Living under the most intense climate drive the world has to offer, Dr Mills asserts, the American man is "always ripe and ready for anything beyond safe bodily limits."

In addition, he warns, the American man is subject to the "cyclic fluctuations in this driving force that cause irregularity."

A survey, embodying his theories regarding the influence of climatic conditions upon the human race, was prepared by Dr Mills for presentation to a convention of the Society of Tropical Medicine Study, which met at Richmond, Va., on Nov. 15.

While his first interest in the study of climatic conditions and human reluctance to be governed biological rather than Dr. Mills believes that his finds will be ..r value to social leaders and on add to how recommend agents to the care of temperament under psychoses.

American climatic conditions, Dr. Mills says, gives man periods of a few months to a few years when he is "pushed to the limit, when he is driven into a wild expansion of all his activities without consideration of the consequences, and his shiny is correspondingly the normal periods of depression."

A change in the storm intensities with accompanying wrath will cause man to suddenly drop everything and become his bit, Dr Mills believes.

"Periodic variations in human energy may be regarded as the basis of business cycles," Dr. Mills says. "North American and Europe, where industrial development has become most advanced, show the sharpest and most disastrous response to these changes in weather intensities.

"Here, as in other fields, the highest level of activity engenders the most confused situations, and with a rapid to business! It is the downward turns that bring widespread hardship misery.

"Where people here are willing only to remain in the same place, the stimulation on the basis of the economic cycles, instead of considering the cycles as inherent in some mysterious phase of the cosmic universe, we might be able to obtain a measure of relief."

Weather conditions have a direct effect on business fluctuations, and by applying proper checks during the stimulative periods and more extensive control of the weather or weather changes, trade can become more stabilized, according to Dr. Mills.

Price Seemed High

Stained For Three Years Before Two Bank Judge

Justice Morton Fisher Stone, of the United States Supreme Court, receives an annual salary of $20,000 and he can't see why Dr pennies and his salaries.

Launching across the way from the Capitol, the justice ordered a search made of rabbit brand. It developed that rabbit-brand construction cost five cents more than others, and Mr. Justice Stone immediately wanted to know why The head waiter explained that rabbit cost more. Mr. Justice Stone looked over his menu with carefully.

"I can find only three and one half onions and I don't think they're worth a nickel," he grumbled.

Globes Better Than Ships

Children Get More Correct Idea Of Earth

Terrestrial globes, educators point out, are much better than maps for teaching geography, inasmuch as the thinker, due to a wholly artificial "projection," grossly misrepresents things. Thus Greenland is made to look much larger than South America, and what about, from studying a map would guess the truth that the earth's mass from Texas to Tennessee is by way of the Aleutian Islands?

Animals Know The Time

Undoubted Given Some Facts About Their Clever Wings

Animals commit half the time by the clock writes O. G. Pike, the Discoverist in Tit-Bits, but a speaker of mine would always run to fetch the bottom from the front door mat when he was let in on week-days, but he never attempted it on Sunday, another dog would go off for long rambles by himself on five days of the week, but always remained at home on Saturday and Sunday when the children whom he considered his charge were home from school. A highly-evolved animal, such as the dog which has been trained, will always remember his lessons.

In a wild state the animals have no one to train them, yet they are the most prudent timekeepers. A number of birds awake full by a friend at a certain time each morning, and just before ten o'clock they flew to the spot where the meal was presented; morning after morning they arrived without fail, but the remarkable thing is that when the clock was put on for Summer Time they usually arrived an hour earlier. They took place in a public park, and the birds probably knew that Summer Time had by the regular duties of the park-keepers.

Bill Records Recognized

Shows Cows, Or Yorkers Herd Placed On Honor Roll

High marks in production of milk by three cows in a Yorkton herd have been recognized through the official record of production certificates by the Department of Agriculture at Ottawa.

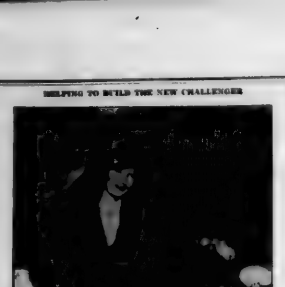
"Laborer Lillian," grand champion Ayrshire at the 1933 Regina Fair, and twice Saskatchewan champion producer, now has 20,746 pounds of milk containing 1,020 pounds of butter fat in a 365-day official test, Record of Performance No. 1,000. The four-year-old, produced 14,726 pounds of milk with 720 pounds of butter-fat in a 305-day test, while "White Star Bonny," a two-year-old produced 10,-134 pounds of milk with 537 pounds of butter-fat in a 305-day test.

Although not establishing new record in milk and butter-fat production, the animals gave more than the necessary amount to gain a place on the Canadian honor roll. All three are owned by Messrs. Spicer and Anderson.

Cash System For Business

Two Many Firms Trust People Who Never Intend To Pay

We have heard a lot lately about the cash system being the only method for successful business. Why? Because too many people endeavor to make money by short pay purchases with them people in a good line and supplying but a pleasure. On the other hand, there are a few people who refuse to pay their accounts when they have the money to do so. Then there are those who are honest and willing to pay, but are unable to do so owing to the present hard times. Then there are those who are honest and willing to pay, but are unable to do so owing to the present hard times. Then there are those who are honest and willing to pay, but are unable to do so owing to the present hard times.



HELPING TO BUILD THE NEW CHALLENGER

Here we see Mrs T O M. Sopwith assisting in the first step in the building of her husband's challenger, "Endeavour," by pouring lead into the mould from which will come the 66-ton keel. Mr. Sopwith through the medium of the Endeavour syndicate, is building a boat which Sir Thomas Lipton never succeeded in doing—wrest the America Cup from the United States.

Depends On Many Things

Heredity And Other Factors Determine Length Of Life

The Mississippa tribune of Methuselah people may live in to 130 to 150 years' old but that gives no real hope that Canadians will survive to the same ripe old age by eating, in the opinion of some of the medical authorities of the ministry of national health

"We have an allotted span of years," said one eminent doctor to the Toronto Star Weekly." We cannot live longer than that Heredity, disease and other factors enter in

"Eating special foods is not go to help us live much longer than is normal despite what Dr Crazy-top-Bait may say to the contrary Diphtheria, scarlet fever, and other diseases have nothing to do with the food which has been eaten and they carry people off just the same

"Anyway I sincerely hope I don't live to be a hundred much less 130 or 150 said the doctor "When a man is fifty he has done his best work, except in exceptional cases I can remember Dr Osler would earn chloroformed at 65 He was not exactly and-nerved What he meant was that college professors, of whom he was speaking, had completed their best work in the way of acquiring knowledge at 65, and after that were inclined to be verbose and contribute nothing further to human advancement. He thought they should lecture up to 40 and then devote themselves to writing. At 60 they might be chloroformed without harm.

"Personally I am with the idea. I don't want to live past sixty. I'd be willing to go at 59; all the best work I've done was in the first. But that's only a personal opinion. We of the medical profession spend our time keeping people alive, but it wouldn't do for the idea to be considered as generally accepted. I most certainly would not want to live to be a hundred."

The Marvels Of Sunlight

Wonderful Discoveries Are Being Made By Modern Methods

One penny inch of the surface of one of the hotter stars would provide enough motive power to drive an Atlantic liner. The possibilities of the sun's energy that a ton of their matter could be placed comfortably into the heart of a pipe. Such energy would not waste the situation they are assisting to perpetuate, and soon they awaken to the real facts a reaction against this method of capture is inevitable. Absorption of the cloud trap as a means of taking animals and the wearing of humanely farmed furs would follow. Other furs humanely obtained, as an to discourage the cruelty of present trapping methods, the society claims, is not new, for the state of Massachusetts, U.S.A., has, with certain exceptions, banned its use, and the National Federation of Women's Institutes in England has called upon English women to purchase only humanely killed fur.

A swedish natural scientist is said to have produced a variety of tobacco that is free from nicotine. Perhaps "cream heard" will now take on a new meaning.

Explore Wild Animal Slaughter

Society For The Prevention Of Cruelty To Animals Against Use Of Steel Trap

To promote the separate sale of humanely killed fur, to endeavour to find a suitable substitute for the steel trap and to promote legislation for Aboligical control to stop the indiscriminate slaughter and destruction of Canadian fur-bearing animals is the aim of the Vancouver branch of the Society for the Prevention of Cruelty to Animals, assisted by women branches in Canada, in a campaign of publicity recently promoted for the purpose.

Present methods of trapping, the Vancouver branch of the society believes, unless biologically controlled and managed will eventually reduce the species to the point of extinction. Also many species of desirable animals which are essentially Canadian The indiscriminating with a sweeping battle of land ginger ale, a five-pound box of chocolates and a dozen assorted silk handkerchiefs are her requirements of qualifications.

In July, the Heyt household removed to their summer home on Lake Resort Club on the lake shore, which commanded the situation for Camilla to some reports, and improved others She was further pleased that Peter while at the club, but free when she drove into town on personal errands.

Another twist in Peter's pride was his refusal to drive with Camilla in his powerful speedboat. Of course, it was not as it appeared on the surface.

"Impossible! He just told you that to get rid of you. Didn't you get the work?"

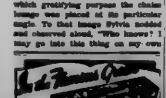
"Well a minute! Not so fast, or I'll hang up on you. I was the one who made him reconsider the thing, and I'll bet I get the job. He promised to let me know tomorrow."

"You're sure he wasn't stalling?"

"Not a chance. If he decides to do the work, I'm the model, all right. Leave it to me and call tomorrow night. Say, he even gave me a dollar for my dinner," she laughed triumphantly.

"He would. All right. Miss Todd, I'll call about the same time tomorrow evening."

Sylvia cintered the telephone into place and resumed her sipping of ginger ale with a shrewd smile. Her image was reflected in a mirror on the opposite side of the room, for which gratifying purpose the chair image was placed at the particular angle. To that image Sylvia nodded and observed aloud, "Who knows? I may go into this thing on my own."



Use a hundred uses. Always have a box in the kitchen.
Crestbrook

OCCASIONAL WIFE

By
IRMA ROSE WEBSTER
Author of "Jocelyn," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt, young and beautiful art student, and Peter Anson, a struggling sculptor, fall in love and marry secretly, deciding to live apart until the time Peter can establish himself Camilla, the adopted daughter of wealthy parents, is not let to merit money when she comes of age She is properly launched by her self-made guardian, Mrs Todd Together with Peter which she secretly loved for vanity as shopping, a matinee, interesting employers or driving with the girls, she was not entirely

Still, Camilla was seeing too much of this man who was nobody and had nothing except an ambition. Mrs Todd's mother, of course, did not forget that was original status of all people who really accomplished important things. Her attitude toward Camilla's welfare was an enigma to those who knew the circumstances She had telegraphed all reasonable for the girl after her twenty-first birthday, yet was zealous in her efforts to relinquish all responsibility which would provide her a fortune.

She began to arrange special opportunities for Terry Wayne's convalescence. He was perhaps the most eligible of Camilla's following. His mother, wintering with a sweeping

(Now Go On With The Story)

CHAPTER XXI.

Sylvia Todd was doing her best to be comfortable in her over-furnished apartment that was just three short blocks from Camilla Hall where Peter had his studio. A huge electric fan contributed its tireless efforts in her behalf, underlying with a sweeping battle of land ginger ale, a five-pound box of chocolates and a dozen assorted silk handkerchiefs are her requirements of qualifications.

In July, the Heyt household removed to their summer home on Lake Resort Club on the lake shore, which commanded the situation for Camilla to some reports, and improved others She was further pleased that Peter while at the club, but free when she drove into town on personal errands.

Another twist in Peter's pride was his refusal to drive with Camilla in his powerful speedboat. Of course, it was not as it appeared on the surface.

"Impossible! He just told you that to get rid of you. Didn't you get the work?"

"Well a minute! Not so fast, or I'll hang up on you. I was the one who made him reconsider the thing, and I'll bet I get the job. He promised to let me know tomorrow."

"You're sure he wasn't stalling?"

"Not a chance. If he decides to do the work, I'm the model, all right. Leave it to me and call tomorrow night. Say, he even gave me a dollar for my dinner," she laughed triumphantly.

"He would. All right. Miss Todd, I'll call about the same time tomorrow evening."

Sylvia cintered the telephone into place and resumed her sipping of ginger ale with a shrewd smile. Her image was reflected in a mirror on the opposite side of the room, for which gratifying purpose the chair image was placed at the particular angle. To that image Sylvia nodded and observed aloud, "Who knows? I may go into this thing on my own."

Eleven Ages Of Man

Following List Shows Them Represented In Many Ways

The eleven ages of man, as expressed in music style, run about like this, according to Tipps Graphic:

Infant, mewling and puking.
Milk.
Milk and bread.
Curl, spaniel, and spoonah.
Oatmeal, bread and butter, green apples, and all-day suckers.
Hot buttered muffins and hot dogs.
Minute steak, fried potatoes, coffee, and apple pie.
Sirloin, roast duck, scalloped potatoes, creamed broccoli, fruit salad, divinity fudge, demi-tasse.
Pain de fois gras, cream soda tart, pumpernickel, egg plant a l'oyster, demi-tasse, and Regnier's cigar.
Two soft-boiled eggs, toast and milk.
Cracknee and milk.
Milk.

Washington is told that the correct way to pronounce the name of the founder of a kit-cross-word is as also being pointed out that it real name is Pinkerton.

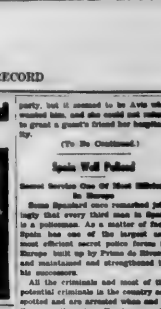
The present fashion is for short, honeymoon but more of them.

FANCIFUL FABLES

Moral:—Is there anything in life worth risking a broken neck for?

John—Nothing, dear, in all the wide, wide world—wives's dinner!

Ends a Cold SOONER



Everybody on the bench in five minutes"

"What's the penalty?" demanded Terry Wayne.

"That depends upon wo pays it," Camilla retorted "The bigs will decide the verdict after the offense."

Camilla was poised on the rail of the springboard like a winged goddess in her brief scarlet suit, silhouetted against the vivid blue of the sky background Her diving commanded the admiration of every spectator, with a favorable margin, of course, upon the masculine side. "It is not easy for any woman to dive, as the accomplishment of a rival watch attracts male attention

With the encouragement of applause, she performed the whole series of dives, the graceful jack-knife, the difficult backbreast, the twisting corkscrew, the hurling somersault After the last, she swam slowly out to the float and pulled herself up to it Terry immediately follow-ed and joined her.

"That was marvelous," he told her, emerging from the water dripp ing and white-skinned. "Is there anything you can't do?"

"Don't flatter me, because I've had hours of time to practice diving. I wish I could do something practical."

"You've always practical. Don't you ever have a bit of interest from the other girls, like Cathie and Avis—"

"I hope I am somewhat individual," she said lightly, and plunged suddenly into the water.

Avis lay on the beach. Her bathing suit was scarcely more than a bandage, was much too strenuous, she thought, to be worth the effort. A coating dog was her best friend. Camilla dropped down beside her, breathing hard after her race with Terry.

"You had a terrible amount of energy," Avis remarked, her tone divided between admiration and disapproval.

"I wish I had something to use it on. I like to be doing things."

"So I've noticed. By the way have you seen Peter Anson lately?"

Camilla started, then replied casually, "Oh, occasionally."

"Is he working for the exhibit?"

"I believe he is."

"Why didn't you ask him to the party? He needs the sort of thing to cheer him down."

"It happens I can not his keeper, and besides, I didn't do the planning of the party. It was mother's idea entirely."

"So it was. I've a bright idea. Let's drive to and get Peter and bring him. mother wouldn't mind, would she?"

"Perhaps not. But I don't think Peter would care."

"Why not?" Avis demanded sharply. "He would if I ask him, I bet."

Camilla decided that it was time not to oppose her, and not to be too familiar with Peter's inclinations. "Ask him if you wish. I don't mind." But she wondered what Peter would do about it. She did wish he were there with them. He needed the rest and change. Perhaps if he saw her well if Avis did the persuading. He would be more likely to come, under the circumstances.

"Let's go! Terry to drive us in," Avis suggested, jumping up to put her plan in action and displaying the usual energy she had shown that day.

Mrs. Heyt was not too enthusiastic about the addition of Peter to the party, but it seemed to be Avis who wanted him, and she could not refuse to grant a guest's friend her hospitality.

(To Be Continued.)

Spain Will Patrol

Second Service One Of Most Efficient In Europe

Some Spaniard once remarked jokingly that every third man in Spain is a policeman. As a matter of fact, Spain has what is said to be the most efficient secret police force in Europe built up by Primo de Rivera, and maintained and strengthened by his successors.

All the criminals and most of the potential criminals in the country are spotted and are arrested when and if the occasion arises Foreign anarchists and criminals who slip down over the border to Barcelona are most of them well known to the Spanish police.

Perhaps the most interesting aspect of the secret police's work is the political. It is almost literally true that the Minister of the Interior every political remark of importance that is made in Spain. The government has agents in every city, town and village of the country. The Parliamentary and Republican disappear Yes but occasionally they do. Then they are found to have been on their own before to join Mr.

Little Before For The Week

"Are they not all ministering spirits? "—Hebrews 1:14.

May I reach
That purest heaven, be to other
souls
The cup of strength in some great
agony,
Enkindle generous ardor, feed pure
love,
Be the sweet presence of a good diffused,
And in diffusion ever more intense.
So shall I like the lights that burn
Whose name stands in the gladness of the
world.—George Eliot.

Certainly in our own little spheres it is not the most active people to whom we owe the most. Among the common people whom we know it is not the most active people to whom we look for help in time of need, but to those who are ever on the watch after some visible change and trust. It is the love like the stars which pour down on us the calm light of their bright and faithful being by whom we look up, and to whom we look for help and calm and courage. It seems to me there is there a reassurance for many of us who seem to have no power to do active mechanisms. We can do nothing for our father-land. But still it is good to be sure that we do something for them, to know (and this we may know surely) that no man or woman of the humblest sort can really be pure, strong, gentle and self-controlled the world being better for it, and without necessarily being helped and comforted by very conscious act of that goodness.—Phillips Brooks.

A Memorable Date.

Fred—"I've a date tonight with that peach you introduced me to. It's her birthday and I've got this necklace for her."

Jack—"She's doing well. Ask her to show you the bracelet I got her for her birthday last week."

THE RHYMING OPTIMIST

By Alice Mitchell

A NOTHING PEARS

God, I would keep my ear at rest,
Be deaf, so unblessed,
To the discussions upon his knee,
A sweet and joyous child!

But since I know that cannot be,
May he grow wise and strong,
Well-endowed in integrity,
Relentless foe of wrong.

May he with gladness play his part
In the harsh world of men
With courage ever in his heart
And faith to try again!

But, Father, in his breast I pray
Put one more unchanging plan,
Write still a little boy will stay
For mother-love's embrace!!

Change In Locomotives

Railroad President Predicts That Gas Will Replace Steam

The days of steam locomotive, with its huge boilers, pistons and blazing cylinders, are definitely numbered, by the opinion of Fred Sargent, president of the Chicago and Northwestern Railroad.

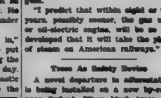
Single unit gas and electric locomotives of various designs will gradually supplant the iron horses of the industries and long haul service, Sargent believes. The single unit system is more practical, flexible and economical than either steam or a comprehensive centrifugal electrified system.

"Elaborate studies made by Westinghouse and General Electric show that it would cost at least $60,000,000 to electrify the three northwestern branches of the Northwestern with a fixed power plant system," said Sargent.

"I predict that within eight or ten years, possibly sooner, the gas unit or oil-electric engine, will be so far developed that it will take the place of steam on American railways."

Trees As Safety Device

A novel departure in afforestation is being installed on a new by-road into Oxford. Silver birch trees are being planted at the corners of every side turning so that at night the silvery white trunks may reflect the headlights of oncoming cars. Open spaces are being planted with shrubs trees for future plantations. The roadside hedges will hide the useful, but ugly, wooden fence.



DENICOTEA Cigarette Holder absorbs the nicotine, purifies smoke and removes all traces of odour. Sweet to tobacco smoke.

EXCESS FAT DUE TO RHEUMATISM

One Remedy for the Two Troubles

Having demonstrated so badly that she could sincerely walk, Miss Jones began to put on a little weight at first. In a letter just received, she writes:—

"I had a severe attack of rheumatism in both arms and legs and for three weeks I could not put my feet to the ground. I was very unfortunate in—through not getting the usual exercise I started to put on flesh, and persevered. The first thing I noticed was the tonic effect it had, and the next that my rheumatism went, and better than anything—I lost that awful fat. I am a woman of 55, and when I tell you I do exactly the same work as I formerly did my statement will be believed. I am sure you will understand why I never let Kruschen Salts be out of the house wherever I go."—M. K.

The six salts of Kruschen assist the internal organs to throw off every day the waste matter which is responsible for the system. Then, little by little, that ugly fat disappears, leaving you slender. The first spoonful and every subsequent one you take commences to do its work in a natural way. You will be surprised at the new health and energy you will enjoy. Kruschen Salts are obtainable from all chemists all over the world.

DIED

The funeral of Mary Sophia Watson, age 58, wife of Andrew Watson, who passed away in Grande Prairie on Tuesday, November 21, took place on Friday afternoon.

The funeral service was held in the Baptist Church, of which she was a member, Rev. S. J. Waterman officiating. Interment was in Grande Prairie cemetery.

The Watsons were oldtimers in the Chipman district, having moved to Grande Prairie in 1925, taking over a farm in the district, where they have since resided.

Beside the husband, the following are left to mourn their loss: Three sons and four daughters—James, Roy, and Ronald all living at home; Mrs. E. Paulson, Edmonton, Hazel and Vera at home; Mrs. W. VanCamp, Clover Bar, Alberta.

Four brothers and three sisters also survive: W. H. Buchanan, Regina, Sask.; Roland Fort Saskatchewan; Dave, Islay, Alberta; George Wahkatomus, Alberta; Mrs. E. Clark, Toronto; Mrs. S. S. Moore and Mrs. C. Shaw, Fort Saskatchewan.

Fort Saskatchewan Record

VOL. 12 NO. 8 — FORT SASKATCHEWAN, ALBERTA WEDNESDAY, DEC. 25th, 1929 — $1.50 PER YEAR IN ADVANCE

A Merry Christmas

Bank of Commerce Branch Here to Close

The Canadian Bank of Commerce has to insufficient volume of business transacted at its branch in Fort Saskatchewan to justify continuance business on December 30th, 1929.

Arrangements have been made with The Royal Bank in Fort Saskatchewan to transfer accounts to them and business will go on without interruption.

The plans of Mr. A. H. Rogers, who has been manager of this branch since its inception on March 1st, 1914 are uncertain. We hope Mr. Rogers will remain amongst us. He has at all times been interested in Church and social matters, and anything tending to the interests of the town and district, where he has made a large circle of friends.

The loss of Mr. Harold Ardley, also of The Bank of Commerce Staff will be felt, as he has made himself very popular in sports etc., and is at present the secretary of the curling club.

HONEY CROP

Alberta's honey crop for the past season is now estimated at about one million pounds, which is almost double that of last year. The large producers in Southern Alberta reported a very heavy output.

The average price for the product is placed at eight cents, which gives a total value to the product of $80,000, compared with $44,000 last year.

United Church Ladies Aid Hold Annual Meeting

The United Church Ladies Aid held their annual meeting at the home of Mrs. W. J. Foster on Thursday afternoon, December 7th. The following officers were elected:—

Hon. Presidents, Mrs. Ramsay and Mrs. McLean.
President, Mrs. Floyd Baker.
1st. Vice-Pres., Mrs. W. J. Foster.
2nd Vice-Pres., Mrs. Geo. Mohr.
3rd Vice-Pres., Mrs. C. H. Grunert.
Secretary, Mrs. Calhoun.
Treasurer, Mrs. F. Murray.

NEW DEAL IN ALBERTA BEEF CATTLE

The fine reputation established in Britain by Alberta Red Label Beef has had results recently in a new feature introduced into the marketing of our beef overseas. One of the leading importers in London has purchased and put on food lots in Central and Southern Alberta 1,000 head of choice feeder cattle, mostly calves and yearlings, bought direct from the ranchers. The farmers finishing these cattle on their feed lots are to be paid 7 cents a pound for gain made. The cattle will go overseas in the spring as soon as they are in prime condition.

The arrangement of this deal was made through the Southern Alberta Co-operative and if successful, the deal will probably be the forerunner of a fairly large enterprise along these lines.

This is the first occasion on which a British importer has purchased cattle outright on the Alberta range, and fixed a definite price to be paid for gain in weight on the feed lot.

An announcement has been made that after January 1st, bank interest on Current accounts will be cut by Canadian banks by half of one per cent.

Partridge Hill

The various denominations of the district held their annual meetings this month. Tuesday 12th, Mrs. C. H. Flintoft and Mrs. H. Rye were nominated at the home of the former, the U. F. A. and U. F. W. A.

Reports show the bonds in good standing with a membership increase in the U. F. A. over 100 per cent.

Mrs. R. Gordon was elected President of the U. F. W. A., Mrs. James Whitson, Vice-President, and Mrs. A. Krebs, Sec.-Treasurer.

Mrs. Robert Worring, Past President and Mrs. A. Krebs were the recipients of gifts in appreciation of their services.

Mrs. Warring's son was pre-served with a "Baby Record".

Mr Gillison in the role of Santa Claus dispersed treats from the Christmas tree to the members present.

Thursday 14th, Mrs. W. Attewell was hostess to the W.M.S. and L. A. Mrs. Wm. Hawes was relected President, Mrs. H. Rye, Vice-Pres., Mrs. F. Lawrence Sec.-Treas.

******

A number of well attended bridge parties have been held in the community to raise funds to send delegates to the U. F. A. convention.

******

A number of mighty hunters have ventured into the wilds west of Edmonton in search of game. Walter Houston, Raymond Wallis and Harvey Whitson each returned with a moose.

******

Partridge School Christmas tree will be held in the Church on Friday, 27th inst.

******

Mr. and Mrs. Bert Celebration of Vermilion were visitors at the parental roof last Sunday and Monday.

EXTEND PERIOD TAX PAYMENTS

Hon. R. G. Reid, Minister of Municipal Affairs has announced that due to the condition of the roads throughout the Province it has been found impossible in many cases to haul grain and livestock to the markets. As a consequence large numbers of taxpayers find themselves unable to meet the payments falling due on December 19th under the agreements made with the municipalities and the Government for the consolidation of arrears of taxes under the provisions of the Tax Consolidation Act.

The government feels in fairness to the taxing authorities and the public in general an extension of time should be granted, in which to make these payments, and legislation to towns, villages and municipal districts to accept payments under these agreements up to and including December 31st, 1930, have been issued.

Legislation will be introduced at the next session of the House to validate this extension.

Junior Hockey Team Holds Gay Dance

The Junior Hockey boys held a very successful dance last Friday evening in the Recreation Hall.

Although close to Christmas the boys realized $60 after paying all expenses.

The music by the Penny Pals Orchestra was enjoyed by the dancers.

At midnight refreshments were served after which dancing was resumed.

Advertise it, or you may have to sell it.

Women's Institute Elects Officers for 1930

The annual meeting of the Fort Saskatchewan Women's Institute was held on Thursday, December 12th with a good attendance.

The hall was gaily decorated with Christmas greens, holly wreaths and red candles, while a handsome tree, bright with tinsel held the Christmas gifts exchanged among the members at this annual Christmas party Five tables of bridge were played while other members visited or did fancy work. The bridge prize a dainty cup and saucer, which went to Mrs. P. S. Truby.

Mrs. W. A. Graham, Mrs. A. Carscadden, Mrs. C. H. Grunert and Mrs. J. P. Wiebe were hostesses at the tea hour, after which the business of the meeting took place, with the president in the chair.

The reports of the Secretary and Treasurer showed a very successful year educationally, socially and financially. The finances of the W. I. and of the Cemetery Fund had been well sustained.

The sum of $10 was given to the local Red Cross for Christmas cheer and $5 to each of the junior rooms of the school for the same purpose.

The following officers were elected for the ensuing year

Past President, Mrs. H. A. Ardley; Vice-President, Mrs. C. H. Grunert; Second Vice-President, Mrs. F. H. Walter; Treasurer, Mrs. J. Westover; Directors, Mrs. G. Neale; Mrs. C. H. Ashton; Mrs. Carscadden; Mrs. F. W. Smith, Auditors, Mrs. F. H. Walter, and Mrs. A. E. Rogers

The office of Secretary was left open till next month.

A cordial vote of thanks to the retiring officers was moved by Mrs. R. G. Fraser and carried with applause.

ALBERTA TURKEYS GO OVERSEAS

The marketing season for Alberta turkeys is now in full swing, and as is usual with every year, many a Christmas dinner table not only in Canada but across the seas, will be graced by a fine Alberta bird. The British market has turned a favourable eye upon the Canadian Turkey, and already four carloads, or about 50,000 lbs. have gone from the provinces to that market. In addition to this, the export of turkeys to other provinces will be larger than usual this year.

Good Hope

Miss Laura Johnston is home again for a couple of weeks after having been in Nosebook for the past five months.

******

The Senior U. F. A. meeting was held at Mr. C. Dietrich on December 18th. The next meeting will be held at Mr. Gordon Moyer's on Jan. 3rd.

******

Messrs Leonard and Walter Crosswell and Miss Lothia Crosswell are visitors in the district.

******

Mrs. D. S. Whitson and family were Edmonton visitors last Sunday.

******

Born to Mr. and Mrs. Lyle Sansom on December 12th, a son.

******

Don't forget the Good Hope Christmas concert on Thursday, Dec. 31st.

With the closing of The Bank of Commerce here, another building will be empty in town. We are sorry to see this happen as it always means that one or two will be out of work somewhere.

Greetings

The Undersigned extends to every Citizen of Fort Saskatchewan a sincere wish for a Happy Christmas and a Prosperous New Year.

G. T. Montgomery, Mayor.

We take this Opportunity of extending to the people of Fort Saskatchewan and District our heartiest wishes for a

Merry Christmas
and
A Prosperous New Year

Jones, Graham & O'Brien's

Britain Shows The Way

When one reads of the very little accomplished by the World Disarmament Conference, and of the retirement of the World Disarmament Conference without any results having been achieved, and coupled with the show of force to advance the cause of peace, official announcement of the needs of re-arming in Germany of the largest military and naval budgets yet known in Japan of a great programme of warplane construction by the United States, of hundreds of millions spent on fortifications by France, one is inclined to ask: Are the nations of the world determined on self-destruction, and is it their desire that civilization as we now know it shall be destroyed?

When we recall the efforts which the League of Nations put up and the League of Nations as a form of international machinery to maintain and promote the peace of the world, as we recall the fact that in the years since 1916 the League has, on more than one occasion, been instrumental in preventing another war, but that more recently it failed to check Japanese aggression in China and Manchuria, as we witness Japan's advance of the Lone-ue and withdrawal from it followed by the withdrawal of Germany and how Italy continued conquestion of Italy, we are further inclined to ask: Is there no nation that can and will give leadership to the world in the cause of peace?

Is physical disarmament the first and necessary step to an assurance of peace? If so, then Great Britain has provided leadership, but, alas the other nations have refused to follow

Speaking in the House of Lords recently, Lord Londonderry, Secretary for Air in the National Government, stated that Britain has only 850 first line airplanes compared with 1,650 in France, from 1,400 to 1,500 in Russia, 1,800 to 1,900 in the United States, and 1,500 to 1,700 in Italy Britain's first line aircraft have been reduced by more than 30 per cent. of her peace time strength with the result that Britain now stands in the number of her military and naval airplanes only fifth in the list of nations.

Sir John Simon, Foreign Secretary of Britain, in a recent review of Britain's efforts to set an example in disarmament, stated in emphatic terms that Britain has not an example, has led the way. "We reasonable or instructed persons can possibly suggest," said Sir John, "that we have not reduced our own armaments to the lowest point to which we could go by unilateral action. It will not be thought a waste of time if I gave the House three or four figures.

Of the British Navy, Sir John Simon then said:—

"Take the Navy—I am going to give comparisons not with the end of the war when we had piled up enormous forces; I am going to the year in which the war began.

"Since 1914 the capital ships of the British Commonwealth have been reduced from 69 to 15; its cruisers from 108 to 54; its destroyers from 716 to 180, and its submarines from 74 to 50. In 1914 we had a class of vessel called a torpedo boat, of which there were 106 in commission in 1914. They have disappeared entirely. At the same time there has been a reduction in personnel, as compared with 1914, from 133,000 to 90,000."

So much for leadership in naval disarmament given by Britain. Sir John Simon continued. "Take the Army—Since 1914, the regular Army has been reduced from 256 000 to 208,584. This has been effected by 6 cavalry regiments of cavalry, 61 battalions of infantry, 3 battalions of Guards, 21 companies of Royal Engineers, and 21 battalions of infantry and three batteries of Colonial troops. At the same time the Special Reserve has been reduced from 69 130 in 1914 to 24,000, and that has been replaced by the Territorial Army during this period of 141,782. In 1914 it was 312,000 to-day it is 170,000. In addition, during the same period, 18 regiments of cavalry, 21 battalions of infantry and seven battalions of Guards have been added to bound by the Indian Army. That has resulted in an approximate reduction of 17,000 men

Instead of following this wonderful leadership by Great Britain in disarmament, the other great nations of the world have actually increased their fighting forces and voted larger armament budgets than ever before in times of peace if disarmament fails the British Commonwealth cannot be held in any sense responsible or blameworthy. Britain has done its part; the world has refused to follow the British example.
